E.6.5 If the island is mentioned by name in the Directory, it may be assumed to meet this rule and no action is required. In all other cases the IOTA Committee will need to see evidence of compliance. Any national or international map – but not a local tourist or special interest map – may be used to confirm this requirement. If the island is shown and named, it will be necessary only to send a copy of the map (make sure you include the scale). If the island is shown but not named, please send the original, together with a second map of larger scale showing the island's name. Maps will be returned on request if postage is enclosed.

E.6.6 If no 1:1,000,000 scale map can be found, the island may still count if evidence is produced to show that:

- it consists of a single unbroken piece of land longer than 1 kilometre (0.62 statute miles) measured by straight line at high tide, or
- it is within an ‘officially recognised island group’, defined in paragraph E.5.2 above, or
- it is separated from the nearest part of the mainland by an island which qualifies, or

• it is closer to an island which qualifies than to the mainland.
In all cases the IOTA Committee will require to see a large-scale map (e.g. 1:50,000) as evidence. If you send a copy, make sure that the scale is visible. Maps will be returned on request if postage is enclosed.

E.6.7 SECOND RULE – The island must be separated from the mainland at all points by a minimum 200 meters (219 yards) of sea at low tide. This may consist of one stretch of 200 metres or of up to three smaller stretches added together. See Fig 1.

E.6.8 If the island is mentioned by name in the Directory, it may normally be assumed to meet this rule and no action is required. However, maps available to the IOTA Committee might have been wrong and, if the operator realizes this to have been the case, the onus is on him / her to report the true position to the Committee immediately on return. This could prevent disappointment for others visiting the island.

E.6.9 An island that lies more than 1 kilometre (0.62 statute miles) from the mainland but fails to meet the 200 meter requirement because it is linked or nearly linked to the mainland at low tide, but not at high tide, by a sand-bar, Fig 1.stretch of shingle, rocks or mud-flats, may still count. Intervening islands could adversely affect the decision.

E.6.10 An island that is separated from the mainland by a minimum 200 metres (219 yards) of sea at low tide except for an area lying more than 1 kilometre (0.62 statute miles) from the m

ANNEX K – GUIDE TO VALIDATING YOUR OPERATION

FREQUE NTLY AS KED QUESTIO NS AB OUT V ALID ATIO N (RULES SE CTIO N F)

DO I NEED TO VALIDATE MY OPERATION?

Yes, if the IOTA group from which your operation has or will take place is currently listed as provisionally numbered in the latest IOTA Directory, for example OC-288P, or is listed and marked with a #, signifying a rare group, in the listing of Most Wanted IOTA Groups.
Note: This applies even if there has, since publication of the Directory, been a valid operation that, in the case of a provisionally numbered group, has resulted in the number being confirmed.

Yes, if the island or the island group as a whole is known to have restrictions for whatever reason on landing or operating an amateur radio station, or is exceptionally difficult to reach, e.g. requiring an extended or costly or dangerous journey, or is known to present far greater than average political or licensing problems.
Note: You are required to take all reasonable steps to ascertain if any of these circumstances apply. If they do, you will need to show evidence as to how you have overcome the problems and, where permissions are necessary, that you have obtained them. If they do not apply, you may need to give account if the IOTA Committee receives contrary information.

Yes, if the IOTA Committee asks you to do so.
Note: Rule F.4.1 deals with the special case of operations by yachtsmen with access to on-board amateur radio stations.

No, in all other cases. However, even if your operation falls into a category that does not require validation, you are advised to collect and retain evidence of presence on the island and any local permission, for example from a landowner or a lighthouse management trust, to support your position in case of a challenge.

EVEN THOUGH I DO NOT NEED TO VALIDATE, CAN I?
Yes, if you think that there are special reasons to do so, for example where local permission has not always been easy to obtain in the past.

In all other cases we prefer you not to validate since it is unnecessary. Voluntary validation is particularly discouraged in the case of operations from islands in groups that are easily reached or regularly activated and / or have resident amateurs.

WHAT HAPPENS IF I FAIL TO VALIDATE WHEN ASKED?
Your operation will be recorded in the ‘long term pending’ category and Checkpoints will be instructed not to accept your cards for credit. You are free to choose whether or not you wish your cards to count for IOTA. We have that choice also.

WHAT DOES VALIDATION MEAN?
It means providing written evidence that you were o n the island on the dates claimed, that you had permission, if required, to be there and to operate an amateur radio station and that you were properly licensed. Note that having a licence to operate does not necessarily mean that you have permission to do so in a particular location. They are two different things.

WHAT DO MOST DXPEDITIONERS PROVIDE TO PROVE PHYSICAL PRESENCE?
It depends on a lot of factors. Let's take it in stages.

Transportation
Where people take public transport, e.g. a scheduled flight, ferry, train or bus, to reach an island, they normally provide a ticket, counterfoil or receipt for monies paid, suitably dated and showing the name of an island or a town on it. Ideally we would like to see the passenger's name also but with some forms of public transport this is not possible. Where they charter a boat or airplane for the final stage of the journey to the island, they normally provide a signed statement from the boat or airplane captain confirming transportation of the named passengers to and from the island on specified dates. Many DXpeditioners prepare a suitable statement in advance – this should always include space for the full name, address and telephone / fax / e-mail number of the signatory. A receipted invoice on headed paper confirming the booking is the next best thing.
Where they hire a fisherman to transport them in his boat,
they normally try to obtain a signed statement but experience shows that for various reasons this may not be possible. In such cases a photograph of the boat taken with the DXpeditioner will help but other evidence of presence will usually be expected (see below).
Where they use their own boat or car, or swim (!), they are expected also to provide some other form of evidence of presence.

Presence
Where the island is inhabited, most have no difficulty in providing a receipted invoice on headed paper from a hotel, village hut complex, campsite or other lodgings, issued in their name. Alternatively, a signed statement from someone in authority on the island, e.g. immigration officer, post office manager, lighthouse keeper or local headman will suffice. Where the island is uninhabited, increasingly people prove presence by taking a photograph of a GPS reading! Others provide a photograph of themselves against a well-known feature on the island, natural or man-made, or against a sign or plaque with the island name. If there is absolutely nothing to distinguish the island – it happens quite often, then photographs of the island taken from the sea, if possible including nearby islands or mainland, will help as will photographs of the operating site with antennas and the team. In such cases
the names and call-signs of all team members (include addresses where there are non-licensed members) should be provided.
We would like evidence under both these headings if possible and particularly if your operation was from an uninhabited island. With careful planning this should not be difficult, expensive or particularly time-consuming to arrange.

WHAT KIND OF PERMISSIONS ARE REQUIRED?
This depends on who has control of entry to the island. This is not always solely the owner. In many countries the final decision rests with a governmental or quasi-governmental organisation charged with responsibility for the preservation of the island's flora and fauna, historical sites and the general environment. Particular care needs to be taken where an island is under military control. Generally, where permission to land and / or

operate a radio station is required, you should obtain this in writing and include a copy when submitting your other validation material.

Do not try an ‘undercover’ operation! If you are not totally satisfied that you have permission to be there, don’t go. Not only could you be prejudicing permission being given for future operations but you could anyway find your operation rejected for IOTA on grounds of inadequate validation. Worse still, you could during the operation expose yourself to personal danger, not least in an emergency if no one in the locality knows that you are there.

DO I NEED TO SEND A COPY OF MY LICENCE?
No, if you use your standard call-sign with or without /P or a routine island prefix or suffix (and if, of course, it’s legal). If, however, you use a special call-sign issued for this operation and / or island operations generally, you should send a copy with your validation material. The Committee recognises that this might be felt to be intrusive but it considers that the effect of the validation exercise would be negated if it ignored the licence used.

THIS ALL SOUNDS VERY BURDENSOME?
Well, it really should not be. Validation is required of very few operations. Where it is necessary, we have found during the many years that we have been applying the procedure that there have been very few significant problems with compliance. DXpeditioners have been able to provide in many cases first- class validation at the cost of a few minutes of their time. The secret is to incorporate the requirements into the detailed planning of an operation from the outset. Nowadays, all material can be scanned and sent as an attachment to an e-mail, so costs are negligible.

The IOTA Committee operates on a basis of trust and will normally take at face value validation provided. If however it receives information that an operation did not take place from a claimed island, did not have the necessary permissions or was unlicensed, it is bound to treat such allegations seriously, investigate them and, if it finds them proven, take whatever action is required to safeguard the integrity of the Programme. Luckily cases of this sort occur very infrequently.

ANNEX L – SOME FINAL DOS AND DON'TS

DXPEDITIONERS

Make your cards clear and unambiguous – and print both the call-sign and the island name. The call-sign should be the one used during the operation –the time for deciding whether to use /P, /number, prefix/ or /suffix is before the operation takes place, not after the operation and before QSLing!
If you need to print further batches of cards, don't change the call-sign to fit card design. And, remember, always print the island name.
If you include the IOTA reference number (please do), make sure that it is correct!
If your licensing authorities allow you a choice, avoid using a call-sign that is more usually associated with a different DXCC entity or IOTA group within your country.
In the case of island names, use the one that is commonly shown on maps – don't translate it from the local language into English, without also highlighting the original name. Don't include anything on the card that could raise doubts that the operation might not have been land-based.
Don't assume that everyone knows the exact location of
your island – if it is really small, add the geographical co-ordinates and / or additional information pinpointing it in relation to a larger island in its group or to an identifiable landmark on the coast.
If you include the island name on the computer label, it is best to validate it with a rubber-stamped verification mark and your initials across the corner.
Don't handwrite the island name on a card. With our system of decentralised checking we have no easy means of ensuring uniform treatment of cards if individual Checkpoints are required to take a view on the authenticity of every handwritten endorsement, those genuine, suspicious and in between. Sorry, we have to reject them all, no exceptions.
If you use a multi-box card with island names (and IOTA numbers) printed alongside, use a method of marking the relevant island that does not allow card-tampering.

Try to send your cards as soon as possible after the QSO. The IOTA Committee receives a lot of complaints about poor QSLing performance. These often include requests that we remove all credit for a particular operation – yes, the rules allow us to do this in exceptional circumstances. We encourage slow or erratic QSLers to pay particular attention to this important aspect of IOTA. This said, there are many DXpeditions which perform well on QSLing and we know that the IOTA community appreciates their efforts.

IOTA APPLICANTS
Take special care, when entering your claimed credits on the on-line system, to record all the QSO details requested accurately. It is not fair on Checkpoints to expect them to spend their time correcting avoidable errors.
Submit cards that are clear and unambiguous – this means selecting ones that have a printed call-sign and island name.
If you have a choice, submit QSL cards from more recent operations rather than old ones.

Expect that some ‘unique’ cards could cause problems over acceptance.
Don’t expect your Checkpoint to advise on ‘doubtful’ cards on the off-chance that they may be valid for an IOTA. Check the cards carefully against the islands listing in the Directory and, if necessary, the co-ordinates box given for the group.
Don’t ask your Checkpoint to break IOTA rules clearly stated in the Directory. If there is a problem with the card, sort it out with the operator or QSL manager. Normally they will want their cards to count for IOTA but it is their choice if they don’t.
And, importantly, do not bypass your Checkpoint by sending your query direct to the IOTA Manager or IOTA Centre.

IOTA CONTEST: ISLAND ENTRANTS
Check before entering the contest that the island from which you plan to operate qualifies for IOTA and make sure that the island name (not the group name if different) is entered in your log entry.
Remember, QSL cards need to have the island name printed on them. Handwritten endorsements are not sufficient.
Please reply to QSL requests. A lot of your contacts will be island-chasers wishing to increase their IOTA scores and your QSL could be the one they particularly need.

NOTE ON DATA-CLEANSING
A few words to explain our approach to ‘data-cleansing’ – removing the very small proportion of incorrect credits that inevitably accumulate in the database. IOTA Centre enters on this central database the call-sign of each credit given to a partic- ipant. In this way we have not only a permanent historical record of past activity but also, equally importantly, information on the scale of the operation, demonstrated by the volume and geo-graphical spread of participants’ credits, and often a means of identifying the operators involved.

What should we do when we hear or strongly suspect, on balance of credible evidence, that an earlier operation did not take place from a qualifying island, or took place from a different IOTA group than the one given on the card? We are sometimes in a difficult position that we cannot put into the public domain the full extent of our knowledge or doubts on the basis of available information. In such cases we feel under no obligation to give credit just because a card has been submitted. Furthermore, we cannot accept the viewpoint that IOTA should be run on the basis that a credit once given cannot be withdrawn. This would make a nonsense of programme integrity and place too heavy a burden of responsibility on Checkpoints. Worse still, it would make for inconsistency of treatment leading to valid complaints of unfairness.

Decentralised checking offers great benefits. But it does require the establishment of procedures for monitoring data-input centrally.

First introduced a few years ago, data-cleansing is now an established feature of management control. The procedure adopted is to delete credits that are definitely wrong but also ones that are strongly suspected of being incorrect. Many of these relate to unique credits, i.e. a credit which only one participant has on his / her record from an operation which IOTA Centre knows nothing about. Experience has shown that these are usually errors of some sort. Faced with the deletion of a credit, the participant should recheck his card and resubmit or replace it as appropriate. A card from a different, possibly more significant, operation may provide a solution. If we have made a mistake, we will be happy to correct it. However, please do not assume that such cases are always or mainly the Checkpoint’s fault. Data-cleansing is an IOTA Centre function, its

purpose being to keep the database as free as possible of errors. If we are doing our job properly, errors will be identified on a regular basis and participants must accept this as a consequence of effective programme management.

In the past it has not always been possible to keep participants informed, but we will try to do so. Participants should understand the scale of the exercise facing the Committee and keep in perspective the likely small effect of this action on their scores. If participants ensure their database record includes a current e- mail address, the process will be simpler for everyone.

IOTA Centre’s maintenance of an effective procedure for check- ing data is one of the most important tasks now facing the Committee. Your cooperation and understanding of our reasons and method of doing this are appreciated.

Goodbye Post-Contest Log Massage; CQ Announces Five Day Log Submission DeadlineBy Jamie Dupree NS3T radio-sport.net
Posted July 21, 2012
In a major change, CQ Magazine has announced that effective with the CQ WW SSB Contest at the end of October, all logs must be submitted within five days after the end of the contest, drastically shortening the time that contesters will have to electronically submit their contest entries.
The announcement came on the CQ-Contest reflector from CQ WW Contest Chair Bob Cox K3EST. "With the technology available today and the presence of the internet practically everywhere, it has been decided to reduce the log submission time for all CQ contests to five (5) days," Cox wrote.
"Reviewing the submissions from last year's CQ WW DX contests, ~ 70% of all electronic logs were received within 7 days after the contest," Cox said, acknowledging that the five day limit might cause some heartburn for certain contesters.
"We realize that in some cases circumstances may not allow a timely submission. Requests for an extension must be received before the log submission deadline by sending an e-mail to questions at cqww.com."
[Cox initially said the first contest impacted by this new change would be CQ WW RTTY in September, but CQ Magazine Editor Rich Moseson W2VU made clear on Monday that the change would not go into effect until the 2012 CQ WW SSB Contest in October.)
The decision accelerates what had been a general move to shorten the time for log submission by major contests; in 2010, CQ WW shortened the log submission deadline to basically three weeks, while the ARRL moved its submissions in major contests to 15 days.
The Fight Against "Log Massage"
It was less than a year ago that Cox led a public call by the CQ WW DX Contest against "log massage," which is basically defined as using outside aid *after* a contest has ended to alter your log and improve your score.
"CQ WW CC considers the use of post contest data sources as unsportsmanlike," was the message from the CQ WW Contest Committee in 2011.
It wasn't immediately clear if that appeal for "fair play" had been judged to be effective or not, but the move to institute a five day log submission deadline would certainly

restrict efforts by contesters to make changes in their logs after a contest has ended.
Your contest result is a measure of your contesting skill," argued CQ WW Contest Committee member Doug Zwiebel KR2Q in a 2011 webinar on contest ethics.
Some have argued for immediate submission of logs as a way to avoid any post-contest log change issues - the 2010 WRTC used that in Russia, for example - but some opponents argue getting internet access for some isn't always easy.
Still, with this decision, the largest contests of the year are now edging towards more immediate log submission, which raises an obvious question.
"Does this also mean that the results will be available and published much quicker?" asked Rich N2WQ.
That has happened with the ARRL DX Contests; it wasn't immediately clear if CQ Magazine was heading that was as well.

SB PROP @ ARL $ARLP030
ARLP030 Propagation de K7RA

ZCZC AP31
QST de W1AW
Propagation Forecast Bulletin 30 ARLP030
From Tad Cook, K7RA
Seattle, WA July 27, 2012
To all radio amateurs

SB PROP ARL ARLP030
ARLP030 Propagation de K7RA

The bulletin this week comes from Chicago, Illinois, where K7RA is on the road.

We currently see new sunspot groups coming over our Sun's eastern horizon, but this week has been a quiet one, both in terms of sunspot and geomagnetic activity. Average daily sunspot numbers declined by fifty-percent, from 104.7 to 52.1, and average daily solar flux was down nearly 45 points to 97.2. This is comparing two reporting periods, July 19-25 against July 12-18.

The latest solar flux forecast from NOAA/USAF has flux values at 115 for July 27-28, then 120, 125 and 130 on July 29-31, 135 on August 1-3, 130 on August 4-6, 125 on August 7-8, and 115 on August 9-11, then bottoming out around 90 on August 17.

Predicted planetary A index is 5, 15, 18, 12 and 10 on July 27-31, 5 on August 1-3, 10 on August 4, and 5 on August 5-18. There is possible geomagnetic activity raising A index values to 15 and 12 on August 19-20, then 18 on August 24-25.

F.K. Janda, OK1HH sends us his own geomagnetic forecast, and this week he predicts active to disturbed conditions July 27-29, mostly quiet on July 30, quiet on July 31, active to disturbed again on August 1-2, mostly quiet August 3-4, active to disturbed August 5, quiet to unsettled August 6-7, mostly quiet August 8, quiet August 9, active to disturbed August 10-11, quiet to active August 12-13, mostly quiet August 14-15, and quiet to active August 16-17.

Astronomy Magazine has an article about a July 11 experiment in which a telescope was lifted by a sounding rocket to take high definition photos of the Sun's corona at extreme ultra-violet wavelengths. Read about it at http://www.astronomy.com/~/link.aspx?_id=fd4b216b-fb6f-4a5e-9a60-f593af862f38. David Moore sent a link to a similar article

from the Astronomy Now web site,
http://www.astronomynow.com/news/n1207/24hic/.

Rob Steenburgh, KA8JBY, sent some interesting statistics regarding the NOAA 45 day outlook/prediction for solar flux that is updated daily at http://www.swpc.noaa.gov/ftpmenu/forecasts/45DF.html. You can see the data collection here:
http://www.swpc.noaa.gov/forecast_verification/F10.html.

Note the link at the bottom of the page for "Forecast Skill vs. Lead Time". As I understand it, "Persistence" refers to the chance that the solar flux will be the same tomorrow (or up to 7 days in the future) as it is today. "Climatology" refers to some value representing a recent average, and "Recurrence" is the chance that the solar flux will be the same 27-28 days from now as it is today. This represents one rotation of the Sun relative to Earth.

So to make this forecast, they look at a combination of these factors, and also whether the activity from four weeks before is increasing or decreasing. What might be interesting is to find out what effect the STEREO mission has on forecast accuracy, because STEREO brought to us the ability to see what is happening everywhere on the Sun. See the continuously updated STEREO image at http://stereo.gsfc.nasa.gov/.

As Rob put it in a recent email, "You are right about the 45 day forecast - a bit of persistence at the beginning, then more and more recurrence and climatology later in the forecast. Stereo has helped - we can watch regions coming around on STEREO-B, and in a qualitative sense, tell if they're larger or smaller. It would be interesting to take a look at the F10.7 stats and see if there's a statistically significant difference in our forecasts since STEREO went up."

Rich Zwirko, K1HTV of Amissville, Virginia wrote: "The 6M band opened on Tuesday, July 24 at around 1200Z to Puerto Rico, CT (that's Portugal, not Connecticut), F and G. Two FP stations also showed up to liven up the Magic Band. Then around 1515Z, 144 MHz came alive with E skip.

The first round started around 1525Z when he worked Florida stations, W4AS, EL95TO, N2OTO, EL96WI (worked on 2M SSB than again later on 146.52 FM), N3LL, EL86TX."

"The last station heard was W4AS at 1610Z, then 2M quieted down. I didn't get back on the air until 2110Z and found 6 Meters hot as a pistol. I worked 66 stations in the next 50 minutes. At 2200Z, I noticed on thewww.vhfdx.info MUF map page that the MUF had climbed to over 145 MHz to the west of here. I quickly changed frequency on the IC706 to 144.200MHz and started to hear and work E skip stations to the west and eventually southwest."

The 66 stations he worked were in Arkansas, Iowa, Illinois, Kansas, Minnesota, Missouri, Oklahoma, Texas, Wisconsin, and West Virginia.

Rich wrote, "In this opening, the ionized E clouds favored OK(11), MO(7), KS(4), IL(3), FL(3), WI(2), and one station each from TX, AR, MN, and IA. It was a fun day. Too bad it didn't occur over the weekend during the CQWW VHF contest.

My son Andy, K1RA, while driving home from work and operating 2M mobile, also got into the fun. He worked N0ICZ, K0NYW, W0BLD and K5SW with 50 Watts and a mobile whip."

Reynolds Davis, K0GND of Lincoln, Nebraska forwarded a July 24 note from Dave Theophlius, W0NRW of Fremont, Nebraska:

"Just like in 2009 and 2010, there was a major Sporadic E opening on 2 meters late this afternoon. I had been keeping an eye on the DX Sherlock site all day because the MUF kept popping above 100 MHz in the southeast U.S.

Finally, at 2340Z it opened for me. The cloud appeared to be over the Ohio River Valley and I appeared to be on the west edge of people able to make contacts. I did hear W0KT in Omaha also making contacts. CT1HZE, who asked that logs be emailed to him, estimated that the MUF rose to 274 MHZ as contacts were also being made on 220.

The VHF propagation map based on APRS stations was just a big blob of red.

The opening only lasted about 10 minutes for me where signals were strong enough to work anybody. At 2340Z I worked NT4RT in EM94 in South Carolina, and at 2346 I worked W4TMW in EM84 in Georgia.

And just as fast as it opened it was over for me, although stations farther east continued to make contacts.

CT1HZE added a comment on the ON4KST chatroom that in Europe a major opening like today is often followed by another one the following day. So, it might pay to keep an eye open on Wednesday if you are into VHF DX.

And my antenna? A 2 meter FM vertical polarized groundplane at 54 feet on my new tower. Yes, Lance and Larry, the rotatable groundplane. The VHF/UHF beams are not up yet.

So, it appears that although VHF SSB/CW operators use horizontal polarization, the polarization during Es openings may not be all that important. I think Lance, WN0L had the same experience during one of the earlier openings. But when Plan A is not operational, it is time to go to Plan B, which is use anything that is available."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for July 19 through 25 were 39, 55, 50, 29, 60, 66, and 66, with a mean of 52.1. 10.7 cm flux was 100, 92.3, 89.9, 93.7, 96.7, 102.4, and 105.4, with a mean of 97.2. Estimated planetary A indices were 6, 11, 11, 8, 9, 10, and 6, with a mean of 8.7. Estimated mid-latitude A indices were 6, 10, 8, 9, 8, 10, and 6, with a mean of 8.1.

Islands on the Air (IOTA) Contest
Help for newcomers

Getting started with the RSGB IOTA Contest

Here's a summary of how inexperienced contesters can enter the IOTA contest. Welcome!

Basics

First of all – be reassured. Contesting is meant to be fun, and you can enter without any previous experience. If you have tried one of the shorter RSGB contests, such as the 80m club contests or the VHF/UHF UKAC contests, you have a head start. The main difference you will notice is that the RSGB IOTA Contest is likely to be faster and more international. It should also be more exciting – isn’t that what you're here for?

This web page will tell you more about the contest, how to get on the air, what to expect, and how to send in your entry. You may already know most of what you read here, but you might also pick up a hint or two along the way. The emphasis is on entrants using SSB, although CW methodology is not very different. Listen to good contesters, on any mode, to learn the best techniques. The advice here is aimed mainly at first-time UK entrants, but of course, the principles are the same wherever you operate from.

You need a rig that covers the HF bands, and at least one suitable antenna. The contest takes place on five bands – 3.5MHz, 7MHz, 14MHz, 21MHz and 28MHz. Both SSB and CW can be used – you can work stations on both modes (which count separately), so there are ten possibilities for contacting each station. You need to decide which bands to operate on, which may be determined by the antennas you already have or want to put up.

The rules are on http://www.rsgbcc.org/hf/rules/2012/riota.shtml . If you have limited contest experience, you just need to know enough to get started. The date is always the last full weekend in July (in 2012, 28-29 July), from 1200–1200 UTC, that's 1 p.m. Saturday to 1 p.m. Sunday UK time. Everyone sends a signal report, but don't be surprised if you virtually always receive 59 or 599. To save time, HF contesters are in the habit of doing this regardless of the actual signal strength! You also send a serial number, starting at 001, and continuing on regardless of band changes. So, for example, if you change band when you have reached serial number 123, you continue on the next band with 124, and so on.

As you look at the rules, you will see that there are a number of options as far as your entry is concerned. The contest allows both CW and SSB contacts, and entrants can choose whether to use one or the other, or both. There is a category for those who want to operate for 12 hours or for 24 hours – as a newcomer you will probably want to maximise your effort by using the full 24 hours. And you can choose whether to enter with QRP (5 watts), low power (100 watts), or high power (over 100w). This choice will may well be determined by your class of licence, but good advice for those starting on the IOTA contest is to use the highest power that you are permitted, so as to increase your chances of making the QSOs and multipliers needed. When you submit your entry, the "robot" will confirm these choices with you.

The essence of the contest is to work as many island stations as possible. Although you can work any station, island or non-island, contacts with islands score more points, and only new islands count as multipliers. How do you know if a station is on an island? Because after sending the serial number, island stations also send an island reference, but non-island stations don't send any reference. The reference consists of a continent abbreviation, for example EU for Europe, and a number, allocated by the RSGB IOTA Committee. Stations on the UK mainland are in IOTA reference EU005. Other references can be found on:
http://www.rsgbiota.org/info/search.php . So, for example, search for "Wight" and you will see that the IOTA reference for the Isle of Wight is EU120.

By the way, you may be asking "What is a multiplier?" When you (or your computer) have added up the score from QSO points, you multiply that by the number of multipliers you have contacted. The IOTA contest rules will give you more details of how this is done. But it's easy to see that it is very important to find and work as many island station multipliers as possible, because your score will receive a big boost. Have a look at the results from previous IOTA contests to see the difference between just making QSOs, and making QSOs which are also multipliers.

On the air

If you are new to international contests, the easiest way to start is with “Search and Pounce”, or S&P. Tune the band in a systematic way, looking for stations you haven’t worked – if you are using logging software, this will tell you immediately if a station is a "dupe". You will not be popular if you often call stations when they know from their log that you have already worked on this band and mode! You will be looking particularly for island stations -- some will be in great demand: if so, note the frequency and move on, coming back later when things are quieter. Otherwise, when they ask for new callers, call just once, using the phonetic alphabet. Be ready to copy down the information sent, and be ready to send you own.

If you miss anything, ask for a repeat before you send any of your own information. When you have everything copied, send your own report and island reference, without unnecessary verbiage. People usually don't have time for chatting, although you might add a “Good luck Bob”, or other sociable greetings if you know who is operating. But your friend won’t be pleased if you spend so much time on pleasantries that your contest information is lost in QRM! After a dozen or so QSOs, you will get the idea of S&P.

Here's an example. You are G9XYZ.

CR3T: CQ contest, Charlie Romeo three Tango, contest
YOU: Golf nine X-ray Yankee Zulu
CR3T: G9XYZ, 59, 327, Alpha Foxtrot one four
[he sends you serial number 327, and his IOTA reference is Africa 014. Note or remember this information, and transmit as soon as he finishes]
YOU: Roger, 59, zero nine seven, Echo Uniform five
[you send serial number 097, and IOTA reference EU005]
CR3T: Thank you, Charlie Romeo three Tango, contest

So far, so good. Now conditions are poor, and there are requests for repeated information.

K1TTT: .... Kilo one Tango Tango Tango contest
YOU: Golf nine X-ray Yankee Zulu

K1TTT: The golf nine station, again
YOU: G9XYZ, Golf nine X-ray Yankee Zulu, over
K1TTT: G9XYZ, thanks, 59, 1x22
[he sends his serial number, but you miss the second digit. Ask for a repeat before sending your information. He's not on an island, so sends no island reference]
YOU: Number again, please
K1TTT: 1322, 1322, over
[got it this time]
YOU: Roger, 59, two four one, Echo Uniform five
K1TTT: Is that two four one? Over
[if he's got it right, just agree]
YOU: Roger, roger, roger
K1TTT: Good luck, K1TTT, contest

When it is harder to copy information, you might be more repetitious. Follow the example of the station you are working, who may be more experienced.

You might decide you want to call CQ Contest yourself. You can get an idea of how good operators do this by listening to them making these sorts of QSO for a few minutes. Before starting, as at any other time, always check that the frequency isn’t already in use. The rules specify some more limited segments than the whole band, for instance, on 20m -- check first. Callers will expect you to reply instantly to their calls, and to copy the information without asking for excessive repeats. Don't be frightened to call CQ, but be aware that even a lowly "G" station can generate a pile-up, with five or six calling people at once – this is mainly because island stations such as those in the British Isles score higher than non-island. Work out in advance how you will deal with this, and listen to what other good operators do.

But also remember that it's often normal to make up to ten CQ calls before getting a reply, sometimes more, even for the best-equipped stations. On a quiet band, you could wait for minutes at a time before getting any callers, although you would also ask yourself if you are really on the right band at all in this case! Many operators now get their computers to perform the job of calling CQ, using MP3 voice files or similar, and CW operators almost always use the computer to send CQs, as well as other contest information.

There is a good general description of HF contesting by G4BUO:
http://www.rsgbcc.org/hf/information/guide.shtml
This will give you ideas about the RSGB IOTA and other contests.

Which Band?

If you are equipped for several bands, you will need to choose the band to operate on. As a rule, you would use the highest frequency that is open at the time, although this is a very general statement. If you can hear signals on 10m, that is a good place to start, and then look on 15m. However, unless sunspot activity has recently been high, 20m is likely to be the mainstay of contest operation, with 15m also good if conditions are reasonable.

From the UK at present, 20m is likely to be open to Eastern Europe (and further afield) in the mornings. Propagation gradually opens up to the North America from around midday, and tends to die down in the evening. You will probably find Western Europe available most of the day and evening. If you can only equip yourself for one band, 20m should probably be it.

As far as the IOTA Contest is concerned, you might therefore find a mixture of European and US stations on 20m soon after the contest begins. If you stay on the band, you could expect North America to predominate into the evening, always mixed with Europeans. Later on, many stations will move lower in frequency, but it is always worth checking the band just in case. The next morning on 20m will see stations from the East predominating, but you are likely to find Western Europeans on at any time.

If you have an antenna for 40m, you should have no trouble working European stations, including plenty of multipliers, throughout the evening and overnight. If you have 80m, you will find it is also most used once it gets dark, although some stations will frequently be found as early as 1600 or 1700 UTC. There can be high levels of static on 80m, which makes it a harder band to use during the summer.

Your Dipole Antenna

We've already noted that 20m is the band to go for if you can only choose one band. This is where you would be able to make several hundred QSOs and perhaps 30-40 multipliers without using any other band. If you already have an HF antenna available (for 80m, perhaps, or a G5RV), you can try it on 20m, and see if it works. Most radios have an automatic ATU, which may well be able to tune up your existing antenna. But as a test, be certain that you can readily make international contacts with reasonable reports before considering that you have an effective antenna.

Even if this works, it is far better to put up a 20m antenna -- specifically for the contest if you cannot make it permanent. The easiest antenna is a dipole, fed with 50 ohm coaxial cable, supported at the ends (and in the middle if possible, although this is not often feasible).

Perhaps your aerial will look like this. The length L in the diagram will be around 16.5 feet for a 20m dipole. So the total length would be 33 feet, plus a little extra for the rope attaching to the end supports. There's a good reason why the half-wave dipole such as this is so widely used -- it’s the single most useful antenna in a radio amateur’s repertoire. It’s simple, effective, and flexible. A half-wave dipole can be put up in minutes, and is likely to work first time with minimal adjustment. You can calculate the total length from the formula, in traditional units, 467/f, where f is the frequency in Megahertz, and the result is in feet.

Any reasonable supports can be used for the aerial – the end of your house and a tree, for example. For a 20m dipole you will get best results if all of your antenna is over 20 feet high, and 30 feet is even better. If the supports are of different heights, it’s not too important. Where the space available is not quite long enough, then stretch out the dipole symmetrically, and bend the ends down towards the ground.

The two halves are connected to the centre and braid of the coaxial feeder, and an indefinite length of coax can be used to connect to the transceiver. You may find that a balun is not essential – if you buy one, you need a 1:1 ratio. The off-the-shelf types of balun will probably also have connectors which will give you a place to tie off the wires and make them easier to connect.

Another type of balun can be made by forming about half a dozen turns of the coaxial cable into a coil, at the point where the cable joins the aerial itself, around 8-10 inches in diameter. Tape up this coil, and leave it in place, dangling beneath the dipole. Of course, if your antenna is not supported in the centre, the weight of this coil may reduce the

overall height, which is less desirable.

Normally you would make the dipole slightly longer than the formula, and then cut sections off (the same amount each side) until the correct length is achieved. How do you know the correct length? You measure the Standing Wave Ratio (SWR), either from the rig itself, or from a separate meter. An SWR of 1:1 means the impedance is 50 ohms. Transceivers can usually tolerate an SWR of up to 2:1, so as soon as you get between 1.5:1 and 2:1 you would be satisfied.

You may say that you can get on the band well enough by tuning up a piece of wire from your shack window. One of the main advantages of the dipole over such a random piece of wire is that it separates the antenna itself from the feed line. The coax should not be involved in radiating a signal; on the contrary, radiation takes place only from the antenna itself. As long as the dipole is as high as possible, you have maximised the effective overall height, and reduced the possibility of causing and receiving local interference.

The Inverted Vee variation

Where there is only one convenient support, the “Inverted Vee” is a good antenna. It is simply a dipole with the centre attached to a support (tree, building, pole, etc.) The ends can be attached by ropes to a fence or temporary pole. Best performance is achieved with the antenna as symmetrical as possible, although there’s plenty of leeway. The Inverted Vee is less directional than a dipole, but you’re only likely to notice this at the higher frequencies.

The angle between the two halves is not critical, but 90° is the lowest reasonable limit. A simple calculation will show that an inverted-vee can take up about 75% of the garden space of a straight dipole, so a 33-foot antenna can be fitted into around 25 feet. But make sure that the ends are well clear of the ground, so that they cannot be touched by humans or animals. RF voltages at the end of a dipole can be high, even when using low power.

The Contest and your log

You should now be equipped to enter the RSGB IOTA Contest. Remember that the main objective is to enjoy yourself, and when you have had more experience, even get a certificate to hang on the wall. But you must submit your log first, within three weeks of the end of the Contest.

You will find that logging direct on to computer is preferable to logging on paper, particularly when it comes to checking "dupes". A straightforward program for carrying out this task is provided by EI5DI, and it will enable you to log as you go along in a very simple way. If you decide to log by hand, that is, on paper, you can use the same software to create your log afterwards, for submission and adjudication.
See: www.rsgbcc.org/sd.shtml .

73, and good luck in the contest!

3109. Dear Entrant in the 2011 Oceania DX Contest

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-07-29 07:27:19 UTC
From: Yb land Dx club
Topic: 3109 Message: 3109
Attachments: 4 described; binary payloads are missing from this source WARC

Dear Entrant in the 2011 Oceania DX Contest

The Oceania DX (OCDX) contest committee is pleased to advise that the results of the 2011 contest are now available athttp://www.oceaniadxcontest.com/2011_Results.htm ..

Congratulations to all the winners and thank you to everyone who participated in the 2011 OCDX contest, even if it was only to make one or two QSOs.

What a difference one year can make! After many years of hibernation the 10M band finally exploded back to life with more than 20% of the action in the 2011 contest occurring on this band. The low bands were in poor shape but this was more than offset by the excellent conditions on the higher bands. The 2011 OCDX contest was the biggest so far with a total of 1259 logs being submitted. This represents a 15% increase over the previous record of 1092 logs in the 2010 contest. In particular it was pleasing to see an 81% increase in the number of logs submitted from North American stations. The increased activity can be attributed to excellent conditions on the HF bands, the efforts of the T32C and YJ0VK DX expeditions, and a growing awareness of the contest and the unique opportunity that it provides to work DX from the Oceania area.

2011 CERTIFICATES

Certificates have been awarded to the top scoring station in each category for each continent and country. Additionally, a participation certificate identifying the number of successful QSOs has been awarded to each station that participated in the contest. The certificates are available online for downloading and printing by individual entrants at their convenience. The web link to the certificates can be found athttp://www.oceaniadxcontest.com/2011_Results.htm ..

Note: Printed certificates are no longer being delivered via the postal service except in response in response to written requests from entrants who won a category in their country and made more than 10 QSOs in that category. Requests for the delivery of printed certificates must be received by the contest committee before 31 August 2012 and should be addressed to info@... ..

2011 PLAQUES AND TROPHIES

Here are the winners of the 2011 OCDX contest trophies and plaques:

OCEANIA Ron Wills ZL2TT Memorial Trophy - VK4QH
OCEANIA Single-Op ALL Band CW Plaque - VK2IM
OCEANIA Single-Op ALL Band LOW Power CW Plaque - ZL1TM
AUSTRALIA Single-Op ALL Band PHONE Plaque - VK4QH
AUSTRALIA Frank Hine VK2QL Memorial Trophy - VK2IM
AUSTRALIA Club Plaque - Eastern & Mountain District Radio Club
ASIA Single-Op ALL Band PHONE Plaque - JA7NVF
ASIA Single-Op ALL Band CW Plaque - UA0CA

NORTH AMERICA Single-Op ALL Band PHONE Plaque - K8IA/7
NORTH AMERICA Single-Op ALL Band CW Plaque -N6RO
EUROPE Single-Op ALL Band PHONE Plaque - RS3A
EUROPE Frank Vander Drift VK3COF Memorial Plaque - YL3FT

These plaques and trophies will be issued shortly, along with outstanding plaques from the 2010 contest.

LOG CHECKING REPORTS

Entrants in the 2011 contest can submit a request to the Contest Committee info@... for a copy of the log checking report that has been created for their entry. This report provides detailed information about any QSOs that have been removed from the score calculation, including the reasons for their removal.

2012 OCEANIA DX CONTEST

The next OCDX contest will be held on the first two full weekends of October 2012 as follows:

PHONE: 08:00 UTC Saturday 6 October to 08:00 UTC Sunday 7 October
CW: 08:00 UTC Saturday 13 October to 08:00 UTC Sunday 14 October

The full set of rules for the 2012 contest is available from our web site at http://www.oceaniadxcontest.com/rules.pdf ..

We look forward to seeing you all again, along with new entrants, in the 2012 event. Hopefully there will be even better HF conditions and more participants to make it the biggest and best Oceania DX contest party yet!

73 from

Oceania DX Contest committee
VK3MI/ZL1AZE, VK3TZ, ZL3GA, VK7GN, VK2HN, VK4TS, VK6DXI

28 July 2012 A.R.I. DX Bulletin

No 1108

==========

*** 4 2 5 D X N E W S ***

**** DX INFORMATION ****

==========

Edited by I1JQJ & IK1ADH

Direttore Responsabile I2VGW

9A - HA9MDN will be active as 9A/HA9MDN from Vir Island (EU-170) from 28 July to 4 August. He will operate SSB, RTTY and SSTV, and will take part in the IOTA Contest. QSL via home call, bureau preferred.

9M2 - Look for 9M2CQC/p to be active from Langkawi Island (AS-058), West Malaysia on 28-30 July. The main goal is participation in the IOTA Contest (40, 20, 15 and 10 metres SSB), with some casual operating outside the IOTA event "if time permits". QSL via home call, direct or bureau. [TNX 9M2CQC]

F - The Council of Europe Radio Amateur Club (www.tp2ce.eu) will be active as TP8CE on 27-29 July. QSL via F5LGF, direct or bureau. [TNX F6FQK]

FK - JJ2NYT will be active as FK/JJ2NYT from New Caledonia (OC-032) from 29 July to 2 August. He will operate CW, SSB and RTTY on 40-10 metres. QSL via JJ2NYT. [TNX The Daily DX]

I - Top Radio Team members Giovanni, IK8MRA and Maria Rosaria, IZ8XOU will be active from Mount Etna, an active volcano and a natural park (Sicily, EU-025) on 27-29 July. TRT sponsors the Archeological Italian Award (www.topradioteam.com/Dia/dia.asp). [TNX IK8MRA]

J6 - Once again Bill, K9HZ will be active as J68HZ from St. Lucia (NA-108) on between 1 and 18 August. He will be QRV on 40-6 metres CW, SSB and RTTY. QSL via K9HZ. [TNX DX World]

JA - Take, JI3DST is active on 40-10 metres as JI3DST/JI1 from Shikine Island (AS-008) until 30 July. During the IOTA Contest he will be signing JI3DST/1. QSL via home call, bureau preferred.

JW - Erik, LA2US is now active as JW2US from Bear Island (EU-027) until November. He operates mainly SSB with some CW on 40-10 metres.

OH - Jukka, OH3OJ will be active as OH3OJ/p from Kaurissalo Island (EU-096) on 1-6 August. He will operate CW, SSB, PSK and RTTY on 80-6 metres. QSL via bureau. [TNX OH3OJ]

OJ0 - G3TXF, G3XTT, SM0DZB and SM0W will operate as OJ0R from Market Reef (EU-053) for the IOTA Contest. "During last winter the Lighthouse on the Reef lost all permanent antennas plus the wind generator", Teemu (SM0W) says, "so the team will put up several vertical antennas and dipoles and run modest power". They arrived on 27 July and expect leave on the 30th in the early morning. "The

main goal for the team on this trip will be to prepare for a new permanent antenna installation that will be done later in August. SM0W will also collaborate with the Finnish Lighthouse Society to find a good permanent solution for the electricity for future activations". QSL via G3TXF. [TNX SM0W]

SV5 - Look for Roberto SV5/I2RNJ and Piero SV5/IK2IHY to be active holiday style from Rhodes (EU-001) on 4-11 August. They will operate SSB only. QSL via home calls, bureau preferred, and LoTW. [TNX NG3K]

TT - Silvano, I2YSB and the Italian DXpedition Team will be active as TT8TT from Chad in October. They plan to operate CW, SSB and RTTY on 160-6 metres with three stations. QSL via I2YSB (direct) or IK2CIO (bureau), plus LoTW within six months. Further information, online logs and OQRS can be found at www.i2ysb.com. Once again Arturo IK7JWY will be the pilot station for the expedition (it will be possibile to contact him through the dedicated forum at www.hamradioweb.org). [TNX IK7JWY]

UA - The RI0K team heading to Ratmanova (AS-061) [425DXN 1107] is still in Anadyr, as the flights to Lavrentiya have been cancelled owing to fog and wind. Their next attempt will take place on Monday (30 July), because the airport is closed during the weekends. Bookmark http://ri0k.ru/ for updates. [TNX RZ3EM]

UA - Vasily, RU3SD and Sergei, UA3SKV are active as RK3SWB/1 from Anzersky Island (EU-066) until 31 July. They will participate in the IOTA Contest. QSL via RK3SWB, direct or bureau. [TNX RA1QY]

UA - Look for Viktor, RN1N/p and Dmitry, UA1NFA/p to be active as homecall/p from Bol'shoy Kimalishche Island (EU-147) on 28-30 July, IOTA Contest included. QSL via home calls, direct or bureau. [TNX RN1N]

UA - Celebrating the 200th anniversary of the Patriotic War of 1812 (the French invasion of Russia) special event station R1812SM will be active on 1-31 August from various battlefields in the region of Smolensk. QSL via RV3LZ, direct or bureau. [TNX RV3LZ]

UA - Special callsign R10RLHA will be in use on 1-31 August to celebrate the 10th anniversary of the Russian LightHouses Award programme. Expect activity from various lighthouses on 40-10 metres SSB and CW. QSL via RA1QY, direct or bureau. [TNX RA1QY]

W - The Cape Ann Amateur Radio Association will be active as W1T from Thacher Island (NA-148) on 3-6 August. QSL direct to W1GLO. [TNX rsgbiota.org]

ZA - Once again TA1HZ will be active as ZA1TC from Durres, Albania on 1-7 August, including participation in the European HF Championship. QSL via TA1HZ, direct or bureau. [TNX NG3K]

RSGB IOTA CONTEST ---> The following stations have announced their participation in this year's event (from 12 UTC on 28 July through 12 UTC on the 29st). For lastest additions please give a look at www.rsgbiota.org, and at the announced operation lists maintained by
Ric, DL2VFR (http://www.iota-expedition.com/IOTA2012/iota2012.html)
and Bill, NG3K (www.ng3k.com/Misc/iota2012.html).

Complete details on the IOTA Contest can be found at www.iotacontest.com.
SWLs please note that the IOTA SWL Contest has been picked up by the Radioascolto SWL Club, and will be held in parallel with the IOTA Contest. Complete details can be found at http://www.radioascolto.org/swl/ or from the IOTA SWL Contest Manager (iw1qla[@]tin.it).
Good luck to you all!

Direttore Responsabile I2VGW

CHILTERN DX CLUB ---> On 21 July the Chiltern DX Club (www.cdxc.org.uk), the UK DX Foundation elected its Committee for the coming year: G3NUG (President), G3SVL (Chairman), G3USR (Treasurer), G4LDL (Secretary), G3RFX (Digest Editor), G4AXX, G4FKA and G4PFF.

CQ CONTESTS NEW DEADLINE ---> Participants in CQ-sponsored contests will now have five days after the end of a contest to either upload or mail their logs. "This is the first step in an effort to speed the processing and reporting of CQ contest results", CQ magazine Editor Rich Moseson (W2VU) explained, "and it is one more step in our ongoing efforts to help ensure the integrity of submitted logs. Shortening the deadline reduces the time available for those who might be tempted to 'cleanse' their logs after the contest". However, "we realize that in some cases circumstances may not allow a timely submission", CQ WW Contest Director Bob Cox (K3EST) says. "Requests for an extension must be received before the log submission deadline by sending an e-mail to questions[at] cqww.com". The change takes effect with this year's CQ World Wide DX Contest and will apply to all future CQ-sponsored contests.

CY9M & IOTA CONTEST ---> CY9M, St. Paul Island (www.cy9m.com) will participate in the IOTA contest this weekend. Their contest operation will be limited to 20 metres only, SSB and CW. The contest log will be merged with the regular DX operation, so there is no need to work them twice. The CY9M QSL card will be used for confirmation, the log will be uploaded to LoTW and submitted to the IOTA Contest manager.

V8 & 6 METRES ---> The Magic Band is coming back to Brunei after a silence of more than ten years. The V84SMD expedition (11-23 November) has been

granted permission to be active on 6 metres, and will have a dedicated antenna. See http://www.mdxc.org/v84smd/

+ SILENT KEYS + Paul Caboche (3B8AD, ex VQ8AS and VQ8AD) passed away on 24 July. Born in 1918, he was the oldest amateur radio operator in Mauritius and the first Chairman of the Mauritius Amateur Radio Society (1967-93). Other recently reported Silent Keys include Sergey V. Zhuchkov (R9WW), Charles D. Shinn (W5PG) and George S. Badalian (EK6GB), a doyen of amateur radio in his country and the President of the Federation of Radiosport of the Republic of Armenia (FRRA).

Subject: WUST Award

Hi Budi.

Here is an email that our club is sending to DX clubs and DXers. I thought you would be interested and would appreciate your sharing with your friends and club members.
73,

John W9ILY

Hello Club Members.

I am writing to let you and your club know about the new W.U.S.T. (Worked all U.S. Territories) award that is being offered by the Metro DX Club of South Suburban Chicago, of which I am the Secretary/Treasurer. Below is a News Release that was issued announcing our unique award. It has been written up in "CQ", the K1BV Awards Directory http://www.dxawards.com/DXAwardDir/usa%204.htm (listed under "T" for Territories), and "QRZ-DX". I'm sure you'll agree that this one will interest DXers everywhere! Also, if you are NUMBER ONE on the ARRL DXCC Honor Roll and your station call appears on the list dated August 2010 (or later) you'll not be required to send any confirmations for the WUST award! What could be easier?

Below is our News Release that I'd appreciate your sharing with your club's membership and your friends who are DXers. I've also attached one to this email. I must point out that two of our Metro DX Club members, Jerry, WB9Z, and Carl, K9CS, will be members of the large NH8S DXpedition that will put Swains Island back on the air in September, 2012. Swains Island is a hard one to work and DXers everywhere will be eager to work the DXpedition. Of course, this will count toward the W.U.S.T. Award!
73 and Good DX,

John W9ILY
Secretary/Treasurer, Metro DX Club

Meet WUST, A New DX Award

It has been a long time since a significant award has been offered to DXers and it requires submitting only 16 QSL cards with a user-friendly application. WUST is an acronym for Worked United States Territories, sponsored by the Metro DX Club located in suburban Chicago. Some of these 16 WUST territories can be heard regularly but many appear on the list of the 25 most wanted countries and can only be worked during a DXpedition to that location. Don't let this scare you away however, because you can qualify for the basic award by confirming only 14 of the 16 territories. Your remaining two can be confirmed later and endorsements are available that will signify that you have reached the ultimate goal.

Awesome wallpaper, challenging and requires minimal paper work

The 16 WUST territories effective January 1, 2012 are: KG4 (Guantanamo Bay), KHØ (Mariana Islands), KH1 (Baker & Howland Islands), KH2 (Guam), KH3 (Johnston Island), KH4 (Midway Island), KH5 (Palmyra & Jarvis Islands), KH5K (Kingman Reef), KH7K (Kure Island), KH8 (American Samoa), KH8S (Swains Island), KH9 (Wake Island), KP1 (Navassa Island), KP2 (US Virgin Islands), KP4 (Puerto Rico) and KP5 (Desecheo Island).

Confirmations can be on mixed bands and modes and there are no date restrictions. No, it's not as easy as you may have thought, but remember, this is a DX award. It's not a simple certificate acknowledging contact with a special event station or commemorating an occasion. You can proudly display this distinctive certificate in your ham shack and show it to fellow hams acknowledging your efforts in the world of DX. Remember, only 14 QSL cards get you started on the road to WUST and not 340 that are required to make number 1 on the ARRL DXCC Honor Roll. If you don't want to take the chance of mailing 16 valuable QSL cards, photocopies of confirmations will be accepted. In addition, Logbook of the World confirmations are OK and must be verified by two licensed amateur radio operators. Plus, if you are NUMBER ONE on the ARRL DXCC Honor Roll and your station call appears on the list dated August 2010 (or later) you'll not be required to send any confirmations for the WUST award. Simply file an application along with 8 US dollars or 4 valid IRCs. Mail your submission to the Metro DX Club, 3810 N. Chamlin Drive, Morris, IL 60450. Following the receipt of the original award for a minimum of 14 territories, endorsements for contact 15 and 16 are available for 3 US dollars or 2 valid IRCs. For additional information, go online to http://www.metrodxclub.com/wust_award.htm. E-mail questions should be sent to awards@....

The new sunspot cycle is finally upon us and the bands are wide open. So what are you waiting for? If DXing is your call then WUST must be on the wall! WUST is a MUST!

3112. Fw: QSL.NET Support

Subject: QSL.NET Support

Dear QSL.net users,

We hope you are enjoying the services we provide, such as free Web Hosting, Email Forwarding, Mailing Lists and DX Log Search. You are one of over 60,000 hams taking advantage of these services!

As you may be aware, back in early 2009 QSL.net was successfully migrated over to servers and systems managed by KA9FOX and K5TR. Since then, a number of improvements have been made:

1) All services migrated to fast, new servers.

2) Servers now located in a state-of-the-art Data Center, with multiple high-bandwidth Internet connections.

3) A powerful Self-help System was created, to allow our users to:
** Request Password Reset.
** Change Password to something easier to remember.
** Change E-Mail Forwarding address.
** Enable or Disable Web Hosting Account.
** Enable or Disable E-Mail Forwarding Service.
** Donation tracking (beta) -- will allow you to see your donations.
To use the Self-Help System, go to http://www.qsl.net and click "Login"

4) A Support Ticket System was created, to allow users to open a ticket for assistance with any of our services. To submit a ticket for assistance, go to http://www.qsl.net and click "Contact Us". A BIG thank you to JR Smullen WJ3R for his help with answering support tickets, as well as backup support from Tom Peterson KC9ECI.

We have received many positive comments on how fast web pages are being served and how reliable our services have been. The new Self-Help system is also making it possible for users to manage their services with ease, and has been very well received. Thank you for your positive feedback!

For over 16 years, QSL.net has been dedicated to the sole purpose of furthering the abilities and interests of the Amateur Radio Community, with free Internet services for hams. QSL.net now needs to ask you for something in return. Your financial support.

In addition to the data center bandwidth & hardware costs, we have hundreds of hours of time involved in answering support tickets (over 8,000 tickets since Jan 2009), programming and maintaining the Self-Help and Ticket systems, as well as the day-to-day administrative tasks of keeping all systems GO.

QSL.net exists solely on your donations!

Would you be willing to put something in our Tip Jar to say Thank you? If so, see our Donation page at: http://www.qsl.net/donate.html

Donations can be sent via PayPal, Credit Card, Check or Money Order, and would be GREATLY APPRECIATED.

Thank you for your support and 73!

Scott KA9FOX
George K5TR

```
DXNL 1791 - Aug 1, 2012
                      DX Newsletter

             a free and weekly service of
          DARC Committee "DX and HF contesting"
                (http://www.darcdxhf.de)

            Editor: Johannes Amchewicz, DK8JB
                (e-mail: dxnl@....de)

                translation by: Bob, DL7VOA
                (e-mail: dl7voa@...)

1S, SPRATLY ISLANDS, AS-051
    John,9M6XRO, and Steve,9M6DXX, will be active with two stations and
    verticals from Pulau Layang Layang (Spratly Islands, AS-051) signing
    9M4SLL in CW, SSB and RTTY on 80-10m from Aug 7-13. Note: 9M4 is issued
    to special event stations that may be anywhere on Malaysian territory.
    QSL via M0URX (OQRS), LoTW. See: http://m0urx.com/9m4sll

DL, GERMANY
    The special event station DR50DTANGO (special DOK 50DT) celebrates the
    50th anniversary of the district Swabia (T) until the end of the year.

G, ENGLAND, EU-005
    The South Essex Amateur Radio Society will be operating the special
    event station GB1HF close to the 5 km Olympic mountain biking course
    at Hadleigh Farm in South Essex, England (WLOTA 1841) until Aug 23.
    QSL via G4RSE. See also: http://www.southessex-ars.co.uk
        ---
    The Wimbledon & District ARS uses the special call GX3WIM during their
    summer camp until August 5. QSL via G4WYJ.
        ---
    The Pontefract & District Amateur Radio Society (FISTS #14041) will be
    QRV as GB0YD from Yorkshire on Yorkshire Day (Aug 1). QSL via G0BPK.
        ---
    The special event station GB2012RA has been issued to the Vintage
    Operating Group in Woolwich (WLOTA 1841, Loc IO91vl) for the period
    of the Olympic Shooting (July 28-Aug 5). QSL via bureau.
        ---
    The special event station GB2012OSP (OSP stands for Olympic Sailing
    Portland) has free public access and a good view of the olympic sailing
    events from Portland Heights till Sep 9. QSL unfortunately only direct.

JW, BEAR ISLAND, EU-027
    Erik,LA2US, is active as JW2US from Bear Island (EU-027) until Nov.
    He operates mainly SSB with some CW on 40m-10m.
```

Only eQSL? This would be very disappointing for many DXers.

SP, POLAND
The special event station SN7PW remembers the uprising in Warsaw every year from Aug 1 until Oct 2. QSL via SQ7GDS.

The scout station 3Z70ZK will be QRV from Aug 1 until Oct 28.
QSL via SP5ZRW.

TI, COSTA RICA
Bob,N6OPR, and Terry,N0TW, announced to be active as TI5/K6MQ on HF from Tarimba from Aug 1-8. They want to take part in the Ten-Ten Summer Phone QSO Party (Aug 4/5) also. QSL via N0TW.

UA1, EUROPEAN RUSSIA
The special event station R1812SM will be QRV from various battlefields in the Smolensk region celebrating the 200th anniversary of the French invasion in August. QSL via RV3LZ.

The special callsign R10RLHA will be used to celebrate the 10th jubilee of the Russian LightHouses Award program. Expect activity from several lighthouses in SSB and CW on 40m-10m during August. QSL via RA1QY.

VE, CANADA
The special event station XL31812 commemorates the Bicentennial of the War of 1812 from Aug 3-5. The station will be QRV from Fort Amherstburg (built in 1796, now Fort Malden) located in Amherstburg/Ontario.
QSL via VA3CSS.

The 34th annual Canal Days Marine Heritage Festival will be held in Port Colborne located on the historic Welland Canal from Aug 3-6. The festival features tall ships, boat cruises, marine museum displays, a car show and several other attractions. The Niagara Peninsula Amateur Radio Club (NPARC) is taking part in the festival by operating the special event station VE3WCD (Welland Canal Days) on 7250, 14250, 21250 and 28250 kHz from Aug 4-5. QSL via bureau.
See also: http://www.nparc.on.ca/content/home

YO, ROMANIA
The special event station YQ0BIKE is working in CW, SSB and digital until Aug 12 on the occasion of the "Cycling tour of Szeklerland".

ZA, ALBANIA
Tevfik,TA1HZ, hopes to become active as ZA1TC from Durres from Aug 1-7. He plans to take part in the European HF Championship.QSL via homecall.

RTTY OPs wanted: The Rhein Ruhr DX Association (RRDXA) looks for more op's for CR3L in the upcoming CQWW RTTY Contest on the last weekend of September. Please contact Hans,DL1YFF, at dl1yff@...
See also: http://www.CR3L.de

CW OPs wanted: Gabriele,I2VGW, is looking for some CW operators for his
    V84SMD DXpedition to Brunei (Nov 11-23).
    Please contact him via e-mail to gabrielei2vgw@...

LINKS: Current SOTA activities (mountain summits) are announced at:
    http://www.sotawatch.org

    Detailed information about current VHF activities can be found on the
    VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Aug 4   European HF Championship
Aug 4/5 DARC UKW Summer Fieldday
Aug 4/5 North American QSO Party

IOTA   compiled by Klaus, DL7UXG (e-mail: iota@...)

Island activities:
EU-001, SV5, Dodecanese: Roberto,SV5/I2RNJ, and Piero,SV5/IK2IHY, will be
    QRV working holiday style from Rhodos (Loc KM46ci, GIOTA DKS-006,
    MIA MGD-028, WLOTA 0045) from Aug 4-11. They plan to work mainly in SSB
    with their IC-706 (100w) and multiband dipole. QSLs via homecalls.
    See also: http://i2rnj.jimdo.com/english/activity/rhodes-greece

EU-014, TK, Corsica Island: Corsica is the third stop on the round trip of
    Jack,IZ3DBA. Listen for TK/IZ3DBA in CW and SSB on HF from Aug 7-13.
    QSL via IZ3DBA.

EU-023, 9H, Malta group: Malta (Bugibba, MIA MM-001, WLOTA 111, Loc JM75FW)
    will be the holiday destination of Mario,IK0PEA, from Aug 5-17. He will
    work as 9H3EA in SSB and digital modes on the HF bands and 6m.
    QSL via IK0PEA.

EU-051, I*9, Ustica Island: Stefano,IV3LZQ, is going to spend his holidays
    on Ustica Island (IIA PA-001, MIA MI-116, WLOTA 0848) from Aug 1-11.
    He plans to work as IE9/IV3LZQ in CW on 80m-10m.
    QSL only direct via homecall.

EU-057, DL, Mecklenburg-Vorpommern State group: Andreas,DL6AP/p, will be
    QRV from Ruegen island on Aug 2/3. QSL via homecall.
    See also: http://www.cqgma.eu

EU-096, OH1 Turku-Pori District Group: Jukka,OH3OJ/p, is working in CW/SSB/
    PSK/RTTY on 80m-6m from Kaurissalo Island from Aug 1-6. QSL via bureau.

NA-108, J6, St. Lucia: Bill,K9HZ, will once again be active as J68HZ from
    Labrelotte Bay/Castries on St. Lucia (WLOTA 1336, Loc FK94MB) from
    Aug 4-19. He will hand out IOTA points in CW, SSB and RTTY on 40m-6m.
    His equipment will be an Elecraft K3 and a 3 ele beam and wires.
    QSL only direct via K9HZ.

NA-111, W2, New Jersey State group: Members of the Old Barney ARC will be
    QRV as N2OB Barnegat lighthouse (Admiralty J1220, ARLHS USA-039, Loc

FM29WS) on Long Beach Island (USi NJ001S) on Aug 4 (maybe also Aug 5).
Emphasis will be put on 40m and 20m SSB. QSL via N2OB.
See also: http://www.obarc.org

NA-148, W1, Massachusetts State North (Barnstable to Essex County) group:
Members of the Cape Ann ARA will be active as W1T from Thacher Island (USi MA001S, WLOTA 0924) from Aug 3-6. They will also activate both lighthouses on the island: Cape Ann [Thacher Island South, ARLHS USA-105, TWLHD WLH K-031, Admiralty J0276) and Thacher Island North (ARLHS USA-1027, TWLHD WLH K-167, Admiralty J0277).
QSL only direct via W1GLO. Logs will be uploaded to the LoTW.
See also: http://caara.net/main

SA-012, YV7, Nueva Esparta State group & SA-035, YV5, Los Roques Island:
Alex,UA9YAB, and Alex,UA9YPS, will be active from two Venezuelan island groups from Aug 2-9. They will sign YV7/homecall from Isla Margarita (SA-012, DIV-062, WLOTA 1085) and YV5/homecall from Los Roques (SA-035, DIV-037, WLOTA 1085). QSLs for all calls via homecalls.

non IOTA: William,WA2CG, will be QRV in SSB on 20m (14270 kHz) from
Sandy Hook lighthouse (ARLHS USA-731) from August 1-8. QSL via WA2CG.

3114. CQ WW Officially Moves to Ban Post-Contest Log Massage With Rules Change for 2012 CQ WW DX

CQ WW Officially Moves to Ban Post-Contest Log Massage With Rules Change for 2012 CQ WW DXBy Jamie Dupree NS3T radio-sport.net
Posted July 31, 2012
Along with instituting a new five day log submission deadline, the CQ WW Contest Committee has included a specific rule change for the 2012 CQ WW DX Contests that seeks to crack down on post contest log changes.
"13. Post-contest correcting of call signs by using any database, recordings or confirming QSO's is not allowed (Rule XII.2 always applies)" reads the new language in the CQ rules.
The message there is very clear, that post-contest log cleanup by using outside aid - whether it is call sign databases or recordings of the contest are now clearly considered against the rules.
The reference to "Rule XII.2" is important as well, because that contains new langauge that could mean a variety of things to CQ WW competitors and their logs:
"2. All sent and received exchanges are to be logged. In addition to the number exchange, the call sign sent by an entrant during a completed exchange, must be logged as sent by the entrant. All QSO exchanges must be logged upon QSO completion."
The new language there includes the final two sentences: "In addition to the number exchange, the call sign sent by an entrant during a completed exchange, must be logged as sent by the entrant" and then "All QSO exchanges must be logged upon QSO completion."
The release of the rules on the CQWW web site was not accompanied by any public explanation of the changes from the CQ WW Contest Committee, but this rule seems to indicate that the CQ WW Contest Committee is ready to use SDR recordings of the contest to check the transmitted signal of someone in contention for a top award, to see what has been sent in the exchange.
Other changes in the 2012 CQ WW rules are visible almost immediately, dealing with power, as the committee refined the language that warns about excessive power in your contest category:
"You must not exceed the total output power limitation of your chosen category on any band. Total output power on any band at any time is measured at the output of the active amplifier(s)," reads the new language, emphasizing the precise point where power is to be measured.
There is also new language on multi-op efforts:
"Multi-Operator Categories (all-band operation only): Any public QSO spotting help is allowed. Any number of operators is allowed. Total output power must not exceed 1500 watts on any band at any time," reads the new language.
From "Fair Play" to a Specific Ban on Log Massage
A year ago, the CQ WW Contest Committee rolled out a public relations campaign designed to publicly pressure contesters over the idea of post-contest log changes, often referred to as "log massage," arguing it was against the spirit of true competition.
"Your contest result is a measure of your contesting skill," argued CQ WW Contest Committee member Doug Zwiebel KR2Q in a 2011 CQ WW webinar, where the CQ WW CC argued to contesters that changes to a log - with outside aid after a contest - is considered outside the bounds.
But in 2011, the CQ WW Contest Committee only called the use of post contest data sources

"unsportsmanlike" - now there is a specific new rule meant to make entrants think twice about using the internet, a recording, or other sources to fix some mistakes in their log. The newly issued rules for the 2012 CQ WW DX Contests are available on the CQ WW web site. Do you agree or disagree with the decision by CQ WW to ban post-contest log changes? Will it even work? Or is this just another rule that can't really be enforced in ham radio contesting?

http://fp-ve2xb.jimdo.com/

FP/VE2XB, St Pierre et Miquelon Islands, NA-032

FP/VE2XB will be qrv from 10-20 August, 2012 using 160-10m including the WARC bands 12, 17, and 30m and 6m when there are openings.
Pse QSL direct to qrz.com address which is aok with self addressed stamped envelope (SASE) with CDN stamps or self addressed envelope (SAE) and 2 IRCs or 2 greenbacks. Postal rates are not the same in the USA and Canada despite our proximity to one another and also being part of NAFTA (North America Free Trade Agreement). So, pse use 2 IRCs or 2 greenbacks. Or you may qsl via the bureau too. No probems there but it takes longer, so pse be patient.
Pse be careful when filling out your qsl card to use GMT/Zulu time. Some ppl send me cards using Pacific Standard Time (PST) or Eastern Standard Time (EST) and this is no good. All Hams around the world use GMT. If you're a newcomer to the hobby, pse Google GMT and you will see real time clocks with accurate time in Zulu/GMT.
Pse remember that 0010 GMT changes the date, so pse fill out your qsl card correctly with the right time and date. And pse be patient to receive a qsl card as I travel often. I will return all qsl requests that are received direct or via the bureau.

I will make a special effort to give first time cw dx QSOs to Novices and newcomers, so listen on or near 7.115 on 40m in the evenings. I wish DX stations would have done this when I was a newcomer. I also understand that many hams are getting back into the hobby after a long hibernation and use cw slowly as they get used to it again. There are also hams with health issues forcing them to cw qrs and also a lot of hams in the SKCC (Straight key century club) who enjoy firing up old rigs with straight keys--I love to do this too. I like to use my old j-38, so expect to hear me on 40m cw qrs for all hams irregardless of situation.

Last year, it was a pileup nightmare with stations calling on top of each other and it was just a big mess to pull out stations at times. This year, I will operate split on ssb and listen 5 KHZ up until the pileups thin out. I will do the same on cw and operate split listening up 2-3 KHZ. Hopefully, this will solve the problem. When the pileups thin out, I will go back to simplex operation.
Thanks in advance for your kind cooperation.

I always appreciate short wave listener (SWL) reports but pse be patient when requesting a QSL card. When I finish all ham qsl requests and if there are enough QSL cards, I will gladly reply to your request if your qso contact info is correct.

Saint Pierre and Miquelon (French: Collectivité territoriale de Saint-Pierre-et-Miquelon, French pronunciation: is a self-governing territorial overseas collectivity of France, situated in the northwestern Atlantic Ocean near Canada. It is the only remnant of the former North American colonial empire of New France that remains under French control.
The islands are situated at the entrance of Fortune Bay, which extends into the southern coast of Newfoundland, near the Grand Banks. They are 3,819 kilometres from Brest, the nearest point in Metropolitan France, but just 20 kilometres off the Burin Peninsula of

Newfoundland. Editor's note: This is NOT very far from where the Titanic sank on April 15, 1902.
Saint-Pierre is French for Saint Peter, who is a patron saint of fishermen.
The present name of Miquelon was first noted in the form of "Micquelle" in the Basque sailor Martin de Hoyarçabal's navigational pilot for Newfoundland. It has been claimed that the name "Miquelon" is a Basque form of Michael, but it appears that this is not a usual form in that language. Many Basques speak Spanish as well as Basque, and Miquelon may have been influenced by the Spanish name Miguelón, a form of Miguel meaning "big Michael".
The adjoining island's name of "Langlade" is a corruption of "l'île à l'Anglais" (Englishman's Island).

During the early 1910s the colony suffered severely as a result of unprofitable fisheries, and large numbers of its people emigrated to Nova Scotia and Quebec.
The draft imposed on all male inhabitants of conscript age after the beginning of World War I crippled the fisheries, which could not be processed by the older people and the women and children. About 400 men from the colony served in the French military during World War I, 25% of whom died. The increase in the adoption of steam trawlers in the fisheries also contributed to reduce employment opportunities.
Smuggling had always been an important economic activity in the islands, but it became especially prominent in the 1920s with the institution of prohibition in the United States. In 1931, the archipelago was reported to have imported 1,815,271 US gallons (6,871,550 litres) of whisky from Canada in 12 months, most of it to be smuggled into the United States. The end of prohibition in 1933 plunged the islands into economic depression.
After the fall of France, most of the war veterans and sailors in the colony supported the Free French of General Charles de Gaulle. The administrator of the colony, Gilbert de Bournat, sided with the Vichy regime. De Gaulle decided to seize the archipelago, over the opposition of the United States. The general covertly gave Admiral Émile Muselier the order to proceed, resulting in the successful Free French coup de main on Christmas Day 1941. The United States Department of State and Cordell Hull in particular were infuriated by the result. The incident ultimately served to focus the American public opinion on the ambivalence of the administration of President Franklin D. Roosevelt in its dealings with Vichy, and also led to a lasting distrust between De Gaulle and Roosevelt.
In a quick plebiscite the next day, the population endorsed the takeover, and the resounding vote in favour of Free France led Muselier to appoint Lieutenant Alain Savary as governor. After the approval of the 1958 French constitutional referendum, the islands were given the options of becoming fully integrated with France, becoming self-governing states within the French Community or preserving the status of overseas territory; they decided to remain a territory.

IOTA: Na-032; ITU: 9 and CQ: Zone 5

And of course thanks to Eric, KV1J, Paul K9OT, Peg KB9LIE, Brian Rose at B&B Fortune, NFLD (He has a lovely B&B and is kind, hospitable and very helpful in many ways) and our Miquelon hostess, Patricia.
Of course, Jenny and Tyler rock my world and I would be nothing without them in my heart and soul.

LOCATION
Location of St. Pierre et Miquelon (Source of image: Wikipedia)

N.B. The Titanic sank about 350 miles/531 km SE of Newfoundland on April 15, 1912--100 years this year. The wreck sits about 2 miles below the Atlantic ocean and over 1500 people died. I may ride in a submersible and see the wreckage...would be an awesome trip and icing on the cake..The water pressure is over 6,500 pounds per square inch, so you can't go scuba diving at that depth...

Location of Titanic wreckage:

For Titanic buffs:

You`ll love this investigation of greed and fraud about the Titanic...Click the link and just scroll down and download the mp file. This is an amazing conspiracy theory...

This is VERY NEAT! Some live webcams of St Pierre et Miquelon:

WX in St Pierre et Miquelon

NEWS

Plans are underway to be qrv from St. Pierre et Miquelon Islands in August 2012 on several HF bands including 160, 80/75 and especially 6 meters.
Flights are booked and accomodations secured.
Keep checking status...on this page as wx in this part of the world lends itself to FOG!!!
Rigs: K3/100 and Yaesu FT-450D and Yaesu ft-857 powerwerx.com pwr supply.
Amplifier: THP: 550fx
Antennas: 20/17/15/12/10/6m: 1 Hexbeam (K4KIO) 6 bands on 10m/approx. 30 ft aluminum mast.
30m/40 Windom and possibly Moxon 2 el switchable array
160/80m: Buckmaster Windom, 85 ft vertical, K9AY Loop.

BAND	CW	SSB	
6m	50.104	50.115	-
10m	28.024	28.480	
12m	24.894	24.950	
15m	21.024	21.250	
17m	18.074	18.135	
20m	14.024	14.175	
30m	10.104	10.115	n/a
40m	7.020	7.075	7.155
80m	3.524	3.800	
160m	1.824	TBA	

73, dx, god bless
Mike, FP/ve2xb

GEAR

The main antenna will be the 6 band 6, 10, 12, 15, 17, 20m--Hexbeam (Leo, K4KIO, who has been excellent as a support person answering technical and mechanical issues and questions even during a long weekend and is always a genuine pleasure to deal with. Period. Thanks LEO!!!) with a Spiderbeam 41 aluminum mast supported by a set or two of guy wires.
The main radio will be the Elecraft K3 (Thanks Dale at Elecraft!) and THP amp (500 w) using the LDG 600 PRO auto-tuner.
The Windom antenna will be used for 75, 40 and 30m. There have been requests for 160/80m QSOs, so we will bring an 85 ft vertical and K9ay loop, and a solid Buckmaster 160m 3kw rated windom. I will be making a special effort to work 6m this year!!!

73, dx
Mike, ve2xb

P.S. Next year possibly some 160 and 80m fullwave loops and bobtail curtain antennas.

So, how high do ya want it? Can we get rid of some of these trees? These leaves are a pain...

My neighbour and buddy, Scott, and I assembling the Hex in Belize.

4S7LGT, Lighthouse Expedition

Every year the RSSL has activated the Barbaryn Light House for the world light house event. This year was no exception thanks to a band of sea-fearers (hi!) who crossed over to the Island off Beruwala. Its half a kilometre from the shore to the island and sometimes the sea can be very rough. Everything has to be wrapped in polythene to protect them from the waves that at times beat into the boat.

This expedition is a great field day event and the fellowship is wonderful. The wx kept fine and they had a great time operating both HF SSB/CW with the call 4S7LGT/AS1 71. The guys who went over consisted of Wijay 4S7VJ who is always there to string up antennas with his sling shots, Kule our CW expert, ever energetic Jaliya 4S7JL and QSL manager and expert BBQ chef Uthpala 4S7UV, Thilan 4S5TNT and some SWLs for support. Next year a beam and a cool 500watts should make the dx come in faster than the waves that lash the island.

VP2MDD Montserrat
GRAHAM DAWES (M0AEP)
11 Ferriby Road
Barton upon Humber, North Lincolnshire., UK DN18 5LE
England

All QSO'S for VP2MDD since 1993 managed by M0AEP
VP2MDD QTH overlooks the Caribbean Sea on the West coast of Montserrat.
Station grid locator Reference is FK86vr.
Montserrat IOTA reference is NA103 in the Leeward Islands, eastern Caribbean.
Antennas:- Carolina Windom for 10M - 80M (incl. 60M), 5 el Eagle 50 MHz yagi on 18' boom & 50 MHz half-wave vertical.
Also experimenting with vertical dipoles for 10M & 12M plus 40M - 6M tuned delta loop antenna.
The next activation of VP2MDD will be from Thursday 7th June until Monday 6th August 2012.
Modes: SSB / CW - sorry no data modes.
VP2MDD Txvr : TS480 HX (200 watts HF / 100 watts 50 MHz).
QSL's for VP2MDD QSO's can be sent via Bureau (marked via M0AEP) or direct to:-
Graham Dawes (VP2MDD), 11 Ferriby Road, Barton upon Humber, North Lincolnshire, DN18 5LE, UK.
Please include return postage in UK stamps, 2 Euros, current IRC or 2 US$ for direct replies.

CQ World Wide RTTY Contest

The 2012 CQ WW DX Contest

RTTY: September 29-30, 2012
Starts 0000 GMT Saturday Ends 2400 GMT Sunday

I. OBJECTIVE: For amateurs around the world to contact other amateurs in as many zones, countries, US states and VE areas as possible.
II. BANDS: Five bands only: 3.5, 7, 14, 21, and 28 MHz..
III. TYPE OF COMPETITION (choose only one):

For all categories:
1. All entrants must operate within the limits of their chosen category when performing any activity that could impact their submitted score.
2. You must not exceed the total output power limitation of your chosen category. Total output power on any band at any time is measured at the output of the active amplifier.
3. Operating location: All transmitters and receivers used by the entrant must be located within a single 500-meter diameter circle or within the property limits of the station licensee's address, whichever is greater.
4. All antennas used by the entrant must be physically connected by wires to the transmitters and receivers used by the entrant.
5. Only the entrant’s callsign may be used to aid the entrant’s score.
6. A different callsign must be used for each CQ WW RTTY entry.
7. An entrant's remote station is determined by the physical location of the transmitters, receivers, and antennas. A remote station must obey all station and category limitations of Rule III.
8. A competitor who wishes to be judged for a top score in their category must agree to a potential visitation at any time during the contest by an observer appointed by the CQ WW RTTY Contest Committee (CQ WW RTTY CC). Failure of the entrant to respond to our correspondence or to allow a CQ WW CC observer full access to the contest QTH during the full contest may result in the competitor being removed for award eligibility for 3 years.
9. Self-spotting or asking to be spotted is not allowed in any category.
10. Only one signal on a band is allowed at any time for all categories.
11. Remote receivers are not allowed. The only exception is public remote skimmers which are allowed for the Multi-Operator and Assisted categories.
12. When two or more transmitters are present on a band, a hardware device MUST be used to prevent more than one signal at any one time; interlocking two or more transmitters on a band with alternating CQs (soliciting contacts) is not allowed.
13. Only Baudot mode is permitted.
A. Single Operator (All Band or Single Band): only one person (the entrant) can contribute to the final score during the official contest period. Callsign alerting assistance of any kind places the entrant in one of the Single Operator Assisted categories. For all single operator categories, all band or single band, only signal is

allowed at any time; for the all band category the operator can change bands at any time.
1. Single Operator: QSO alerting assistance of any kind is not allowed.
1. Single Operator High (SOAB High or SOSB High): Total output power must not exceed 1500 watts carrier on any band at any time.
2. Single Operator Low (SOAB Low or SOSB Low): Total output power must not exceed 100 watts carrier on any band at any time.
3. Single Operator QRP (SOAB QRP or SOSB QRP): Total output power must not exceed 5 watts carrier on any band at any time.
2. Single Operator Assisted: Any public QSO alerting assistance is allowed for all assisted categories. This includes, but is not limited to, DX Cluster-type networks, local or remote Skimmer and/or Skimmer-like technology, reverse beacon network. A local Skimmer is one obeying Rule III.3.
1. Single Operator High Assisted (SOAAB High or SOASB High): Total output power must not exceed 1500 watts carrier on any band at any time.
2. Single Operator Low Assisted (SOAAB Low or SOASB Low): Total output power must not exceed 100 watts carrier on any band at any time.
3. Single Operator QRP Assisted (SOAAB QRP or SOASB QRP): Total output power must not exceed 5 watts carrier on any band at any time.
B. Multi-Operator (all band operation only): any public QSO spotting help is allowed. Any number of operators is allowed. Total output power must not exceed 1500 watts on any band at any time.
1. Single Transmitter: Only one transmitter may be used and it may make a maximum of 8 band changes in any clock hour (run transmitter). Exception: One--and only one--other transmitter may be used if--and only if--the station worked is a new multiplier (multiplier transmitter). The multiplier transmitter may also make a maximum of 8 band changes in any clock hour. The run and multiplier transmitters are governed by independent 8-band-change rules. A clock hour runs from 00 through 59 minutes. The multiplier station cannot call CQ (solicit contacts). Logs found in violation of the 8-band-change rule may be reclassified as M2. If electronic logging is used (Cabrillo), for each QSO, the run transmitter or multiplier transmitter must be indicated in the log.
1. Single Transmitter High (MS High): Total output power must not exceed 1500 watts on any band at any time.
2. Single Transmitter Low (MS Low): Total output power must not exceed 100 watts on any band at any time.
2. Two Transmitters (M2): A maximum of two transmitted signals at any time on two different bands. Both transmitters may work any station. A station may only be worked once per band regardless of which transmitter is used. The log must indicate which transmitter made each QSO. Each transmitter may make a maximum of 8 band changes in any clock hour.
3. Multi-Transmitter (MM): No limit to the number of transmitters or operators. Five bands may be activated simultaneously.
IV. NUMBER EXCHANGE: RST report plus zone (i.e., 599 05). US and VE stations also send US state or VE area (i.e., 599 05 MA, see V. MULTIPLIERS below.)
V. MULTIPLIERS: Three types of multipliers will be used.
1. A multiplier of one (1) for each different zone contacted on each band.
2. A multiplier of one (1) for each different country contacted on each band. Stations are permitted to contact their own country and zone for multiplier credit. The Worked All Zones written rules, DXCC country list, WAE country list and IG9/IH9, and WAC boundaries are standards. Maritime mobile stations count only for a zone multiplier.
3. A multiplier of one (1) for each different US "lower-48" state and VE area contacted on each band. Stations are permitted to contact their own US state or VE area for multiplier

credit. One multiplier for each US state (48) and each Canadian area (14) on each band. Please use only official U.S. Postal Service abbreviations to identify states (e.g., Michigan = MI, Massachusetts = MA, Ohio = OH). Note: The District of Columbia counts as Maryland (MD); Alaska (KL7) and Hawaii (KH6) are counted as country multipliers only and not as state multipliers. Canadian areas (14 total) are as follows: NB (VE1, 9), NS (VE1), QC (VE2), ON (VE3), MB (VE4), SK (VE5), AB (VE6), BC (VE7), NWT (VE8), NF (VO1), LB (VO2), NU (VY0), YT (VY1), PEI (VY2).

VI. POINTS:

1. Contacts between stations on different continents are worth three (3) points.
2. Contacts between stations on the same continent but different countries, two (2) points.
3. Contacts between stations in the same country, one (1) point.

VII. SCORING: All stations: the final score is the result of the total QSO points multiplied by the sum of your zone, country and US state/VE area multipliers. Example: 1000 QSO points x 100 multipliers (30 Zones + 35 Countries + 35 States/Areas) = 100,000 (final score).

VIII. AWARDS:

First place certificates will be awarded in each category listed under Section III in every participating country and in each call area of the United States, Canada, Russia, Spain, and Japan. All scores will be published. To be eligible for an award, a Single-Operator station must show a minimum of 12 hours of operation. Multi-operator stations must operate a minimum of 24 hours. A single-band log is eligible for a single-band award only. If a log contains more than one band it will be judged as an all-band entry, unless otherwise specified. In countries or call areas where the returns justify, 2nd and 3rd place awards may be made. All certificates/plaques will be issued to the licensee of the station used. IX. TROPHIES and PLAQUES: Plaques and trophies are awarded for top performance in a number of categories. They are sponsored by individuals and organizations. For a current list of plaques and sponsors, or to learn how to
become a sponsor, see the CQ WW RTTY website: <http://www.cqwwrtty.com>. A station winning a World trophy will not be considered for a sub-area award; the trophy will be awarded to the runner-up in that area.

X. CLUB COMPETITION:

1. The club must be a local group and not a national organization.
2. Participation is limited to members operating within a local geographic area defined as within a 275 km radius from the center of club area (except for DXpeditions conducted by members living within the defined club geographic area). Club contributions from DXpedition scores are a percentage of the number of club members on the DXpedition.
3. To be listed, a minimum of 3 logs must be received from a club, and a club officer must supply a list of participating club members to the Contest Director.

XI. LOG INSTRUCTIONS:

1. All times must be in UTC.
2. All sent and received exchanges are to be logged.
3. If submitting a paper log, you must indicate zone, country and US/VE multipliers the FIRST TIME worked on each band. This is not required for electronic Cabrillo log submissions.
4. Electronic log submission: We want your electronic log. The Committee requires an electronic log for any possible high-scoring entry. By submitting a log to the CQ WW RTTY Contest, the entrant agrees to have the log open to the public. If possible, we would appreciate complete frequencies in the log. E-mail Required Content: Please submit your log in the Cabrillo file format created by all major logging programs. Be sure to put the STATION CALL SIGN in the "Subject:" line of each message. Your e-mail log will be

automatically acknowledged by the server. Electronic submission implies a signed declaration that all contest rules and regulations for amateur radio in the country of operation have been observed. Submit your CQ WW RTTY log to <rtty@...>.
5. Paper log submission: Use a separate log sheet for each band. Each paper log entry MUST be accompanied by a summary sheet showing all scoring information, category of competition, and contestant's name and address in BLOCK LETTERS. Sample log and summary sheets and zone maps are available from CQ. A large, self-addressed envelope with sufficient postage or IRCs must accompany our request. If official forms are not available, make up your own, 80 contacts to the page on 8-1/2" x 11" paper or European A4. All paper log entrants are required to submit cross-check sheets (an alphabetical list of calls worked) for each band on which 200 or more QSOs were made.
6. Bad QSO: The bad SO is removed and a penalty of three more equivalent QSOs is applied to the points only.
7. QRP and Low Power stations must indicate their category on their summary sheets and state the actual maximum power output used in the comment section of their Cabrillo submission.

XII. ACTIONS OF THE CQ WW CC:

Violation of the rules of the contest makes the entrant subject to either a Red or Yellow card, a warning letter or log rejection at the discretion of the CQ WW CC.
1. YELLOW card: One Yellow card: entrant not eligible for an award in the entered contest. An entrant or operator issued a Yellow card will be listed at the end of the published results. Two Yellow cards: An entrant receiving two yellow cards in three consecutive CQ WW RTTY contests is a Red card.
2. RED card: One Red card: entrant not eligible for an award in the entered contest. Entrants receiving a Red card will be listed at the end of the published results. An entrant or operator receiving a Red card will be ineligible for any CQ-sponsored contest award for a period of one year beginning with the publication of the violation in CQ magazine. Two Red cards: An entry or operator receiving two Red cards within five consecutive CQ WW RTTY contests will be ineligible for any CQ-sponsored contest award for a period of three years beginning the month of publication of the second violation in CQ magazine. If the entrant is in a multi-operator category, all listed operators are so affected.
Further CQ WW CC actions:
1. The entrant agrees that the CQ WW RTTY CC reserves the right to reject any entry for non-compliance with the rules.
2. Unsportsmanlike conduct can be grounds for either a Red or Yellow card at the discretion of the CQ WW RTTY CC. Unsportsmanlike conduct includes, but is not limited to, violation of the CQ WW RTTY rules, ANY use by an entrant of any non-amateur means during the contest including, but not limited to, telephones, Internet, instant messaging, chat rooms, VoIP, or the use of any DX cluster/reflector to SOLICIT, ARRANGE, or CONFIRM any contacts during the contest. Unsportsmanlike conduct also includes out-of-band transmissions by the entrant.
3. Taking credit for excessive unverifiable QSOs or unverifiable multipliers may result in a yellow or red card at the discretion of the CQ WW RTTY CC.
4. An entrant is free to withdraw his/her submitted log for any reason prior to receiving an official letter from the CQ WW RTTY CC. The log will then be handled per the entrant's request. If after receiving an official letter from the CQ WW RTTY CC an entrant chooses to withdraw their log, the entrant's call will be listed at the end of the results showing their log as having been withdrawn.
5. By submitting a CQ WW RTTY Contest log, an entrant agrees that the issuing of Red cards, Yellow cards, and other decisions of the CQ WW RTTY CC are official and final.

6. A card penalty given to an entrant will be honored by all CQ-sponsored contests, the EUHFC, the SCC RTTY Championship, and the JIDXC. XIII. DEADLINE:
1. All entries must be sent NO LATER than 5 October 2012.
2. An extension of up to one month may be given if requested by e-mail <w0yk@...>. The granted extension must be confirmed by the Contest Director, must state a legitimate reason, and the request must be received before the log mailing deadline. Logs postmarked after the extension deadline may be listed in the results but will be declared ineligible for an award. All paper logs should be sent to Ed Muns, W0YK, PO Box 1877, Los Gatos, CA 95031-1877 USA

http://www.darc.de/referate/dx/contest/waedc/en/rules/

Worked All Europe DX Contest - Rules 2012
(2012-06-26)
The Deutscher Amateur Radio Club (DARC) invites radio amateurs world wide to participate in the annual WAE DX Contest.
1 Times
CW: August, second full weekend
Saturday, August 11, 2012, 0000 UTC until Sunday, August 12, 2012, 2359 UTC
SSB: September, second full weekend
Saturday, September 8, 2012, 0000 UTC until Sunday, September 9, 2012, 2359 UTC
RTTY: November, second full weekend
Saturday, November 10, 2012, 0000 UTC until Sunday, November 11, 2012, 2359 UTC
2 Bands
3.5 - 7 - 14 - 21 - 28 MHz.
According to IARU recommendations operation should be avoided outside contest-preferred segments. No operation to take place on:
CW : 3560-3800; 7040-7200; 14060-14350 kHz
SSB: 3650-3700; 7050-7060; 7100-7130; 14100-14125; 14300-14350 kHz.
3 Categories
* SINGLE-OP LOW
Max. output 100 watts - all bands. Only one signal permitted at any time.
* SINGLE-OP HIGH
Output higher than 100 watts - all bands. Only one signal permitted at any time.
* MULTI-OP
Band changes are allowed every 10 minutes; this includes all activities of a main station, including QSO & QTC traffic and CQing.
Only exception: Working of a multiplier. Other transmitters may be used in parallel to the main station to work multipliers on other bands.
* SWL
(see §12)
Notes:
* Transmitters, receivers and antennas used in the contest must be located within a 2 km diameter circle.
* The use of DX spotting nets is allowed in all categories.
4 Off Times
Single Operator stations may only operate 36 out of the 48-hour contest period.
The total of 12 hours off time may be taken in one part but not more than three parts. The off times must be shown on the summary sheet. If operation is interrupted for more than 12 hours the three longest off time periods must be a minimum of 12 hours.
5 Exchange
A contest QSO can only be conducted between a European and a non-European station (exception: RTTY, see §13). The exchange consists of RS/RST and a progressive serial number starting with 001. If the station worked does not send a serial number, log the contact

with number 000. Each station can be credited only once per band.
6 Multiplier
For non-European stations the multiplier is the number of countries defined in the WAE Country List (see below) worked per band.
For European stations every non-European DXCC entity counts as a multiplier.
Exception: In the following countries up to ten numerical call areas count as multipliers: W, VE, VK, ZL, ZS, JA, PY and RA8/RA9 and RAØ -- without respect to their geographical location.
Examples: W1, K1, KA1 and K3../1 count as W1;
VE1, VO1 und VY1 count as VE1;
JR4, 7M4 und 7K4 count as JA4;
ZL2 and ZL6 are two different multipliers.
Multiplier bonus: Country multiplier points are "weighted" by band. Multiply the number of countries worked on 3.5 MHz by four, on 7 MHz by three, and on 14/21/28 MHz by two. The total multiplier is the sum of the weighted multiplier points of all bands.
7 QTC Traffic
Additional points can be achieved by QTCs. A QTC is the report of a contest QSO back to a European station (exception: RTTY, see §13).
The following rules apply:
1. A QTC contains time, call sign and serial number of the reported QSO. Example: "1307 DA1AA 431" means that DA1AA was worked at 1307 UTC and sent serial number 431.
2. Each QSO may only be reported once as a QTC. The QTC may not be reported back to the original station.
3. Every QTC that was correctly transferred, counts one point for the sender and one point for the receiver.
4. Two stations may exchange up to 10 QTCs maximum. The two stations may establish contact several times to complete the quota.
5. QTCs are transferred by means of QTC series. A QTC series is a block of one (minimum) to ten (maximum) QTCs. QTC series are numbered using the following scheme: The first figure is the progressive serial number starting with one; the second figure denotes the number of QTCs in the series. Example: "QTC 3/7" means this is the third QTC series transmitted by this station and it contains seven QTCs.
6. For every QTC series that is transmitted or received, the QTC number, time and frequency band of the QTC transmission must be logged. If any of this data is missing from your log, no credit will be given for this QTC series.
8 Scoring
The final score is the result of total QSOs plus QTCs on all bands multiplied by the sum of all multipliers weighted by the band bonus factor (see §6).
9 Disqualification
Violation of the rules of the contest or unsportsmanlike conduct will be deemed sufficient cause for disqualification. The decisions of the contest-committee are final.
10 Submissions
URL: http://www.waedc.de
Messages to contest manager (no logs): waedc-info@...
Logs need to be sent in STF or Cabrillo-Format to the following e-mail address:WAEDC CW : waecw@dxhf.darc.de WAEDC SSB : waessb@... WAEDC RTTY : waertty@...
Be sure to put the station call sign into the subject of each message.
By submitting an electronic log, the participant claims to fully accept the rules of the contest. A written declaration is not necessary.
Note: After publication of the results all logs will be put into the DARC Contest Logbook (DCL).

Hand-written logs:
After the contest use a proper logging program or LM from DL8WAA to enter your data.
See Link: http://contestsoftware.com/e/home.htm
If you do not have a computer, please ask a friend or family member to import the log.
11 DX & Contest Club Competition
The club score is calculated by adding the final results of all participating club members in all three WAE contests, excluding SWLs. To be counted, the name of the club has to be indicated in the log on a separate header line using the keyword "CLUB".
The club must not be an official national amateur radio club. For a club to be listed, a minimum of three logs must be submitted.
A trophy is sponsored for the top DX (non-EU) and the top EU clubs.
For DL stations participating in the German DARC/VFDB-Clubmeisterschaft put your DOK in the log on a separate header line using the keyword "SPECIFIC".
12 Special Rules for SWLs
SWLs record stations working in the WAEDC. Participation is only possible as a single operator all bands. Every call sign heard - European or non-European station - may be credited only once per band. Both call signs of a contest QSO have to be recorded.
Each station that is logged including the serial number that was sent by that station, counts one point. Every complete QTC which includes all QTC series information (up to a maximum of 10 per station) also counts one point.
Multipliers are counted according to the criteria indicated in §6, but both European and non-European multipliers are counted. A call sign can only be counted as a multiplier, if the serial number it sent was recorded. In the best case, for a completely recorded QSO, two points and two multipliers can be credited.
13 Special Rules for RTTY
In the RTTY portion of the WAEDC there are no continental limits; everybody can work everybody. Only QTC traffic must be performed between different continents.
Every station may send and receive QTCs. The sum of QTCs exchanged between two stations (sent plus received) must not exceed 10 (ten).
The European and non-European multipliers indicated in §6 count for all stations.
14 Log Deadline
Log deadline is always two weeks or, more specific, the third Monday after the end of the contest.
CW: August 27; SSB: September 24; RTTY: November 26, 2012.
15 Criteria for WAEDC Awards and Plaques
Continental winners will receive a plaque. Printable online certificates will be availabe for all stations on result publication.
Entries from countries split by numerical call areas for multiplier reasons (see §6) will be listed according to their reported location within their respective geographical call area.
Stations who activate a WAE country for the WAEDC from where no log was received over the last three years will be recognized as "WAEDC Hero" and receive a special prize.
For 2012 these 9 countries are:
1AØ, HV, JW, JW/b, JX, R1F, SV/A, YU8, ZB
Stations who have been in the Top-Ten/Top-Six list for at least five times can apply for a special plaque.
The WAEDC committee reserves the right to honor special contest activities with additional plaques.
WAE Country List
1AØ, 3A, 4O, 4U1I, 4U1V, 9A, 9H, C3, CT, CU, DL, E7, EA, EA6, EI, ER, ES, EU, F, G, GD,

GI, GJ, GM, GM/s, GU, GW, HA, HB, HBØ, HV, I, IS, IT, JW, JW/b, JX, LA, LX, LY, LZ, OE, OH, OHØ, OJØ, OK, OM, ON, OY, OZ, PA, R1F, RA, RA2, S5, SM, SP, SV, SV/A, SV5, SV9, T7, TA1, TF, TK, UR, YL, YO, YU, YU8, Z3, ZA, ZB.[R1M removed]

VK4ILH
Cape Moreton Lighthouse
AU0009
Moreton Island IOTA OC-137

Dates of Operations & The Team
VK4ILH will be active for the International Lighthouse & Lightship Weekend on August 18th & 19st 2012, with operations due to begin on the 17th

The 2012 team consists of 8 operators:

Derek VK4MIA
Paul VK4FPDW
Brooke VK4KDX
Ewan VK4ERM
Catherine VK4GH
John VK4IO
Graham VK4GRALuke VK3HJ

This DX'pedition will mark the very 1st time that Cape Moreton Lighthouse has ever been activated, it was originally scheduled for the 2007 ILLW but the activity never took place. Although OC-137 is not a "Most Wanted" IOTA Group, Moreton Island has not been active in nearly 15 years

History of The Cape Moreton Lighthouse
Cape Moreton was the first lighthouse to be built in Queensland, but was not the first lighthouse built by the Queensland government, indeed it was built as a New South Wales light in 1857 before Queensland became a separate colony.

The lighthouse is on the northern point of Moreton Island and is constructed of sandstone quarried on the island. It stands on a rare rocky promontory on the sand island.

It was built because of the increasing traffic to the northern coast and the entrance into Moreton Bay, near the island, is scattered with wrecks that attest the the notoriousness of the bay.

Everything is Booked!!
With only 7 weeks to go for the 2012 ILLW we are now fully booked with our Trailer Sites, 4WD Beach Permits and Return trip on the Moreton Island MICAT.

http://www.dxcceast.com/index.html

We are now at 137 with 123 Paid: 116 Dinner paid and 7 Paid Non-Dinner, with another 14 Planning to come (awaiting Payment)
 Goal: 175 with 160 planned for Dinner

Total 230 expressed interest in coming; Register and get your dinner tickets before Aug. 11, 2012
We need your attendance at this event - Thank you in advance

More Rooms at the Holiday-Inn FSK Convention Center have been authorized at the $99.00 + tax rate. Get them while they are still available!

Hot News 07/11/12 - We expanded convention space (added 1/3 more) at the hotel providing more room for Vendor & Social Space. Also, more hotel rooms have been reserved for the convention at the $99.00 rate. More vendors are being added based on request - If you want a space, email David at K3LP@...

Platinum Sponsor
FT-2000 HF/50 Mhz All Mode Transceiver
Grand Prize Drawing #1 Donated by K1LZ - Krassy Petkov

ACOM 1010 HF Amplifier, Power Output: 700 W PEP, 1.8-29.7MHz frequency range
Grand Prize Drawing # 2 Platinum Sponsor
IC-7600 HF/50 Mhz All Mode Transceiver
Grand Prize Drawing #3

Welcome to the
National Capitol DX Association's
"DXCC-EAST" Convention 2012 - August 25, 2012
"ARRL affiliated event"

General Information
NCDXA has been an active DX organization since 1972. Based on our past positive experiences with DXPO conferences from 1974 through 1992, we are excited to announce our new DXCC-EAST Convention for Saturday, August 25, 2012. It is our goal to make this an annual event here on the east coast of the United States.
The DXCC-EAST Convention will include presentations by well known DXers and principles that are knowledge of the DX community including participation by the American Radio Relay League (ARRL).
Other Saturday brochure scheduled activities included are:
* VE Exams – 1:00 PM to 3:30 PM –Schedule in Advance (secretary@...)/Walk-Ins Welcome, $15.00 ARRL VEC Charge, Executive Board Room just outside convention area
* Portable Radio Operation: FT DX 5000 HF Station and 2 Meter: N3C Call Sign, Talk-In 146.480 Mhz. Simplex
* DXCC QSL Card Checking: NCDXA Vendor Table # 6
* Vendor Tables: Francis Scott Key Convention area combined rooms C, D, E & F, Tables 1

thru 28
Friday, August 24, 2012, Early Arrival - 6:00 PM-1:00 AM Hotel Bar (Casey's Lounge)
Frederick County Maryland is central to many exciting places to visit before and after the convention. Make the convention visit a tradition. Combine your trip with a Baltimore Orioles (Toronto Blue Jays in town Aug. 24-26, 2012) baseball game, visit the Inner Harbor, ESPN Center or Aquarium, historic district area or take a trip to Washington DC. There will be lots of fun for the whole family.
I look forward to seeing each of you at the DXCC-EAST Convention.
Sincerely,
David Collingham – K3LP
NCDXA President
Who Should Come?
Whether you are an avid DXer, contester, teacher, scout leader or just getting started in amateur radio, there will be plenty to keep your interest. Come meet friends and future friends, vendors and start a new annual tradition.
There is plenty of parking space for your mobile home.
When?

A - Pre-Conference Events

Friday, August 24, 2012, 3:00 PM to 6:00 PM - ICOM Sponsored - Contester/DXer Product Evaluation and Social at W3LPL's QTH. ICOM will provide HF Radios that will be used by Contester/DXer's. Drinks and Snacks will be Sponsored by ICOM. A great Ham Radio Social Event - Don't Miss it!
Friday, August 24, 2012, Early Arrival - 6:00 PM-1:00 AM Hotel Bar (Casey's Lounge)
B - Convention Starts
Saturday, August 25, 2012, Convention Program: 8:15 AM to 9:00 PM
C - Convention Departure
Sunday, August 26, 2012, 8:30 AM to 11:30 AM – Hotel Check-out
Where?
Holiday Inn Hotel & Conference Center at Francis Scott Key (FSK) Mall
5400 Holiday Drive • Frederick, Maryland 21703
Phone: (301) 694-7500 • Fax: (301) 694-0589

From: Yb land Dx club
Topic: 2113 Message: 3128

Dear All,

One of the most interesting ways to use Club Log is to join your clubs, so that you can participate in your own leagues against friends. Also, if you are interested in joining in the HF or LF challenges organised by CDXC, then you can join these contests in Club Log and have your score automatically calculated by Club Log.

Note: members must add themselves to this club. Instruct them to click 'Settings' and then go to the 'Clubs' tab to join. This method allows users to opt-out (by default) of leagues and DXpedition charts. The opt-in principle is how Club Log is intended to work.

PS: Only YBDXC registered member who got the number membership will be approved.

http://www.clublog.org/edituser.php goes to settings, goes to clubs, thick YBDXC, goes to join clubs

YC1COZ op. Feri, Menang di Kontes Oceania 160m, CW, Oktober 2011

Gbr.1. Peringkat akhir dari stasiun-stasiun Indonesia, Juli 2012. Klik untuk memperbesar.
http://www.oceaniadxcontest.com/ocdxc11-results-4-CW-scores.pdf

Selamat untuk OM Feri, YC1COZ di Bogor, yang menjadi pemenang di negara ini dan sekaligus pemenang di benua (Country & Continent Leader) Oceania pad Oceania DX Contest 2011 dalam moda CW, 160m.

Feri layak meniru ucapan veni, vidi, vici (= saya datang, saya melihat, saya menang/menaklukkan) bak jenderal Romawi: Julius Cesar, 47 Sebelum Masehi. Cobalah bandingkan perolehannya dengan partisipan lain dari seluruh dunia di kategori yang sama. Lihat tautan di atas.

Kisah dan foto-foto pengoperasian YC1COZ di RadioLand di (Gunung Malang, Subang, Jawa Barat) ada pada artikel 10 Oktober 2011. Klik:

http://topbanddxdiindonesia.blogspot.com/2011/10/yc1coz-op-feri-dalam-kontes-oceania.htmlif

Sepanjang catatan saya, inilah satu-satunya prestasi tertinggi dari stasiun YC pada 160m, CW, dalam kontes tsb.

Juga, selamat kepada OM Kasmuri, YD1MRI dan para operator-operator yang masuk dalam daftar di Gbr.1 untuk memperoleh awards.

Kobarkan terus semangat untuk berkompetisi secara sportif.

http://www.ncdxf.org/pages/beacons.html

NCDXF/IARU Beacon Network

The NCDXF, in cooperation with the IARU, constructed and operates a worldwide network of high-frequency radio beacons on 14.100, 18.110, 21.150, 24.930, and 28.200 megaHertz. These beacons help both amateur and commercial high-frequency radio users assess the current condition of the ionosphere. The entire system is designed, built and operated by volunteers at no cost except for the actual price of hardware components, shipping costs, and so on.
Three articles about the beacons have appeared in QST within the past few years and these articles are now available online at the IARU web site at http://www.iaru.org/articles/. These articles have a lot of interesting details about the beacons. Most of the hardware used in the beacons is regular commercial equipment, but the controller is specially designed and is described in detail in Beacon Controller.
Stan Huntting, KW7KW, wrote, "There are at least two possible explanations for an apparently dead band: 1) propagation is poor, or 2) no one is transmitting. The NCDXF/IARU International Beacon Network addresses the second of these possibilities by insuring that reliable signals are always on the air, around the clock, from fixed locations worldwide." With three minutes of listening for the beacons, one can find out either where a particular band is open or which band has the best propagation to a particular part of the world.
In principle, one can simply listen on the beacon frequencies and copy the CW callsigns of the various beacons to figure out where the band is open, but in practice, not every ham operator can copy calls at twenty-two words per minute and some beacons may be heard at too low a signal strength to catch the call. Because the beacons transmit at known times, it is easy to know which beacon one is hearing without actually copying the CW callsign. Since the beacons are running one hundred watts to a vertical, even a weak beacon signal may indicate a path with excellent propagation for stations using higher power and directive antennas.
In order to know which beacon is transmitting at any particular time, one can either refer to the Beacon Transmission Schedule or use your computer and one of the Programs to Help Beacon Listeners. If you want to know where to point your antenna or decide which beacons are the most interesting to you, you can refer to the Beacon Locations. If you have a computer and a computer-compatible radio and would like a record of when various beacons can be heard at your QTH, you will want to learn about Automated Beacon Monitoring.
In time, we hope to have many automated receiving stations around the world which post a record of what beacons they have heard on the internet for all to use. Such a setup raises many interesting questions about how to effectively display such massive amounts of information.
If you like the beacons, we hope you will support those who provide Support for the Beacons and you will surely want to keep up with beacon developments by reading the latest Beacon News and the Early Beacon History. If you are bothered by interference from other stations when you listen to the beacons, you may want to read about Beacon Interference.

The Early History of the NCDXF/IARU Beacons
by John Troster, W6ISQ

Shortly after the formation of the Northern California DX Foundation (NCDXF) in October 1972, the newly formed Board of Directors decided that the organization should expand its horizons to include something of a scientific nature in which all amateurs, DXers and non-DXers alike, could participate. NCDXF support for DXpeditions and overseas operations would be a priority because DXers of the world would be the major contributors to the Foundation. But we hoped to do more than just send radios and DXpeditions and print QSL cards.

We consulted our Scientific Advisor, Dr. O.G. "Mike". Villard, Jr., W6QYT, Professor of Electrical Engineering at Stanford University and Senior Research Scientist at Stanford Research Institute (now SRI International). Mike had an idea. He was concerned about the disappearance of fishing and other boats in Alaskan waters every year. He believed that if the circulation of the Arctic currents were better understood, searching rescue ships would have a clearer idea where to look, thus increasing the chance for finding small lost boats. To help solve this problem, Mike suggested the possibility that a floating beacon be dropped into these Alaskan currents. This could be tracked by amateurs around the world to monitor the drifting course of the beacons.

Mike had a friend with just such a drifting beacon which would transmit on 20 meters with 1 watt or 25 watts, and it was being tested in Washington, D.C. Mike arranged for his friend to turn on the beacon one Saturday morning, and we organized a listening group on 20 meters via the Northern California DX Club 2-meter network. The beacon was easily readable with 25 watts, and pretty good with just one watt. So even the 1-watt QRP transmission could be monitored and useful to amateurs some distance away.

There was One Big Problem with the drifting beacons: their cost of $25,000 each was about 25 times greater than NCDXF had in the treasury. In addition, the beacons were non-recoverable. The idea of a beacon remained appealing, however, and with further thought, the development of a series of relatively low-cost stationary beacons world-wide appeared possible. It would be much cheaper and would still work!

We set up a series of brown bag lunch meetings at SRI to explore possibilities. To do the heavy thinking, we recruited some of the fellows who had worked on Oscar I-IV: Chuck Towns, K6LFH, who was president of Project Oscar at the time; Lance Ginner; and Board Member Jim Maxwell, W6CF, who was always full of imagination and creative thoughts.

After a month or so of meetings, we agreed it would be possible to develop a world-wide beacon network. It would feature all beacons transmitting the same message, each about one minute in length, all on the same frequency, one after the other, and going around the world. At Mike’s suggestion, we also planned to step down the power output of the beacons in 10 dB steps, beginning at 100 watts. The beacon would come on the air with 100 watts, sign the beacon callsign, then step down to each of four power levels, 100, 10, 1, 0.1 watt, and finally back to 100 watts for the sign-off call. Each power level would last about 10 seconds before automatically switching to the next level.

All this planning and daydreaming was just fine, but who was going to design and build this thing? We turned to Chuck Towns and he looked deep into the engineering talent of Project Oscar and came up with an enthusiastic, knowledgeable designer and builder, Jim Ouimet, K6OPO.

One seemingly small matter had to be addressed now, but it was potentially the biggest hurdle. We would need an FCC license! So we wrote a letter to Mr. A. Prose Walker, W4BW, then Chief of the Amateur Branch of the FCC. We received a prompt answer from him saying, essentially, he thought this was a good idea. The plan showed the creative ingenuity that amateurs had used in creating Oscar-1. It was a program that would be for the benefit and interest of all amateurs world-wide, and thus of interest to the WARC-79 planners (he

expressed this sentiment personally later). He invited us to join as a member of the WARC-79 group which was beginning to develop the amateur agenda for that important international conference. The NCDXF/IARU World-Wide Beacon Network owes its existence to the early encouragement of Mr. A. Prose Walker.

Attending WARC-79 meetings in Washington offered the all-important opportunity to discuss with the FCC Amateur Branch engineers what requirements we would have to meet before submitting the proper application for an unmanned, automatic beacon on 14 MHz. One requirement was that we submit a contour map showing the beacon location, as well as the location of all amateur station operators in the San Francisco Bay Area who would be monitoring the beacon 24 hours a day. This was a precaution in case the beacon drifted off frequency, the keying mechanism failed, or anything else went wrong (the map requirement was the same as for early 2-meter repeaters). A lot of Northern California DX Club members did not realize they were now expected to have a receiver on 14.1 MHz day and night, and listen to it...continuously!

Meanwhile, back in Palo Alto, CA, Jim Ouimet was busy designing and building the beacon. He became so busy at work that he had to turn beacon construction over to a colleague. But the work proceeded and, on bench tests, did exactly what it was supposed to do.

The license arrived and we were assigned the call WB6ZNL, not exactly a nice, crisp, short beacon-type call, but it was a license and we were elated and grateful!

In 1979, the beacon was put in operation from a trailer on a low hill overlooking the Stanford University campus. It worked remarkably well, transmitting a one-minute message every 10 minutes for about two years. We received reports from all over the world telling of its reception. So the beacon was doing what it was supposed to do.

Now all we needed was to build eight or nine beacons and distribute them around the world. But there was another problem. Our beacon transmitter was very complicated to build and, we had to admit it, a real boat anchor. Also, Jim Ouimet was being sent world-wide by his company for extended periods. We definitely had a problem in manufacturing those other beacons.

About this time, Dave Leeson, W6QHS, came on the Board of Directors of NCDXF. We described the problem to Dave and he went to work in his lab. He came up with a solution: use a Kenwood TS-120 as the beacon transmitter and build a black box to control the entire system. Dave built the control unit and hooked it up to the TS-120 and, Voila!, we had a beacon transmitter that an amateur with an average build and strength could lift.

We now needed eight more beacons. Who was going to build them? Fortunately, the late Cam Pierce, K6RU, another NCDXF Board Member, took on the project with great enthusiasm. He had the control circuit boards designed and built, cabinets designed and made, cables fabricated, and the units tested. He turned on a real engineering production line.

The new beacons worked beautifully. We put up two quad loops at right angles, complete with a phasing box, designed by Mike Stahl, K6MYC, then at KLM Electronics. At about the same time, we received the call W6WX/B for the beacon. NCDXF had acquired the call after the untimely death of a well-known local DXer, Dave Baker, W6WX. That beacon was on the air almost continuously until 1990, when it was stolen from the trailer!

As Cam Pierce was building beacons, we began to contact potential beacon station operators spaced around the world. At the United Nations, we talked to Dr. Max de Hensler, HB9RS, "Mr. U.N. Amateur Radio." Max immediately said yes, he would like to operate a beacon there. Martti Laine, OH2BH, arranged for a beacon at the University of Helsinki and also in Madeira. Local DX Club friend Bruno Bienenfeld, AA6AD, introduced us to an astronomy professor, Dr. Ahron Slonim, 4X4FQ, at his alma mater, Tel Aviv University. Kan Mizoguchi, JA1BK, introduced the beacon idea to the JARL. We also contacted old DX friend ZS6DN for a good location in the Southern Hemisphere. And at Honolulu City College, we spoke with Professor Bob Jones, KH6O. Later we received approval from Radio Club Argentina to put a

beacon in Buenos Aires. Here were eight groups ready to operate a beacon and join W6WX/B at Stanford to complete the first World-Wide Beacon Network.
These new beacons were unique. Each would transmit the same one-minute message in sequence one after the other on 14.1 MHz. The message was the same as before: callsign at 100 watts, then four 9-second dashes at power levels descending from 100 watts to 10 watts, to 1 watt, to 0.1 watt, then back to 100 watts to sign-off. This same message has been transmitted on 14.1 MHz by beacons for almost 14 years.
Beacons were distributed to the operators as they were completed and tested. They have all been in almost continuous operation since being put on the air. We have had two thefts, one at W6WX/B, the other at JA2IGY. Lightning struck a tree which crashed into the antenna at ZS6DN/B. A hurricane flattened the vertical at KH6O/B. Once in a great while something did go wrong with the beacon or power supply, but was repaired locally. But the TS-120s, in general, were remarkably free of problems. This is a very good record, considering that they were on the air continuously for between 10 to 12 years each.
The International Amateur Radio Union (IARU) had been interested in beacons on a world-wide basis for many years. In 1984, at an IARU Advisory Council meeting, Alberto Shaio, HK3DEU, then Secretary of Region 2 of IARU, had an idea. He suggested that a frequency and time-sharing network, as used in the NCDXF system, would be the best way to present beacons on a world-wide basis. We talked it over and have been working together ever since.
Somewhat later, it was decided that the network should be expanded and up-graded to a multiband network. Also, we had ideas about expanding the number of beacons. But back to the old problem -- who would do the work?
Quite fortuitously, at a meeting of the Northern California Contest Club in 1988, this writer met Bob Fabry, N6EK, retired Professor of Computer Science at the University of California, Berkeley. Somehow we drifted into a conversation about beacons and Bob said he would be interested in building rather than programming for a while. I suggested he talk to Dave Leeson, W6QHS, who designed the present generation of beacons, and who just happened to be sitting at the next table. They immediately started drawing pictures on the table and closely collaborated over many months until Bob had a prototype. Thus was born the new generation of beacons.
We wanted to shorten the time of each beacon’s transmission so we could increase the number of beacons without stretching listening time beyond listener attention span. So, Bob recorded beacon messages at various speeds, from about 10 to 20 seconds; that is, beacon call, then four short, power-stepping dashes only. He played the tape for the Directors of NCDXF, and we voted unanimously that 12 seconds would be about right. The same tape was played for a meeting of the Executive Committee of IARU Region 2. They agreed that 12-15 seconds was good. However, as a practical matter, Bob used a 10 second transmission for each beacon. This allows six beacons per minute, or 18 per three minutes, which is the number of beacons we wished to use.
Originally it was planned to use the Kenwood TS-140 transceiver for the beacon transmitter. However, various technical factors pointed to the Kenwood TS-50 as the better transmitter to use. It should be stated that Kenwood Corporation donated 16 of these transceivers to the International Beacon Project, for which we are sincerely grateful. Kenwood requested that a plaque be affixed to each TS-50 that states that the unit is dedicated to the memory of Jim Rafferty, N6RJ.
Bob constructed a control unit to control the functions of bandswitching and power stepping the beacon. He also used the Trimble Global Positioning System (GPS) receiver as a time control unit to assure accurate functions. Everything’s state-of-the-art in this new system.
As this new beacon was being crafted, we went to work with the IARU, with their worldwide associations, to secure additional beacon locations, principally in the Southern

Hemisphere. As I write this in September 1996, Radio Club of Kenya, Radio Club Peruano, Radio Club Venezuelano, Radio Amateurs of Canada, New Zealand Amateur Radio Transmitters, Wireless Institute of Australia, Chinese Radio Sports Association, and Radio Club of Sri Lanka have accepted our invitation to join the network. One location is being held for Central Russia. These additions will bring the total number of beacons in the network to 18.

Frequencies were chosen for the five new bands after a survey of several months by Bob Knowles, ZL1BAD, and his worldwide crew at the IARU Monitoring Service. Frequencies chosen were 14.100, 18.110, 21.150, 24930, and 28.200 MHz. We are quite aware that 14.100 MHz is in the middle of packet station QRM. However, W6WX is limited to that frequency because of our FCC license. Actually 14.100 has been designated on the IARU band plan as a guarded frequency for the beacon network for many years. We are hopeful that packeteers will give a little up and down to keep 14.100 clear for the network.

Distribution of the new five-band beacons began in the fall of 1995. As of September 1, 1996, twelve of the 18 systems have been built and shipped. Six of the units are on the air and easily copiable. When the entire network is operational, a listener will be able to hear beacons from all parts of the world on a given frequency in a three-minute period. Alternatively, the listener can follow a single beacon through the bands and determine the best band open to that area.

We are grateful to the Universities, National Societies, and individuals who have volunteered to operate the beacons in this expanded network. It will be interesting to monitor the beacons during the increase in HF band activity as the sunspot cycle passes through its minimum and begins its climb back to DX glory!

(Reference: The NCDXF/IARU International Beacon Project, by John Troster, W6ISQ, and Robert Fabry, N6EK, QST, October and November 1994).

NCDXF/IARU Beacon Transmission Schedule
Each beacon transmits every three minutes, day and night. This table gives the minute and second of the start of the first transmission within the hour for each beacon on each frequency. A transmission consists of the callsign of the beacon sent at 22 words per minute followed by four one-second dashes. The callsign and the first dash are sent at 100 watts. The remaining dashes are sent at 10 watts, 1 watt and 100 milliwatts.
Search the DX Summit Database for recent reception reports by callsign.
If you can hear a beacon now, send a report to DX Summit.

3134. CQ TO REVAMP PUBLICATION SCHEDULE FOR CONTEST RESULTS; MAJOR RESULTS TO APPEAR FOUR MONTHS EARLIER

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-08-02 07:00:19 UTC
From: Yb land Dx club
Topic: 3134 Message: 3134

http://cqnewsroom.blogspot.com/2012/08/cq-to-revamp-publication-schedule-for.html

CQ TO REVAMP PUBLICATION SCHEDULE FOR CONTEST RESULTS; MAJOR RESULTS TO APPEAR FOUR MONTHS EARLIER

(Hicksville, NY August 1, 2012) -- CQ magazine will embark on a major reorganization of its editorial content in order to publish contest results significantly sooner, Editor Rich Moseson, W2VU, announced today. On average, contest results will appear four months sooner than at present. The new schedule will be phased in over the course of 2013 and will be fully in place by 2014.

"The phase-in is necessary because of new and old dates overlapping," Moseson explained, "as well as scheduling needs for non-contest articles including our special focus issues and Dayton new product reports. As a result, some contest results will be temporarily relocated in 2013 and some specials will be rearranged as well.

"In addition, there will be two sets of CQ WPX Contest results published in 2013 -- the 2012 scores in January (SSB) and February (CW), followed by the 2013 results in September (SSB) and November (CW). The CQ World Wide DX Contest results, which currently appear in the August (SSB) and September (CW) issues, will be published as of 2013 in the April and May issues, respectively. For one year only (2013), the CQ World Wide VHF Contest results will be published in CQ VHF magazine, and will return to CQ as of 2014, appearing in the January issue."

This schedule change has been made possible by the fact that the vast majority of contest entrants submit their logs online, as well as advancements in technology for log-checking, earlier log submission deadlines announced last month and advances in publishing technology.

"For years, both participants and contest directors have been asking us to publish the results sooner," Moseson explained, "and at last, all of the pieces have fallen into place to make it possible. The new schedule represents the minimum amount of time needed to not only collect and process the logs, but to resolve issues with problem logs and take the necessary steps to assure the ongoing integrity of our contest results."

A complete calendar of contest results issues for 2013 and 2014 will be posted on the CQ website at <www.cq-amateur-radio.com>.

3135. Ham Radio Deluxe v5.24.28 Release Announcement

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-08-02 07:01:15 UTC
From: Yb land Dx club
Topic: 3135 Message: 3135

http://forums.qrz.com/showthread.php?356006-Ham-Radio-Deluxe-v5-24-28-Release-Announcement

Ham Radio Deluxe v5.24.28 Release Announcement
HRD Software, LLC announces the release of Ham Radio Deluxe 5.24.28
at http://www.ham-radio-deluxe.com.
>
>Mike Carper, WA9PIE, said, “We’ve doubled the number of testers and the results reflect the level of effort they’ve put into it. The response we’re gotten with the ‘soft launches’ shows the long hours invested by our development team have made v5.24.28 the most solid release ever.”
>
>Respected DXer, contester and DX himself, Jim Kehler - KH2D, has a background in software development and said, “This version is light years ahead of anything I've seen so far. It has a vastly improved cluster interface and a DXCC picker that is so accurate it will make your record keeping a breeze. The Beta team has outdone themselves with this release. I can't wait to see what v6.0 looks like.”
>
>Rick Ruhl, W4PC, said, “We’ve completed many v6.0 features and having a solid base to build them on was the most important thing. I’m always willing to push the release date later to make sure the program is solid. None of the purchasers of the pre-order 6.0 have lost any support time; in fact, the ones that bought in February got an extra 3-4 months of support for 5.x, not a bad deal for $59.95.”
>
>HRD will also be sending out a newsletter in the next few weeks to keep the customers updated on the progress of v6.0.
>
>This is the final release of the v5.x product that will continue to be available for free. The company has continued parallel development of v6.0 and intends to release it by the end of summer 2012.
>
>Version 6.x will have many new features which include FSK support, a new QSL and awards tracking interface, improved worked status alerting, support for AR Cluster, label printing, and the Super Sweeper in Digital Master. Super Sweeper will allow multiple signals in multiple modes to be decoded in a single window. New radios and rotor controllers are already implemented in the 6.0 pre-beta the beta team has.
>
>The discounted pre-buy price of $59.95 for v6.0 is being extended for 30 days from this press release. The price will then increase to $69.95 until the v6.0 product ships. This includes technical support for v5.2x. Those that have purchased or will purchase the v5.2x support will receive one year of support from the date of the v6.0 release. The retail price for v6.0 will be $79.95 when the v6.0 product ships.
>
>You can purchase and download the product at http://www.ham-radio-deluxe.com
>

DxSpot 1.0.1 now available in the iTunes App Store
Press Release
>July 19, 2012
>Contact: Bob Chandler, WB2ETR
>
>FOR IMMEDIATE RELEASE
>
>Green Creek Technology, LLC announced today the release of DxSpot version 1.0.1 for iPhone, iPad and iPod touch.
>
>DxSpot is your mobile access into the Amateur Radio DX cluster network. With DxSpot you can connect to the DX cluster of your choice. The internal database supplies the connection parameters to over 300 DX clusters. Once connected enjoy formatted table views of DX spots, DXCC information, connected users, cluster announcements, colorized WWV propagation data, and keep current with the latest DX news.
>
>Please note: This application is for licensed Amateur Radio operators. A valid amateur radio call sign is required. Please refer
to http://www.GreenCreekTechnology.com/apps/DxSpot for more information.
>
>Features include:
>
>
> * The DxSpot database contains the connection parameters for over 300 Internet DX Clusters
> * Connection parameters can be customized to access new or private clusters
> * Automatic cluster logon including optional password entry
> * Telnet access to the cluster console
> * Ability to enter cluster commands
> * Monitors DX spots in real time creating formatted table displays
> * Display colorized WWV propagation data
> * Display users currently connected to the cluster
> * Display cluster announcements
> * Automatic QRZ.COM WEB page search by DX, spotter or User call signs
> * DXCC entity display containing: DXCC country name, flag, DXCC prefix, entity number, continent, CQ / ITU zones, latitude/longitude and GMT time offset
> * DXCC entity displayable on the world map
> * Display DX news from the Ohio/Penn DX (OPDX) bulletin
>Device Requirements:
>
>
> * iPhone, iPad and iPod Touch

> * Requires IOS 3.2 or later
> * 1.2 MB
>Pricing and Availability:
>DxSpot is available worldwide exclusively through the iTunes App Store and priced at $3.99 (USD).
>
>For more information, visit us online:
>
>DxSpot: http://www.greencreektechnology.com/
>
>iTunes Download: http://itunes.apple.com/us/app/dxspo...6666?ls=1&mt=8

OM,
Mau tanya :
- Karena QTC hanya sebagai additional, apakah berarti bisa "No QTC".
- Apakah kita harus menerima QTC Traffic yg akan disampaikan dan harus meneruskan lagi
- Apakah kalo kita menerima QTC, kita juga harus bertukar QTC

Maaf pertanyaan awam karena belum pernah tahu, jangan sampai seperti IOTA kontes kemarin ada yg ditanya IOTA numbernya - jawabannya IOTA 2012.

73 es tnx
hen

http://www.darc.de/referate/dx/contest/waedc/en/rules/

Worked All Europe DX Contest - Rules 2012
(2012-06-26)
The Deutscher Amateur Radio Club (DARC) invites radio amateurs world wide to participate in the annual WAE DX Contest.
1 Times
CW: August, second full weekend
Saturday, August 11, 2012, 0000 UTC until Sunday, August 12, 2012, 2359 UTC
SSB: September, second full weekend
Saturday, September 8, 2012, 0000 UTC until Sunday, September 9, 2012, 2359 UTC
RTTY: November, second full weekend
Saturday, November 10, 2012, 0000 UTC until Sunday, November 11, 2012, 2359 UTC
2 Bands
3.5 - 7 - 14 - 21 - 28 MHz.
According to IARU recommendations operation should be avoided outside contest-preferred segments. No operation to take place on:
CW : 3560-3800; 7040-7200; 14060-14350 kHz
SSB: 3650-3700; 7050-7060; 7100-7130; 14100-14125; 14300-14350 kHz.
3 Categories
* SINGLE-OP LOW
Max. output 100 watts - all bands. Only one signal
permitted at any time.
* SINGLE-OP HIGH
Output higher than 100 watts - all bands. Only one signal permitted at any time.
* MULTI-OP

Band changes are allowed every 10 minutes; this includes all activities of a main station, including QSO & QTC traffic and CQing.
Only exception: Working of a multiplier. Other transmitters may be used in parallel to the main station to work multipliers on other bands.
* SWL
(see §12)
Notes:
* Transmitters, receivers and antennas used in the contest must be located within a 2 km diameter circle.
* The use of DX spotting nets is allowed in all categories.
4 Off Times
Single Operator stations may only operate 36 out of the 48-hour contest period.
The total of 12 hours off time may be taken in one part but not more than three parts. The off times must be shown on the summary sheet. If operation is interrupted for more than 12 hours the three longest off time periods must be a minimum of 12 hours.
5 Exchange
A contest QSO can only be conducted between a European and a non-European station (exception: RTTY, see §13). The exchange consists of RS/RST and a progressive serial number starting with 001. If the station worked does not send a serial number, log the contact with number 000. Each station can be credited only once per band.
6 Multiplier
For non-European stations the multiplier is the number of countries defined in the WAE Country List (see below) worked per band.
For European stations every non-European DXCC entity counts as a multiplier.
Exception: In the following countries up to ten numerical call areas count as multipliers: W, VE, VK, ZL, ZS, JA, PY and RA8/RA9 and RAØ -- without respect to their geographical location.
Examples: W1, K1, KA1 and K3../1 count as W1;
VE1, VO1 und VY1 count as VE1;
JR4, 7M4 und 7K4 count as JA4;
ZL2 and ZL6 are two different multipliers.
Multiplier bonus: Country multiplier points are "weighted" by band. Multiply the number of countries worked on 3.5 MHz by four, on 7 MHz by three, and on 14/21/28 MHz by two. The total multiplier is the sum of the weighted multiplier points of all bands.
7 QTC Traffic
Additional points can be achieved by QTCs. A QTC is the report of a contest QSO back to a European station (exception: RTTY, see §13).
The following rules apply:
1. A QTC contains time, call sign and serial number of the reported QSO. Example: "1307 DA1AA 431" means that DA1AA was worked at 1307 UTC and sent serial number 431.
2. Each QSO may only be reported once as a QTC. The QTC may not be reported back to the original station.
3. Every QTC that was correctly transferred, counts one point for the sender and one point for the receiver.
4. Two stations may exchange up to 10 QTCs maximum. The two stations may establish contact several times to complete the quota.
5. QTCs are transferred by means of QTC series. A QTC series is a block of one (minimum) to ten (maximum) QTCs. QTC series are numbered using the following scheme: The first figure is the progressive serial number starting with one; the second figure denotes the number of QTCs in the series. Example: "QTC 3/7" means this is the third QTC series transmitted by

this station and it contains seven QTCs.
6. For every QTC series that is transmitted or received, the QTC number, time and frequency band of the QTC transmission must be logged. If any of this data is missing from your log, no credit will be given for this QTC series.
8 Scoring
The final score is the result of total QSOs plus QTCs on all bands multiplied by the sum of all multipliers weighted by the band bonus factor (see §6).
9 Disqualification
Violation of the rules of the contest or unsportsmanlike conduct will be deemed sufficient cause for disqualification. The decisions of the contest-committee are final.
10 Submissions
URL: http://www.waedc.de
Messages to contest manager (no logs): waedc-info@...
Logs need to be sent in STF or Cabrillo-Format to the following e-mail address:WAEDC CW : waecw@... WAEDC SSB : waessb@... WAEDC RTTY : waertty@...
Be sure to put the station call sign into the subject of each message.
By submitting an electronic log, the participant claims to fully accept the rules of the contest. A written declaration is not necessary.
Note: After publication of the results all logs will be put
into the DARC Contest Logbook (DCL).
Hand-written logs:
After the contest use a proper logging program or LM from DL8WAA to enter your data.
See Link: http://contestsoftware.com/e/home.htm
If you do not have a computer, please ask a friend or family member to import the log.
11 DX & Contest Club Competition
The club score is calculated by adding the final results of all participating club members in all three WAE contests, excluding SWLs. To be counted, the name of the club has to be indicated in the log on a separate header line using the keyword "CLUB".
The club must not be an official national amateur radio club. For a club to be listed, a minimum of three logs must be submitted.
A trophy is sponsored for the top DX (non-EU) and the top EU clubs.
For DL stations participating in the German DARC/VFDB-Clubmeisterschaft put your DOK in the log on a separate header line using the keyword "SPECIFIC".
12 Special Rules for SWLs
SWLs record stations working in the WAEDC. Participation is only possible as a single operator all bands. Every call sign heard - European or non-European station - may be credited only once per band. Both call signs of a contest QSO have to be recorded.
Each station that is logged including the serial number that was sent by that station, counts one point. Every complete QTC which includes all QTC series information (up to a maximum of 10 per station) also counts one point.
Multipliers are counted according to the criteria indicated in §6, but both European and non-European multipliers are counted. A call sign can only be counted as a multiplier, if the serial number it sent was recorded. In the best case, for a completely recorded QSO, two points and two multipliers can be credited.
13 Special Rules for RTTY
In the RTTY portion of the WAEDC there are no continental limits; everybody can work everybody. Only QTC traffic must be performed between different continents.
Every station may send and receive QTCs. The sum of QTCs exchanged between two stations (sent plus received) must not exceed 10 (ten).
The European and non-European multipliers indicated in §6 count for all stations.
14 Log Deadline

Log deadline is always two weeks or, more specific, the third Monday after the end of the contest.
CW: August 27; SSB: September 24; RTTY: November 26, 2012.
15 Criteria for WAEDC Awards and Plaques
Continental winners will receive a plaque. Printable online certificates will be availabe for all stations on result publication.
Entries from countries split by numerical call areas for multiplier reasons (see §6) will be listed according to their reported location within their respective geographical call area.
Stations who activate a WAE country for the WAEDC from where no log was received over the last three years will be recognized as "WAEDC Hero" and receive a special prize.
For 2012 these 9 countries are:
1AØ, HV, JW, JW/b, JX, R1F, SV/A, YU8, ZB
Stations who have been in the Top-Ten/Top-Six list for at least five times can apply for a special plaque.
The WAEDC committee reserves the right to honor special contest activities with additional plaques.
WAE Country List
1AØ, 3A, 4O, 4U1I, 4U1V, 9A, 9H, C3, CT, CU, DL, E7, EA, EA6, EI, ER, ES, EU, F, G, GD, GI, GJ, GM, GM/s, GU, GW, HA, HB, HBØ, HV, I, IS, IT, JW, JW/b, JX, LA, LX, LY, LZ, OE, OH, OHØ, OJØ, OK, OM, ON, OY, OZ, PA, R1F, RA, RA2, S5, SM, SP, SV, SV/A, SV5, SV9, T7, TA1, TF, TK, UR, YL, YO, YU, YU8, Z3, ZA, ZB.[R1M removed]

http://www.guernsey.net/~pcooper/waedc.html

The WAE RTTY Contest and QTC's!

What are they all about?

Each year, the WAE RTTY Contest comes along, and there are many of us who keep saying "SRI NO QTC" because we simply do not understand what they are all about.
QTC traffic is quite simple, really, and very easy to handle with the right software.
In WAE RTTY, everyone can work everyone, unlike the CW and SSB legs of this contest.
A "QTC" is simply a list of ten contacts made by one or other station, showing the time, callsign worked, and the serial number exchanged. Once a batch has been sent, it cannot be sent again.

There is very little to understand, except that you can only exchange them with someone from another continent, and the batch cannot contain a QSO sent between the two stations doing the exchange. For example, if my 10th QSO in the contest is with AA5AU, and I send him some QTC, I cannot send him that 10th contact, as it contains the QSO made between the two of us.
QTC traffic is normally sent in batches of 10 contacts, and each line contains the time, callsign and serial number of that contact. Each batch is numbered in the format 001/10 meaning the first batch containing 10 contacts.
Although there is no absolute requirement to send or receive a batch containing 10 contacts, this is the default for most contesting software, and is the easiest to handle.

To make life easy for me, I usually aim to get about 100 contacts in the log before I start bothering to send QTC's, as this would give me 10 batches, but you can receive from the outset.
Don't bother trying to exchange them with that weak ZL, whose exchange you only just got after several attempts, as you will end up re-sending them time and time again. Far better is to wait and go for that UA9 with the S9++ signal, or maybe the 5B4 or EA8. Later into the contest, there will be plenty of W's and VE's with good signals that will readily exchange QTC traffic with you.

So, how is it going to happen?
First of all, you will call someone and exchange the usual contest report with them, and one of you will send "TX/RX QTC??". Assuming the answer is yes, then one of you will send, and one will receive. How you decide who will do what is up to you. Some folk use a buffer for each option, and some will tell you what is going to happen. It really doesn't matter who does what, as both parties get the same points for the exchange of QTC's.

For now, I will assume you will be on the receiving end.
He will send QRV? To which you reply QRV, and then he will start sending.
You are looking for the batch number, so watch out for that first. Next comes the actual traffic, and will most likely be one contact per line, unless propagation screws it up.
So, you will end up with something like this:
001/10

0012 G3URA 049
0013/AA5AU/056
0014-RA9FOE-012
etc for ten lines.
Whether there is a space, a dash or a slash between the fields depends on what software is being used to send the data, and is not important.
If you have all the data and the calls look OK, then simply send QSL TU, and let him get on with the contest.
If you have one line of garbage, then just ask for “07 AGN PSE” and he will send line 7 again. If there is more than one line, do it one line at a time, as this is less confusing all round. Too much garbage, and you can ask for ALL AGN PSE.
Once you have all the data, you will need to store it, and how you do that will depend on your software. Some methods of doing this will be explained later.
If you elect to send, then the first batch of 10 QTC’s you send with your contest software will be your first 10 contacts. The second batch will be the next 10, and so on. Once a batch has been sent, it cannot be re-sent, so please do make sure the other guy has all the data correctly before ending the QSO and closing the QTC box.

Now you have handled QTC traffic, what does it mean to you?
Let’s use a simple example, as this will make it clearer.
Suppose you have worked 100 contacts in the contest, and there are 30 mults in that total. This would give you 30 X 100 as a final score, ie 3000 points.
Now, if you received 50 QTC’s from 5 different contacts, you score will now look like this:
30 X (100+50) = 30 X 150 = 4500 points.
This represents a 50% increase in your score, and is well worth the extra points.

Handling QTC traffic with MMTTY.
MMTTY is not able to handle QTC’s directly, but as many of you will be using MMTTY anyway, I have given some thought as to how you might be able to do this task.
You will NOT be able to send any QTC, but it doesn’t really matter whether you send or receive, as 10 points are given to both sender and recipient.

You will need to think about whether you want to create buffers to aid you in this.
It might be useful to have one that says CAN YOU SEND ME QTC? and maybe one that says QRV, and another for QSL AND TU at the end.
If you need a repeat, I would suggest simply doing that on the fly.

Within MMTTY there is a text capture facility, and you could use this to simply receive the QTC traffic, and then save it as a simple text file by the batch number.
Go to FILE| SCREEN TEXT TO FILE and then save the screen text as 001-10.txt or whatever, but please remember to save the callsign of the person that sent them to you.

When you come to sort out your final score, simply add the number of QTC’s to the number of QSO’s and then multiply by the number of mults, but do remember to take into account the bonus points for the various bands.
At the end of the contest, simply use ‘cut & paste’ to copy all of the QTC data to one text file.
When you submit your log, include the QTC file with the rest.

This is not an ideal method, but then neither is using MMTTY alone for contest work. I can only suggest that if you enter contests on a regular basis that you invest on one of the major contest programs such as Writelog or RCKRtty. Although you could use WF1B, please

note that the rules have changed since this software was last updated, and it will not score your log correctly.

Handling QTC Traffic with Writelog.
Writelog is well suited to handling QTC traffic, and is a delight to use.
Before you start the contest, you must ensure that you have the correct buffers set up, as the software uses specific positions in the buffer that you may generally use for other things. You cannot change these buffer positions, so it is vital that you put the correct messages in the right places.
These buffers are in Shift+F8, Shift+F9, Shift+F10 and Shift+F11.

When you start the QTC procedure, you press ALT+R to receive and ALT+S to send. This brings up the right QTC dialogue box that has buttons to send QRV/QSL etc, depending on whether you are sending or receiving.
These buttons are the ones that send the text stored in Shift+F8 to F11, so you must program them in the right order.

When you receive, the RTTY receive window shows the lines, and they change colour when complete. At that point, you can click anywhere in the line to save it to the dialogue box. Do this for each complete line, and then click SAVE once you are happy that you have all the data correct.
When sending, you simply click on the box to send the data. If the other party asks for a fill of a particular line, use Alt+1 to send line one, Alt+2 to send line two etc. Then, once the QTC exchange is complete, simply click the SAVE button and go look for some more QTC’s.

There is plenty of help in the Writelog help files, but don’t try looking for QTC in the index! Go to the CONTENTS at the beginning, and you will see a list of the supported contests. As it may depend on which version of the help file you have, I won’t mention the page number, but look for WAE contest in the Contents.

Handling QTC Traffic with RCKLog.
Thanks to Walter DL4RCK.
To use RCKLog in the WAEDC RTTY Contest with all the features of QTC-Exchange it is recommended that you have a play first, and try a "Test-Log" well before the contest.
When you start the WAEDC RTTY Contest, two additional buttons for QTC send/receive become visible in the RCKLog-Digi-Window. In RTTY mode, these two buttons open the QTC-Exchange-Window. But before using the buttons, the callsign of the other station must be entered in the callsign field.
A special feature of RCKLog is to detect the QTC-number when receiving callsigns in the receiving window and mark those calls.
Example: "CQ CQ CONTEST DL4RCK (10 QTC) DL4RCK (10 QTC) CQ".
It is also recommended that you switch on the option to "Save received text on hard drive" so that you have a backup after the contest and to prevent errors.

Sending QTC's:
Enter the callsign of the other station in the callsign field in the main window of RCKLog.
Click the TX-QTC button in the Digi-Window of RCKLog. The QTC-Exchange window opens with the QTC data to be sent.
Click the button QRV?, the text "QRV?" will be sent to ask the other station if they are ready.
After confirmation click the button Send All. All QTC's will be sent, along with the QTC batch-number.

If the other station has not received one QTC correctly, they will ask you to repeat only this QTC like "AGN 3 3 3". This means you must send QTC #3 again. Press the button QTC #3 to repeat and send only the third QTC.
The button QTC x/x sends just the QTC batch number.
If the other station confirms receipt of the QTC's, press the SAVE button to save all on the hard drive. The QTC window will then close. Finally, don't forget to save your QSO after you have finished the QTC-exchange.

Receiving QTC's:
Enter the callsign of the counterpart station in the callsign field of the main window of RCKLog.
Click the button RX-QTC in the Digi-Window of RCKLog. The QTC-Exchange window will open, showing the QTC data fields.
Click the button I am QRV to tell the other station you are ready to receive.
The other station will now send the QTC-group-number and the QTC's.
All received data can be saved automatically by a single mouse click (NOT DOUBLE CLICK) from the DIGI-receiving window to the QTC-window.
First click the QTC-Group-Number. This will be saved in the GRP/NUM field in the QTC-window and the curson-focus will move to the QTC#1 data-field.
After receiving QTC#1 completely, save it by a single mouse click, and then the cursor will move to the QTC#2 field. Repeat the process with QTC#2, QTC#3, etc.
If you receive a QTC wrong, leave it for now. Click the mouse in the next QTC-field of the QTC-window and carry on.
At the end, click on the button next to the missing QTC number, and it will send "AGN 3 3 3" to ask for QTC #3.
Click in the QTC place, and when it is received corretcly, click on it and it will fill that field.
Once you have all the QTC correctly, click on the "ALL OK TNX" button to send exactly that, and then you can click on the SAVE button to save it all to disk.
If you have many errors in the QTC traffic, you can send ALL AGN.

Handling QTC Traffic with MixW.
This info was supplied by Klaus DL1DTL.
Please check the MixW website for a full explanation of handling QTC traffic.
I have no idea as to how MixW handles QTC traffic, so cannot make any comments, other than to provide some basic help here.
Click HERE to go to the MixW website.

To set up MixW 2 for the WAE RTTY contest:
Delete existing QTCTX.log and QTCRX.log files from MixW directory (if needed).
Set up contest mode with StatsWAE.dll.
To record QTCs from the other station, enter its callsign in the WAE dialog, then select QTCs in RX window, right-click the selection and choose "Add to statistics" from the menu.
To send QTCs, enter the other station's callsign in the WAE dialog, then press/click a button with STATS:GENERATEQTC macro. Use STATS:REPEATQTC macro to repeat the last QTCs.
To generate logfiles, go to File - Search in logfile menu. Then select the WAE contest from the drop-down menu and click Display.
Select all found QSOs and click "to Cabrillo" button.
Answer "Yes" when the program suggests generating logfiles in WAE format.
Then you will get the following files:
WaeRtty.sum - summary sheet.

WaeRtty.all - all contacts in chronological order.
WaeRttyXXm.txt - contacts for band XX.
QTCTX.log and QTCRX.log - QTCs.

Handling QTC Traffic with WF1B.
It is some while since I last used WF1B for RTTY contesting, so I will only give you a brief understanding of how to work the QTC's with this software.
As mentioned before, WF1B has not been updated and will not score the log correctly, so it probably isn't the best program to use.
To get access to the QTC boxes, you have to use Ctrl+S for the SEND QTC box, or Ctrl+R for the receive box.
If you are receiving, then you have to click on EACH field as it comes in, and make sure you click on them in the right order, as trying to change what you have entered is not the easiest thing. When you have all the data, it can be worth winding the squelch up on the radio to stop further lines being decoded, or the QTC data will scroll off the screen!
WF1B prefers to see spaces between the fields, and if you get slashes, then you might find you have to start entering it all by hand. In theory, you can use the right hand mouse button to click on the whole line, BUT ONLY if it is in the right format.

It is possible to edit the entire QTC data after the transmission has ended by typing EDIT SQTC to edit sent QTC, or EDIT RQTC to edit the received QTC into the callsign field.
If this all sounds as though it is hard work with WF1B, then maybe it is! Although I got used to it, and did manage it for many years, it was only when I started using Writelog that I realised how easy it could be with the right software.
Handling QTC Traffic with N1MM.Here is some assistance for using N1MM in the WAEDC, written by Claude VE2FK. PLEASE NOTE that the original text was in French, so I have had it translated into English as the following:
This text is under construction and only a preliminary.

How to manage the WAE RTTY QTC with N1MM.
Each year during the WAE RTTY contest, some contesters see no advantage to exchanging QTC - SRI QTC NO!

First I suggest a reading of the contest rules.
You will notice that it is very advantageous to exchange QTC's.
Basic points are: X4 80m, 40m X3 10-15-X2 and multiplied by the number of DXCC / WAE (see list) regulations.
QTC's then exchanged are each worth one extra point. It is permissible
to exchange a maximum of 10 QTC with the same station, one way or
another. It is also permitted to exchange several times. If you exchange
6 QTC first time, you can later return to that call and exchange the remaining 4.
In the second attempt, you do not have to log the callsign, or an exchange, just the QTC's.
So, QTC is a list of 10 contacts previously made that contains the time, call and contact number:
2345/VA2UP/349
A group of QTC can be transmitted only once, but no problem, the software will manage everything.
In WAE RTTY you can contact everyone but QTC exchange is permitted only with another continent.
You understand that it is advantageous to transmit the QTC group of 10
although this is not a requirement. Each group is identified by QTC

number, eg QTC: 10/07 here it is indicated that the group is # 7 and it
Includes 10 QTC. Each QTC is transmitted on a new line.

At the beginning of the contest it is suggested to accumulate some contacts, I accumulate normally about 60 to 100 contacts before providing QTC. However I always accept QTC's if conditions allow.

In summary, you call a station with the normal exchange of the competition - 599 001
and one who is in RUN asks DO YOU WANT OR HAVE QTC?
If you answer YES, you will be asked QRV? You click CTRL-Z
QRV in the new window for receipt of QTC and the exchange will begin.
Its transmission will include a group number (very important) because it
is part of the QTC group, the QTC followed:
QTC: 12/10 QTC: 12/10
1200/GU0SUP/234
1203/VA2UP/453
1203/DL3TD/623
1204/AA5AU/452
1206/VE2FK/004
1207/DL8WPX/412
1208/VE2RYY/489
1209/I2UIY/2008
1209/VE2AXO/309
1210/W4UK/512

so for a total of 10
Then you click first on the QTC group: 12/10 and it will move
automatically in the correct box. You then click on the next line,
1200/GU0SUP/234 and so on as they appear.

If everything is OK at the end click SAVE QTC in the reception window of QTC and
QSL will be sent to the station and stored in your QTC log.

If there had been an error on a line, the software will indicate in red to draw your attention. The software provides a macro SEND AGN # by # SEND AGN
software clears the error and give free space for the correction.

It is also possible to use the macro ALL AGN PSE.
See the effect of these trades on your point total. Suppose you had
100 contacts and 30 multipliers logged. This gives you 30 X 100 for a
result of 3000 points. If you add 50 QTC from five different stations,
your total is 30 x (100 +50) = 4500 points. An increase of 50%.
QTC exchange with N1MM
N1MM is specially designed for the WAE QTC and exchange is easy and interesting.
Before using N1MM it is important to schedule the program in:
Setup / settings / WAE RTTY Configuration
RQTC
RX Ready OK = {ENTER} {RX} QRV QRV {RX}
ALL AGAIN = {ENTER} {PES ALL AGN {RX}
= {ENTER} AGN AGN QTC: $ $ $ {RX}
SEND QTC = {ENTER}! QSL QSL TU {RX}

SQTC
RU QRV = {ENTER} ARE YOU QRV? {RX}
SEND ALL HEADING = {ENTER} {QTC} {QTC}
SEND ALL ENDING = {ENTER} QSL QSL? {RX}
SAVE QTC = {ENTER} TU DE * {RX}
QTC SPACING = {ENTER}

Default number of QTC to send = 10
Clear all data for That QTC = YES

You will need to program your macros to the main screen (main entry window)
and learn how to use ESM and Right Click. (Recommended)

Info: Digital screen, Setup
RtClick = Return not menu = YES
Enable Digital Call Stacking = YES

Info: Config: ESM = YES
config/configure/Functions Keys/workd dupes = YES

Here are my macros entry window with option NOW
F1 CQ = {TX}{ENTER} WAE * * CQ {RX}{CLEARRIT}
F2 = {EXCH} 599 {EXCH TX} {EXCH} {CALL} {RX}
F3 TU = {TX}{ENTER} TU de * CQ {LOG}{RX}{CLEARRIT}
F4 * = {TX}{ENTER} de * * {RX}
F5 HIS = {ENTER} !
F6 NOW = {TX}{ENTER} ! {LOGTHENGRAB} TU NOW {F5} {F2} {RX}
F7 RPT = {TX}{ENTER} {EXCH} {EXCH} {RX}
F8 AGN = {TX}{ENTER} AGN AGN {RX}
F9 NR?= {TX}{ENTER} NR NR? {RX}
F10 QRX= {TX}{ENTER} QRX QRX {RX}
F11 WIPE = {WIPE}
F12 CL? = {TX}{ENTER} !? {RX}
F1 CQ-QRL? = {TX}{ENTER} QRL QRL? {RX}
F2 EXCH = {TX}{ENTER} ! TU 599 {EXCH} {EXCH} {EXCH} {RX}
F3 TU = {TX} ! TU de * {LOG}{RX}
F4 * = {TX}{ENTER} * * {RX}
F5 HIS = {ENTER} !
F6 GL = {TX}{ENTER} GL {RX}
F7 RPT = {TX}{ENTER} {EXCH} {EXCH} {RX}
F8 AGN = {TX}{ENTER} AGN AGN {RX}
F9 NR? = {TX}{ENTER} NR NR? {RX}
F10 QRX = {TX}{ENTER} QRX QRX {RX}
F11 WIPE = {WIPE}
F12 CL? = {TX}{ENTER} !? {RX}

During the competition the macros in the "Database Window" are rarely used directly
but the method used primarily MSOs etc.. During the competition I prefer to use the
Macro digital screen, they are closer to the screen receipt and
number of 24. It is important to have macros for all situations.

My Macros Screen Digital option NOW
STOP = {STOP} Stop la transmission.

WIPE = {WIPE}
NOW = {F6}
QRU/cul = {TX}{ENTER} QRU QRU CUL {RX}

QRU / ha? = {TX} {ENTER} {ENTER} QRU QRU DO YOU HAVE QTC? {RX}
R / HA? = {F2} {TX} {ENTER} DO YOU HAVE QTC? {LOG} {RX}
TU/L = {TX}{ENTER} TU {CALL}{LOG} DE * CQ {RX}
QRU/ha? = {TX}{ENTER} QRU QRU {ENTER} DO YOU HAVE QTC? {RX}
R/HA? = {TX} {F2}{ENTER} DO YOU HAVE QTC? {LOG} {RX}
TU/HA? = {TX}{ENTER} ! TU {ENTER}{LOG} DO YOU HAVE QTC? {RX}
QTC-ME = {TX}{ENTER} * * {ENTER} ANY QTC FOR ME? {RX}
GRNR? = {TX}{ENTER} GROUP NR AGN {RX}
QRZ = {TX}{ENTER} QRZ QRZ {RX}
LOG = {LOG}
MCI/L = {TX}{ENTER} MERCI {NAME}{LOG} DE * CQ {RX}
NR? = {TX}{ENTER} NR NR? {RX}
MYC = {TX}{ENTER} * * {RX}
MY2RL = {TX}{ENTER} DE * * * {ENTER} TU 599 {EXCH} {EXCH} {LOG} {RX}
QRL = {TX}{ENTER} QRL QRL TU {RX}
NOcpy = {TX}{ENTER} SRI POOR CPY CUL {RX}
TX = {CTRL-Y}
RX = {CTRL-Y}

Obviously the abbreviations used and information here are personal and may be modified to your choice.
CTR-Z ou {DIGQTCR} {DIGQTCS}
N1MM has a special screen and further for receiving and
transmission of QTC. Macros QRV? SEND AGN QSL
are available.

To receive QTC press CTRL-Z or {DIGQTCR}
QTC say again to transmit the CTRL-Z or {DIGQTCS}

Tips:
The macros {DIGQTCR} and {DIGQTCS}can be used alone or inserted into other macros - eg:
{TX}{ENTER} DO YOU WANT QTC? {DIGQTCS} {RX} {TX}{ENTER} DO YOU HAVE QTC? {DIGQTCR} {RX}

If by chance you have missed a number of Exchange Group at QTC
by mistake or if you did not put the station callsign in the
Entry Window and the information is known, take notes on paper and it is
possible to manually correct the file on Cabrillo.

There are several useful bits of information on how to use N1MM in the contest, so
do not wait until the day before the contest to experiment!
Check the manual.

During normal contest operation it is nice to have good copy,
if not the error will be broadcast during an exchange of QTC.

If you copy a row (garbage) click anyway and ask for a correction, AGN # so that all are in the QTC order.

N1MM tells you the number of QTC Sent / Unsent / Available.
Do not wait too late in the contest to submit your QTC you could restrict your options.
From an idea by Phil/GU0SUP
Claude VE2FK http://contestgroupduquebec.com/
My thanks to Claude VE2FK for this, I hope it helps you with N1MM!
==========
Good luck, and see you in the contest!
73 de Phil GU0SUP

3141. "QTC's" in WAE contest

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-08-02 15:22:03 UTC
From: Yb land Dx club
Topic: 3141 Message: 3141

http://lists.contesting.com/_writelog/1998-10/msg00034.html

>Would someone who has done this contest be willing to share how you handle >the QTC stuff? I'd like to try it, but have never been in an event that >used QTC's. I've read the Help file, and came away even more confused. To >what extent does Writelog/Rttywrite automate the process? > >73 de AL7L Here is a WAE how to do WAE with WriteLog, I put on the reflector a year or two ago, about the WAE Test..

Subject: WriteLog/Rttyrite WAE QTC info.. I have been ask how to do several things about the QTC exchanges,
thought I better say something before I have several asking the
same questions. ----------
(If you read nothing else read THIS): Shift F-8, F-9, F-10 & F-11
needs to have something like what's below. When you click QRV QSL
in the QTC window something will be there to print. (This is for WAE RTTY, you can send and receive QTC's in RTTY mode out side your own Continent.) Examples: Put something like this in these "Shift" F-Keys: (These are the proper Shift F-Keys Keys for these msg's go in.) Shift F-8 %R%D QSL ALL QTC'S TNX DE K5DJ%R%E Shift F-9 %R%D I'M QRV SEND QTC'S DE K5DJ%R%E Shift F-10 %R%D QSL ALL QTC'S ? DE K5DJ%R%E Shift F-11 %R%D ARE U QRV? DE K5DJ%R%E When you click in either Sending or Receiving QTC's. QRV, QSL or QRV?, QSL? it will print like it supposed to, (if the above msg's are listed.) Log some QTC exchanges and try it out. If you try and send QTC's to a station in your own continent the program won't let you do it.. I had a problem in years past with a different S/W in WAE test,
people asking me what the time was in qtc no# 6 I sent them
several hours ago (sometimes up to 12hrs earlier) using a different
S/W, I used at that time, I couldn't see what I have sent unless I
printed a hard copy when I sent or received QTC's, or print them
on a break. Well you can see them with WriteLog/Rttyrite.. Lets say you sent
K5DJ 10 qtc's several hours ago, on a break I discovered I didn't
get the time on no# 6 of group 11/10 you sent me.. I make a note
of it and the next time I work you I ask you what was the time on
Group 11/10 no#6 I didn't get the time?? All you have to do to
find out is, click or type K5DJ in the call window then Press
CTRL-G.. It will go to the first time we worked in your log, if
that wasn't the qso you sent me qtc's press CTRL-G again, until
you see in the logging window where you sent me qtc's. Then arrow
over to no#6 and see the time and send it. (After all, if I didn't
get the right exchange you don't get credit for it either. This
type of thing log checkers look for because there easy to spot,
they will check the other log to see if your trying to count it,
EVERY TIME)... BTW, you can change the font size to a very small
font and get both the log and the QTC on screen all the time. ("IF"
you can read it that small.. hi) Play around with it a little, you'll love it.. All logged calls will be stacked automatically for QTC exchanges.
Once you have selected WAE RTTY Contest, and have saved it, the

call window will tell you how many QTC's you have to send. The number only goes to Ten because that's all you can send to anyone station. If you have WAE running you will see: (the below example is the call window) SEQ CALL RVC NR Tx-Qtc Country C 1
Tx-Qtc= the number of qtc you can send to the call in the window, The nu# will be seen in this window when a call is listed under CALL... To Send QTC's:
Press Alt-S, a window will come up, it will list how many qtc's you can send up to 10. Next click QRV? to see if the receiving station is ready to receive qtc's (Don't worry it's blank right now.) To Receive QTC's:
Press Alt-R, A blank Screen will appear and you can click on the first number of the time, call, QSO# to bring it to the QTC window, it will go to N0-1 and so on in the receive QTC window. If you have a light purple color back ground just click anywhere in the color and all three parts of the QTC sent will go the next open number on your receive QTC window. If you should need a fill, Say No#6 simply high light No#6 and press No#6 (Not F-6)on the keyboard. It will ask for a fill for Number 6 qtc sent. That's how you do it. One last thing, in the WAE rules, you can't send any station that you have already worked his own callsign and exchange in a QTC group. The program will take care of this for you.. It won't happen. :-) Any other questions pse let me know I'll see what I can do to help.. 73, de Ron K5DJ

http://www.radio-sport.net/waecw_qtc.htm

Some simple talk about QTC's in the WAE CW and SSB contestsBy Jamie Dupree NS3T
If you've done any operating in the WAE CW and SSB contests, you know what a QTC is, or at least you've heard of it.
But maybe the mere mention of it has always sort of scared you away from the contest, since you weren't really sure what to do when someone asked for a QTC.
The first issue is obvious - what is a QTC??
"A QTC is a segment of your WAE log sent to a station in Europe," said Bailey. "Up to ten contacts from your log can be sent to a European station.
"Sending ten contacts is worth the same number of points as making ten QSO's! The Winning European stations will receive more QTC's than they make QSO's," Bailey added.
For information direct from the contest source, go to the DARC web site at http://www.darc.de/referate/dx/fedcw and look at the "Get Ready" tab for audio examples of QTC's.
Bailey laid out this example for radio-sport.net:
"A QTC has a "group" number, like 1/10. This means that this is the FIRST QTC group I am sending and that I will send 10 contacts from my log."
"A European sends "QTC?" or I send "QTC?" and the European stations says yes." DL0WAE: QTC?
VY2MT: QTC 27/10 QRV?
DL0WAE: QRV or R or sometimes just "dit"
VY2MT: 0057 G4BUO 157 (time, callsign worked, serial number received)
DL0WAE: "Dit" or maybe "R"
VY2MT: 0058 HG1S 142
DL0WAE: "Dit"
[...]
VY2MT: 0104 HG6N 203
DL0WAE: QSL QTC 27/10
VY2MT: TU VY2MT
If DL0WAE needs a repeat, he may send "AGN", "Time", "Call", or "NR."
"It is vital that you figure out how your logging software sends QTC's and that you play with the various combinations before the contest," sayd Bailey. "Also, listen to the audio examples on the DARC web site."

3143. QTC pada WAE Contest

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-08-02 15:24:38 UTC
From: Yb land Dx club
Topic: 3143 Message: 3143

http://yb2zds.blogspot.com/2007/08/qtc-pada-wae-contest.html

QTC pada WAE Contest
Mungkin rekan-rekan sering mengikuti Work All Europe Series Contest? Ada beberapa serie pada kontes ini yaitu mode SSB, CW dan RTTY (WAEDC RTTY)? Ada satu point penting di kontes WAEDC ialah QTC.
Apa itu QTC?
Kesan pribadi penulis mengikuti WAE kali pertama adalah QTC sulit dan sukar dimengerti. Setiap kali ada pertanyaan/permintaan untuk menerima/mengirim QTC dengan sedikit malu-malu dijawab dengan : SRI NO QTC, TU GL es 73.
Tapi sekali mencoba QTC esensi Contesting is Fun akan segera lebih terasakan.
Dengan QTC perolehan point secara signifikan dapat ditingkatkan.
Memang ada beberapa pendapat dari contester yang mengatakan bahwa esensi sebuah kontes adalah point dari jumlah QSO yang kita kerjakan bukan dari additional point yang lain. Tetapi kembali ke basic, contesting is fun, dan QTC memberikan keasyikan tersendiri.

Tulisan ini sekedar mengajak untuk saling belajar dan barangkali bisa menjadi motivasi untuk ikutan WAEDC RTTY dan belajar bertukar kirim QTC.
Beberapa aturan baku dari WAE untuk QTC sebagai berikut :
1. Sebuah QTC terdiri dari waktu, callsign dan serial number dari QSO yang dilaporkan. Contoh 0458/YB2EMK/002 berarti bahwa kita telah berhasil ber-QSO dengan YB2EMK pada 0458 UTC dan memberikan serial number 002.
2. Setiap QSO hanya boleh dilaporkan sekali sebagai QTC dan tidak boleh dilaporkan kembali ke stasiun aslinya.
3. Sebuah QTC terdiri dari minimum 1 dan maksimum 10 data QSO.
4. Pastikan bahwa stasiun yang akan kita ajak bertukar QTC berbeda continent, QTC hanya valid untuk stasiun radio yang berbeda continent.
5. Untuk contoh QTC handle diberikan contoh menggunakan MixW :
Setting up MixW :
1. Delete existing QTC yang terdapat di directory : QTCTX.log dan QTCRX.log
2. Set up contest mode dengan statsWAE.dll
3. Dialog Window akan muncul di layar. Pada layar dialog ini akan terpampang informasi jumlah QTC yang bisa dipertukarkan. Terlihat bahwa telah terkirimkan QTC#1 yang terdiri dari 10 data QTC, dan masih tersisa 2 buah QTC yang siap untuk dikirimkan.
6. Tambahkan pada macro pada saat confirmed exchange misalkan : TX/RX QTC?
7. Untuk menerima QTC :
Beritahukan bahwa Anda telah siap untuk menerima QTC dengan mengirim QRV for QTC.
Entry-kan callsign lawan pada dialog, highlight QTC yang diterima dan klik kanan mouse, sorot pada add to statistic dan klik pada menu otomatis QTC akan ditampilkan pada dialog window.
8. Untuk mengirim QTC:
Buat macro untuk generate QTC:
QSL de pse k ,
dan untuk untuk mengulang pengiriman QTC buat macro:
<> QSL DE K

Tanyakan kesiapan lawan QSO untuk menerima QTC, misal QRV for QTC?.
Apabila lawan QSO sudah QRV segera kirimkan QTC Anda. Ulang sebagian atau keseluruhan apabila dikehendaki.
Contoh Format QTC yang terkirim :
QTC 1/10 for UT2UZ
0458-YB2EMK-002
0458-YB5BO-010
0459-YB0DPO-002
0459-AA5AU-020
0459-EU1MM-015
0500-YB0ECT-002
0501-DJ3NG-020
0502-JS1OYN-012
0502-JH1BHK-020
0502-AI9T-050
UT2UZ QSL de YB2ECG pse k
9. Yakinkan bahwa kondisi propagasi benar-benar bagus. Kondisi propagasi dengan QRM akan menyusahkan di dalam bertukar QTC yang memaksa kita untuk mengulang-ulang QTC.
10. Untuk meng-generate logfile, ke menu File, search logfile menu dan pilih WAE contest dan klik display. Select seluruh QSO dan klik to Cabrillo button. Klik Yes untuk meng-generate logfile dalam format WAE. Dari statistik di bawah terlihat peningkatan point :
- Point QSO : 12x14=168
- Point QTC : 10x14=140
- Total : 22x14=308 (45% kenaikan point)
11. Akan terbentuk beberapa file :
WaeRTTY.sum: summary
WaeRTT.all: log QSO
WaeRttyXXm.txt contact pada band XXm,
QTCTX.log: berisi QTC yang terkirim
QTCRX.log yang berisi QTC yang diterimakan.

Demikian sekilas tentang QTC handle. Jadi kalau anda membaca di screen TX/RX QTC? Jawablah dengan yakin QRV for QTC! Happy contesting!

3144. Handling QTC WAE dengan MixW

Yahoo group: YBDXC_News (2012-06 — 2012-12)

Handling QTC WAE dengan MixW
October 30, 2008 in Contesting, Elmering | Tags: HF, Kontesting, MixW, RTTY
Ah, sebentar lagi bulan November. Dan seperti biasanya di minggu awal bulan November, annually di kalangan digital kontester, terutama RTTY kontester adalah diselenggarakannya WAE RTTY Contest, Work All Europe Contest mode RTTY.
Salah satu hal menarik dari seri kontes WAE adalah fitur QTC. QTC secara sederhana adalah serangkaian/daftar, biasanya terdiri atas 10 data maksimum dan 1 data minimum, informasi mengenai QSO yang terdiri atas waktu, 'worked' stasiun dan pertukaran/exchange (serial number). Berbeda dengan mode ssb/cw yang menghendaki pertukaran QTC hanya sah dengan stasiun dari EU, namun untuk RTTY pertukaran sah QTC hanya boleh dilakukan antar dua benua/continent yang berbeda dan 'everybody works everybody' QSO.
Salah satu software yang menurut saya 'very ultimate' adalah MixW, bahkan beberapa digital contester memberikan julukan sebagai 'the Swiss Army Knife' Digital mode, berkenaan dengan multimode dan kemudahan di dalam handling-nya, terutama di dalam menghandle QTC trafic.
Masih inget betul saat mengikuti WAE RTTY, setiap kali ada permintaan QTC? saya dengan sedikit tersipu selalu menjawab : SRI NO QTC! Ha ha…. padahal kalau kita dalami lebih lanjut perihal QTC adalah 'mudah' dan sangat menyenangkan. Dengan melakukan pertukaran QTC akan menambahkan point score pada WAE Contest.
Langkah-langkah QTC handle pada MixW :
1. Sebelum memulai MixW pastikan dan hapus file QTCTX.log dan QTCRX.log pada folder directory program MixW Anda.
2. Jalankan MixW dan setup contest WAE dengan memilih statistik WAE [download StatsWAE.dll di MixW.
3. Pada screen layar akan muncul WAE Dialog yang akan berfungsi untuk mengelola kirim/terima QTC.
4. Buatlah 2 macro; namakan saja SendQTC dengan <STATS:GENERATEQTC> untuk mengirimkan QTC dan repeatQTC dengan <STATS:REPEATQTC> untuk mengulang pengiriman QTC apabila dikehendaki.
5. Untuk mengirimkan QTC pastikan bahwa buffer di WAE Dialog cukup tersedia QTC yang hendak dikirimkan, paling efektif adalah pengiriman dengan 10 buah QTC walaupun kita boleh saja mengirimkan satu buah QTC.
6. Tanyakan stasiun lawan dengan QRV? Terus isikan callsign di WAE Dialog dan klik macro pada yang telah kita buat [SendQTC]. Serangkaian QTC otomatis akan terkirim via window kirim/ TX Window.
7. Untuk menerima QTC, masukkan callsign lawan ke WAE Dialog dan klik kursor pada RX window. Segera akan terkirim dari lawan daftar QTC, segera highlight QTC tersebut dan lakukan klik kanan pada mouse dan pilih 'ADD TO STATISTIC'. QTC akan terecord di dalam WAE Dialog.
8. Untuk generate log lakukan converting log pada menu File, search logfile menu dan pilih WAE Contest dari drop-down menu dan klik Display. Pilih dan hightlight seluruh log dan klik 'to Cabrillo'.
9. MixW akan men-sarankan untuk generating log dalam format WAE, jawab dengan yes.
10. Segera akan terbentuk beberapa file : WAERTTY.sum adalah summary sheet, WAERTTY.all adalah QSO dalam urutan kronologis, WAERTTYxxM.txt data QSO pada xx band dan QTCTX.log &

QTCRX.log yang berisi data QTC kirim dan terima, semuanya dalam format TXT yang bisa diedit via Notepad.
11. Beberapa tips yang mungkin berguna adalah pastikan bahwa pertukaran hanya sah antara dua stasiun yang berbeda kontinen, dan untuk menghindari pengulangan-pengulangan [ini yang terkadang bikin frustasi] pastikan kualitas komunikasi/signal cukup baik tanpa terganggu oleh QRM/QSB.
Oke, sedikit cerita tentang QTC sudah dijabarkan, tinggal kemauan Anda untuk mencoba. QRV for QTC? segera jawab dengan yakin QRV to Send, dan bukanya lagi SRI NO QTC!
Cobalah, dan akan Anda temukan kontesting di rtty semakin menarik dan Anda akan mendapatkan bonus tambahan point!
See you on the next WAE RTTY Contest!

Recent Updates July 24, 2012
Added new active stations (July 24, 2012) - (Active Stations)

Updated Diamond DXCC entities list and scorecard with clarifying notes.
The scorecard has not cahnged with regard to any new entities.
  Diamond DXCC
2012 is the 75th anniversary of the ARRL's DXCC Award--the world's preeminent DXing award continues to be DXCC, so reaching the "Diamond milestone" is an event that we all want to celebrate. Going back to the roots of the award, and specifically reading the 1937 DXCC List (January, 1937 QST pages 52-3), we can learn what countries were counted at the onset led us to create the Diamond DXCC Challenge. ...Full story
The intent of this 75th anniversary award is to capture the essence and spirit of the first DXCC List with a fun operating activity that allows us to look back and appreciate the wonderful geography of Amateur Radio. We don't intend to try to fit every existing scrap of land into one of the 1937 entities. Some stations we work today will not count towards any entity from 1937. Nor do some of the places we have chosen to represent a certain entity fully match what existed in 1937. The Diamond DXCC awards are not numbered, so relax and enjoy the chase for this is a year-long operating event. We will continue to roll-out improvements in the web tools and information provided.

http://www.arrl.org/files/file/Diamond%20DXCC/ARRL%20Diamond%20DXCC%20Challenge.pdf
ARRL Diamond DXCC Challenge
2012 is the 75th anniversary of the ARRL's DXCC Award. The world's preeminent DXing award continues to be DXCC, so reaching the "Diamond milestone" is an event that we all want to celebrate. Going back to the roots of the award, and specifically reading the
1937 DXCC List (January, 1937 QST pages 52-3) to learn what countries were counted at the onset led us to create the Diamond DXCC Challenge.

The country list that we will use for the Diamond DXCC Challenge is based upon the list of 231 places shown in 1937. We tried to find corresponding entities today that would represent the places listed in 1937, but there are five places (Baluchistan, British Cameroons, Canal Zone, Hejas, Spanish Morocco, and New Guinea Territory) that were on the oldest list that just don't exist today in a form that could even loosely be represented by someplace current. The Diamond DXCC List represents 226 of the 231
1937 "countries." The list is fascinating and leads us to learn more about world history and how geopolitics has changed leading up to today.

As you "check-off" these entities during the course of 2012 working DX (which is an achievement even today) using spotting networks, pan-adapters, 200 watt rigs, and stacked tribanders, imagine how DXing was different in the early years of radio and DXCC! Working Tibet or Aldabra with 50 watts and crystal-controlled transmitters to simple wire antennas, had to be a thrill like no other in that time for Ham Radio operators.
We anticipate that this award will be very popular thanks to the unique nature of the

entities which we will try to put-into the log in 2012. Not only are there traditional, DXCC entities, but there are cities, Islands on the Air (IOTA by RSGB) island groups, and various sub-political entities inside DXCC entities, such as the Indian State of Goa, and many States in Malaysia and islands in Indonesia. There are even three “countries” that make up Yemen (7O – Yemen, Socotra Islands, and the City of Aden)! Yes, we would like to have even one of them on the air. An interesting factoid about this 1937 list came via the late Jim Maxwell, W6CF. Jim said that the only entity from the 1937 list to be removed without a single QSO being made was Wrangel Island.

The Diamond DXCC Challenge is an “Honor Award” and will not require acquisition or inspection of QSLs or proof of confirmation, although it still will be fun and useful to seek out cards or LoTW confirmations. We will provide forms online to use at your operating position to track what you have worked, and forms for applying for awards and endorsements. As the year goes on, we will also provide hints and tips about what is happening with the Diamond DXCC Award and for instance, who might be on the air from Goa or Gdansk!

The Diamond DXCC certificate will be available for working 100 of the 226 entities, and will be endorsable at 5 levels: 125, 150, 175, 200, and 225. If anyone works all 226, there will be a special award for that remarkable achievement! We hope to publish award recipient’s call signs online during the year, and identify high numbers.

There will be a Diamond DXCC Challenge Honor Roll. The Honor Roll level will be determined by the leader in worked entities submitted to HQ, and the bottom of the Honor Roll will be 9 entities less than that of the leader. Example: If W1AW has worked
165 entities, the bottom of the Honor Roll will be 156 entities. In February, 2013, HQ will issue a final Honor Roll tally with overall leaders.

Dear OM Hendro,

Sedikit mencoba jawab pertanyaan OM Hen.
QTC sifat-nya optional. Biasanya lawan QSO akan menanyakan apakah memiliki QTC buat dia atau barangkali mau menerima QTC dari ybs.
Pengalaman pertama ikutan WAE series nggak mudheng tuh QTC, akhirnya kalau ditanya ya jawabnya ' Sorry No QTC' dan itu no problem.

Tetapi kalau mau menambahkan point score contest, fitur QTC akan sangat bermakna.

Demikian OM Hen.
Semoga bisa membantu.
73 de yb2ecg-Jon.

QTC pada WAE Contest
Mungkin rekan-rekan sering mengikuti Work All Europe Series Contest? Ada beberapa serie pada kontes ini yaitu mode SSB, CW dan RTTY (WAEDC RTTY)? Ada satu point penting di kontes WAEDC ialah QTC.
Apa itu QTC?
Kesan pribadi penulis mengikuti WAE kali pertama adalah QTC sulit dan sukar dimengerti. Setiap kali ada pertanyaan/permintaan untuk menerima/mengirim QTC dengan sedikit malu-malu dijawab dengan : SRI NO QTC, TU GL es 73.
Tapi sekali mencoba QTC esensi Contesting is Fun akan segera lebih terasakan.
Dengan QTC perolehan point secara signifikan dapat ditingkatkan.
Memang ada beberapa pendapat dari contester yang mengatakan bahwa esensi sebuah kontes adalah point dari jumlah QSO yang kita kerjakan bukan dari additional point yang lain. Tetapi kembali ke basic, contesting is fun, dan QTC memberikan keasyikan tersendiri.

Tulisan ini sekedar mengajak untuk saling belajar dan barangkali bisa menjadi motivasi untuk ikutan WAEDC RTTY dan belajar bertukar kirim
QTC.
Beberapa aturan baku dari WAE untuk QTC sebagai berikut :
1. Sebuah QTC terdiri dari waktu, callsign dan serial number dari QSO yang dilaporkan. Contoh 0458/YB2EMK/002 berarti bahwa kita telah berhasil ber-QSO dengan YB2EMK pada 0458 UTC dan memberikan serial number 002.
2. Setiap QSO hanya boleh dilaporkan sekali sebagai QTC dan tidak boleh dilaporkan kembali ke stasiun aslinya.
3. Sebuah QTC terdiri dari minimum 1 dan maksimum 10 data QSO.
4. Pastikan bahwa stasiun yang akan kita ajak bertukar QTC berbeda continent, QTC hanya valid untuk stasiun radio yang berbeda continent.
5. Untuk contoh QTC handle diberikan contoh menggunakan MixW :
Setting up MixW :
1. Delete existing QTC yang terdapat di directory : QTCTX.log dan QTCRX.log
2. Set up contest mode dengan statsWAE.dll
3. Dialog Window akan muncul di layar. Pada layar dialog ini akan terpampang informasi jumlah QTC yang bisa dipertukarkan. Terlihat bahwa telah terkirimkan QTC#1 yang

terdiri dari 10 data QTC, dan masih tersisa 2 buah QTC yang siap untuk dikirimkan.
6. Tambahkan pada macro pada saat confirmed exchange misalkan : TX/RX QTC?
7. Untuk menerima QTC :
Beritahukan bahwa Anda telah siap untuk menerima QTC dengan mengirim QRV for QTC.
Entry-kan callsign lawan pada dialog, highlight QTC yang diterima dan klik kanan mouse, sorot pada add to statistic dan klik pada menu otomatis QTC akan ditampilkan pada dialog window.
8. Untuk mengirim QTC:
Buat macro untuk generate QTC:
QSL de pse k ,
dan untuk untuk mengulang pengiriman QTC buat
macro:
<> QSL DE K
Tanyakan kesiapan lawan QSO untuk menerima QTC, misal QRV for QTC?.
Apabila lawan QSO sudah QRV segera kirimkan QTC Anda. Ulang sebagian atau keseluruhan apabila dikehendaki.
Contoh Format QTC yang terkirim :
QTC 1/10 for UT2UZ
0458-YB2EMK-002
0458-YB5BO-010
0459-YB0DPO-002
0459-AA5AU-020
0459-EU1MM-015
0500-YB0ECT-002
0501-DJ3NG-020
0502-JS1OYN-012
0502-JH1BHK-020
0502-AI9T-050
UT2UZ QSL de YB2ECG pse k
9. Yakinkan bahwa kondisi propagasi benar-benar bagus. Kondisi propagasi dengan QRM akan menyusahkan di dalam bertukar QTC yang memaksa kita untuk mengulang-ulang QTC.
10. Untuk meng-generate logfile, ke menu File, search logfile menu dan pilih WAE contest dan klik display. Select seluruh QSO dan klik to Cabrillo button. Klik Yes untuk meng-generate logfile dalam format WAE. Dari statistik di bawah terlihat peningkatan point :
- Point QSO : 12x14=168
- Point QTC : 10x14=140
- Total :
22x14=308 (45% kenaikan point)
11. Akan terbentuk beberapa file :
WaeRTTY.sum: summary
WaeRTT.all: log QSO
WaeRttyXXm.txt contact pada band XXm,
QTCTX.log: berisi QTC yang terkirim
QTCRX.log yang berisi QTC yang diterimakan.

Demikian sekilas tentang QTC handle. Jadi kalau anda membaca di screen TX/RX QTC? Jawablah dengan yakin QRV for QTC! Happy contesting!

OM Jon,
Terus terang juga kemampuan receive saya kurang bagus apalagi kalo banyak QRM seperti di kontes2, masih harus banyak berlatih.
Mangkanya saya sangat kagum pada beberapa stasiun DXpedition yang kadang dengan sekali sebut callsign, ybs bisa nangkap dengan jelas tanpa salah tanpa saya harus mengulang.
Tapi ada juga stasiun DX yg mungkin salah tangkap callsign saya pada satu QSO sehingga QSL card saya dibalas dg. : "not in the logs" seperti oleh 4O3A tahun 2008, tapi sudah tergantikan th 2012 ini, juga FM5AN & PJ4C.

Dulu sering ikut kontes/game yg pakai QTC, di 2M seru memang mengasyikan, yaitu "Duck Hunting" - sayang sekarang sudah gak populer lagi.
Terima kasih infonya OM Jon.

Dear OM Hendro,

Sedikit mencoba jawab pertanyaan OM Hen.
QTC sifat-nya optional. Biasanya lawan QSO akan menanyakan apakah memiliki QTC buat dia atau barangkali mau menerima QTC dari ybs.
Pengalaman pertama ikutan WAE series nggak mudheng tuh QTC, akhirnya kalau ditanya ya jawabnya ' Sorry No QTC' dan itu no problem.

Tetapi kalau mau menambahkan point score contest, fitur QTC akan sangat bermakna.

Demikian OM Hen.
Semoga bisa membantu.

Dear OM Hendro,

Untuk membantu test kemampuan receiving di logger elektronik semacam N1MM disupport fungsi predictive call.
Kalau di entry log window diberikan satu atau dua huruf suffix/prefix akan muncul predictive call yang kemungkinan sesuai.
Fungsi predictive call ini akan sangat berguna kalau selalu di-update country files-nya dan Super Check Partial Data Base-nya.
Untuk country file bisa diunduh di http://www.country-files.com/ dan untuk SCP bisa diunduh di http://www.supercheckpartial.com/

Demikian, semoga bisa membantu.

DX Bulletin 31 ARLD031
From ARRL Headquarters
Newington CT August 2, 2012
To all radio amateurs

SB DX ARL ARLD031
ARLD031 DX news

This week's bulletin was made possible with information provided by NC1L, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

SPRATLY ISLANDS. John, 9M6XRO and Steve, 9M6DXX will be QRV as 9M4SLL from Pulau Layang Layang, IOTA AS-051, from August 7 to 13. Activity will be on 80 to 10 meters using CW, SSB and RTTY with two stations. QSL via M0URX.

PAKISTAN, AP. Tariq, AP2TN has been active on 30 meters around 2000z. QSL via DJ9ZB.

COMOROS, D6. A group of operators will be QRV as D64K from Ngazidja Island, IOTA AF-007, from August 8 to 21. Activity will be on 160 to 6 meters, and possibly 60 meters, using CW, SSB and RTTY with five stations. QSL via IV3DSH.

FEDERAL REPUBLIC OF GERMANY, DA. Special event station DR50DTANGO is QRV until the end of 2012 to celebrate the 50th anniversary of the Swabia district. QSL via bureau.

ENGLAND, G. Special event station GB2012OSP is QRV until September 9 during the Summer Olympic and Paralympic Sailing events from Portland Heights. QSL direct.

ST. LUCIA, J6. Bill, K9HZ will be QRV as J68HZ from Labrelotte Bay/Castries from August 4 to 19. Activity will be on 40 to 6 meters using CW, SSB and RTTY. QSL direct to home call.

ALAND ISLANDS, OH0. Pasi, OH3WS is QRV as OH0/OH3WS from Eckero until August 3. Activity is in his spare time. QSL to home call.

MARKET REEF, OJ0. After his Aland operation, Pasi, OH3WS will be QRV as OJ0W from August 4 to 10. Activity will be in his spare

time. QSL to home call.

LEBANON, OD. Special event station OD5ARMY is QRV during August in celebration of the founding of the Lebanese Army. QSL via OD5NJ.

DODECANESE, SV5. Roberto, I2RNJ and Piero, IK2IHY will be QRV as SV5/home calls from Rhodos, IOTA EU-001, from August 4 to 11. Activity will be holiday style on the HF bands using mostly SSB. QSL to home calls.

COSTA RICA, TI. Bob, N6OPR and Terry, N0TW are QRV as TI5/K6MQ from Tarimba until August 8. Activity is on the HF bands. This includes an entry in the 10-10 International SSB Summer contest. QSL via N0TW.

CORSICA, TK. Giacomo, IZ3DBA will be QRV as TK/IZ3DBA from August 7 to 12. Activity will be on the HF bands using primarily CW with some SSB. QSL to home call.

BENIN, TY. Patrice, TY2BP has been active on 15 meters using CW around 1330z. QSL via IK2IQD.

EUROPEAN RUSSIA, UA. Special event station R1812SM is QRV during August from various battlefields in the Smolensk region to commemorate the 200th anniversary of the French invasion. QSL via RV3LZ. In addition, special event station R10RLHA is QRV during August to celebrate the 10th jubilee of the Russian Lighthouses Award program. Activity is from several lighthouses. Activity is on 40 to 10 meters using CW and SSB. QSL via RA1QY.

CANADA, VE. Special event station XL31812 is QRV until August 5 from Fort Amherstburg to commemorate the Bicentennial of the War of 1812. QSL via VA3CSS.

NICARAGUA, YN. Ben, TI4SU is QRV as HT9H to commemorate the 250th anniversary of the Battle of the Rio San Juan. QSL to home call.

ROMANIA, YO. Special event station YQ0BIKE is QRV until August 12 during the Cycling tour of Szeklerland. Activity is on the HF bands using CW, SSB and various digital modes. QSL via operators' instructions.

ALBANIA, ZA. Tevfik, TA1HZ is QRV as ZA1TC from Durres until August 7. This includes an entry in the European HF Championship. QSL to home call.

OPERATION APPROVED FOR DXCC CREDIT. The following operation is approved for DXCC credit: Solomon Island, H44UD, 2012 operation.

THIS WEEKEND ON THE RADIO. The ARRL UHF Contest, North American CW QSO Party, 10-10 International SSB Summer Contest, European HF Championship, QRP CW Fox Hunt, NCCC CW Sprint Ladder, TARA Grid Dip Shindig and the RSGB RoPoCo CW are all on tap for this weekend. The

ARS Spartan CW Sprint is scheduled for August 7. The CWops Mini-CWT Test and NAQCC-EU Monthly Sprint are scheduled for August 8. Please see August QST, page 77 and the ARRL and WA7BNM Contest Websites for details.

http://www.supercheckpartial.com/
Super Check Partial Database Files for Amateur Radio Contesting
About SCP
There are contesters out there who can remember every call they have ever worked. For the rest of us, it is all we can do to remember who we worked in the contest just hours before! The Super Check Partial database files provide a list of callsigns used by active contesters. The data comes from Cabrillo logs contributed by contesters themselves. Contributed logs from the past 24 months are used to create the database. These logs are combined and filtered so that they result in a fairly good (but not perfect) list. The files do not contain any QSO data, such as state, CQ zone, Maidenhead Grid Locator, etc. Super Check Partial is a feature that K1EA first introduced in his CT logging software. However, it is now supported by all the major contest logging programs. It enables the use of the database to extend the list of calls that appear in the check partial call window. Used correctly, it can help you more quickly pull a call out of the QRM. Used incorrectly, e.g. to guess calls, it can result in stupid mistakes and significant score reductions. Caveat emptor!
The files provided are a set of super check partial databases created using tools developed by Jim, AD1C and Ken, K1EA. The dta files can be used with CT, WriteLog, TRlog, SD, N1MM Logger, NA, Win-Test, and others. The scp file is for use with Win-Test.
Note: If your callsign does not appear in the latest version of the database and you would like to add it, please send me an email at logs@.... I will add the callsign in the next release. However, remember that this is a database of active contesters. The best way to keep your callsign in the database is to make contest QSOs!
How to Download
Download the zip file to get all of the files, or click on each to download them individually. (Depending on your browser, you may have to right click on the link and select Save Target As...)
Master Files (July 11, 2012)
Below are files for the main Super Check Partial database. These files are generated from all contest logs donated by the contesting community regardless of mode.
File Name
Description
Calls
Size
scp_VER20120711.zip All master files below contained in one zip file. 1318 Kb
master.dta File with all calls.
Use this for international contests where anyone can work anyone. 41,935 1104 Kb
masterdx.dta File with DX calls (outside W/VE)
Use this for DX contests such as the ARRL DX Contest (from W/VE side). 27,849 764 Kb
masusve.dta File with only W/VE calls.
Use this when working from the DX side of the ARRL DX Contest or for W/VE domestic contests. 15,077 347 Kb
masterss.dta File with only W, VE and US Territory calls.
Use this when working the ARRL November Sweepstakes Contest. 15,362 355 Kb
master.scp File with all calls.

For use with Win-Test software. It contains all calls in an ASCII format. 41,935 296 Kb
The main database set of files was created out of 3,196,815 QSOs from 3,269 logs. The full data set contained 98,560 unique calls which were filtered to create the master files.
A version number has been included in all files in the format VERyyyymmdd.
RTTY Master Files (July 11, 2012)
Below are files for the RTTY-only Super Check Partial database. These files are generated using only RTTY contest logs donated by the contesting community.
File Name
Description
Calls
Size
SCPRTTY_VER20120711.zip All RTTY master files below contained in one zip file. 185 Kb
mastertty.dta File with all RTTY calls.
Use this for RTTY contests where anyone can work anyone. 11,615 309 Kb
mastertty.scp File with all RTTY calls.
For use with Win-Test software. It contains all calls in an ASCII format. 11,615 82 Kb
The database set of files was created out of 594,195 QSOs from 868 RTTY logs. The full data set contained 20,437 unique calls which were filtered to create the master files.
A version number has been included in all files in the format VERyyyymmdd.
Log Submission Instructions
The more logs that are contributed, the better the database. Follow the instructions below to have your logs included:
* Send Cabrillo files only!
* File name must be call.log (exactly the same way you submit it to the contest sponsor!)
* Files should be as attachments to an email. You can put them in a zip file, but it is better if you don't.
* Logs from any contest are accepted. Some of the more commonly donated logs come from:
CQ WW DX - CW, Phone, RTTY
CQ WPX - CW, Phone, RTTY
CQ 160M - CW, Phone
ARRL DX - CW, Phone
ARRL Sweepstakes - CW, Phone
ARRL RTTY Roundup
ARRL 10M
ARRL 160M
IARU Radiosport
Russian DX Contest
Worked All Europe - CW, Phone, RTTY
* Only logs from the past 2 years are needed (to keep the data "fresh"). That means you only should submit logs from 2010 and later.
* Submit files at any time. Send them in at the same time you submit to the contest sponsor!
* Send to logs@...
All files submitted become the property of WA1Z and will be used only for the purpose of creating the master call files.
If you would like to have your call blocked from appearing in the SCP files, please send an email tologs@... as well. Some people have chosen to do this because they don't want others to use assistance in copying their callsign.
New versions of the master files may be created at any time. Expect new files in January and October in advance of the Spring and Fall contest seasons. You can view the release

history here.
If you find busted calls in the master files, or you want to have your call excluded from the master files, please send an email to logs@supercheckpartial.com.

OM Jon,
Wuihhh... otak orangtua ini loadingnya makin lambat. HI.
Iya saya pernah lihat rekan yg operate di YE0X waktu ikut kontes, juga untuk mengindari dupes ya.

Di notebook saya sudah diinstal juga N1MM, oleh teman2 waktu acara JakFox (OM Busan, OM Djoko, OM Ndut).

Thanks OM Jon.

OM Ndut & OM Nur,
Mungkin ada masalah dengan log saya, walaupun pengisiannya sih seperti biasa dan untuk kontes lainnya gak ada masalah.
Biasanya sih seperti yg OM Nur Halim bilang sekitar 1 jam malahan di bawah itu.
Saat ini saya lagi coba dari situs resminya IOTA yg diinfokan OM Gun di FB, semoga bisa - masalahnya kasihan 5 kontestan yg bisa kena potongan skornya nanti kalo log gak terkirim juga.

Thanks all.

8.4 Entries must be emailed to iota.logs@... and should be sent as a normal attachment to the e-mail. Send as an uncompressed file. Do NOT send more than one attachment. In the "subject" line of your e-mail message, please include your contest callsign. Please take a moment to check your log via a text editor before sending it, to avoid potential problems. You will receive an acknowledgement by e-mail within 24 hours, directing you to a Web page to complete the submission process, or advising you if there is any problem with your log. Further help on IOTA log submission is available by going to IOTA FAQs.

SB PROP @ ARL $ARLP031
ARLP031 Propagation de K7RA

ZCZC AP32
QST de W1AW
Propagation Forecast Bulletin 31 ARLP031
From Tad Cook, K7RA
Seattle, WA August 3, 2012
To all radio amateurs

SB PROP ARL ARLP031
ARLP031 Propagation de K7RA

Average daily sunspot numbers this week were up over 47 points to 99.3. Average daily solar flux rose nearly 35 points to 131.7.

Solar flux jumped from 139.8 on Tuesday, July 31 to 150.1 on Wednesday, August 1. Predicted solar flux is 135 on August 3-4, 130 on August 5-6, 125 on August 7-9, 130 on August 10-11, and 120 on August 12-13. Solar flux is expected to drop below 100 on August 16-21. Predicted planetary A index is 8 on August 3, 5 on August 4-19, 8 on August 20-21, 5 on August 22-23, then 8, 8, 12 and 8 on August 24-27.

At the beginning of August we have some new sunspot data from our 3-month moving average. The three-month moving averages centered on January through June 2012 are 83.3, 73.7, 71.2, 87.3, 91.5, and 96.5. The average centered on June 2012 is every daily sunspot number from May 1 through July 31 added together, then divided by the number of days, which is 92. You could say that this latest number is the 3-month trailing average, or the 3-month average centered on June. Every month we include a new month of data and drop off an old month.

F.K. Janda, OK1HH says to expect mostly quiet geomagnetic conditions on August 3-4, active to disturbed on August 5, quiet to unsettled August 6-7, mostly quiet August 8, quiet on August 9, active to disturbed again on August 10-11, quiet to active August 12-13, mostly quiet on August 14-15, and quiet to active on August 16-17.

On the NASA Solar Cycle Prediction page, the only thing that has changed over the past few months is the date. This is issued monthly: http://solarscience.msfc.nasa.gov/predict.shtml.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for July 26 through August 1 were 77, 91, 108, 79, 106, 116, and 118, with a mean of 99.3. 10.7 cm flux was 114.7, 123.3, 126.6, 131.4, 136, 139.8, and 150.1, with a mean of 131.7. Estimated planetary A indices were 4, 5, 11, 6, 13, 6, and 6, with a mean of 7.3. Estimated mid-latitude A indices were 3, 5, 11, 6, 11, 5, and 7 with a mean of 6.9.

No 1109

==========

*** 4 2 5 D X N E W S ***

**** DX INFORMATION ****

==========

Edited by I1JQJ & IK1ADH

Direttore Responsabile I2VGW

9H - IK0PEA will be active holiday style as 9H3EA from Bugibba, Malta (EU-023) on 5-17 August. He will operate digital modes and SSB on the HF bands and 6 metres. QSL via home call, direct or bureau.

9M4_spr- Announced frequencies for the 7-13 August 9M4SLL operation from the Spratly Islands [425DXN 1107] are as follows:

CW 3517 7017 10117 14007 18087 21007 24907 28007 kHz
SSB 3803 7058 - 14180 18165 21295 24985 28495 kHz
RTTY 7042 10135 14092 18107 21092 24927 28092 kHz

QSL via M0URX and LoTW. QSLling policy and other information can be found at www.m0urx.com/9m4sll.html.

CT7 - CT1GZB, CT1CSY and CT2JXT will be active as CR6LH from the lighthouse at Cabo da Roca for the ILLW on 18-19 August. They plan to operate SSB, RTTY, PSK31 and QRS CW on as many bands as possible. QSL via CT1GZB, direct or bureau. [TNX CT1GZB]

D6 - Announced frequencies for the 8-21 August D64K operation from the Comoro Islands [425DXN 1107] are as follows:

CW 1826 3506 7006 - 10106 14026 18076 21026 24896 28026 50103
SSB 1845 3780 7060/7150 - 14150 18140 21270 24940 28470 50103
RTTY - - 7035 - 10142 14080 18100 21080 24920 28080

QSL via IV3DSH and LoTW. QSLling policy and other information can be found at www.d64k.net

DL - Mike, DG5LAC will be active holiday style as DG5LAC/p from Amrum Island (EU-042) on 11-24 August. He will be QRV on 80-10 metres SSB. QSL via home call. [TNX DG5LAC]

E5_sc - Once again Henrik, OZ6TL will be active holiday style as E51TLA from Rarotonga (OC-013), South Cooks from 18 November to 8 December. He will operate CW and RTTY. QSL via OZ6TL and LoTW. [TNX OZ6TL]

F - Look for F4BKV/p and F4FET/p to be active from Er Island (EU-107) on 4-5 August, from Raguenes Island (EU-074) on 6 August and from Batz Island (EU-105) on 7-8 August. Each station will have about 300w output and antennas for 40, 20, 17, 15 and 10 metres. As for QSLlling, direct & OQRS via F4BKV only (www.f4bkv.net/oqrs); bureau via individual callsign. [TNX F4BKV]

F - F4FVI, F4GTD, F5TRO, F8BDB and HB9ELV will be active as TM1NOI from Noirmoutier Island (EU-064) on 12-14 August. They plan to be

QRV on 80-10 metres SSB. QSL via F4FVI (bureau) or HB9ELV (direct), plus LoTW and eQSL.

G - Phil, G3SWH will activate the special call M0RSE in 18-19 August. He will operate CW only on all bands. Special QSL via G3SWH, direct or bureau (OQRS at www.g3swh.org.uk); all QSOs will be uploaded to LoTW immediately after the weekend. [TNX G3SWH]

G - John M5JON, Pete M0ILT, Ant MW0JZE and Chris G1VDP will be active as MX0LDG from Lundy Island (EU-120) on 11-16 October. They will have two stations on the air from 6 to midnight (when the island's power closes down) each day, and will operate SSB and possibly some digital modes. QSL via M0URX (please use his OQRS for both direct and bureau cards at http://m0urx.com/oqrs) and LoTW. [TNX G1VDP]

HL - Tai, DS2NMJ will be active as DS2NMJ/2 from Yonghung Island (AS-105) on 12-13 August. He will be QRV on 12 and 15 metres SSB. QSL via home call, direct or bureau. [TNX NG3K]

HZ - The 7Z7AB IOTA expedition to Al-Dhahrah Island (AS-190, new one) [425DXN 1107] will take place on 5-11 October. Look for activity on 160-10 metres SSB, CW and RTTY. QSL via 7Z1CQ. A website is under construction at www.dxcoffee.com/7z7ab/

I - Paolo, IZ5NFD will be active holiday style as IA5/IZ5NFD from Elba Island (EU-028) on 6-12 August. Look for him to operate mainly CW around 5 UTC and after 21 UTC on 40-2 metres. QSL via home call, direct or bureau. [TNX Mediterraneo DX Club]

I - Once again ARI Genova (IQ1GE) will participate in the International Lighthouse/Lightship Weekend (18-19 August). This year they will be QRV as II1PV from the lighthouse at Punta Vagno, as their traditional location (La Lanterna) is being renovated and it is closed to public. QSL direct or bureau. [TNX IZ1BZS]

IS0 - Massimo, I0PNM will be active as IM0/I0PNM from San Pietro Island (EU-165) from 10 August to 3 September. He will operate SSB, RTTY and PSK31 on 20, 15 and 10 metres. QSL via home call (direct). [TNX I0PNM]

JW - Torkel, LA6VJA and Fredrik, LA6TMA will be active as JW6VJA (CW and some SSB) and JW6TMA (digital modes) from Longyearbyen (EU-026), Svalbard on 10-12 August. QSL via home calls. [TNX The Daily DX]

OJ0 - Pasi, OH3WS will be active in his spare time as OJ0W from Market Reef (EU-053) on 4-10 August. QSL via home call. [TNX NG3K]

PA - Marco, IZ3GNG will be active on 40-6 metres SSB as PA/IZ3GNG from Schouwen Duiveland (EU-146) on 8-12 August and from Texel Island (EU-038) on 13-16 August. On 18-20 August he will operate as HB0/IZ3GNG from Liechtenstein (WARC bands only). [TNX IZ3GNG]

PY0S - The PT0S DXpedition to St. Peter and St. Paul Rocks [425DXN 1105] will be on the air from approximately 10 November to the 22nd. Exact dates are subject to weather conditions and other circumstances that may occur on a boat trip. In the meanwhile, AA7JV and PY2XB made a reconnaissance trip to the archipelago. For further information and regular updates please visit http://pt0s.com/

SM - SA0AEK, SA0AEX and SA0ASG will be active as SC0UT/5 on 4-10 August. They will operate SSB on 80-12 metres from Scout Camp Boomerang 2012 on Vassaro Island (EU-084). QSL via bureau to SC0UT. [TNX rsgbiota.org]

SM - Tomas, SM3DMP will be active as SF2CW from Holmon Island (EU-135) on 6-9 August. QSL via home call, direct or bureau. [TNX rsgbiota.org]

SV - Fabio, IZ7FLQ will be active as SV8/IZ7FLQ from various Greek islands on 8-18 August: Lefkada (no IOTA), Ithaki (EU-052), Meganisi (EU-052), Kefallonia (EU-052) and maybe others. QSL via home call, direct or bureau.

TK - Jack, IZ3DBA will now be active as TK/IZ3DBA from Corsica on 4-17 August. He will operate holiday style 80% CW and 20% SSB. QSL via home call.

VK - VK3VCE, VK5KC, VK5LOL, VK5PAS, VK5SN, VK5VW and VK5YX will be active as VI5CW from the lighthouse at Cape Willoughby on Kangaroo Island (OC-139) on 17-20 August. They will be QRV on 80-10 metres. QSL via VK5PAS, direct or bureau, and LoTW. Further information can be found at www.wix.com/simmopa/capewilloughby

VK - VK3HJ, VK4ERM, VK4FPDW, VK4GH, VK4GRA, VK4IO, VK4KDX and VK4MIA will operate CW and SSB as VK4ILH from the lighthouse at Cape Moreton on Moreton Island (OC-137) on 17-19 August, including participation in the International Lighthouse & Lightship Weekend. QSL via VK4MIA, direct or bureau, and LoTW. They have a website at www.capemoreton2012.com

VQ - Chuck, W4XP will be active as VQ9XP from the VQ9X club station on Diego Garcia (AF-006) on 9-25 August. He plans to focus on 6 metres, with some activity in the HF bands if times permits. QSL via home call and LoTW. [TNX The Daily DX]

VU7 - A group of operators from the Bangalore Amateur Radio Club (namely VU2GGM, VU2GSM, VU2JHM, VU2LU, VU2LX and VU2UR) has been granted permission to operate from the Lakshadweep Islands. They will be active as VU7M from Minicoy Island (AS-106) and lighthouse on 13-22 August with a "humble HF station". QSL via VU2JHM. Further information and updates on qrz.com.

YB - Celebrating the 67th anniversary of the proclamation of Indonesian indipendence (17 August 1945), special event station YB67RI will be active on 10-17 August on all bands and modes. QSL via YB2DX (direct) and LoTW.

Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

CY9M ---> Bad weather forecast for 1 August caused CY9M close down earlier than expected, at 16.23 UTC on 31 July, and to leave St. Paul Island a few hours later. The team logged about 33,200 QSOs in 136 hours - see www.cy9m.com/log/ for log search.

DXCC NEWS ---> The recent H44UD operation from the Solomon Islands has been approved for DXCC credit.

PUBLICATION SCHEDULE FOR CQ CONTEST RESULTS ---> "CQ magazine will embark on a major reorganization of its editorial content in order to publish contest results significantly sooner", Editor Rich Moseson (W2VU) announced on 1 August. "On average, contest results will appear four months sooner than at present. The new schedule will be phased in over the course of 2013 and will be fully in place by 2014". Read more at http://cqnewsroom.blogspot.com/

RI0K ---> The RI0K team brought forward their operation from Alyumka (AS-092), and were active as RI0K/p for 14 hours on 28 July (1376 QSOs). On 30 July they were finally able to fly to Lavrentiya, and then to reach and become active from Ratmanova (AS-061) at 7 UTC on the 31st. They planned to QRT around 23.30 UTC on 2 August, but the flight back to the mainland was cancelled because of bad weather. On 3 August RZ3EM reported that "it looks like the team will stay longer on Ratmanova, probably for two more days".

TOP LISTS ---> The latest Topband, Topmode and Toplist listings are now available at www.425dxn.org/awards/toplist/index.html. QSOs confirmed through LoTW or included in on-line logs are eligible for listing. Send your scores, as well as any request for further information, to Luciano Lucini, IK2QPO (ik2qpo[@]425dxn.org).
WUST AWARD ---> The Metro DX Club sponsors the Worked United States Territories (WUST) Award. The 16 WUST territories effective 1 January 2012 are: KG4 (Guantanamo Bay), KH0 (Mariana Islands), KH1 (Baker & Howland Islands), KH2 (Guam), KH3 (Johnston Island), KH4 (Midway Island), KH5 (Palmyra & Jarvis Islands), KH5K (Kingman Reef), KH7K (Kure Island), KH8 (American Samoa), KH8S (Swains Island), KH9 (Wake Island), KP1 (Navassa Island), KP2 (US Virgin Islands), KP4 (Puerto Rico) and KP5 (Desecheo Island). Complete information at www.metrodxclub.com/wust_award.htm; e-mail questions should be sent to awards[@]metrodxclub.com. [TNX W9ILY]

+ SILENT KEYS + Stephen J. Powlishen (K1FO), best known for his Yagi antenna designs and amplifiers for 432 MHz, passed away on 28 July at 60 years of age.

3170. Unable to go single mode CW on a mixmode (CW/SSB) contest

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-08-05 05:04:28 UTC
From: yb7xo
Topic: 3170 Message: 3170

On the last three contests that RAC, IARU, & RSGB IOTA, I need to edit my log before sending it. These three contest have two options: You can go mix (SSB and CW) or single (CW or SSB).

I have chosen the single mode (CW). But when I run the log it was running on phone mode. So after the contest was over I edited the mode fromPH to CW and the RST from 59 to 599. But the statements on the mode category is correct, CW. Is there any way to fix this? Or is it already fixed on the latest patch V12.07.05?

73,
Ricky, YB7XO

Coba kirim lewat WA7BNM webform yg rupanya juga disarankan oleh Panitia di RSGB IOTA Contest, 7 kali gagal.
Coba dengan cara satunya yg juga disarankan panitia, 2 kali juga gagal ada pesan ERROR.
mbuhhh...!!

Akhirnya kirim email ke Panitia, lampiri data yg sudah dibuat dengan WA7BNM form.

Beres deh.., alhamdulillah beban moral lepas sudah.

OM Irfan,
Saya juga belum tahu dimana masalahnya, karena selama ini saya gunakan format kontes yg dibuat oleh WA7BNM gak ada masalah.
Biasanya kecuali ke alamat panitia kontes, log itu juga dikirim ke email saya - tapi kali ini format yg masuk dalam bentuk PDF sehingga sepertinya gak bisa diterima oleh Panitianya.

73 es tnx

Oooh..OM Hendro pake format pdf
Karena yg diminta dg cabrillo makanya tidak diproses oleh sang robot..
Tapi kan udah dikirim ulang yaa.. Karena tadi masih ada notifikasi 'check log'..moga-moga itu sedang dlm proses..

Good luck,

OM Irsan,
Gak ada pilihan format PDF di WA7BNM web itu, biasanya sih selesai kita buat - submit - beres, mereka akan kirim ke Panitia Kontes dan copy diberikan ke kita.
Tapi terakhir ini (RSGB IOTA) - koq yg dikirim ke saya format PDF terus dan yg ke Panitia gagal.

Saya memang cuma kirim utk "checklog" gak ikut kontes 100%, ambil 5 kontester yg = entity baru buat saya.

OM Eddy,
Yang kirim utk checlog dari YB-land cuma saya.
Rupanya kontester kakap juga masih banyak yg belum kirim lognya, saya lihat di note di bawahnya.
Terakhir saya lihat yg belum kirim ada ES5QD, TO2D yang keduanya sempat QSO dg. saya.

OPDX Bulletin 1073 August 6, 2012
The Ohio/Penn Dx PacketCluster
DX Bulletin No. 1073
BID: $OPDX.1073
August 6, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)
Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, W2NK, W2VU, K3IRV, NG3K & ADXO, W3UR & The Daily DX, N4AA & QRZ DX, N4GN, N4JF, K5XK, KH6BZF, KK6EK, K8GI, K8YSE, W8GEX & 60m News, W9ILY, AC0RA, W0GJ, AT International, DF2UU, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, G3RWF, G3TXF, I1JQJ/IK1ADH & 425 DX News, ON4ZD, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, S50U, Sixitalia Weekly, UT7UT, VA3RJ & ICPO and the VHF-DX-Portal (MMMonVHF) for the following DX information.
DXCC COUNTRY/ENTITY REPORT
According to the AR-Cluster Network for the week of Tuesday, 31st-July, through Tuesday, 7th-August there were 207 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5X, 5Z, 6W, 6Y, 7Q, 7X, 8P, 9A, 9H, 9J, 9K, 9M2, 9M6, 9N, 9V, 9Y, A2, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, CY9, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, ER, ES, ET, EU, EX, EY, EZ, F, FG, FJ, FK, FM, FO, FP, FR, FS, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, P5, PA, PJ7, PY, PZ, R1FJ, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, TA, TF, TG, TI, TK, TN, TT, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VK9N, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YK, YL, YN, YO,
YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS
* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).
5X, UGANDA (Pirate!)
Nick, G3RWF, reports, "Someone is currently pirating my Ugandan call (G3RWF) - he/she/it was on 20m today (August 1st) at about 1215 UTC - also on 40m a few days ago (and also last March fwiw). I hope to return to Uganda in October, but no dates yet fixed." Nick told OPDX, "Current plans are for a return to Uganda in mid-October for 8 weeks - taking in CQWWCW (maybe SSB too if I can find my mic) and the ARRL 10m contest (if 10m wakes up again properly!)."
9M, SPRATLY ISLANDS (Reminder)
Just a reminder that operators John/9M6XRO and Steve/9M6DXX will be active as 9M4SLL from Pulau Layang Layang, Spratly Islands (AS-051) this week between August 7-13th. Activity will be on all bands from 80-10 meters using CW, SSB and RTTY, using two stations with linear amplifiers to vertical antennas on the edge of the ocean. Spratly Islands are ranked 29th in the current The DX Magazine ‘100 Most Needed Countries’ survey (world-wide, mixed modes), up from number 32 last year. The QSL Manager for 9M4SLL is Tim Beaumont, M0URX. QSL direct with SAE + 2 USDs or 1 new IRC, OQRS

(see http://m0urx.com/oqrs)or via the RSGB bureau (all bureau cards MUST be marked "via M0URX"). Logs will be uploaded to LoTW as soon as possible after the end of the operation (within a few days), but there will be NO online log during the DXpedition itself. (Note for users of computer logging programs: The 9M4 prefix is issued to special event stations that may be anywhere on Malaysian territory; this includes the DXCC entities of West Malaysia, East Malaysia or, as in this case, Malaysian islands in the Spratly group.)
CORRECTION DEPARTMENT
In OPDX.1072, under "VK0H, HEARD ISLAND (Update)", The callsign for Joe Taylor (Nobel physics) was incorrect and should be K1JT (not N1JT). We have been informed by Bob, KK6EK, that it is now corrected on the Heard Island Web page.
CQ NEWS
Rich, W2VU, sent out the following press release on August 1st:
"CQ TO REVAMP PUBLICATION SCHEDULE FOR CONTEST RESULTS; MAJOR RESULTS TO APPEAR FOUR MONTHS EARLIER --
>CQ magazine will embark on a major reorgani- zation of its editorial content in order to publish contest results signif- icantly sooner, Editor Rich Moseson, W2VU, announced today. On average, contest results will appear four months sooner than at present. The new schedule will be phased in over the course of 2013 and will be fully in place by 2014.
>'The phase-in is necessary because of new and old dates overlapping,' Moseson explained, 'as well as scheduling needs for non-contest articles including our special focus issues and Dayton new product reports. As a result, some contest results will be temporarily relocated in 2013 and some specials will be rearranged as well.'
>'In addition, there will be two sets of CQ WPX Contest results published in 2013 -- the 2012 scores in January (SSB) and February (CW), followed by the 2013 results in September (SSB) and November (CW). The CQ World Wide DX Contest results, which currently appear in the August (SSB) and September (CW) issues, will be published as of 2013 in the April and May issues, respectively. For one year only (2013), the CQ World Wide VHF Contest results will be published in CQ VHF magazine, and will return to CQ as of 2014, appearing in the January issue.'
>This schedule change has been made possible by the fact that the vast majority of contest entrants submit their logs online, as well as advance- ments in technology for log-checking, earlier log submission deadlines announced last month and advances in publishing technology.
>'For years, both participants and contest directors have been asking us to publish the results sooner,' Moseson explained, 'and at last, all of the pieces have fallen into place to make it possible. The new schedule represents the minimum amount of time needed to not only collect and process the logs, but to resolve issues with problem logs and take the necessary steps to assure the ongoing integrity of our contest results.' A complete calendar of contest results issues for 2013 and 2014 will be posted on the CQ website at www.cq-amateur-radio.com."CY9, ST. PAUL ISLAND (QRT)
The CY9M St. Paul Island DXpedition went QRT earlier then expected on July 31st, around 1625z due to a forecast of poor weather conditions and at the request of the skipper. They departed from St. Paul Island at 1900z. In 4.5 days of operating, the team made over 33k QSOs. All contacts will be verified via LoTW once they return home, and for those who want paper QSLs, Tim Beaumont, M0URX, will be the QSL Manager. The log is now available on ClubLog. The final totals are as follows: 33219/QSOs and 12715/Unique Calls. Mode breakdown is:
15561/CW, 16143/SSB, 62/PSK, 705/RTTY and 748/PSK63F.
Continent breakdown is: 441/AF, 0/AN, 514/AS, 17438/EU, 13548/NA, 233/OC and 1045/SA.
D6, COMOROS (Reminder/Update)

A team of Europeon operators will be active as D64K from Ngazidja (Grande Comore), Comoros Islands (IOTA AF-007), between August 8-20th. The current list of operators mentioned are Salvador C31CT/EA3QS, Sigi/DL7DF, Josep/EA3AKY, Fabrizio/IW3SQY, Paolo/ IV3DSH, Franco/IZ8GCE and Les/SP3DOI. The team has already obtained all permissions, and the license has been sent to the DXCC Desk. Pilot station is Stan/KH6CG. Their license covers from 160 to 6 meters, so the guys will be active on all bands and modes, and they are even considering the possi- bility of working on 60m and 6m. They will have four stations on the air using 2x Elecraft K3, 2x Elecraft K2 all with amps, into 2x Spiderbeams, 2 element vertical array (80/40/30) and HF vertical Multi-band. Suggested frequencies are:
CW 1826, 3506, 7006, 10106, 14026, 18076, 21026, 24896 and 28026 kHz
SSB 1845, 3780, 7060/7150, 14150, 18140, 21270, 24940 and 28470 kHz
RTTY 7035, 10142, 14080, 18100, 21080, 24920 and 28080 kHz
6m - 50130/CW-SSB and 50193/EME
The QSL Manager will be Paolo, IV3DSH. Watch the following Web sites for updates:
http://www.d64k.nethttps://twitter.com/#!/D64K
DXCC NEWS
Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:
H44UD Solomon Islands; 2012 Operation
DXPEDITION VIDEOS OF THE WEEK
With more and more DXpeditions putting their videos on YouTube and other Web services, we decided to list them (possibly) each week. For this week's listings:
2008 - T88CJ Palau Koror Island DXpedition: http://www.youtube.com/watch?v=NbuSLKOiZsI
2005/2007 - 6W/ HA7TM & J5UTM DXpeditions: http://www.youtube.com/watch?v=Mwwbm0Vh36k
1999 - 7A0K Semut Kecil Island DXpedition: http://www.youtube.com/watch?v=PDfh4MAx_4k
1998 - E30HA & E30GA Eritrea DXpedition: http://www.youtube.com/watch?v=qeWXNC0jWhs
If you have a DXpedition 'video' available on the Web and would like to have it listed in the OPDX, PLEASE send the URL to use and we will publish it.
FO, FRENCH POLYNESIA (IOTA Op!)
Didier, F6BCW, will be active as FO/F6BCW (or possibly a special callsign) from various French Polynesian Islands between October 2nd and November 8th. Activity will be holiday style, CW only, and using 100 watts into dipoles strung-up between coconut trees on the following islands:
October 2-6th - Tahiti Island (OC-046); no or very little activity
>October 6-15th - Huahine Island (OC-067); 40-10 meters
>October 15-19th - Raiatea Island (OC-067); 30/20/17 meters
>October 19-22nd - Tahaa Island (OC-067); 40/30/20/17 meters
>October 22-26th - Maupiti Island (OC-067); 30/20/17 meters
>October 22nd(?)-November 8th - Huahine Island (OC-067); 40-10 metersQSL via his home callsign, direct or by the Bureau.
FR, REUNION ISLAND
Willi, DJ7RJ, will once again be active as FR/DJ7RJ from Reunion Island between September 26th and October 21st. Activity will be on all bands 160-10 meters using, CW and SSB, and will pay special attention to the low bands for US and JA. QSL direct to his home callsign.
IOTA NEWS
AF-018. Operator Raffaele, IH9YMC, will be active from Pantelleria Island (IIA TP-001, MIA MI-124, WW Loc. JM56XT), African Italy, during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/ Single-Band (??) entry. QSL via eQSL.
AS-105. Kim (Tia), DS2NMJ, will be active as DS2NMJ/2 from Yonghung Island between August 12-13th. Activity will be on 15 and 12 meters SSB. QSL via his home callsign, direct

(preferred) or by the Bureau.
AS-190. (Update/New IOTA) A team of Saudi operators will activate Al-Dhahrah Island as 7Z7AB between October 5-11th. Operators mentioned are Abdul/7Z1CQ, Suli/7Z1SJ, Abdullah/HZ1AR, Bader/ HZ1BF, Abdullah/HZ1BW, Abdul/HZ1DG, Firas/HZ1FS, Hani/HZ1HN, Mohamad/HZ1MD and Nhaw/HZ1TL. More details and a Web page will be forthcoming. See their logo on (QRZ.com).
EU-012. Look for a YL DXpedition to be active as GB2YLS from Fair Isle (IOSA SH-09, WLOTA 1319) between August 16-22nd. Operators mentioned are Unni/LA6RHA, Chantal/PA5YL, Ruth/IT9ESZ/HB9LFM, Nicky/MM5YLO, Elaine/2E1BVS and Denise/MM6ZDW. Activity will be on the HF bands using CW and SSB, as well as an entry in the International Lighthouse/Lightship Weekend (August 18-19th) from Fair Isle South (Skaddan) Lighthouse (ILLW UK0127, ARLHS SCO-079, BARLS A3750, TWLHD WLH GM-028). QSL via MM5YLO, by the Bureau or direct. Visit their Web site at:
http://www.radioclubs.net/gb2yls
EU-028. Paolo, IZ5NFD, will be active as IA5/IZ5NFD from St. Andrea (WW Loc. JN52BT) in the north western part of Elba Island between August 6-12th. Activity will be holiday style on 40-2 meters on CW during his early mornings (0500z) and his evenings (2100z). QSL via his home callsign, direct or by the Bureau.
EU-042. Mike, DG5LAC, will be active as homecall/p from Amrum Island (GIA N-018, WFF DLFF-013, WLOTA 2464) between August 11-24th. Activity will be holiday style on 80-10 meters SSB. QSL via his home callsign, direct or by the Bureau. Log will be uploaded to LoTW, WFF and eQSL.
EU-064. Members of the Radio Club Vendéen (F6KUF) will be active as F6KUF/p from the Sebastopol Polder (FFF-218) on Noirmoutier Island between August 20-21st. Operators mentioned are:
CW Team - Pat/F6ACD and Alain/F5OEV
SSB Team - Phil/F5TRO and Seb/F4BHZ.
Activity will be on the usual WFF frequencies, +/- QRM permit- ting. QSL cards are via the Bureau; SWL cards are welcome.
EU-84. Operators Stefan/SA0AEK, Alexander/SA0AEX and Oskar/SA0ASG will be active as SC0UT/5 from the Scout Camp Boomerang on Vassaro [Vässarö] Island until August 10th. Activity will be on 80-12 meters SSB. QSL SC0UT via the Bureau.
EU-165. Massimo, I0PNM, will once again be active as IM0/I0PNM from San Pietro Island (IIA CI-007, MIA MIS-050, WLOTA 2989) between August 10th and September 3rd. Activity will be mainly 20/15/10 meters using SSB, RTTY and PSK31. QSL via his home callsign direct only.
EU-182. (Correction) One of the Russian-Ukrainian team's operator who was listed a R6LP in OPDX.1072 from their press release is actually Oleg, RL6LP, and was active as UT/RL6LP from Ankudinov Island during the IOTA Contest last weekend. QSL via LoTW or eQSL.
NA-124. Manuel, XE2HUQ, will be active as XF1F from San Francisco Island sometime in October. Specific dates were not announced. Activity will probably be on 80/40/20/17/15/12/10 meters using SSB only. QSL via XE2HUQ.
JW, SVALBARD (Update)
Torkel, LA6VJA, will once again be active as JW6VJA from the JW5E club station in Longyearbyen on Spitsbergen Island (EU-026) between August 10-12th. Fredrik, LA6TMA, will also join him and be active as JW6TMA. Activity by JW6VJA will mainly be CW with some SSB, while JW6TMA will be active mostly on the Digital modes. QSL via their home callsigns, direct or by the Bureau. PLEASE NOTE the new postal address for direct QSL cards. Also, JW6VJA will upload his log to LoTW. For more details, visit:

Wyatt, AC0RA, reports that he made a QSO on August 2nd with Rich, KP2CT, from St. Thomas on FO-29 for his first satellite contact. For equipment he has a Icom 706 and an arrow antenna. He is manually tuning for Doppler and still getting the hang of it. Wyatt states, "He (Rich) is going to only be on the SSB satellites for now and probably only FO-29 due to the ease of working semi duplex on mode J vs mode B. Though we might try on VO52 at some point. He is still picking up on things that make it easier and need to trouble shoot a few problems we found during our first QSO! He will try to be QRV on fo29 during the next few week ends and possibly during the week depending on his free time due to his unpredictable work schedule. He also asked that people not try to contact him for skeds. If he knows he can make a certain pass or passes I will try to make an effort to post to the AMSAT BB."
NCDXF PRESS RELEASE (Dated July 28th)

"The Northern California DX Foundation is the recipient of a 4000 USDs donation from the Northern California DX Club. This is the largest donation ever received from a club. More and more DX clubs are donating to NCDXF. NCDXF thoroughly analyzes the financial needs of planned DXpeditions and helps provide critical funding to DXpedtions high on the Most Wanted List. Often without support such DXpeditions would not be possible. Several expensive DXpeditions in the Top Ten Most Wanted are in the early or mid planning stages. Contributions from individuals and from clubs to NCDXF will help make these DXpeditions happen."NCDXF PRESS RELEASE (Dated August 48th)

"The Northern California DX Foundation is pleased to announce the addition of two new Directors to fill vacancies created by retiring board members. Tom Berson, ND2T, and Glenn Rattmann, K6NA, were elected to fill these positions.
>Tom Berson, ND2T, became a ham at the age of 11. He has lived and worked abroad for 7 ½ years. He is a past president and director of the Inter- national Association for Cryptologic Research, Inc. Professionally, Tom is an expert in cryptography, computer security, information conflict, and high-tech business. Tom has been on several high profile DXpeditions and will be headed to NH8S Swains Island very soon. Tom has lived in Palo Alto, CA, since 1977.
>Glenn Rattmann, K6NA, has been DXing and contesting since age 14. He has a degree in Marine Geology and has had successful careers in oceanographic survey work, electronic sales and manufacturing and aerospace. He retired from Northrop Grumman in 2007. He has participated in many DXpeditions and is very active in contesting. He has worked all current DX entities and loves the low bands. He has been very active in the San Diego DX Club. Glenn lives in Valley Center, CA.
>More extensive biographies for Tom and Glenn can be seen at:
>http://www.ncdxf.org/pages/officers.htmlAn eleven member Board of Directors oversees all of the Foundation's business. These Directors and the volunteer advisors who assist them have held responsible positions in the business or academic worlds. They all are active DXers. The Foundation does not have a paid staff, and no Foundation officer, director or advisor receives a salary or compensation in any form.
>In keeping with the original intent of the founders, NCDXF has supported over 500 DXpeditions, large and small. For the expensive "mega" DX- peditions, NCDXF is usually the "anchor" sponsor and its grant often makes the difference in whether the DXpedition goes forward. Since its founding in 1972, NCDXF has donated in excess of $1 million to worthy

DXpeditions. NCDXF also supports the world-wide NCDXF/IARU Beacon Project and provides for scholarships for worthy recipients in cooperation with the ARRL Foundation.
>The Northern California DX Foundation relies heavily upon the generosity of its contributors to fund various projects. The NCDXF is an organization described in Section 501(c)(3) of the Internal Revenue Code and all con- tributions are tax-deductible to the extent permitted by law for U.S. taxpayers.
>73, Glenn W0GJ"OD5, LEBANON
Members of the Lebanese Army Ham Radio (HAM RADIO DX GROUP) will be active as OD5ARMY during the month of August. Activity is to celebrate the founding of the Lebanese Army, and to "thank the Lebanese Army for their effort and their faithfulness to the Land, to the Country, to their parents, and the Lebanese people." Gabriel, ON5NJ, informs that the following will be participants during this event: Joe/OD5TE, Raja/OD5MV, Puzant/OD5NH, Gaby/OD5NJ, George/OD5QB, Maria/OD5QT and Anthy/OD5YY. QSL via OD5NJ.
OJ0, MARKET REEF
Pasi, OH3WS/OG3A, who was active as OH0/OH3WS from Eckerö, Aland Island (EU-002) on Friday, is now active as OJ0W from Market Reef (EU-053, ARLHS MAR-001, WLOTA 0542) until August 10th. Activity will take place during his spare time. QSL via OH3WS.
P3, CYPRUS (Update)
Mark, M0DXR, will be active as P3F (not 5B/M0DXR as first announced) during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/High-Power entry. QSL via his home callsign.
PT0, ST. PETER AND ST. PAUL ROCKS (Update)
Members of the Araucaria DX Group, in conjunction with the TX3A Team, will activate St. Peter and St. Paul Rocks (PY0S), under the callsign PT0S approximately between November 10-22nd. They suggest on their Web page to please visit and check their Web site regularly for news updates or announcements. (Like all things maritime, the exact dates of their travel to the rocks will be subject to the weather and issues related to the boat.) The Web page also menitoned that two operators of the PT0S Team (PY2XB and AA7JV) went out on a survey voyage to St. Peter and St. Paul Rocks this past weekend to find a suitable site for a platform to hold their operating and sleeping tent. This is necessary as there is no flat land available on the rocks. They have only 5 hours on the rocks to complete their survey, which, in addition to the platform site, will include surveying potential antenna sites and generator location.
Once again, operators for the PT0S operation will be Fred Carvalho/PY2XB (PY2XB/PY0F, PQ0F, VP5/PY2XB, 8P9XB), Peter Sprengel/PP5XX/PY5CC (PY0FM, PW0T, HK0NA). Tomi Pekarik/HA7RY and George Wallner/AA7JV. The operation will have a strong low band focus. There will be a dedicated 160 meter station operating on 160 meters from sunset to sunrise. A second station will be on 80 and 40 meters at night. During the day they will operate two stations on the higher bands -- and 6 meters -- based on conditions. RTTY will also be supported. An "Online QSL Request Service" (OQRS) will be set up on their Web site for both direct or Bureau QSLs. For direct cards via the mail, QSL via HA7RY (read details on the Web page). The log will be uploaded on LoTW, generally within 36 hours of the QSO taking place. For further information, please visit:
http://pt0s.com

QSLS RECEIVED VIA THE BUREAU: OP4K, OX3XR, S9DX, T77NM and Z36A
SILENT KEYS
Well-known operator Paul Caboche, 3B8AD, became a Silent Key (SK) on July 25th. Paul is remembered as a communications pioneer and was active on many islands in the Indian Ocean. He was inactive in recent years due to illness. Older DXers may remember Paul as VQ8AD, etc.
http://hamgallery.com/qsl/country/Mauritius/vq8ad.htmHe was 94. Jacky, 3B8CF, made the following announcement on the IARU Region 1 Web site, "Paul was the oldest ham in Mauritius. His first call was VQ8AS in the Chagos back in 1937. Later he got the call VQ8AD, then in 1970 he became 3B8AD. He was the first chairman of MARS (Mauritius Amateur Radio Society) and held this post for many years, from 1967 to 1993. He has done much to protect the interests of ham radio in Mauritius and to promote this hobby over the years.

May he rest in Peace! Jacky, 3B8CF."
OPDX was also informed that Sven Lutzen, OZ3SA/OX3SA, recently had a heart attack and is now a Silent Key (SK). No other details were provided.
OPDX and its readers would like to send out our deepest sympathy to the family and friends of the above Silent Keys.
TZ, MALI
"The Daily DX" reports this past week that Fernando, Z21BB/EA4BB (ex-9Q5BB, D2BB, ST2BF, TU5JL), has left Zimbabwe and has taken a new assignment in the Mali Republic. He is expected to receive a TZ6BB license in a couple of week. QSL via W3HNK.
V5, NAMIBIA
Hans, DF2UU, informs OPDX that he will once again be active from Namibia between the end of August to the middle of September as V5/DF2UU. Activity will be on 160-6 meters. He will also be active during some contests. In the SSB FD, September 1-2nd, he (and others) will be active as V55V/P as a Multi-Single entry. In the WAE SSB, September 8-9th, he states that the callsign is not sure, but if he works Single-Op it will be V5/DF2UU and if it is Multi-Op then V55V.
VU7, LAKSHADWEEP ISLAND (aka Laccadive Islands)[IOTA/Lighthouse/WFF Op]
Members of the Bangalore Amateur Radio Club (VU2ARC) and a small group of amateur radio volunteers will be active as VU7M from Minicoy Island (AS-106, WFF VU-103, ARLHS LAK009 and also IND017 [to be deleted!!]) between August 13-22nd. The group received special permission from Ministry of Communication and Information Technology, and the Government of India on July 26th, to use the special callsign VU7M to represent India during the 2012 International/Lighthouse and Lightship Weekend, August 17-18th. Operators mentioned are Arasu/VU2UR, Laxmanan/VU2LX, Srikantha/VU2GSM, Govind/VU2GGM, Ramesh/VU2LU and Lion/VU2JHM. Details on QRZ.com state that they will be "setting up humble HF station" and the QSL route is "DIRECT or through the Bureau". For more details (plently of URLs to look at) and updates, watch (QRZ.com) under VU7M.
YN, NICARAGUA
Jeff, N6GQ, will once again be active as YN2AA from Grenada, Nicaragua, between October 23-29th. Activity will be on 160-6 meters, and he will participate in the CQWW DX SSB Contest (October 27-28th) as a Single-OP/All-Band/High-Power entry. Jeff will probably use a K3 radio and 1 KW amp into the following antennas: a Tribander, 2 element 40m beam, wires and beverages for 80/160m. QSL via NN3W, by the Bureau or direct. U.S. stations, please send SASE; DX stations, please send SAE with GS or IRC. Bureau service will take time. Logs will also be uploaded to LoTW.
ZL9, CAMPBELL ISLAND (Update)
It was announced on August 5th: "The HARAOA ZL9HR DX'Pedition to Campbell Island in the Great Southern Ocean (IOTA OC-037) is delighted to have been granted an award from the prestigious ARRL Colvin foundation.
The Colvin Award is conferred in the form of grants in support of Amateur Radio projects that promote international goodwill in the field of DX and the HARAOA are honored to have received this award.
Preparations for this major DX'Pedition are on schedule for the activation dates of November 28th. to December 9th, 2012."

JW6VJA - - Svalbard/Spitsbergen - IOTA EU-026, 2012-08-10 to 2012-08-12 (with LA6TMA)

I have been on the air from Svalbard/Spitsbergen on several occasions, resulting in several thousand QSOs from the QTH of JW5E in Longyearbyen. For details regarding the JW6VJA activations, please read on.General informationPropagationScheduled JW6VJA activationsPrevious JW6VJA activationsQSL informationQSL address for direct cardsAn important note on direct QSL cardsA few words on the JW6VJA QSL cardsGetting there, staying there and going home again
General information

The QTH of all JW6VJA operations has been the JW5E club station in Longyearbyen, QTH-locator JQ78TF, IOTA EU-026. Svalbard is located midway between Norway and the North Pole. In accordance with the Svalbard treaty of 1920, the Spitsbergen archipelago is Norwegian sovereignty.

Propagation

Sometimes the conditions just aren't there. Switch off the radio and do something else! A visit to the museum is highly recommended, and so is also a brisk walk over the Longyear plateau. Be sure to bring your camera and a rifle. A visit to the swimming pool in Nybyen is also highly recommended. The view of Longyearbyen from the edge of the swimming pool is magnificent. There is also a wide range of activities available for those interested.

For a scientific approach to propagation, a few of the available - and valuable - sources of information are listed below:

Geomagnetic data (courtesy of the University of Tromsoe)
Some articles about the Aurora
observed Aurora Borealis
LA4LN/LA7SL's realtime monitor for geophysical activity and radio propagation
qsl.net propagation report
VHFDX.info real-time maps

Scheduled JW6VJA activations
2012-08-10 to 2012-08-12 (with LA6TMA)

Previous JW6VJA activations
1997-08-01 to 1997-08-03
1998-07-17 to 1998-07-19
1999-06-25 to 1999-06-27
2000-06-30 to 2000-07-02
2001-06-29 to 2001-07-01
2002-03-25 to 2002-03-28
2002-08-09 to 2002-08-11

2003-08-08 to 2003-08-11
2004-08-05 to 2004-08-09
2009-07-03 to 2009-07-05
2011-05-07 to 2011-05-09
2012-02-11

QSL information

QSL info is direct/mail or via the bureau to LA6VJA. Bureau cards should be addressed to JW6VJA via LA6VJA as the LA bureau handles incoming JW cards for callsigns normally located on the mainland.

No card is sent until a request for a QSL card is received either by direct mail (not by email) or via the QSL bureau. QSL processing is up-to-date with cards being shipped to the bureau each month and direct cards being answered within a few days after their arrival.

QSL address for direct cards

Please use the address below for direct QSL cards. It should be typed exactly as shown, to minimize postal delays. Please do not write "Svalbard" anywhere in the address field (quite a lot of geniously designed log programs do this; however, my address is on the mainland and there is no need to cause confusion by placing "Svalbard" on the envelope). Sorry, no eQSL cards accepted and no plans to do so (I do, however, upload the log to ARRL's Logbook of The World project after each visit to Svalbard - last upload: 2012-02-13).

NEW postal address, effective from 01-Nov-2011:

Torkel M. Jodalen
P.O.Box 1036 Jeløy
NO-1510 Moss
Norway

Important: read the section below if you are a "direct QSL'er".

An important note on direct QSL cards

Thanks to the Government of Norway and the never-ending desire of certain socialist parties to increase the tax burden on Norwegian citizens, a 25% VAT has been imposed on postal service charges. As a result, USD 3.00 is required to cover the postage for a QSL card to anywhere outside of Norway (Norway Post's 2012 price list available here, for those interested). Also, the currency exchange charge collected by Norwegian banks makes it extremely unfavourable receiving foreign currency as "green stamps". Please send your "green stamp" as an IRC coupon (in addition to the self-addressed envelope and your QSL card). QSL cards with foreign notes will be returned via the bureau, as I cannot afford running a charity service.

Again: one IRC + a self-addressed envelope is the preferred means of handling a direct QSL request.

A few words on the JW6VJA QSL cards

The first JW6VJA QSL card was designed and printed in 1997. The front shows a walrus having a rest on a piece of drifting ice near the former Russian settlement of Pyramiden. The

photo was taken by JW6VJA in 1997.

The reverse side contains a short description of Svalbard. Certain facts are, however, no longer up-to-date:

The Russian settlement of Pyramiden was abandoned in 1998. Thus, there are no longer any Russians residing there (correction: a caretaker or two is reported to still be lurking around there).
The web address printed on the card is no longer correct, the correct URL is http://www.qsl.net/jw6vja/
New mailing address from November 2011.

A new QSL card was designed in August 2002. The cards were printed by ELLI Print (OK1FXX). A highly recommended QSL printer.

Unfortunately, there are two minor misprints at the reverse side of the card: while the text on the card reads "...located between 71° - 81" N and 10° - 35" E", the correct text is supposed to read "...located between 71° - 81° N and 10° - 35° E". Also, new postal address from 01-Nov-2011 - the address printed on the QSL card is no longer in use.

Old card.

New card.

Getting there, staying there and going home again

Planning to visit Svalbard yourself? Here is what you need to know:

SAS provides a regular air service between Longyearbyen (IATA: LYR, ICAO: ENSB) and the Norwegian mainland. Flights depart from Tromsø and Oslo and are flown with Boeing 737 aircraft. Flight time from Tromsø is approximately 1 hour 30 minutes, directly from Oslo the flight time is close to 3 hours. Try to arrange for a ride on the flight deck, the panoramic view of Bear Island and the eastern coast of Svalbard is magnificent. Be aware, though, that actually seeing Bear Island is rare - it's normally covered by clouds.

It is possible to stay at the JW5E club station. Please refer to the JW5E information page for further information. If staying in a hotel is preferred, several options are available. The SAS Radisson Polar Hotel is located only a few minutes of walking from the radio shack (~600m), Mary-Ann's Polarrigg is even closer and has a unique atmosphere and a friendly owner. Spitsbergen Hotel is also a good place to stay. No matter where you stay, a bike is recommended in summertime to make your way around in Longyearbyen. Remember to bring with you a wide selection of warm and comfortable clothes even during the short summer months.

Welcome to LA6VJA

Welcome to the homepage of Norwegian Amateur Radio Station LA6VJA. If you are looking for information regarding the JW6VJA activations, please follow the link on the menu above. Anyway, feel free to have a look around.

The modulator rack in the basement.

I live in a country known for its natural beauty, fisheries, oil/gas production and social welfare system. My home QTH is in Moss/JO59HK, which is located in the south-eastern part of the country. The captial city of Oslo is only some 60 km to the north, easily within

range by train (when they run).

For those of you who don't know much about Norway, it's a small country in northern Europe, home to some 4.6 million more or less happy Norwegians. Furher information is available in the CIA World Factbook. Although common belief among non-Norwegians is that Norway has winter all year, the summer is often quite nice. Even warm enough for sunflowers to grow (have a look at the graphics at the top of this page). Effective from July 10th, 2010, I have taken over development of the Win-EQF* logging program.

WLOTA LH-3174 first activation by LA9VDA and LA6VJA on 06-Jan-2012.

My QTH is on Jeløy island, WLOTA LH-3174. Within visual sight of ARLHS NOR-302 and ARLHS NOR-389.

Icom on the go.

The shack currently includes an Icom IC-7600 as well as an IC-7000. A Yaesu FT-950 is located at the mountain QTH at approx. 950m ASL. A Kenwood TS-590S serves as a handy radio when none of the others do. I'm not quite surewhen, but it's a nice thing to have around.

An IC-703 serves the purpose for semi-portable HF operation so does a Yaesu FT-817. Running Begali, Bencher and Palm Radio paddles andLogiKey keyers.

Kenwood's TS-690SAT and TS-50 as well as Icom's IC-7400, IC-756ProIII and IC-706MKIIG have also secured several QSOs in the log since 1995 but have all been traded in for more capable models. QRV on D-STAR with the Icom IC-E2820/ID-800 and APRS with the Kenwood TM-D710/TH-D72 as well as some homebrew combinations of surplus HTs and tracker units. QRV on VHF/UHF for /P operation with the Yaesu VX-3, VX-6 and VX-7 HTs. The Butternut HF9V serves me well both at my home QTH and at the weekend QTH.

You will find me on CW and digital modes on the HF bands. Sometimes I am also cleaning away the dust from the microphone, but I am more than happy to leave the "hola hooola" SSB operation to south European stations.

Memberships are currently held in the NRRL, the ARRL as well as clubs LA9H, LA3F, LA3T and LA2K.

I am employed as an airline pilot, flying the DHC8-100/-300/-Q400 series for a Norwegian airline. Though I have previously flown the B737-300/-500 for an airline within the SAS Group, flying the DHC8 gives me the opportunity to work closer to my home QTH and spend more time off duty. I hold an M.Sc. degree in computer science and I run a small consulting business when I am not flying, programming, calling CQ or enjoying life as a PADI Divemaster. From time to time I also exercise the privileges as a flight examiner, which I have been granted by the Norwegian CAA.

At work... it's a hard life. I used to fly the B737 for a living, but now I fly the DHC8. For sure a smaller and more noisy aircraft, but also a more laxed work schedule.

DHC8 operation at HVG/ENHV, near North Cape.

Superb engineering by Icom. A truly amazing boat-anchor, just like the 756ProIII which I traded in for this upgrade.

Sudah beberapa hari ini saya mencoba memonitor ZD7FT - St. Helena/Africa seperti spot yg ada di DXWatch, tapi cuma noise yg terdengar.
Sore ini receiver tetap di frekwensi 21,240MHz headphone sudah dilepas dari telinga, karena sakit juga kelamaan - sekarang gunakan speaker IC-718 utk tetap monitor.

Masih noise yg terdengar - yang buat kalangan kang ouw di top band adalah musik merdu - mendadak ada suara kuat terdengar dari YB-land yg cuma 2-3 kali panggil sudah berhasil QSO dengan ZD7FT.

Papa Foxtrot untuk YB1ALL yg sudah berhasil mendengar dan memanggil ZD7FT - worked.

Welcome to the
National Capitol DX Association's
"DXCC-EAST" Convention 2012 - August 25, 2012
"ARRL affiliated event"

General Information
NCDXA has been an active DX organization since 1972. Based on our past positive experiences with DXPO conferences from 1974 through 1992, we are excited to announce our new DXCC-EAST Convention for Saturday, August 25, 2012. It is our goal to make this an annual event here on the east coast of the United States.
The DXCC-EAST Convention will include presentations by well known DXers and principles that are knowledge of the DX community including participation by the American Radio Relay League (ARRL).
Other Saturday brochure scheduled activities included are:
* VE Exams – 1:00 PM to 3:30 PM –Schedule in Advance (secretary@...)/Walk-Ins Welcome, $15.00 ARRL VEC Charge, Executive Board Room just outside convention area
* Portable Radio Operation: FT DX 5000 HF Station and 2 Meter: N3C Call Sign, Talk-In 146.480 Mhz. Simplex
* DXCC QSL Card Checking: NCDXA Vendor Table # 6
* Vendor Tables: Francis Scott Key Convention area combined rooms C, D, E & F, Tables 1 thru 28
Friday, August 24, 2012, Early Arrival - 6:00 PM-1:00 AM Hotel Bar (Casey's Lounge)

Frederick County Maryland is central to many exciting places to visit before and after the convention. Make the convention visit a tradition. Combine your trip with a Baltimore Orioles (Toronto Blue Jays in town Aug. 24-26, 2012) baseball game, visit the Inner Harbor, ESPN Center or Aquarium, historic district area or take a trip to Washington DC. There will be lots of fun for the whole family.
I look forward to seeing each of you at the DXCC-EAST Convention.
Sincerely,
David Collingham – K3LP
NCDXA President
Who Should Come?
Whether you are an avid DXer, contester, teacher, scout leader or just getting started in amateur radio, there will be plenty to keep your interest. Come meet friends and future friends, vendors and start a new annual tradition.
There is plenty of parking space for your mobile home.
When?

A - Pre-Conference Events

Friday, August 24, 2012, 3:00 PM to 6:00 PM - ICOM Sponsored - Contester/DXer Product Evaluation and Social at W3LPL's QTH. ICOM will provide HF Radios that will be used by Contester/DXer's. Drinks and Snacks will be Sponsored by ICOM. A great Ham Radio Social Event - Don't Miss it!

3186. e-QSP Vol. I-July-2012

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-08-07 17:19:06 UTC
From: bam yb0ko soetrisno
Topic: 3186 Message: 3186
Attachments: 2 described; binary payloads are missing from this source WARC

Dear ALL,

terlampir (atau silah diunduh) e-QSP edisi KHUSUS bln JULI 2012

Dari halaman depan, berturut-turut,konten edisi ini adalah:

+ SERTIJAB dari ISS Expedition 31 ke Expedition 32 (yang kebetulan hampir semuanya Amatir Radio)

+ Berita Organisasi: Pengukuhan Kelengkapan ke-Pengurus-an ORPUS

+ IOTAs July 2012 : YEØOM dan YB9IOTA

+ Rubrik AntennaMania: 80/40m Inverted L dg. Trap besutan GMØONX.

Dan, SRI FER the bandwidth, krn dalam memasuki tahun ke II penerbitannya e-QSP ini sdh berkembang jadi 10 halaman, dan menyita nyaris sampai 2 Mb

Kembali yg unik dr edisi ini adalah untuk pertama kalinya (sejak era BeON) kalawarti elektronik ini keluar dengan jumlah halaman yang GANJIL, yaitu 9 halaman !!!

Selamat membaca, PSE QSL, and as always: pse ENJOY .!!!

73, de

bam ybØko

[Ed. , e-QSP]

PS:

bagi rekans yang tidak bisa menerima surel dengan lampiran (attachment), sila unduh sendiri di http://issuu.com/e-qsp/docs/vol._i-july__2012

atau kirim imil pendek (atau klik Reply mssg ini) ke japri unclebam@...

cid:image001.png@01CD0B41.4BB475B0

OM Bam,
Terima kasih, sungguh eQSP ini dibuat dengan "hati" jadi hasilnya pun menyentuh materi.
Salam hormat
Dani
YB2TJV

Fabrizio, IW3SQY, Paolo, IV3DSH, Antonello, IT9YVO, Franco, IZ8GCE, Giorgio, IZ4AKS, Les, SP3DOI, and Salvador C31CT/EA3QS will be active as D64K from August 8th to 21st from Comoros (AF-007). They will operate from 160 m to 6 m in all modes. QSL via IV3DSH.
http://www.d64k.net/
https://twitter.com/#!/D64K

DL, Germany:
The two special event call signs DP775BLN and DQ775BLN will be QRV till the end of this year, celebrating the 775th anniversary of Berlin. These and other club stations from Berlin will have the special DOK BLN775. More than 10,000 QSOs have been logged so far.
http://www.darc.de/distrikte/d/775bln

Also DP87SIXD will be QRV throughout the year, for the 87th Enduro Team World Championship (Six Days). For the first time in 23 years, the International Six Days Enduro (ISDE) take place in Germany again.
QSL via bureau.

FP, St. Pierre et Miquelon:
Mike, VE2XB, will be FP/VE2XB between August 10th and 20th from St. Pierre et Miquelon (NA-032) on all bands with a focus on 6 m. With a 500W-PA by THP and a Hexbeam we can expect a good signal from him.
QSL via VE2XB.
http://fp-ve2xb.jimdo.com/

G, England:
GB2012OLY is one of the special stations for the Olympics 2012.
QSL via M0DOL.

OD, Lebanon:
Special event station OD5ARMY is QRV during August in celebration of the founding of the Lebanese Army. QSL via OD5NJ.

OJ0, Market Reef:
Pasi OH3WS will be active as OJ0W from August 4th to 10th from Market Reef, (EU-053, ARLHS MAR-001, WLOTA 0542) in spare time. QSL via OH3WS.

ON, Belgium:
On the occasion of the 29th Oldtimer FlyDrive-in in Schaffen on August 11/12, the radio club ON4DST will activate the special call ON29IOF on 80 m to 10 m in SSB and CW. QSL via ON4AMM.

SM, Sweden:
SA0AEK, SA0AEX and SA0ASG plan to be active as SC0UT/5 until August 10th from the Scout Camp Boomerang 2012 on Vassaro Island (EU-084). QSL via SC0UT (b).
http://www.radioscouter.se/

SP, Poland:
Until October 2nd, the special call sign SN63DNI will be on the air to remember the 63rd anniversary of the Warsaw Uprising.
QSL via SP5NHV.

A list of more than 1500 Polish special call signs since 2007 can be accessed at:
http://www.uke.gov.pl/uke/redir.jsp?place=galleryStats&id=54443

UA, Russia:
Members of the AFARU (Armed Forces Amateur Radio Union) will be active as R100WWS from any areas of Russia between August 10th to 18th to celebrate the 100th anniversary of the Military Air Forces of Russia (formed on August 12, 1912).
QSL via RV3YR.

VU7, Lakshadweep:
Members of the Bangalore Amateur Radio Club (VU2GGM, VU2GSM, VU2JHM, VU2LU, VU2LX and VU2UR) have been granted permission to operate from the Lakshadweep Islands. They will use the call sign VU7M from Minicoy Isl. (AS-106) and lighthouse from August 13th to 22nd with a "humble HF station". QSL via VU2JHM.
http://www.qrz.com/db/VU7M

YB, Indonesia:
Members of the YB Land DX Club (YBDXC) will activate the special event station YB67RI between August 10th and August 17th, celebrating the 67th anniversary of Indonesia's independence.
QSL via YB2DX direct or LoTW only.

YL, Latavia:
Vitaly, YL3AFK, Alex YL3BU, Evgeny, YL2TD and Grigorij, YL2NS will be active on the 11th and 12th of August 2012 from Edole Castle (WCA YL-00022, COTA-YL Z-007, WW Loc. KO07ua) as YL11WCA on the HF bands in CW and SSB close to the WCA frequencies.
QSL via bureau. Their log will be uploaded to WCA E-Log.
http://www.yl3bu.lv/news/WCA_Edole_castle

YN, Nicaragua:
Ben, TI4SU is QRV as HT9H to commemorate the 250th anniversary of the Battle of the Rio San Juan. QSL via TI4SU, direct.

DXCC:
    The Solomon Island activation of H44UD (2012) was approved for
    DXCC credit..

New deadline for CQ-Contests:
    The log submission deadline for the CQ-Contests has been reduced to
    five days after the end of the contest. Extensions may be given on
    request (questions@...) under certain circumstances. The first
    contest affected by this new deadline will be the CQ WW SSB Contest
    taking place in October.
    http://www.cqww.com/

UPCOMING CONTESTS

Aug 11/12   WAE DX Contest (CW)

IOTA   compiled by Klaus, DL7UXG (e-mail: iota@...)

Island activities:

AF-006; VQ9; Diego Garcia Island: Chuck, W4XP, plans to be active from
    August 9th to 25th from Diego Garcia Atoll (AF-006, WLOTA 1645,
    LOC MI62) as VQ9XP from the club station VQ9X. The focus of his
    activity is 6 m, he's also QRV on HF.
    QSL direct via W4XP and LotW.

AS-105; HL2; Kyonggi-Do Province group: Tai, DS2NMJ, will be active
    from Yonghung Do (AS-105) on August 12/13 as DS2NMJ/2. He will
    be QRV only in SSB on 15 m and 12 m.
    QSL via DS2NMJ (direct or bureau).

EU-012; GM/MM; Shetland and Fair Isle: Members of the Grantham Amateur
    Radio Club members (Alan, G0RCI, Pete M0USY, Harry G7DEH, M0UXX,
    Dave G4IAR, Judith G4IAQ and Alec M0PUD) will be active as GS0GRC
    from Bressay Isle (IOSA SH06, SCOTIA SI08, WLOTA 1079, LOC IP90,
    WAB HU43), Shetland & Fair Isle (EU-012) from 14th to 19th August.
    QSL via G0RCI (direct or bureau).
    http://www.garc.org.uk/

    Dave, G4IAR and Judith, G4IAQ will also activate the Bressay-
    Kirkabister Ness lighthouse (BARLS A3776, ILLW UK0035, ARLHS
    SCO-021, TWLHD WLH GM-009, WLOTA 1079) as GB0BL on the ILLW.
    Additional activities include using the WAB Awards Group Call
    GM4WAB from WAB HU43.
    QSLs via G4IAR (direct or bureau).

EU-014; TK; Corsica Island: Jack, IZ3DBA, will be active from Corsica
    (EU-014, DIFM TK-001, MIA MCO-001, WLOTA 1390) as TK0/IZ3DBA from
    8-16th August.
    QSL via IZ3DBA (direct or bureau, LotW, eQSL)

EU-015; SV9; Crete Island: SV1GSU will be active from Crete Island
    (IOTA EU-015) from August 4th to 8th as SV9/SV1GSU on 40 m, 20 m

and 15 m in CW, SSB and PSK31.
QSL via SV1GSU.

EU-026; JW; Spitsbergen Island: Torkel, LA6VJA and Fredrik, LA6TMA plan to be active as JW6VJA and JW6TMA, respectively, from Longyearbyen, Spitsbergen Island (EU-026, WLOTA 0125), Svalbard Archipelago, from 10th to 12th of August. JW6VJA plans to be on CW and SSB while JW6TMA will mostly use digital modes.
QSL via home calls.
http://www.bitwrap.no/web/index.php?id=6

EU-028; IA5 Tuscany Region Group incl. Toscano Archipelago: Paolo, IZ5NFD will be active holiday style as IA5/IZ5NFD from Elba Island (EU-028) on August 6th to 12th. Look for him to operate mainly in CW in the early mornings around 5 UTC and after 21 UTC on 40 m to 2 m.
QSL via IZ5NFD (direct or bureau)

EU-038; PA; Noord Holland/Friesland/Groningen Province group: Texel Island is the second planned destination of Marco/IZ3GNG between August 13th and 16th (WLOTA 0043, LOC JO23), using PA/IZ3GNG on the HF bands.
QSL via IZ3GNG (direct or bureau)

EU-042; DL; Schleswig-Holstein State North West group: Mike, DG5LAC/p will spend his vacations on Amrum Island (WLOTA 2426) between August 11th and 24th. He also plans an activity from DLFF-013 (National Park Schleswig-Holsteinisches Wattenmeer); note that those activities from DLFF-013 do not count for IOTA and vice versa.
QSL via DG5LAC (direct or bureau, LotW)

EU-052; SV; Ipeiros/ Dytiki Ellas Region group: Fabio, IZ7FLQ, will be touring Greek Islands starting on August 8th through August 18th. He will be active from Lefkada, Itaca, Meganisi, Kefallonia Islands with the following callsigns and references:
SV8/IZ7FLQ/LI Lefkada no IOTA
SV8/IZ7FLQ/TI Itaca EU-052
SV8/IZ7FLQ/MI Meganisi EU-052
SV8/IZ7FLQ/KI Kefallonia EU-052
The activation of further islands may be possible.
QSL via IZ7FLQ (direct or bureau)
http://iz7flq.jimdo.com/

EU-056; LA; More og Romsdal County Centre group: From August 13th to 17th Glenn LA8XRA and Trond, LA9VDA will be active as LA6Q from Sandoy Island. It will be the first activation of WLOTA LH-2769. Activities will take place in CW, SSB and RTTY from 80 m to 10 m.
QSL via LA9VDA (direct or bureau, requests via la9vda[at]gmail.com).

EU-064; F; Pays de la Loire Region group: Geoffrey, F4FVI, Chris, HB9ELV, Johan F4GTD, Phillipe F5TRO and Nicolas F8BDB plan to operate as TM1NOI from Barbatre, Ile de Noirmoutier (EU-064, DIFM AT020, WLOTA 1224) from August 12th to 14th. They will be active around the IOTA frequencies in SSB.

QSL via HB9ELV (direct) or F4FVI (bureau) and LotW/eQSL.
http://www.qrz.com/db/TM1NOI

EU-079; LA; More og Romsdal County South group: Glenn, LA8XRA and Trond, LA9VDA plan activate Jonsholmen Island (EU-079) as LA6Q from August 10th to 13th. Activities will be on 80 m to 10 m in CW/SSB/RTTY. They may make short side trips to Dimna Island (EU-079, WLOTA 2438) and Nerlandsoy Island (EU-079, WLOTA 2193).
QSL via LA9VDA (direct or bureau)

EU-132; SP1; Szczecin/Koszalin Province group: From August 10th to 19th, Jacek/SP5OXJ will be active from Karsibor (SPFF-269) as SP5OXJ/1. Activities will take place on the HF bands in CW and digital modes.
QSL via SP5OXJ (direct, bureau, LotW)

EU-135; SM2 Vasterbotten District Group: Tomas, SM3DMP will be active as SF2CW from Holmon Island (EU-135) on August 6th to 9th.
QSL via SM3DMP (direct or bureau)

EU-146; PA; Zuid Holland/ Zeeland Province group: Marco, IZ3GNG will be active as PA/IZ3GMG on 40 m to 6 m in SSB from Schouwen-Duiveland (EU-146, WLOTA 3089, LOC JO11) on August 8th to 12th.
QSL via IZ3GMG (direct or bureau)

EU-165; I*0; Sardinia's Coastal Islands: Massimo/I0PNM will be active as IM0/I0PNM from S.Pietro Island (IOTA EU-165) from August 10th to September 3rd on 20 m to 10 m mostly SSB, RTTY and PSK31.
QSL via I0PNM (direct only)

NON-IOTA
Operators Ron, KB9NW, Frank, K9TIE and Fritz, WD9FMB will activate and try to qualify Coopers Island (USi IL040, LOC EN50en), located in the Illinois River, Tazewell County, Illinois, on 11th of August using the special callsign K9C. They will be QRV around 7250 kHz, 21350 kHz, 28450 kHz but mainly 14250 kHz to 14260 kHz.
QSL via WD9FMB.

Email to me your highest qso rates, please inform call used, contest and if the hour was "clock hour" or "QRATE hour"(=your best 60 minutes). You can also send several rates from different contests. Minimum for SSB is 300, for CW 200 and for RTTY 120. Only the best hour per contest is listed. Errors are possible. Please inform me if you find any.
For European operations: please send your best rates over 240 (SSB) and 175 (CW), so I will make a separate EU list.
For OH/OH0 operations: please send your best rates over 200 (SSB) and 150 (CW).
About Qrate, read this blog post of

Email to me your highest qso rates, please inform call used, contest and if the hour was "clock hour" or "QRATE hour"(=your best 60 minutes). You can also send several rates from different contests. Minimum for SSB is 300, for CW 200 and for RTTY 120. Only the best hour per contest is listed. Errors are possible. Please inform me if you find any.
For European operations: please send your best rates over 240 (SSB) and 175 (CW), so I will make a separate EU list.
For OH/OH0 operations: please send your best rates over 200 (SSB) and 150 (CW).
About Qrate, read this blog post of
mine: http://thehamradio.com/2010/12/rate-is-king-and-qrate/

Kepada Rekan2,

diharapkan partisipasinya sehinggga YB67RI on air 24 H, all mode all band
silahkan update data via email ke yb1ar@... atau ybdxc@...

Jadwal Operator YB67RI,

edited, 9 Agustus 2012

YB67RI SOP:

English Version:
CQ DX CQ DX CQ DX, this is YB67RI, special call for the 67(sixty seven) anniversary of Republic of Indonesia, calling CQ DX and standing by...

QSL via YB2DX or pse look at QRZ.com

Indonesia:
Opening:
CQ Indonesia CQ Indonesia CQ Indonesia, di sini YB67RI (six seven) spesial call dalam rangka Hari Ulang Tahun kemerdekaan Rep Indonesia ke 67, di sini YB67RI stand by,

QSL :
Silahkan kirim QSL card ke: PO Box 123, Purwodadi 58100, akan dibalas dengan QSL card spesial dari YB67RI.

Closing:
Terima kasih atas QSO nya , Dirgahayu Indonesia.

Utk operator:
1. Logging menggunakan komputer dan file dalam format:
Callsign Operator_YB67RI.adi
Misalnya Operator adalah YF1AR, maka file loggingnya adalah :
YF1AR_YB67RI.adi

2. Log file bisa dikirim ke :....
Paling lambat 31 Agustus 2012

Kepada semua Koord dan Oparator yg terlibat diucapkan Terima kasih atas partisipasinya.

To all radio amateurs

SB DX ARL ARLD032
ARLD032 DX news

This week's bulletin was made possible with information provided by QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

SPRATLY ISLANDS, 9M. Operators John, 9M6XRO and Steve, 9M6DXX will be active as 9M4SLL from Pulau Layang Layang, until August 13. Activity will be on all bands from 80 to 10 meters using CW, SSB and RTTY. QSL via M0URX, direct or via the RSGB bureau.

SVALBARD, JW. Torkel, LA6VJA will be active as JW6VJA from the JW5E club station in Longyearbyen on Spitsbergen Island (EU-026) between August 10 and 12. Fredrik, LA6TMA, will also join him and be active as JW6TMA. Activity by JW6VJA will be mainly CW with some SSB, while JW6TMA will be active mostly on the digital modes. QSL to their home call signs, direct or via the Bureau.

LAKSHADWEEP ISLAND, VU7. Members of the Bangalore Amateur Radio Club (VU2ARC) and a small group of amateur radio volunteers will be active as VU7M from Minicoy Island (AS-106, WFF VU-103, ARLHS LAK009 and IND017 from August 13 to 22. QSL direct or via the Bureau.

LEBANON, OD5. Members of the Lebanese Army Ham Radio Group will be active as OD5ARMY during the month of August to celebrate the founding of the Lebanese Army. QSL via OD5NJ.

MARKET REEF, OJ0. Pasi, OH3WS/OG3A is now active as OJ0W until August 10. Activity will take place during his spare time. QSL via OH3WS.

NAMIBIA, V5. Hans, DF2UU will be active from the end of August to the middle of September as V5/DF2UU. Activity will be on 160 to 6 meters. He will also be active during some contests.

REUNION, FR. Willi, FR/DF7RJ will be QRV from September 26 to October 21, on 160 to 10 meters, using CW and SSB, with special attention to the US and JA on the low bands. QSL direct to his home call.

TANZANIA, 5H. Roland, DL4ME will be QRV as 5H3ME from August 14 to September 3 with his son Mike, 5H3EE. Operation will take place on 80 to 6 meters in CW and digital modes. QSL via home call.

COMOROS, D6. Fabrizio, IW3SQY, Paolo, IV3DSH, Antonello, IT9YVO, Franco, IZ8GCE, Giorgio, IZ4AKS, Les, SP3DOI, and Salvador C31CT/EA3QS will be active as D64K until August 21. They will operate from 160 to 6 meters on all modes. QSL via IV3DSH.

ST. PIERRE ET MIQUELON, FP. Mike, VE2XB will be QRV as FP/VE2XB from August 10 to 20 on all bands with a focus on 6 meters. QSL via VE2XB.

ENGLAND, G. GB2012OLY is one of the special event stations for the Olympics 2012. QSL via M0DOL.

POLAND, SP. Special event call sign SN63DNI will be QRV until October 2 to remember the 63rd anniversary of the Warsaw Uprising. QSL via SP5NHV.

RUSSIA, UA. Members of the AFARU (Armed Forces Amateur Radio Union) will be active as R100WWS between August 10 and 18 to celebrate the 100th anniversary of the Military Air Forces of Russia. QSL via RV3YR.

INDONESIA, YB. Members of the YB Land DX Club (YBDXC) will activate the special event station YB67RI from August 10 to 17, celebrating the 67th anniversary of Indonesia's independence. QSL via YB2DX direct or LoTW only.

NICARAGUA, YN. Ben, TI4SU is QRV as HT9H to commemorate the 250th anniversary of the Battle of the Rio San Juan. QSL via TI4SU, direct.

ALASKA, KL7. From August 17 to 19, KL7XK/p, WL7CSJ/p, VA7AQ/NL5, and VE7DP/WL9 will be QRV from Pleasant Island (NA-161). Listen for them on CW and SSB on 30, 20, 17 and 15 meters. QSL via their home calls either direct or via the bureau.

OPERATION APPROVED FOR DXCC CREDIT. The following operation is approved for DXCC credit: H44UD, Solomon Islands, 2012 operation.

THIS WEEKEND ON THE RADIO. The Worked All Europe Contest, Maryland-DC QSO Party, Fall 6 Meter Sprint, Straight Key Weekend Sprintathon, NJQRP Skeeter Hunt, and Feld-Hell Gridloc Sprint will keep contesters busy this weekend. Please see August QST, page 77 and the ARRL and WA7BNM Contest websites for details.

3206. Software Glitch Results in CQWW Scoring Errors; Corrected Results to Be Posted Online

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-08-10 02:13:01 UTC
From: Yb land Dx club
Topic: 3206 Message: 3206

http://cqnewsroom.blogspot.com/2012/08/software-glitch-results-in-cqww-scoring.html

Software Glitch Results in CQWW Scoring Errors; Corrected Results to Be Posted Online

Announcement from CQ magazine…

(Hicksville, NY, August 9, 2012) -- A glitch in the software used to analyze logs submitted for the CQ World Wide DX Contest has resulted in errors in final scores for some participants in the 2011 CQWW DX SSB and CW competitions. These errors were discovered after the results of both competitions were sent to the printer, so some results published in the August and September issues of CQwill be incorrect. However, only one SSB certificate (out of approximately 1300) was affected by the error, and with the new, corrected, results, all affected stations' scores went up, not down. CW results were still being worked on as this is written, but a similarly small impact is expected.

According to the CQWW Contest Committee, "approximately one QSO in a thousand was marked as a bad call in error. This occurred when two similar calls, for example W1GD and W1GQ, were logged within three minutes of each other and only one of the stations submitted a log." The problem came about as part of a recent software upgrade, so no previous CQ contests are affected. It has now been fixed, so future contests also should not be affected.

Corrected scores for the SSB weekend will be posted on the CQ website as soon as possible. Corrected scores for the CW weekend will be planned to coincide with the release of the September digital edition, on or around September 1, 2012.

We will make additional announcements when the corrected results have been posted online.

CQ regrets any inconvenience resulting from these errors.

Dear YBDXC HQ,

Jika diperkenankan saya akan coba jadi operator YB67RI nanti malam 10 Agustus 2012 Jam 14-17 utc pada 15 meter band.
Data satsiun saya :
TX/RX : Icom IC-706 Power : +/- 5 watt (Sbb final sdh musti diganti)
Antenna : 2 EL MOXON Monoband 15 M band, Ketinggian 8 Meter above ground.
Logger : LOG4OM

Mohon maaf saya cuma bisa tanggal 10 agustus saja sebab, tanggal 11 Agustus pagi saya musti ke Jakarta, sedangkan di Jakarta saya tidak ada setup stasiun.

Thanks,
M.ZAINI, YB0MZI/4

SB PROP @ ARL $ARLP032
ARLP032 Propagation de K7RA

ZCZC AP33
QST de W1AW
Propagation Forecast Bulletin 32 ARLP032
From Tad Cook, K7RA
Seattle, WA August 10, 2012
To all radio amateurs

SB PROP ARL ARLP032
ARLP032 Propagation de K7RA

The bulletin today is coming from Eugene, Oregon.

Average daily sunspot numbers rose over 20 points this week, or
about twenty-percent, to 119.4. The average daily solar flux was up
3 points to 134.7.

Geomagnetic activity was quiet, with unsettled conditions around
August 2.

The NOAA/USAF prediction has solar flux at 135 on August 10, 130 on
August 11-12, then 125, 120, and 115 on August 13-15, then 110 on
August 16-17, then 95 on August 18, 100 on August 19-20, then 110,
115, 120, 125, 130, 135, 140 and 145 on August 21-28, then 140 on
August 29-31.

Predicted planetary A index is 5, 8 and 10 on August 10-12, then 5
on August 13-15, then 10, 8, 5, 8 and 8 on August 16-20, then 5 on
August 21-23, and 8 on August 24-25, then 12 on August 26, then 5 on
August 27 through September 14.

F.K. Janda, OK1HH sees quiet geomagnetic conditions on August 10,
mostly quiet August 11, active to disturbed August 12, quiet to
active August 13, mostly quiet on August 14, quiet August 15-16,
quiet to unsettled August 17-20, mostly quiet August 21, quiet
August 22-24, quiet to active August 25-26, mostly quiet August
27-28, active to disturbed again August 29-30, and a return to quiet
on August 31 through September 1.

Check out some nice solar images at
http://blogs.discovermagazine.com/badastronomy/2012/08/09/the-sun-is-shagadelic-baby/
and
http://www.space.com/17003-sun-eruption-solar-filament-video.html.

O.J. Lougheed, AD7DR of Lopez Island, Washington wrote: "I've been interested in transpolar propagation since I lived in Irkutsk, Siberia from 1997-2004. I'm thinking of putting together a ham club at the school on Lopez Island and your name popped up with an internet search. There is so little on the web. With sunspots picking up, things (I would assume) will get exciting. Do you know of any EU or Russian/Ukrainian folks interested in such propagation?"

I don't know, but if any readers across the poles or anywhere want to contact AD7DR, look him up in QRZ.com, where you will find his email address. You will have to login, but getting an account is free.

Larry Godek, W0OGH of Gilbert, Arizona wrote on Thursday, August 9, "Spratly Island, 9M4SLL has been worked on both 20 meter SSB and CW, along with CW on 15, with great signals.

Comoros Islands, D64K was worked on 15 yesterday at 2155Z. Had good signals into this area all the time he was on the air. Typically shortly after I get to work them, the band goes out. Happens a lot to me on 20 as well. Just like Arizona is the last place to make a QSO even though I hear the DX for long periods of time.

ZS2I was worked this morning at 1353Z on 20 CW long path. He couldn't hear me on the regular path so turned the antenna around to 270 degrees and he came up to over S9.

Talk about short hop, J68HZ was worked yesterday at 2224Z on 28.375. He was working mainly 4-land and the east coast. Surprised he came back to me.

Same thing with HT9H on 18.073 MHz at 2215Z. But then we had a large storm front within 100 miles from the north around thru the east to the SE. Then 20 this morning has been excellent to the Pacific.

Yesterday in the morning we had a 6 meter opening, double hop into Florida, Tennessee, South Carolina and Texas. Nothing unusual about the Texas stations as the area from EM00 though EM03 and EM10 thru EM13 are the first hop for us. They usually have loud signals and are typically the first stations from the E we hear.

There would be an idea. If it were possible, have any DX station, maybe some of the rarer types, run a WSPR beacon. If they can capture your signal at 2W, then you've got a path. But then there is a lot of one way propagation that goes on isn't there?

Really been a pretty fair year so far for DX. 30 meters has been a disappointment as has 10. If it wasn't for 15 and 20 there would be very little DX.

We print all the ARRL bulletins on a Model 28 TTY machine here. Everything that is 45 Baud 60WPM anyway. Really nice that ARRL continues that mode. Lots of hams around the country have real

mechanical TTY machines and look forward to running them several times a week. Keeps the oil and grease from getting old, kinda like the body!"

Burton Boyd, W7IIT of Bremerton, Washington says his hearing isn't as sharp as it used to be, and he can't always hear the WWV broadcasts of geophysical data at 18 minutes after each hour. I advised Burt to get the info off the internet at http://www.swpc.noaa.gov/ftpdir/latest/wwv.txt.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for August 2 through 8 were 126, 160, 140, 107, 108, 96, and 99, with a mean of 119.4. 10.7 cm flux was 134.6, 139.7, 138.7, 134, 134.1, 128.5, and 133.3, with a mean of 134.7. Estimated planetary A indices were 16, 7, 7, 6, 11, 7, and 10, with a mean of 9.1. Estimated mid-latitude A indices were 16, 8, 6, 6, 10, 8, and 12 with a mean of 9.4.

11 August 2012 A.R.I. DX Bulletin

No 1110

==========

*** 4 2 5 D X N E W S ***

**** DX INFORMATION ****

==========

Edited by I1JQJ & IK1ADH

Direttore Responsabile I2VGW

4S - Members of the Radio Society of Sri Lanka plan to be active as 4S7LGT from the lighthouse on Barberyn/Beruwala Island (AS-171) during the International Lighthouse/Lightship Weekend (18-19 August). [TNX The Daily DX]

5H - Ron, DL4ME will be active as 5H3ME from Tanzania from 14 August to 3 September. He will operate holiday style on 80-6 metres CW and digital modes. QSL via home call.

9A - Vincenzo, IZ2WMW, will be active as 9A/IZ2WMW from Krk Island (EU-136) on 18-25 August. QSL via home call, direct or bureau. [TNX rsgbiota.org]

CT - CT1EJB and CT2JYX will be QRV as CR5WFF (http://cr5wff.blogspot.pt) from Berlenga Island (EU-040) on 17-20 August. They will operate SSB, RTTY and PSK. QSL via CT1EJB. [TNX CT1END]

CX - The Radio Club Uruguayo will be active as CW1R from Punta del Este Lighthouse on 17-19 August for the ILLW. Look for activity on 80-10 metres CW, SSB and digital modes with at least two stations. QSL via CX1AA, direct or bureau. [TNX CX3AL]

DL - Mike, DL4ABO will be active as DL4ABO/p from Foehr Island (EU-042) on 18-25 August. He plans to be QRV during his evening hours. QSL via home call, bureau preferred. [TNX rsgbiota.org]

GM - A team from the Grantham Amateur Radio Club (www.garc.org.uk) will be active as GB0BL and/or GS0GRC from Bressay Isle (EU-012) and lighthouse on 14-19 August. QSL via operator's instructions.

GM - A team of YL operators will be active as GB2YLS from Fair Isle (EU-012) on 16-22 August, including the ILLW. They will operate CW and SSB on the HF bands. QSL via MM5YLO. [TNX DX World]

KL - Look for Doc KL7XK/p, Chuck WL7CSJ/p, Heinz VA7AQ/NL5 and Frank VE7DP/WL9 to be active from Pleasant Island (NA-161) on 17-19 August. They will operate CW and SSB on 30, 20, 17 and 15 metres. QSL via home calls, direct or bureau. [TNX DX World]

OH0 - Normunds, YL3DQ will be active as OH0/YL3DQ from the Aland Islands (EU-002) on 12-20 August. He will operate holiday style on 80-10 metres CW and RTTY. QSL via home call and LoTW. [TNX NG3K]

OH - Look for OH8T to be active from Marjaniemi lighthouse on Hailuoto island (EU-184) on 17-19 August for the International Lighthouse/ Lightship Weekend. QSL via bureau. [TNX rsgbiota.org]

ON - ON4YOTA (Youngsters On The Air) will be in use on 19-26 August during a youth radio camp to be held in Eeklo, Belgium and organized by UBA and VERON. QSL via ON9CFG. Further information on this event can be found at qrz.com and on the IARU Region 1's website (www.iaru-r1.org). [TNX ON9CFG]

PJ2 - Louis, PJ2LS will be active as PJ2L from Noordpunt Lighthouse on Curacao (SA-099) during the International Lighthouse/Lightship Weekend on 18-19 August. QSL direct to EB7DX.

SP - Jacek, SP5OXJ will be active as SP5OXJ/1 from Karsibor Island (EU-132) on 10-19 August. He will operate CW and digital modes. QSL via home call, bureau preferred, and LoTW. [TNX rsgbiota.org]

TA - The TC Special Wireless Activity Team (www.tcswat.org) and the Giresun Radio Amateurs and Nature Sports Club will be active as TC2ELH from Karadeniz Eregli Oluce Lighthouse on 18-20 August. QSL via TA1HZ.

V3 - Travis, AF6WU (V31WU) and Kjerstin, AF6KJ (V31DV) will operate mainly SSB from Caye Caulker (NA-073), Belize on 16-20 August. QSLs via AF6WU, direct or bureau.

P4 - Jack, W6NF (P40NF) and Shelley, K7MKL (P40S) will be active holiday style from Aruba (SA-036) on 15-21 August. She will participate in the SARTG RTTY Contest; Jack will operate mainly CW on 20, 15 and 10 metres (plus 6 metres, if there is an antenna available). QSL via home calls and LoTW. [TNX The Daily DX]

VK - Bill, VK4FW will be visiting his daughter on Groote Eylandt (OC-141) on 9 August for one week. Look for him to be active as VK8MM (CW only). QSL to VK4FW. [TNX QRZ DX]

VK - Look for Tony, VK3VTH to be active as VK3VTH/7 from the Currie Lighthouse on King Island (OC-233) for the ILLW. He expects to be QRV on 16 and 17 August, for a few hours starting at 5 UTC on 20 metres SSB; then during the lighthouse event on 18 August (0-9 UTC) and on the 19th (0-7 UTC), on 40 and 20 metres SSB. QSL via home call, direct or bureau.

VK - Mike, VK7FB and Anne, VK7BYL will be active from Tasman Island (OC-233) and lighthouse on 18-25 August, including an entry in the International Lighthouse/Lightship Weekend. [TNX rsgbiota.org]

VQ9 - Jim, VQ9JC (ND9M) is back on Diego Garcia (AF-006) until mid November. The ham shack was closed for maintenance during his absence from the island, and he does not know yet when it will be re-opened. In the meantime, he operates from two different locations on the island, both of which are in recreational parks. All of his operating is currently Field Day style, "in that I bring all my gear (rig, power supply, antennas, power and coax cables, keyer, laptop, and tools - about 40 pounds) with me in two backpacks. There is no shortage of trees, but I can only get the antenna up about 25 feet because of the density of the palms". He has to set up the station and then break it down each day, "which further limits my operating time to 1230-1615Z on most days typically". He runs 100 watts into single-band dipoles; he operates mainly CW with some SSB, while digital modes are not available for the time being. QSL via ND9M. [TNX VQ9JC]

W - The Great South Bay Amateur Radio Club (W2GSB) will be active from the historic lighthouse on Fire Island (NA-026) on 18-19 August for the ILLW. They plan to have three stations operating simultaneously on 80-10 metres CW, SSB and PSK31, plus satellites. [TNX Southgate ARC]

WEST AFRICA TOUR ---> Dominic, M1TKA will be active as M1KTA/6W from Senegal on 15-22 August, and from The Gambia (C5) on 22-29 August. He will operate SSB, RTTY, PSK and CW on most HF bands. One day side trips to Goree Island (AF-045, 6W) and the Bijol Islands (AF-060, C5) are being planned. While on the islands he will operate on 20 metres SSB (battery powered QRP). QSL via home call, direct or bureau. Check http://m1kta-qrp.blogspot.co.uk for updates.

==========
*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

7Z7AB ---> The website for the 5-11 October 7Z7AB expedition to Al-Dhahrah Island (AS-190) is now up and running at www.dxtool.com/7z7ab/.

ILLW ---> The 15th annual International Lighthouse/Lightship Weekend, conducted under the sponsorship of the Ayr Amateur Radio Group, will take place from 00.01 UTC on 18 August until 23.59 UTC on the 19th. Complete information on this popular event, including a list of participating stations (404 from 44 countries so far), can be found at http://illw.net/

NCDXF ---> The Northern California DX Foundation (www.ncdxf.org) has added two new Directors to fill vacancies created by retiring board members. The eleven member Board of Directors, which oversees all of the Foundation's business, now includes Rusty Epps W6OAT (President), Glenn Johnson W0GJ (Vice-President), Kip Edwards W6SZN (Secretary), Don Greenbaum N1DG (Treasurer), Ned Stearns AA7A, Steve Merchant K6AW, John Miller K6MM, Ken Anderson K6TA, Glenn Vinson W6OTC and newly elected Glenn Rattmann K6NA and Tom Berson ND2T. Since its founding in 1972, NCDXF has supported over 500 DXpeditions and donated in excess of one million dollars.

NIUE: NEW PREFIX ---> On 3 August the International Telecommunication Union (ITU) assigned the entire E6 prefix block (E6A-E6Z) to Niue (ex ZK2). The ARRL DXCC List and the Award Credit Matrix on LotW have already been amended to reflect this change.

PT0S ---> A summary of the reconnaissance trip to St. Peter and St. Paul Rocks [425DXN 1109] can be found at http://pt0s.com/. The actual 4-hour survey was conducted by AA7JV and PY2XB on 1 August.

QSL 5R8FL---> Andreas, 5R8FL has terminated G3SWH's QSL managership of his station effective 31 July 2012. "I have his logs up to the end of June 2012", Phil says, "and am awaiting the log for July. I will be uploading

the latest logs to LoTW and to the search facility on my web site (www.g3swh.org.uk) in the next few weeks". Phil has not been any reason for the termination, and he has "no information as to whether Andreas has made any alternative arrangements for confirming his future QSOs". [TNX G3SWH]

RAC ONTARIO SECTION ---> Effective 1 September, the current Ontario Section of RAC (Canada's national amateur radio Society) will be replaced by four new Sections: Ontario North (ONN), Ontario East (ONE), Ontario South (ONS), and the Greater Toronto Area (GTA). RAC Sections are separate multipliers for some contests, be sure to update your logging software.

Topic: 3207 Message: 3222
Attachments: 1 described; binary payloads are missing from this source WARC

Kepada Rekan2,

diharapkan partisipasinya sehinggga YB67RI on air 24 H, all mode all band
silahkan update data via email ke yb1ar@... dan/atau ybdxc@...

Jadwal Operator YB67RI, pada lampiran MS excel format

YB67RI SOP:

English Version:
CQ DX CQ DX CQ DX, this is YB67RI, special call for the 67(sixty seven) anniversary of Republic of Indonesia, calling CQ DX and standing by...

QSL via YB2DX or pse look at QRZ.com

Indonesia:
Opening:
CQ Indonesia CQ Indonesia CQ Indonesia, di sini YB67RI (six seven) spesial call dalam rangka Hari Ulang Tahun kemerdekaan Rep Indonesia ke 67, di sini YB67RI stand by,

QSL :
Silahkan kirim QSL card ke: PO Box 123, Purwodadi 58100, akan dibalas dengan QSL card spesial dari YB67RI.

Closing:
Terima kasih atas QSO nya , Dirgahayu Indonesia.

Utk operator:
1. Logging menggunakan komputer dan file dalam format:
Callsign Operator_YB67RI.adi
Misalnya Operator adalah YF1AR, maka file loggingnya adalah :
YF1AR_YB67RI.adi

2. Log file bisa dikirim ke : yb2dx@... dan/atau ybdxc@...
Paling lambat 31 Agustus 2012

Kepada semua Koord dan Oparator yg terlibat diucapkan Terima kasih atas partisipasinya.

Dear YBDXC HQ,

Jika diperkenankan saya akan coba jadi operator YB67RI nanti malam 10
Agustus 2012 Jam 14-17 utc pada 15 meter band.
Data satsiun saya :
TX/RX : Icom IC-706 Power : +/- 5 watt (Sbb final sdh musti diganti)
Antenna : 2 EL MOXON Monoband 15 M band, Ketinggian 8 Meter above ground.
Logger : LOG4OM

Mohon maaf saya cuma bisa tanggal 10 agustus saja sebab, tanggal 11 Agustus
pagi saya musti ke Jakarta, sedangkan di Jakarta saya tidak ada setup
stasiun.

Thanks,
M.ZAINI, YB0MZI/4

Subject: [YBDXC_News] Re: Jadwal Operator YB67RI, 20120810

Dear YBDXC HQ,

Jika diperkenankan saya akan coba jadi operator YB67RI nanti malam 10 Agustus 2012 Jam
14-17 utc pada 15 meter band.
Data satsiun saya :
TX/RX : Icom IC-706 Power : +/- 5 watt (Sbb final sdh musti diganti)

Antenna : 2 EL MOXON Monoband 15 M band, Ketinggian 8 Meter above ground.
Logger : LOG4OM

Mohon maaf saya cuma bisa tanggal 10 agustus saja sebab, tanggal 11 Agustus pagi saya musti
ke Jakarta, sedangkan di Jakarta saya tidak ada setup stasiun.

Thanks,
M.ZAINI, YB0MZI/4

Subject: Jadwal Operator YB67RI, 20120810

Kepada Rekan2,

diharapkan partisipasinya sehinggga YB67RI on air 24 H, all mode all band

silahkan update data via
email ke yb1ar@... atau ybdxc@yahoo.com

Jadwal Operator YB67RI, pada lampiran MS excel format

YB67RI SOP:

English Version:

CQ DX
CQ DX CQ DX, this is YB67RI, special call for the 67(sixty seven) anniversary of Republic of Indonesia, calling CQ DX and standing by...

QSL via YB2DX or pse look at QRZ.com

Indonesia:

Opening:

CQ Indonesia CQ Indonesia CQ Indonesia, di sini YB67RI (six seven) spesial call dalam rangka Hari Ulang Tahun kemerdekaan Rep Indonesia ke 67, di sini YB67RI stand by,

QSL :

Silahkan kirim QSL card ke: PO Box 123, Purwodadi 58100, akan dibalas dengan QSL card spesial dari YB67RI.

Closing:

Terima kasih atas QSO nya , Dirgahayu Indonesia.

Utk operator:

1. Logging menggunakan komputer dan file dalam format:

Callsign Operator_YB67RI.adi

Misalnya Operator adalah YF1AR, maka file loggingnya adalah :

YF1AR_YB67RI.adi

2. Log file bisa dikirim ke : yb2dx@... atau ybdxc@...

Paling lambat 31 Agustus 2012

Kepada semua
Koord
dan Oparator yg terlibat diucapkan Terima kasih atas partisipasinya.

Subject: [YBDXC_News] Re: Jadwal Operator YB67RI, 20120810

Dear YBDXC HQ,

Jika diperkenankan saya akan coba jadi operator YB67RI nanti malam 10 Agustus 2012 Jam 14-17 utc pada 15 meter band.
Data satsiun saya :
TX/RX : Icom IC-706 Power : +/- 5 watt (Sbb final sdh musti diganti)

Antenna : 2 EL MOXON Monoband 15 M band, Ketinggian 8 Meter above ground.
Logger : LOG4OM

Mohon maaf saya cuma bisa tanggal 10 agustus saja sebab, tanggal 11 Agustus pagi saya musti ke Jakarta, sedangkan di Jakarta saya tidak ada setup stasiun.

Thanks,
M.ZAINI, YB0MZI/4

Dear YBDXC HQ,

Jika diperkenankan saya akan coba jadi operator YB67RI nanti malam 10 Agustus 2012 Jam 14-17 utc pada 15 meter band.
Data satsiun saya :
TX/RX : Icom IC-706 Power : +/- 5 watt (Sbb final sdh musti diganti)

Antenna : 2 EL MOXON Monoband 15 M band, Ketinggian 8 Meter above ground.
Logger : LOG4OM

Mohon maaf saya cuma bisa tanggal 10 agustus saja sebab, tanggal 11 Agustus pagi saya musti ke Jakarta, sedangkan di Jakarta saya tidak ada setup stasiun.

Thanks,
M.ZAINI, YB0MZI/4

7Z7AB – Al-Dhahrah Island, AS-190

A team consisting of HZ1BF, 7Z1CQ, 7Z1SJ, HZ1MD, HZ1BW, HZ1HN, HZ1AR, HZ1DG, HZ1FS and HZ1TL will activate Al-Dhahrah Island AS-190 using the callsign 7Z7AB.

The DXpedition will start on 2012/10/05 until 2012/10/11.

ABOUT AL WAJH

Al Wajh (Arabic: الوجه□) is a coastal town in northwestern Saudi Arabia, situated on the coast of the Red Sea. The town is located in the Tabuk Province.

Al Wajh is a comparatively small town. Fishing is a primary activity of the town's residents and the port is the central location where this occurs – the Al Wajh port used to be one of the main shipping centres in the region 50 years ago.

The town is served by the Al Wajh Domestic Airport and has close links with the city of Tabuk, with a road connecting the two locations.

Al Wajh is passage for convoys since ancient times. There are the castles and fortresses hundreds of years ago.

It holds a historic town built by the facial effects of parents and grandparents and grandchildren maintained. Population of the province about 50,000 souls.

ABOUT
Al-Dhahrah Island جزيرة الظهرة
Al Wajh City مدينة الوجه

a coastal island in North Western Saudi Arabia.
west of Al Wajh city

Latitude : (26° 9′ 21” N)

Live Contest Score – Russia – Post Score – N1MM – WRITELOG – TR4W – WINTEST – MIXW

Universal Poster
This is small program (unipost4.zip has size just 79 Kb) that can be used to communicate between an either Win-Test, MixW or WriteLog software on the client side and On-line Server. To successfully execute unipost4.exe the Microsoft .NET Framework version 2.0, 3.0, 3.5 or 4.0 should be installed on your computer.
The unipost4.zip archive contains:
unipost4.exe (100 Kb) – the main program, written in C#
WLconn.dll (92 Kb) – dynamic library to communicate with WriteLog, written in WinAPI
© 2012, Team R4W

TR4W
Complete the following steps in your TR4W program to set up 'Each 10 minutes' automatically posting scores to cqcontest.ru server:
Press CTRL-J
Set SCORE POSTING URL: http://cqcontest.ru/postscore.jsp
Set SCORE READING URL: http://cqcontest.ru
Open window "Post score" at "Windows" menu.
Note 1: cqcontest.ru accept detail score since TR4W version 4.234a
Note 2: cqcontest.ru accept MULTI-TWO, MULTI-LIMITED or MULTI-UNLIMITED category since TR4W version 4.243

N1MM
The Contest Reporting Application (Realtime score reporting) can be started by checking "Start Contest Reporting Application" on the Other tab of the configurer. When the application has been started the dialog "Realtime Score Reporting" will be shown.
Click Setup
Set Score Posting URL: http://cqcontest.ru/postscore.jsp
Set Score Reading URL: http://cqcontest.ru
Click OK

Win-Test (3.x, 4.x)
You need to download unipost4.exe program from cqcontest.ru "Options" menu. Set up both network broadcast (or direct IP) address and port number. Click here for details info.
Set network broadcast address and port
Set WT Category-band
Click "Run!"
Note: To successfully execute unipost4.exe the Microsoft .NET Framework version 2.0, 3.0, 3.5 or 4.0 should be installed on your computer.

MixW
You need to download unipost4.exe program from cqcontest.ru "Options" menu. After execute unipost4.exe set operator category values here. After that choose MixW .log file you wish

to send real time score from. Each 5 to 30 minutes (depends on unipost4.ini settings) live score will automatically send to on-line contest score server.
Choose MixW log
Set properly values of contest settings
Click “Run!”
Note: Because of MixW log limits, universal poster will send just QSO by bands/modes. No mults and total score sends.
To successfully execute unipost4.exe the Microsoft .NET Framework version 2.0, 3.0, 3.5 or 4.0 should be installed on your computer.

5MContest
The program supports realtime reporting since version issued later than 24-Mar-2011. Check out 5MContest author’s web-site to find last software releases and notes. Follow this link to find how to setting up on-line reporting in 5MContest.
Referee
This is a special version of Live Multi-post client program designed especially for (UCG or any other field style competition) referees.

AATest
The program supports realtime reporting since version 1.95. Check out AATest author’s web-site to find last software releases and notes. Follow this link to find how to setting up on-line reporting in AATest.

QARTest
The contest program written by Paolo, IK3QAR. At the moment QARTest is only available in Italian language. Follow this link to find how to setting up on-line reporting in QARTest.

WriteLog
You need to download unipost4.exe program from cqcontest.ru “Options” menu. Launch Writelog application first, select the log. Launch unipost4.exe second. In unipost4.exe select properly category-op, -band, -mode, -power. Click “Run!”. Each 5 to 15 minutes (depends on unipost4.ini settings) live score will automatically be send to on-line contest score server.
Launch WriteLog
Launch unipost4.exe
Select contest name and operator categories
Click “Run!”
Note: To successfully execute unipost4.exe the Microsoft .NET Framework version 2.0, 3.0, 3.5 or 4.0 should be installed on your computer.

Posted on 2012/07/02 by Admin
Hi all, here a few words about my activity…
I'm in Morocco since 2 years now for my job. I was very busy so I amCN2YZ only since the 14 February 2012.I'm located in Tanger city , loc : IM75CS. So far I am the only Ham station « active » from Tanger city. Since a few days there is an other French ham (F1GXW), name Patrick who is now CN2GW, also located in Tanger city.He is resident in Tanger. He will need a bit time to setup his station and antenna system.
My working conditions are very simple because I « live » in a hotel room :
FT897d + 17m dipole + MFJ-945tuner. This setup is good for 20/17/15/6m and just « acceptable » for 30/12/10m. The dipole is taped on a fishing rod out of the window, and facing Europe. You can have a "shack tour" on youtube here: http://www.youtube.com/watch?v=HHleG2Kj-Xg
The major problem is the QRN, at least 53 and sometimes up to 59 ! Sometimes, the night I have to switch off the light in my bedroom to bring the QRN down …Aniway, I have been worked by : EU, AF,NA, SA, AS and OC (vk..)
I focus on 6m during Es openings, and because SSB would disturb some others hotel customers in the nexts bedrooms, I prefer digimodes like : psk31/63/125 , RTTY, CW (via computer) and made also severals JT6M QSO on 6m during low and shorts Es bursts ..
My PWR is only : 20w in psk / 40 in RTTY / 50 in JT6M-CW and 80w in SSB.
I'm on the air mostly week-ends and some week's evening time, till end of August 2012. Then I will be «sporadicaly » in Tanger till end of 2012.
In July I have also the permission to use the calsign : 5C13CY (celebrating the 13th anniversary of the enthronization of His Majesty Mohammed VI) This activity is also valid for the DXCC an any diploms.
My great thank's go to: iZ8CCW Antonio for this web service and QSL card management, and CN8LR Kacem for his kindness and licences…
73 and and see you soon on the air.
Florent CN2YZ / 5C13CY (F4CYZ)
QSL …. ready to start !
Posted on 2012/05/25 by Admin

Morocco

Morocco is a country located in North Africa.
It has a population of about 35 million and an area of 710,850 km², including the disputed region of the Western Sahara, seen by and mostly administered by Morocco as the Southern Provinces. Morocco is part of the Maghreb region, in addition to Tunisia, Algeria, Mauritania, and Libya, with which it shares cultural, historical and linguistic ties.
Morocco is a constitutional monarchy with an elected parliament. The political capital is Rabat, but the largest city is Casablanca; other main cities include Marrakesh, Tetouan, Tangiers, Salé, Fez, Agadir, Meknes, Oujda, and Nador.
Most Moroccans natively speak either Moroccan Arabic or Berber as a mother tongue. Both languages have regional dialects and accents. Hassaniya Arabic is also spoken natively in

the southern parts of the country by a small population.
Here is a nice video showing Morocco and its beauties.

Italy
To receive CN2YZ QSL-card is required an appropriate SASE or SASE+IRC or SAE+$ (USD) for direct mail return.
Consider that in Italy postage rate for letters are:
* € 0.75 for 20 gr. letter to Europe;
* € 1.60 for 20 gr. letter to USA;
* € 2,00 for 20 gr. letter to Oceania & South America.
QSLs without an appropriate contribution will be answered via bureau.
If you send your QSL via direct, please don’t send also via bureau and vice versa. Thank you so much!

Dear Rekan YBDXC,
Saya mau tanya, ada beberapa stasiun DX yang bertanya kepada saya bahwa dia butuh QSL card dari saya.
Sebab kalau dia kirim pakai dollars, dia bilang takut hilang di Indonesia.
Maka dia minta lewat PAYPAL.
Saya punya Rekening PAYPAL, trus apa yang saya berikan kepada dia, sedangkan rekening PAYPAL saya ga tahu nomor rekeningnya?
Apakah ada teman yang bisa bantu saya?
Terima kasih. 73 de ZEN, YB0MZI/4

Dear OM Zen,

One of the Good Idea.. How to deal with another HAM Friends to receive money due the QSL Card matter..

Saya jadi sempat berpikir menggunakan hal yg sama krn sy juga punya Paypal account beberapa waktu lalu. Makanya sy langsung oprek" rekening saya disitu, lalu sy coba lihat beberapa kemungkinan :

OM Zen, pada account kita disana coba saat kita masuk/login nanti ada beberapa options di toolbar atas :
My Account - Send Payment - Request Money - Merchant Service - Product n Services .. Nah coba OM pilih Request Money.

Pada pilihan ini, kita bisa mengirimkan permohonan permintaan uang (request money) pada teman kita di 190 negara diseluruh dunia, asalkan dia punya e-mail address.. Mudah kan? Coba lihat keterangan disana. Cukup masukan alamat e-mail ybs (yang request qsl card kepada OM Zen). Bahkan mereka yg ga punya account Paypal bisa kita request juga.

Nah setelah kita input e-mail address, lalu amount (jumlah) berapa ∂αη dalam mata uang apa? USD, Euro dll
Request Payment for : (pilih) Goods or Services ..IMHO sy pikir ini pilih services aja lah.. Nah nanti akan ada fee yg dikutip dari yg pengirim uang tsb. Kalo M̲ªů baca keterangan di "see when fees apply"..

Kalo kita terima uang ga terima fees, nantinya kalo kita tarik kemudian akan ada fees
makanya hemat sy paypals punya kebijakan spt itu supaya bagusnya kita pakai lagi account balance yg ada pada account kita itu untuk belanja lagi/services yg lain..
Taruhlah khusus utk received/sent payment for QSL paper Card only.. Hi Hi..

Semoga dapat membantu OM..

OM Irsan,

Yang saya tahu :
SASE = Self Addressed Stamped Envelope,
adalah amplop yg disertakan pada saat kita kirim QSL card utk minta balasan. Amplop sudah kita tulisi ALAMAT KITA dan sudah kita bubuhkan PERANGKO, sehingga mereka tinggal masukkan QSL balasan dan kirimkan ke kantor pos. Ini tentunya untuk negara yg sama atau kita punya perangko negara mereka dan mereka SETUJU dg sudah ditempel perangko itu.

SAE = Self Addressed Envelope
seperti di atas tapi tidak ditempeli perangko, tapi biasanya utk biaya pengiriman/perangko dilampiri green stamp (US$) atau IRC. Tapi ada juga yg memang cuma minta dilampiri SAE saja tanpa perlu GS ataupun IRC.

OM Zen,
Sebenarnya di Indonesia relatif aman selama amplop mereka rapat, tidak bisa diterawang isinya dan JANGAN DITULISI CALLSIGN SIAPAPUN di luar amplop itu.

OM Seno, GM
Setelah terjadi satu QSO - harus segera diselesaikan secara adat. xixixix

Saya trenyuh lho dengar ada rekan yg bilang : "Saya terima banyak QSLcard DX udah lama, tapi belum balas dan greenstampsnya/USD 2 sudah segini", (katanya sambil telunjuk & jempolnya membentuk spasi 1cm).

+ Mbok dibalas segera, udah ditungguin tuh.
- Blom punya QSL card, belum nyetak

+ Wong sekarang nyetak gampang, bisa pake printer sendiri, nyetak jumlah sedikit aja 10-20-100 lembar juga bisa di percetakan digital, dicetak via rekan2 di YBDXC juga lebih murah dg jumlah tertentu desainnya bagus2 lagi tinggal pilih.

Masih bingung ?, buat aja stempel karet utk data QSO & callsign - beli kartu pos bergambar (mahal ya..?) atau kartu pos biasa (kalo tega) - stempel, isi data - kirim deh.
Saya banyak terima QSL card yg sangat sederhana dulu, terutama dari PO Box 88 Moscow, tapi via buro, kalo mereka kirim direct + IRC/GS, yg bagusanlah kartunya.

Dulu ODJ menyediakan QSL card bergambar full colour, yg bisa digunakan siapa saja - tinggal tambahkan callsign masing2.

Koq aku jadi curcol nih OM Seno.

OM Hendro..

Selamat Pagi..
QSL 100% already OM.. Sy cuma M̲ªů 'menyapa' teman saya YD0OVC yg tinggal di Green Garden itu OM Budi Halim hahahahha... Biasanya dia suka becanda OM.. Kayaknya dia lsg 'kabur' setelah disapa saya..

Betul sebaiknya tidak menyertakan Callsign atau apapun di dlm amplop, ∂αη kondisi amplop harus berwarna (saran saya pake amplop coklat) seukuran QSL Card.. Ohya OM Hen, sebaiknya diperhatikan permintaan dari mereka mengenai QSL Info krn kalo kita hanya kirim SAE tanpa IRC akan dibalas via Bureau .. Waksss tau sendiri kan sampainya kapan? Hi Hi..

OM Irsan,

Yang saya tahu :
SASE = Self Addressed Stamped Envelope,
adalah amplop yg disertakan pada saat kita kirim QSL card utk minta balasan. Amplop sudah kita tulisi ALAMAT KITA dan sudah kita bubuhkan PERANGKO, sehingga mereka tinggal masukkan QSL balasan dan kirimkan ke kantor pos. Ini tentunya untuk negara yg sama atau kita punya perangko negara mereka dan mereka SETUJU dg sudah ditempel perangko itu.

SAE = Self Addressed Envelope
seperti di atas tapi tidak ditempeli perangko, tapi biasanya utk biaya pengiriman/perangko dilampiri green stamp (US$) atau IRC. Tapi ada juga yg memang cuma minta dilampiri SAE saja tanpa perlu GS ataupun IRC.

OM Zen,
Sebenarnya di Indonesia relatif aman selama amplop mereka rapat, tidak bisa diterawang isinya dan JANGAN DITULISI CALLSIGN SIAPAPUN di luar amplop itu.

Hehe

Ga papa,
Setiap individu kan pya pengalaman pribadi masing2,
Sy juga pernah membawakan station Zulu, terus log-sheet nya aku serahkan ke org yg bertanggung-jawab dalam hal itu, eeehh malah dibuang, edan bener orang ini, pya jabatan kepengurusan lagi.

sebelum mengenal LoTW mmg sy sdh pake manager qsl, jadi ga pusing, habis mancar log-sheet sy email ke dia, nah sekarang ada LoTW ya saya perkewuh mau nyapih dia, wong kelihatannya org nya sdh sepuh, jadi ya aku biarin aja ngurus qsl-cardku, lagian aku juga ndak pusing mbalesin,
Jadi kalo nanti ada yg komplain kok ga dibales, tinggal aku email sama dia aja, ehhh yg ini kok blm dibales, hehehehe

OM Irsan,

Yang saya tahu :
SASE = Self Addressed Stamped Envelope,
adalah amplop yg disertakan pada saat kita kirim QSL card utk minta balasan. Amplop sudah kita tulisi ALAMAT KITA dan sudah kita bubuhkan PERANGKO, sehingga mereka tinggal masukkan QSL balasan dan kirimkan ke kantor pos. Ini tentunya untuk negara yg sama atau kita punya perangko
negara mereka dan mereka SETUJU dg sudah ditempel perangko itu.

SAE = Self Addressed Envelope
seperti di atas tapi tidak ditempeli perangko, tapi biasanya utk biaya pengiriman/perangko dilampiri green stamp (US$) atau IRC. Tapi ada juga yg memang cuma minta dilampiri SAE saja tanpa perlu GS ataupun IRC.

OM Zen,
Sebenarnya di Indonesia relatif aman selama amplop mereka rapat, tidak bisa diterawang isinya dan JANGAN DITULISI CALLSIGN SIAPAPUN di luar amplop itu.

Dear Rekan YBDXC,
Saya mau tanya, ada beberapa stasiun DX yang bertanya kepada saya bahwa dia butuh QSL card dari saya.
Sebab kalau dia kirim pakai dollars, dia bilang takut hilang di Indonesia. Maka dia minta lewat PAYPAL.
Saya punya Rekening PAYPAL, trus apa yang saya berikan kepada dia, sedangkan rekening PAYPAL saya ga tahu nomor rekeningnya?
Apakah ada teman yang bisa bantu saya?
Terima kasih. 73 de ZEN, YB0MZI/4

Rekan-2
kalau boleh sharing, yang dimaksud oleh rekan yang QSO dengan OM Zen adalah sistem OQRS (Online QSL Card Request System), saat ini memang mulai diminati berbagai kalangan di manca negara.
OQRS itu terkoneksi dengan Cliub Log (www.clublog.org) untuk systemnya dan dengan paypal (www.paypal.com,) utk pembayarannya.
Intinya station yang berQSO dengan YB67RI tidak usah mengirimkan QSL card, tetapi dia request melalui OQRS System di Club log misalnya, mereka cukup membayar dengan Harga US$ yang ditentukan, (misalnya : umumnya US$ 2 sd US$ 2.5) utk setiap QSL card, berapapun jumlah QSO yang dilakukan. (biasanya max 4 QSO)

Setelah mereka membayar dengan paypal dan mengisi aplikasi pada clublog, maka paypal akanmemberitahu QSL manager bahwa telah dilakukan pembvayaran OQRS oleh X, engan nominal US$ XX.00 untuk QSO dengan rincian DATE, TIME, BAND dst.

Maka si Manager tersebut setelah mengecek pada log, bisa langsung mengirimnkan QSL Card tersebut.
kira-kira demikian sharing nya,
saat ini sudah banyak yang menggnakan system itu: contoh HKØNA, TO3X, YJØVK, dan hampir seluruh DX pediion sudah menggunakan OQRS ini, karena praktis, karena pada umumnya station dx pedtion tidak memerlukan qSL card dari peserta QSO, mereka hanya butuh support $$.

semoga bisa membantu
salam

Salaam kenal juga OM Zen..YB0MZI/4 de YC0OST..
Betul tuh kata OM Rouss YB0BAW..
Kelihatannya mereka udah terbiasa mengirim biaya QSL card kepada HAM Friends via Paypal sehingga mereka menanyakannya kpd OM Zen..
Untungnya OM Zen punya..

Okay Good Luck OM Zen for QSL-ing..
I will put some info about paypal in my profile in QRZ.com, too

OM Hendro..

Selamat Pagi..
QSL 100% already OM.. Sy cuma M̄ªů 'menyapa' teman saya YD0OVC yg tinggal di Green Garden itu OM Budi Halim hahahahha... Biasanya dia suka becanda OM.. Kayaknya dia lsg 'kabur' setelah disapa saya..

Betul sebaiknya tidak menyertakan Callsign atau apapun di dlm amplop, ∂αη kondisi amplop harus berwarna (saran saya pake amplop coklat) seukuran QSL Card.. Ohya OM Hen, sebaiknya diperhatikan permintaan dari mereka mengenai QSL Info krn kalo kita hanya kirim SAE tanpa IRC akan dibalas via Bureau .. Waksss tau sendiri kan sampainya kapan? Hi Hi..

SalamJelangLebaran,

Kalo yang satu ini memang benar OM Dani..khususnya DXpedition apalagi mereka menggunakan ClubLog..(OM Zen udh daftar belum tuh? OM Hendro juga karena sudah punya club yaitu YBDXC)..
Lain ceritanya kalo belum ada club seperti saya hiks ..hiks..

Tetapi OQRS menurut saya adalah suatu payment method yang sangat tepat untuk QSL-ing jaman kini..
Saya sedang memonitor khusus yg satu ini..

Thanks OM Dani for your info..

OM Seno,
Utk ke Jateng koq susah saya diterimanya ya, pernah coba beberapa kali QSO dengan OM Hans - YB2DX

Saya bisa terima YB2DX dengan jelas, tapi sayanya sulit sekali terdengar - tapi berkat ketekunan saya manggil dan kesabaran YB2DX memonitor, akhirnya berhasil juga. ;-)

Semalam saja, OM Busan-YF1AR hampir nangis karena sedih, susah mendengar signal saya. Reportnya 3/3 HI.

OM Hendro..

Selamat Pagi..
QSL 100% already OM.. Sy cuma M̲ªů 'menyapa' teman saya YD0OVC yg tinggal di Green Garden itu OM Budi Halim hahahahha... Biasanya dia suka becanda OM.. Kayaknya dia lsg 'kabur' setelah disapa saya..

Betul sebaiknya tidak menyertakan Callsign atau apapun di dlm amplop, ∂αη kondisi amplop harus berwarna (saran saya pake amplop coklat) seukuran QSL Card.. Ohya OM Hen, sebaiknya diperhatikan permintaan dari mereka mengenai QSL Info krn kalo kita hanya kirim SAE tanpa IRC akan dibalas via Bureau .. Waksss tau sendiri kan sampainya kapan? Hi Hi..

SalamJelangLebaran,

OM Irsan,

Yang saya tahu :
SASE = Self Addressed Stamped Envelope,
adalah amplop yg disertakan pada saat kita kirim QSL card utk minta balasan. Amplop sudah kita tulisi ALAMAT KITA dan sudah kita bubuhkan PERANGKO, sehingga mereka tinggal masukkan QSL balasan dan kirimkan ke kantor pos. Ini tentunya untuk negara yg sama atau kita punya perangko
negara mereka dan mereka SETUJU dg sudah ditempel perangko itu.

SAE = Self Addressed Envelope
seperti di atas tapi tidak ditempeli perangko, tapi biasanya utk biaya pengiriman/perangko dilampiri green stamp (US$) atau IRC. Tapi ada juga yg memang cuma minta dilampiri SAE saja tanpa perlu GS ataupun IRC.

OM Zen,
Sebenarnya di Indonesia relatif aman selama amplop mereka rapat, tidak bisa diterawang isinya dan JANGAN DITULISI CALLSIGN SIAPAPUN di luar amplop itu.

Dear Rekan YBDXC,
Saya mau tanya, ada beberapa stasiun DX yang bertanya kepada saya bahwa dia butuh QSL card dari saya.
Sebab kalau dia kirim pakai dollars, dia bilang takut hilang di Indonesia. Maka dia minta lewat PAYPAL.
Saya punya Rekening PAYPAL, trus apa yang saya berikan kepada dia, sedangkan rekening PAYPAL saya ga tahu nomor rekeningnya?
Apakah ada teman yang bisa bantu saya?
Terima kasih. 73 de ZEN, YB0MZI/4

Ya semua itu tergantung apa yang mau kita rencanakan / inginkan,
Kalo kita tidak butuh qsl mereka OQRS adalah cara yg tepat, tp kalo kita ingin keep QSL mereka juga, ya eman-eman, suatu ketika kita butuh qsl dia utk nambah kredit, kita dptnya cuma USD aja,

Rekan-2
kalau boleh sharing, yang dimaksud oleh rekan yang QSO dengan OM Zen adalah sistem OQRS (Online QSL Card Request System), saat ini memang mulai diminati berbagai kalangan di manca negara.
OQRS itu terkoneksi dengan Cliub Log (www.clublog.org) untuk systemnya dan

dengan paypal (www.paypal.com,) utk pembayarannya.
Intinya station yang berQSO dengan YB67RI tidak usah mengirimkan QSL card, tetapi dia request melalui OQRS System di Club log misalnya, mereka cukup membayar dengan Harga US$ yang ditentukan, (misalnya : umumnya US$ 2 sd US$ 2.5) utk setiap QSL card, berapapun jumlah QSO yang dilakukan. (biasanya max 4 QSO)

Setelah mereka membayar dengan paypal dan mengisi aplikasi pada clublog, maka paypal akanmemberitahu QSL manager bahwa telah dilakukan pembvayaran OQRS oleh X, engan nominal US$ XX.00 untuk QSO dengan rincian DATE, TIME, BAND dst.

Maka si Manager tersebut setelah mengecek pada log, bisa langsung mengirimnkan QSL Card tersebut.
kira-kira demikian sharing nya,
saat ini sudah banyak yang menggnakan system itu: contoh HKØNA, TO3X, YJØVK, dan hampir seluruh DX pediion sudah menggunakan OQRS ini, karena praktis, karena pada umumnya station dx pedtion tidak memerlukan qSL card dari peserta QSO, mereka hanya butuh support $$.

semoga bisa membantu
salam

Ada juga yg bukan DXpedition, tapi menyarankan penggunaan PayPal - ada yg cukup kirim data QSO tanpa perlu kirim QSL card (dia gak perlu), tapi dalam kasus OM Zen khan dia yang perlu QSL card dan OM Zen juga mungkin memerlukan QSL cardnya juga. Hanya utk masalah keamanan GSnya saja.

Seingat saya waktu awal disarankan kepada member YBDXC saya sudah daftar, tapi terus terang penggunaannya belum ngartos euy... (CPU di kepala masih pake Pentium 1).

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).
3D2C, CONWAY REEF (Press Release)
Paul, N6PSE, sent out the following on August 7th: "After many months of careful planning, we are pleased to announce that our preparations for a large multi-national Dxpedition to Conway Reef are going according to plan.
Conway Reef is located in the South Pacific Ocean and is #35 on Club- Log's most wanted DXCC list.
The Team is meeting in Lami Bay, Suva and departing by ship to Conway Reef on September 24th. The Team expects to arrive at Conway Reef and become active on September 26th. We will complete our Dxpedition on October 5th, 2012.
The main goals of this DXpedition are to work every amateur radio operator who needs Conway Reef for a new DXCC country. In addition, we will be active on all bands from 1.8 MHz to 144 MHz, including the 5 MHz and 50 MHz bands.
We will be active on CW, SSB and RTTY. Special attention will be made to work far away stations such as Europe and Africa during those periods when propagation permits. The

propagation window for EU and Africa is very brief at times and signals may be weak, so we ask everyone in the honored HAM SPIRIT to stand by when asked so that we may fulfill this need. Our destination will have a wide range of options and possibilities.
We plan to upload our logs on a daily basis to our on-line log. We will upload to LOTW approximately six months following the DXpedition.
Our team consists of these Operators: Hrane-YT1AD-Leader, Aleksej-UA4HOX-Co-Leader-Operations, Paul-N6PSE-Co-Leader-PR & Fundraising, David-WD5COV, Vasily-RW4NW, David-AH6HY, Alan-K6SRZ-Team Physician, Alan-AD6E, Sergej- RZ3FW, Craig-K9CT, Stan-LZ1GC, George-N6NKT, Peter-PY5CC, Mike-K6MKF, Jim-K9JM, Miguel-PY3MM and Luciano-PY5KD.
We wish everyone good propagation and we hope that you enjoy working the 3D2C Team.
At this time, we are seeking additional Club and Individual Sponsors to help us defray the costs of carrying out this DXpedition. Our official website is:
http://www.yt1ad.info/3d2c/index.html3D2C Team"
5T0, MAURITANIA
A group of Polish radio amateurs (SP2EBG, SP3CYY, SP3GEM, SP6EQZ, SP3FXY and SP6IXF) with the special participation of Jean, 5T0JL, will be active as 5T0SP between November 24th and December 10th, from Mauritania. Activity will be on all HF bands, 160-10 meters using CW, SSB an RTTY. There will be a focus on JA and Far East. A Web page is currently under construction at:
http://www.5t0sp.dxing.pl
C6, BAHAMAS
Bob, W9XY, will be active as C6AXY between November 4-9th. Activity will be holiday style on 40-10 meters using mostly CW and SSB, with maybe some RTTY or PSK31 thrown in. QSL via W9XY.
CW, URUGUAY (LH Op!)
Members of the "RADIO CLUB URUGUAYO" will be active as CW1R (ILLW Special Event Callsign) from Punta del Este Lighthouse (ARLHS URU 008, ILLW UY0005, Grid Locator GF25ma) during the upcoming International Lighthouse/Lightship Weekend (August 17-19th). Activity will be on 80-10 meters using CW, SSB and the Digital modes. QSL by the Bureau or direct to: Radio Club Uruguayo, P.O.Box 37, 11000, Montevideo, URUGUAY, SOUTH AMERICA (with SAEand 1 new IRC or 2 green stamps).
DXPEDITION VIDEOS OF THE WEEK
With more and more DXpeditions putting their videos on YouTube and other Web services, we decided to list them (possibly) each week. For this week's listings:
2008 - KL7DX NA-234 Cleveland Volcano
DXpedition: http://www.youtube.com/watch?v=026fW4rYcwg
2007 - C6ARI DXpeditions: http://www.youtube.com/watch?v=8wTkbywWcdk
2002 - VP6DI Ducie Island DXpedition:

 http://www.youtube.com/watch?v=1P2K8kcaiA4 (Part 2)
If you have a DXpedition 'video' available on the Web and would like to have it listed in the OPDX, PLEASE send the URL to use and we will publish it.
E6, NIUE (New Prefix)
On August 3rd, the ITU updated its "Table of International Callsign Series" to reflect a callsign change for Niue. The island will now have the entire E6 prefix block (E6A-E6Z). Niue is an island approximately 1700 miles northeast of New Zealand, and is a self-governing island nation that has been in free association with New Zealand since 1974. Prior to the change, the island used ZK2.
EA6, BALEARIC ISLANDS
Adrian, AA5UK, will be operating again from Ibiza, Balearic Islands (EU-004), between October 20-31st as EA6/AA5UK. Activity will be holiday style on 80-10 meters using SSB,

RTTY and PSK31. He will also operate in the CQWW DX SSB Contest (October 27-28th) as a Single-Op/ All-Band/Assisted entry. Adrian informs OPDX, "I got back into RTTY big time last year and found there was a big demand of EA6. I will be con- centrating heavily on RTTY with some SSB during my non-contest period." QSL direct via his home callsign, by the Bureau, LoTW or eQSL.

IOTA NEWS

AS-008. Takeshi "TAKE", JI3DST, will once again be active as JI3DST/JI1 from Shikine Island (North Izu Island) between 0500z, September 12th and 2400z, September 16th. Operations will be on 40/30/20/17/15/ 12/10 meters using CW, SSB, FM, RTTY and PSK31. Activity will also be during the Scandinavian Activity Contest [SAC] (Sep- tember 15-16th). In case of heavy rain or other conditions, the operation condition may vary. QSL info for JI3DST/JI1 is available on QRZ.com. Also, visit his Blog Page at:

http://blog.goo.ne.jp/ji3dst

AS-060. Members of Gwangju DX Club will be active as D7G from Kogum Island between August 17-19th. Activity will be on 80-6 meters using CW, SSB and RTTY. QSL via HL4CEL.

EU-136. Vincenzo, IZ2WMW, will be active as 9A/IZ2WMW from Krk Island (ACIA IC-105, CIA-22, IOCA CI-046, MIA MC-185, WLOTA 1342) between August 18-25th. Activity will be holiday style on the HF bands. QSL via hs home callsign, direct or by the Bureau.

NA-161. Operators Doc/KL7XK/p, Chuck/WL7CSJ/p, Heinz/VA7AQ/NL5 and Frank/VE7DP/WL9 will activate Pleasant Island between August 17-19/th. Activity will be on 30/20/17/15 meters using CW and SSB. QSL to operator's home callsign, by the Bureau or direct.

OC-174. Gil, 4F2KWT, will be active as DX0N from the rare Bongao Island located in the province of Tawi-Tawi, Philippines, sometime in September. Look for more details o be forthcoming at:

http://www.qrz.com/db/DX0N

K4, UNITED STATES (LH/IOTA Op!)

A team of eight operators, lead by Rick, K4JTT, from the Atlanta area, will again activate a rare light- house from Sand Island Lighthouse (ARLHS USA-723), on Dauphin Island (NA-213), in Alabama, between September 26-30th. The callsign will be K4D. Sponsors for this year's activation include Yaesu who will supply the radios, the anchor sponsor Alpha Delta Antenna's who will provide the antennas and the Kennehoochee Amateur Radio Club, Marietta, Georgia. This is the group 3rd annual activation. For more details and updates, visit:

http://www.w4bti.org

visit:http://www.amsmeteors.org/2012/08/viewing-the-2012-perseid-meteor-shower

NH7, HAWAII

Ji, N6TJ, will be active as NH7A from KH6LC's QTH during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/ All-Band entry. QSL via F5VHJ.

OH0, ALANDS

Normunds, YL3DQ, will be active as OH0/YL3DQ from Eckero, Aland Island, between August 12-20th. Activity will be holiday style on 80-10 meters using CW and RTTY. QSL via YL3DQ.

The log will be uploaded to LoTW.
P4, ARUBA
John, W2GD, will be active as P40W from Santa Cruz, Aruba (SA-036, WLOTA 0033), during the CQWW DX SSB Contest (October 27-28th) and the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band/ High-Power entry. QSL via LoTW or N2MM (QRZ.com). Look for some 30/17/12 meters and 160 meters operations before the contest as time permits.
PLEASE NOTE: 60m operation is NOT authorized on Aruba. Log will be posted to LoTW within two weeks. ALSO, John plans to end responding to P40W QSL card requests by the end of 2013. Confirmations for P40W only via LoTW thereafter.
PT7, BRAZIL (LH Op!)
Luciano, PT7ZT/p, will be active from two valid Lighthouses for the Brazilian Lighthouse Award (DFB) and Ceará State Lighthouse Award (DFCE): Between now and August 14th, Pontal das Almas Lighthouse (BRA-179, CE-03), and August 16-19th, Itapagé Lighthouse (BRA-057 andd CE-02). Activity will be SSB only. QSL via his home callsign.
PT0S, ST. PETER AND ST. PAUL ROCKS (Update)
As mentioned last week, George, AA7JV, was on a recon trip to St. Peter and Paul Rocks for the PT0S operation coming up in November, and has returned home. George used an Elecraft KX3 with a whip on the recon trip to determine the quietest location for the low band receiving antennas: 300 ft. away on another island. You can read about on the PT0S Web page under "News Updates" at:
http://pt0s.com/news.html

Phil, G3SWH , reports: "It is with great regret that I have to announce that Andreas, 5R8FL, has terminated my QSL managership of his station with effect from the end of July 2012. I have his logs up to the end of June 2012 and am awaiting the log for July. I will be uploading the latest logs to LoTW and to the search facility on my web site in the next few weeks. I have plenty of proper QSL cards left. I have been given no reason for the termination
and have no infor- mation as to whether Andreas has made any alternative arrangements for confirming his future QSOs."
CY9M LOTW NOTICE. The following note is on M0URX's Web page at:
http://m0urx.com/3-M0URX/369-cy9m-lotw-upload.html"The CY9M log has been uploaded to Logbook of The World, LoTW. It has become clear that one of the laptops used for logging was + one hour out of UTC. If you are missing a match on LoTW please reload your QSO adding ONE HOUR to your log time."
QSL H44USMC via H44RK. Special event station to commemorate 70th anni- versary of the U.S. Marines landings on Guadalcanal.

HK0NA LoTW. Bob, N2OO, reports that he has begun to upload QSOs to LoTW. However, he mentions that for some reason some 15,000 QSOs are missing from the HK0NA LoTW upload. He states, "Will work it all out with ARRL next week. PLEASE don't deluge me with emails! I'm on it."
UT1FG/MM QSL UPDATE. OPDX has been informed with the following updated info concerning the status of QSL requests for contacts made by UT1FG/MM after April, 2012: "Yuri, UT1FG, has been on a well deserved vacation in Russia following his 6 month long voyage as Captain of the M/V Barnacle. Logs for the April-May 2012 timeframe have just now become available to his QSL Manager Eugene, UX0FY. Yuri was only home for a few days, but he managed to write many QSL cards which will be returned by mail (if postage was provided), or by the Bureau (if no postage was enclosed). Eugene will have the bureau cards out in September and said that the Ukraine Bureau is working very well. Direct cards are going out daily.
Eugene has all of Yuri's logs now and can answer all requests. Eugene responds to all requests (with sufficient postage) on a direct basis. He encloses an insert that requests that the recipient send an E-mail to him when they receive their card(s). This insures that the process is complete. If no E-mail is received then the card is possibly lost or stolen in the mail. So, let him know if you received your UT1FG/MM cards that you requested or not. If you did not receive the cards, he will work something out with you to get them. This goes for the 6 meter as well as the satellite contacts.
QSL RECEIVED VIA LoTW: 1A0C, 5B4AHK, 5B4AIF, 6D0LM, 9A5K, 9A8ZRS, 9K2MU, 9M6XRO, AK1W, CE2/VE7SV, CN4P,CO2JD, CQ7A, CY9M, DF4WC, DK1BX, DL1IAI, DL1QQ, DL3XM, DL4YBP, DL5FU, DL7URH, DU1IST, DU1JI, EI6HW, EA1XT, F4BKV, FM5CD, FP/VA2WA, G4IIY, G7SSE, GJ6YB, GM2T, GM5X, H2T, HA0HW, HK0NA, HR9/WQ7R, HS0ZIV, IR2M, IW1QN, IZ8GCE, JA3EGY, K4NC, K6MM, K9BTQ, LY200NB, LY2MM, LZ1BJ, MI0AYR, MJ0CFW, MO0FAL, OE7FMH, OG5N, OJ0R, OK2DL, OL2HQ, OK5T, OL2HQ, PA1NHZ, PA1PE, PA3C, PA3GND, PA9JO, PJ4/K5KG, PY1SX, R6AF/P, R7NA, RN4LP, RZ3EC, S57L, SP1MWK, SP5IT, SQ2NNN, SV0XCC/9, SV9AHZ, UA2FL, UA3ON, UA4HBW, UN5J, UR5LCZ, UX0HO, UX2KA, V55V/P, V73NS, VA7PX, VE3XB, VK1DI, VK2DX, VK4AFU, W0EWD, W4AS, WH7Z, XE1KK, YO9IKW and ZP9MCE
QSLS RECEIVED VIA MAIL: 6V7Z, DP1POL, ES3AX, EY7AD, HH4/W3CMP, HK1MW, J52HF, K5N, N5K, MO0OXO, OD5NH, OM3CAQ, PJ7DX, SV2ASP/A, TO5T, UA9MA, VP2MFF, WE8A/KH0, XV9MA, YB8Y and YT1E
QSLS RECEIVED VIA THE BUREAU: 4JA3USA, 4O/S56C, 5B4AJC, 5X1VJ, 6W/UA0SE, 6W/RZ0SR, 7U1MA, 9M2TO, A65BU, AH0BT, C31MO, DU1IST, ES4X, EA6ES, EA6SK, EA6TS, EA7AAW/EA6, EA8AB, EA8AJO, EA8CBJ, EA8IK, EA8MT, EA8QP, EA8UP, EA8ZS, EC8ADS, EH8RHG, ET3AA, JD1BMH, KB7OBU/KH2, P3N, P33W, P4/RG5A, PP0T, PY0/CT1BWW, R1ANC, T2XG, T6AG, T88NA, TX3T, TX7M, UK/JA0VSH, VK9ANU and VK9HR
TC2, TURKEY (LH Op!)
As a part of WEBLOTA (Western Black Sea Lighthouses On The Air Award) scheme, look for TC2ELH to be on the air between August 18-20th. Detailed information about WEBLOTA and the lighthouse is available on
www.qrz.com and www.tcswat.orgActivity will be on all HF bands, and they will also try VHF-UHF. QSL via TCSWAT. (As they also QSL 100% via the Bureau, please do not QSL direct unless you are in a hurry!). Unfortun- ately, TC6LHW, also planned for the same weekend from the Civaburnu Light- house at Çarsamba, Samsun, but it had to be cancelled. It will be activated in the future.
V4, ST. KITTS AND NEVIS
John, W5JON, will once again be operating as V47JA from his Calypso Bay, St. Kitts, W.I., hillside vacation home (CQZ 8, IOTA NA-104, Grid FK87pg) between October 12th and November 1st. Activity will be on 160-6 meters, including 60m and using SSB. His activity will also include CQWW DX SSB Contest (October 27-28th) as a Single-Op/ All-Band entry. Equipment will be: Kenwood TS-590S and a SB200 Amplifier and a 80-10m Multiband Dipole and S9

Vertical (18' and 31'); 6m will be a 3 element yagi. His XYL Cathy, W5HAM, will occasionally operate as V47HAM. ALL QSLs go to his home callsign W5JON. Also via LoTW.
VK9C, COCOS (KEELING) ISLAND
A surprise activation last week by Allen, VK3BF, from here as VK3BF/VK9C will end very quickly (possibly on August 12th. Activity seems to be mainly on 20 meters SSB. QSL via VK3BF.
VK9X, CHRISTMAS ISLANDS
Pekka, OH2YY, reports, "Last November a re- scheduling of flights, caused by bad weather, cut my operation at Christmas Island very short. I have now decided to return to Christmas and re-activate VK9XM in early October this year. The schedule for the operation is from Oct. 6th (ca. 12Z) to Oct. 12th (ca. 24Z). I will be active on frequencies 7-28 MHz. I will QSL 100% either direct or via SRAL QSL bureau. Direct QSL's to my home address: Pekka Ahlqvist OH2YY, Vapaalanpolku 8B, 01650 Vantaa, Finland."
VP9, BERMUDA (NA-005)
Paul, W4/VP9KF (G4BKI),will once again be active as VP9KF from Baileys Bay, Hamilton Parish, between November 5-19th. Activity will only be CW on all bands and the JA greyline. QSL via W4/VP9KF: Paul Evans, 6809 River Road, Tampa, FL 33615. Please, DO NOT send to the VP9 bureau. Visit his Web page for more information, including logs, propagation and operating times, at:
http://vp9kf.com
VQ9, CHAGOS ISLANDS
Jim, VQ9JC/ND9M, informs OPDX,
"I'm back on Diego Garcia until mid November. The ham shack was closed for maintenance during my absence from the island, and I don't know yet when it will be re-opened. Hopefully, the closure is only temporary. In the meantime, I'm operating from two different locations on the island, both of which are in recreational parks. All of my operating is currently Field Day style in that I bring all my gear (rig, power supply, antennas, power and coax cables, keyer, laptop, and tools - about 40 pounds) with me in two back- packs. (I wear one and hand carry the other.) Being a tropical island, there's no shortage of trees, but I can only get the antenna up about 25 feet because of the density of the palms. I get the supporting lines into the trees using fishing line and lead weights and throwing them up by hand. (Think David and Goliath.) I'd be able to get the antennas up higher if I could use a slingshot or bow and arrow, but those are considered weapons here
and are illegal under BIOT law.
>Since my two operating spots are outside in public areas, I have to set up the station and then break it down each day, which further limits my operating time to 1230-1615z on most days typically. My HF rig is an FT-897D (barefoot at 100W) and single- band dipoles.
>Most of my operating will be on CW, but I'll do SSB on occasion. I don't have a Rigblaster with me yet, so digital modes aren't available for the time being. My CW operating is normally with a keyer, but I have a retired shipboard hand key with me at all times and can easily switch to manual keying for SKCC contacts.
>I also operate through the LEO satellites with an FT-857 (TX) and FT-817 (RX) for duplex comms. The antenna is a 5-element Elk log periodic. All of my HF operating is from the island, so contacts are valid for DXCC and other awards that require that QSOs be made between land-based stations. My satellite operating is from both the island as well as the ship I work on. All QSOs that I make from the ship will be clearly identified as '/MM' or 'maritime mobile', and the QSLs will indicate that as well. QSL via ND9M."VQ9, CHAGOS ISLANDS
Chuck, W4XP, will be active as VQ9XP from the club station VQ9X from Diego Garcia Atoll (AF-006, WLOTA 1645, LOC MI62) between now and August 25th. His activity will be focused on 6 meters, but he will also be on the HF bands. QSL direct via W4XP and LoTW.

VU7, LAKSHADWEEP ISLAND (Reminder)[IOTA/Lighthouse/WFF Op]
Remember to look for members of the Bangalore Amateur Radio Club (VU2ARC) and a small group of amateur radio volunteers to be active as VU7M from Minicoy Island (AS-106, WFF VU-103, ARLHS LAK009 and also IND017 [to be deleted!!]) between August 13-22nd. Details on (QRZ.com) state that they will be "setting up humble HF station" and the QSL route is "DIRECT to the QSL Manager VU2JHM or through the Bureau". For more details (plently of URLs to look at) and updates, watch(QRZ.com) under VU7M.
W4DXCC DX CONVENTION
Mark your activities calendar for September 28-29th, for the Annual W4DXCC DX Convention held in Pigeon Forge, TN, at the Mainstay Conference Center. Ten Tec also sponsors a outdoor Hamfest at their plant in Sevierville, TN, on the same weekend. These two events are just a couple of miles apart. The Hamfest is during the morning/ afternoon and the W4DXCC Convention is during the evening hours. For additional information about the W4DXCC DX CONVENTION, visit their Web site at:
http://www.w4dxcc.com
W9DXCC DX CONVENTION (September 14-15th)
Jim, N7US, reports: "This is a reminder of the 60th annual W9DXCC DX Convention which is a little more than a month away. We always have a great time. The presentations are interesting and focused on DXing. The prize drawings are fun. Several vendors and organizations will be exhibitors, and you can operate an FT DX 5000 which Yaesu has furnished for special event station W9D.
We'll have QSL card checking for CQ and ARRL awards, including 160M and deleted countries. The CW copying contest will let you compete against the best, especially if our banquet speaker, Fred Laun, K3ZO, participates.
The optional Friday afternoon class will get aspiring DXers up to speed (well, maybe not 35 wpm) in four hours. Our master of ceremonies, Jim O'Connell, W9MU, will keep us on track and entertained.
The hotel is conveniently located near major highways and O'Hare, so the convention is easy to get to locally or from anywhere else. But the best part of the convention is seeing old friends and making new ones. The Friday and Saturday night hospitality suites are a good opportunity to do that.
By registering now instead of the last minute or at the door, you save a few bucks and you enable us to plan for the right number of attendees. Registering is easy on our website, http://www.w9dxcc.com, and you can pay using PayPal for your convenience. Everyone attending the convention is expected to register, as the registration fees cover the costs of the convention, so please do the right thing and register.
You may receive an individual mailing as well as one or more from your reflectors, so sorry for any dupes. Please pass on the word to your local club and friends. We look forward to seeing you at W9DXCC....
73, Jim N7US"
ZL9, CAMPBELL ISLAND (Update/Press Release)
Ed, VK2ARE, Australian Publicity Officer for the ZL9HR, sent out the following press release [edited]: "The team at the Hellenic Amateur Radio Association of Australia have all permissions including the landing permit to Campbell Island (OC-037) and are in the process of building out three shipping containers in Sydney, Australia, to be used for transport of all equipment and supplies required. The DX'Pedition will be on Campbell Island between the 28th of November and the 9th of December.
An international team of operators has been assembled for this event on the sub-Antartic Campbell Island which is located 650 km or 400 miles south of New Zealand in the Southern Ocean. This is the biggest DX'Pedition by an Australian club in 25 years and the promises

to be the most sought after DX'Pedition in 2012 overall. The complete crew of 10 operators is as follows: Tommy/VK2IR, John/VK3YP, Les/W2LK, Gene/K5GS, Don/VE7DS, Istvan/HA5AO, John/9M6XRO, David/K3EL, Jacky/ZL3CW and Tom/KE4KY.
Keen DX-ers who may be looking to get ZL9 on a particular band and mode to move towards a DXCC or other award, should go to the survey on the website at ZL9HR.com and vote for which bands and modes they would like to hear ZL9HR operating on!
When people think of DX'Peditions, they think of operators sitting under palm trees on exotic islands with the world of amateur radio enthusiasts trying to talk to them. While this is where every DX'Pedition tries to get to, there is a LOT of work that has to happen before this is possible! Months or even years before, the event planning starts and permits are requested, equipment assembled and transport both of equipment and operators arranged. Accommodation organized and all red-tape worked through. All of this requires a lot of work from the organizers and also requires finance in the form of contributions from those taking part in the event and from sponsors. Without sponsors no DX'Pedition can take place and the ZL9HR DX'Pedition is no exception.
This DX'Pedition is rightly being billed as one of the most important DXPeditions in 2012 and the HARAOA is very happy to announce that many of the sponsors that supported earlier DXPeditions are helping again with ZL9HR. There will be additional sponsors 'signing up' over the next few weeks, but we would like to thank those who have already committed to support the DX'Pedition. These are as follows (in alphabetical order);
Commercial sponsors: RF Solutions and Spiderbeam
Club & Organisations: British Colombia & Northwest Washington ORCA DX & Contest club, Clipperton DX Club, Danish DX Group, European DX Foundation, German DX Foundation, Lone Star DX Association, Long Island DX Association, Lynx DX Club, Mediterraneo DX Club, Northern California DX Club, Northern Illinois DX Association, Oklahoma DX Association, Pacific DXers, West Tennessee DX Association and 599 DX Association.
There are also currently 33 individuals who are sponsoring the event.
In addition to these sponsorships, the HARAOA ZL9HR DX'Pedition is delighted to have been granted an award from the prestigious ARRL Colvin foundation. The Colvin Award is conferred in the form of grants in support of Amateur Radio projects that promote international goodwill in the field of DX and the HARAOA are honoured to have received this award.
Please keep monitoring the DX'Pedition's website - ZL9HR.com for all updates as the preparations keep progressing."

OM Hen kapan ada waktu ketemu, ngobrol2 dan coba club log :D
kadang-kadang saya, OM Hari, OM Yongki dan OM Uun diBintaro atau di Serpong
kumpul2 sambil sharing logger software dll.

OM Djoko, OM Irsan,
Habis lebaran ya, jadi gak lemos kita nantinya.
Kita atur jadwalnya nanti.

Waduh asyik tuh bisa nambah2 ilmu DXing, kalo orang jawa bilang ngangsu kawruh.

thanks
hen

Tergantung undangan dari panitianya..

Palembang jakarta hanya 45 menit kok, yg lama malah dari bandara soeta.

Rekan-2
kalau boleh sharing, yang dimaksud oleh rekan yang QSO dengan OM Zen adalah sistem OQRS (Online QSL Card Request System), saat ini memang mulai diminati berbagai kalangan di manca negara.
OQRS itu terkoneksi dengan Cliub Log (www.clublog.org <http://www.clublog.org/>) untuk systemnya dan dengan paypal (www.paypal.com <http://www.paypal.com/> ,) utk pembayarannya.
Intinya station yang berQSO dengan YB67RI tidak usah mengirimkan QSL card, tetapi dia request melalui OQRS System di Club log misalnya, mereka cukup membayar dengan Harga US$ yang ditentukan, (misalnya : umumnya US$ 2 sd US$ 2.5) utk setiap QSL card, berapapun jumlah QSO yang dilakukan. (biasanya max 4 QSO)

Setelah mereka membayar dengan paypal dan mengisi aplikasi pada clublog, maka paypal akanmemberitahu QSL manager bahwa telah dilakukan pembvayaran OQRS oleh X, engan nominal US$ XX.00 untuk QSO dengan rincian DATE, TIME, BAND dst.

Maka si Manager tersebut setelah mengecek pada log, bisa langsung mengirimnkan QSL Card tersebut.
kira-kira demikian sharing nya,
saat ini sudah banyak yang menggnakan system itu: contoh HKØNA, TO3X, YJØVK, dan hampir seluruh DX pediion sudah menggunakan OQRS ini, karena praktis, karena pada umumnya station dx pedtion tidak memerlukan qSL card dari peserta QSO, mereka hanya butuh support $$.

semoga bisa membantu
salam

OM Djoko, OM
Irsan,
Habis lebaran ya,
jadi gak lemos kita nantinya.
Kita atur
jadwalnya nanti.

Waduh asyik tuh
bisa nambah2 ilmu DXing, kalo orang jawa bilang ngangsu kawruh.

thanks
hen

Ada juga yg bukan
DXpedition, tapi menyarankan penggunaan PayPal - ada yg cukup kirim data QSO
tanpa perlu kirim QSL card (dia gak perlu), tapi dalam kasus OM Zen khan dia
yang perlu QSL card dan OM Zen juga mungkin memerlukan QSL cardnya juga.
Hanya utk masalah keamanan GSnya saja.

Seingat saya
waktu awal disarankan kepada member YBDXC saya sudah daftar, tapi terus terang
penggunaannya belum ngartos euy... (CPU di kepala masih pake Pentium 1).

Judul: Re: Bls: [YBDXC_News] HELP!

Kalo yang satu ini memang benar OM Dani..khususnya
DXpedition apalagi mereka menggunakan ClubLog..(OM Zen udh daftar belum tuh?
OM Hendro juga karena sudah punya club yaitu YBDXC)..
Lain ceritanya kalo belum ada club seperti saya hiks ..hiks..

Tetapi OQRS menurut saya adalah suatu payment method yang sangat tepat untuk
QSL-ing jaman kini..
Saya sedang memonitor khusus yg satu ini..

Thanks OM Dani for your info..

Subject: Re: Bls: [YBDXC_News] HELP!

Rekan-2
kalau boleh sharing, yang dimaksud oleh rekan yang QSO dengan OM Zen adalah sistem
OQRS (Online QSL Card Request System), saat ini memang mulai diminati berbagai
kalangan di manca negara.
OQRS itu terkoneksi dengan Cliub Log (www.clublog.org) untuk systemnya dan dengan paypal

(www.paypal.com,) utk
pembayarannya.
Intinya station yang berQSO dengan YB67RI tidak usah mengirimkan QSL card, tetapi dia request melalui OQRS System di Club log misalnya, mereka cukup membayar dengan Harga US$ yang ditentukan, (misalnya : umumnya US$ 2 sd US$ 2.5) utk setiap QSL card, berapapun jumlah QSO yang dilakukan. (biasanya max 4 QSO)

Setelah mereka membayar dengan paypal dan mengisi aplikasi pada clublog, maka paypal akanmemberitahu QSL manager bahwa telah dilakukan pembvayaran OQRS oleh X, engan nominal US$ XX.00 untuk QSO dengan rincian DATE, TIME, BAND dst.

Maka si Manager tersebut setelah mengecek pada log, bisa langsung mengirimnkan QSL Card tersebut.
kira-kira demikian sharing nya,
saat ini sudah banyak yang menggnakan system itu: contoh HKØNA, TO3X, YJØVK, dan hampir seluruh DX pediion sudah menggunakan OQRS ini, karena praktis, karena pada umumnya station dx pedtion tidak memerlukan qSL card dari peserta QSO, mereka hanya butuh support $$.

semoga bisa membantu
salam
DANI

Dear Rekan2 YBDXC,
Setelah sharing dengan temen-temen YBDXC mengenai PAYPAL, akhirnya stasiun DX yang saya maksud berhasil mengirimkan uang sebanyak 2 UD$ sesuai dengan yang saya tagih via Paypal. Sekedar info buat rekan-rekan, dia kirim 2US$ tapi saldo yang masuk ke Paypal saya cuma 1,62 US$ (Mungkin dipotong biaya jasa Paypal)

Apakah temen-temen ada yang mengerti maksud surat dari stasiun DX tersebut seperti email dia dibawah ini yang saya beri garis bawah :

Hi ZEn

I have managed to send the payment by paypal for the qsl card of 2 usd , a short time ago .

I will send just a qsl card by post if you would like one off qrz either the girls or the antennas.

The address should be . Roger Betts .. 15 CLEASBY .. TAMWORTH .. STAFFORDSHIRE .. B77 4JL .. UK ..
many thanks Roger

Terima kasih atas penjelasan dari temen-temen maksud dari surat tersebut, mengingat Bahasa Inggris saya cuma bisa bilang "Fifty Nine and Goodluck". eeehhhhhh...eeehhhh.

de ZEN, YB0MZI/4

OM Zen...

Maksudnya dari Mr Roger..

Dia akan kirim QSL Card untuk OM Zen yang sama seperti di QRZ.com dia...coba lihat di sana apa ada dia posting sample QSL card beliau yang gambarnya satu antena dan satunya lagi gambar Cewek /girls ...nah kalo OM Zen suka yang gambar antena tinggal bilang sama dia aja...nanti dia kirim....atau mau yang satunya lagi? :-)

That's it!

Have Fun...with the QSL Cards...:-)

Ok om terima kasih.

EEEEHHHHHH...eehhhh, kirain saya ditawarin gadis di UK.

Boleh OM....bilang aja sama OM Roger..
Nanti siapa tau akan dicarikan gadis sehat dan segar dari pedesaan di kampungnya...
Mungkin gadis pemerah susu atau gadis penggembala kambing seperti ceritanya Heidy ...Hi hi...

Cheers,

Irsan

OM Irsan (yg pakar sapi juga kambing rupanya),
Gadis "pemerah susu", maksudnya apa ?

- Gadis yg bekerja memerah susu kambing/sapi, atau
- Gadis yg membuat susu menjadi (berwarna) merah

;-)
hen

Boleh OM....bilang aja sama OM Roger..
Nanti siapa tau akan dicarikan gadis sehat dan segar dari pedesaan di kampungnya...
Mungkin gadis pemerah susu atau gadis penggembala kambing seperti ceritanya Heidy ...Hi hi...

Cheers,

Irsan

Belum tau OM..

Untuk Eropa aja kalo ga pake amplop IDR 6000 mgkn kalo pake 2x lipatnya.. Perkiraan kalo ke UK IDR 8000. Lumayan jauhnya

Hitung-hitung tongpes OM sekian banyak paper qsl card yg harus dikirim..belum IRC..tapi nungguin yg spt OM Zen aja dech..pake Paypal..
Kalo pake LoTW praktis tapi ga bs kumpulin paper qsl card..itu syarat buat ikut unar..hiks

Lumayan yaa potongan biaya paypal
Tapi daripada GS -nya hilang di 'jalan'

Irsan

Tadi sy perkirakan pasti akan rame komentar kalo udah bicara Gadis ∂αη Susu..

Ternyata banyak penggemar kedua-duanya disini.. :-)

Kabbbooorrr..QRX

Irsan

Ps : OM Hen..maaf maksud saya adalah Gadis Pemerah Susu bisa susu sapi atau susu kambing..
Udah ah.. Jangan dibahas..tuh udah ada yg mulai keracunan susu dari Solo City..
Hehehehe

OM Irsan (yg pakar sapi juga kambing rupanya),
Gadis "pemerah susu", maksudnya apa ?

- Gadis yg bekerja memerah susu kambing/sapi, atau
- Gadis yg membuat susu menjadi (berwarna) merah

;-)
hen

Boleh OM....bilang aja sama OM Roger..
Nanti siapa tau akan dicarikan gadis sehat dan segar dari pedesaan di kampungnya...
Mungkin gadis pemerah susu atau gadis penggembala kambing seperti ceritanya Heidy ...Hi hi...

Cheers,

Irsan

OM Seno,
Kalau aku monitor di cluster om seno sering di PSK31,
Aku mau tanya interface buat mode digital pesan dimana?
Aq udah pesan ke YB3DD tapi jack ke microphone Om Pardi masih pakai yang 8 pin, sedangkan radio saya pakai IC706 yang pakai jack socket seperti buat telpon.
thanks zen, yb0mzi

OM Zen..

Ganti thread bikin yang baru...Mode Digital PSK dan RTTY Interface...

Entar di splatter sama Momod loh...

Irsan

Hallo OM Zen,

Ahhh enggak kok,
Aku masih blum prof,
Ok basicnya adalah :
1. Aku pake sound card , tp aku blok pake trafo OT-240
2. Pake soft-ware digipan (free ware bisa down-load)
Pse note : aku masih coba2 , ya misih ribet sih, tp sdh bisa convert to file .ADI

Demikian info,
Thanks es 73

OM Seno,
Kalau aku monitor di cluster om seno sering di PSK31,
Aku mau tanya interface buat mode digital pesan dimana?
Aq udah pesan ke YB3DD tapi jack ke microphone Om Pardi masih pakai yang 8
pin, sedangkan radio saya pakai IC706 yang pakai jack socket seperti buat
telpon.
thanks zen, yb0mzi

LOJEL.....LOJEL....LOJEL.....
iya juga ya om, bikin dapur ga ngebul.
Sekarang stasiun DX pada pasang tarif, padahal dia pake mobil mewah, motor harley stasiunnya nauju bilah minjalik.
Saya yang pake Honda bebek tahun 90 aja mau pasang tarif ga tega...
eeeehhhh..eehhhhh..

3296. Bls: Bls: [YBDXC_News] Ikutan Kumpul2....(interface)

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-08-14 01:18:46 UTC
From: hendro s.joedho
Topic: 3242 Message: 3296

OM Zen,
Waktu pesan ke YB3DD harusnya kasih tahu rig yang akan digunakan apa, jadi jack/plugnya akan disesuaikan dengan rig itu.

Kalo mau iseng buat sendiri yg sederhana juga relatif mudah koq, waktu itu di QTHnya OM Onno pernah ada workshop membuat sendiri interface utk digital mode ini.
Lihat skemanya di internet juga banyak koq.

Dari: Zen <yb0mzi@...>
Kepada: YBDXC_News@yahoogroups.com
Dikirim: Selasa, 14 Agustus 2012 7:22
Judul: Re: Bls: [YBDXC_News] Ikutan Kumpul2....

OM Seno,
Kalau aku monitor di cluster om seno sering di PSK31,
Aku mau tanya interface buat mode digital pesan dimana?
Aq udah pesan ke YB3DD tapi jack ke microphone Om Pardi masih pakai yang 8 pin, sedangkan radio saya pakai IC706 yang pakai jack socket seperti buat telpon.
thanks zen, yb0mzi

3297. Ikutan Kumpul2.... (Tarif Pos DX)

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-08-14 02:01:00 UTC
From: hendro s.joedho

OM Zen dkk,
Terlampir daftar Tarif Pos/Perangko ke negara2 tujuan di Afrika, Asia Pacific, Amerika & Eropa.
Daftar negara mungkin kurang lengkap, tapi bisa digunakan tarif utk tujuan terdekat - tapi ada juga negara tujuan yang "tidak ada" di entity list-nya DXCC. HI.

Sebaiknya sebelum ke kantor pos timbang dulu suratnya di rumah, biasanya utk QSL card selembar plus amplopnya +/- 10-13 gram.
Tapi kalo langsung kita serahkan ke petugas kantor pos utk nimbang dan menentukan biayanya, "kadang" lebih mahal. Lucu...?

Satu lagi, stock perangko di kantor pos seringkali tidak lengkap, yg banyak tersedia pecahan Rp 2.500 ke atas.
Pecahan Rp 1500,- sudah jarang, yg Rp 1000 juga gak ada, padahal kadang saya berusaha utk nempel perangko agak banyak lembarnya.

Belum tau OM..

Untuk Eropa aja kalo ga pake amplop IDR 6000 mgkn kalo pake 2x lipatnya.. Perkiraan kalo ke UK IDR 8000. Lumayan jauhnya

Hitung-hitung tongpes OM sekian banyak paper qsl card yg harus dikirim..belum IRC..tapi nungguin yg spt OM Zen aja dech..pake Paypal..
Kalo pake LoTW praktis tapi ga bs kumpulin paper qsl card..itu syarat buat ikut unar..hiks

Lumayan yaa potongan biaya paypal
Tapi daripada GS -nya hilang di 'jalan'

Irsan

Subject: [YBDXC_News] Ikutan Kumpul2.... (Tarif Pos DX)

OM Zen dkk,
Terlampir daftar Tarif Pos/Perangko ke negara2 tujuan di Afrika, Asia Pacific, Amerika & Eropa.
Daftar negara mungkin kurang lengkap, tapi bisa digunakan tarif utk tujuan terdekat - tapi ada juga negara tujuan yang "tidak ada" di entity list-nya DXCC. HI.

Sebaiknya sebelum ke kantor pos timbang dulu suratnya di rumah, biasanya utk QSL card selembar plus amplopnya +/- 10-13 gram.
Tapi kalo langsung kita serahkan ke petugas kantor pos utk nimbang dan menentukan biayanya, "kadang" lebih mahal. Lucu...?

Satu lagi, stock perangko di kantor pos seringkali tidak lengkap, yg banyak tersedia pecahan Rp 2.500 ke atas.
Pecahan Rp 1500,- sudah jarang, yg Rp 1000 juga gak ada, padahal kadang saya berusaha utk nempel perangko agak banyak lembarnya.

Belum tau OM..

Untuk Eropa aja kalo ga pake amplop IDR 6000 mgkn kalo pake 2x lipatnya.. Perkiraan kalo ke UK IDR 8000. Lumayan jauhnya

Hitung-hitung tongpes OM sekian banyak paper qsl card yg harus dikirim..belum IRC..tapi nungguin yg spt OM Zen aja dech..pake Paypal..
Kalo pake LoTW praktis tapi ga bs kumpulin paper qsl card..itu syarat buat ikut unar..hiks

Lumayan yaa potongan biaya paypal
Tapi daripada GS -nya hilang di 'jalan'

Rekans,saya ingin sharing saja karena saya pengguna PAY PAL yang cukup aktif. Mohon maaf apabila hal ini sudahpernah dibahas pada topik email2 sebelumnya, karena saya keburu menghapus utk subject ini. Dari informasi yang kita peroleh dari OM Zen, beliau telah melaksanakan QSO dengan rekan DX nya, pada dasarnya lawan QSO om zen di luar negri itu sepertinya agak ragu kalau kirim Green Stamp yang dimasukan kedalam amplop dan mengirimkannya ke OM Zen takutnya enggak keterima atau menguap ditengah jalan. Mungkin dia sudah mengalami kehilangan sebelumnya dan yang dikirimi menyampaikan tidak pernah menerima GSnya.
PAY PAL itu adalah cara pembayaran yang aman yang dikembangkan dinegara Paman Sam. Sistim pembayaran ini memanfaatkan Credit Card sebagai sumber pembiayaannya. Untuk mendapatkan account Pay Pal kita harus melalui proses yang cukup panjang kita bisa masuk ke situsnya Pay Pal untuk mendaftarkan dan kita harus punya Credit Card yang masih berlaku. Untuk selanjutnya kita tidak akan membergunakan nomor kredit card tetapi cukup menyampaikan alamat email kita yang didaftarkan ke Pay Pal untuk menerima pembayaran maupun melakukan pembayaran tentunya terhadap sesama pengguna account Pay Pal dan akan membebani credit card kita apabila melakukan pembayaran dan tambahan kredit pada credit card kita apabila menerima pembayaran.
Pada tahun- tahun dulu banyak orang yang kebobolan credit cardnya karena pada saat melakukan transaksi melalui internet kita harus menyampaikan nomor creditkan kita dan ini yang bisa dimanfaatkan oleh orang2 yang tidak bertanggung jawab, karena siapa saja yang mengetahui nomor credit card itu sudah bisa belanja baik lewat telepon maupun lewat internet.

Untuk kasusnya OM Zen, apabila Om Zen sudah pernah mendaftarkan dan memiliki account PAY PAL, maka beliau cukup menyampaikan alamat Emailnya yang sudah didaftarkan ke Pay Pal dan nanti si pengirim akan mengirim uangnya dengan aman tanpa potongan biaya dan otomatis menambah kredit nya OM Zen.

Demikian om Zen dan rekan2 mudah2han bermanfaat penjelasan ini.

Salam

Dear Om Kris,
Betul sekali apa yang anda ceritakan. Memang stasiun DX tersebut dia bilang sdh sering sekali kehilangan Dollars apabila dia kirim langsung. Makanya dia minta Paypal.
Untuk Paypal saya memang saya sdh pernah buka account tersebut, tapi saya tidak mendaftar kartu kredit saya (dasanya memang aku tdk ada kartu kredit). Jadi memang cuma email saja, dan setiap dana yang masuk ke Paypal saya mungkin tidak bisa diambil atau dipindahkan kecuali kita punya kartu kredit. Paling dana yang terkumpul di paypall bisa kita pergunakan lagi sebagai transaksi ke pengguna paypal lain.
Thanks, zem yb0mzi

Terima kasih OM Kris..

Betul sekali Paypal adalah metode yg lazim digunakan utk bertransaksi online dg aman di dunia maya, menggunakan credit card account kita sebagai jaminan pembiayaan.

Tentunya penggunaan Paypal secara bijaksana sangatlah dianjurkan. Dikarenakan dlm hal ini OM Zen belum memiliki Credit Card, tidak menjadi masalah krn tentunya saldo yg ada di Paypal bisa dipakai utk urusan payment QSL Card.

Subject: Re: Re: Bls: Bls: [YBDXC_News] HELP!

Rekans,saya ingin sharing saja karena saya pengguna PAY PAL yang cukup aktif. Mohon maaf apabila hal ini sudahpernah dibahas pada topik email2 sebelumnya, karena saya keburu menghapus utk subject ini. Dari informasi yang kita peroleh dari OM Zen, beliau telah melaksanakan QSO dengan rekan DX nya, pada dasarnya lawan QSO om zen di luar negri itu sepertinya agak ragu kalau kirim Green Stamp yang dimasukan kedalam amplop dan mengirimkannya ke OM Zen takutnya enggak keterima atau menguap ditengah jalan. Mungkin dia sudah mengalami kehilangan sebelumnya dan yang dikirimi menyampaikan tidak pernah menerima GSnya.
PAY PAL itu adalah cara pembayaran yang aman yang dikembangkan dinegara Paman Sam. Sistim pembayaran ini memanfaatkan Credit Card sebagai sumber pembiayaannya. Untuk mendapatkan account Pay Pal kita harus melalui proses yang cukup panjang kita bisa masuk ke situsnya Pay Pal untuk mendaftarkan dan kita harus punya Credit Card yang masih berlaku. Untuk selanjutnya kita tidak akan membergunakan nomor kredit card tetapi cukup menyampaikan alamat email kita yang didaftarkan ke Pay Pal untuk menerima pembayaran maupun melakukan pembayaran tentunya terhadap sesama pengguna account Pay Pal dan akan membebani credit card kita apabila melakukan pembayaran dan tambahan kredit pada credit card kita apabila menerima pembayaran.
Pada tahun- tahun dulu banyak orang yang kebobolan credit cardnya karena pada saat melakukan transaksi melalui internet kita harus menyampaikan nomor creditkan kita dan ini yang bisa dimanfaatkan oleh orang2 yang tidak bertanggung jawab, karena siapa saja yang mengetahui nomor credit card itu sudah bisa belanja baik lewat telepon maupun lewat internet.

Untuk kasusnya OM Zen, apabila Om Zen sudah pernah mendaftarkan dan memiliki account PAY PAL, maka beliau cukup menyampaikan alamat Emailnya yang sudah didaftarkan ke Pay Pal dan nanti si pengirim akan mengirim uangnya dengan aman tanpa potongan biaya dan otomatis menambah kredit nya OM Zen.

Demikian om Zen dan rekan2 mudah2han bermanfaat penjelasan ini.

Salam

OM,
Kalo begitu berarti OM Zen sementara ini hanya bisa menggunakan account PayPalnya hanya utk rekening penampungan saja ya ?
Utk mengirim hanya sebatas saldo yang ada dulu.

Seingat saya dulu saya pernah coba juga buka account, tapi lupa tuh gimana nasibnya, mungkin akan saya telusuri dari email yg masuk dari PayPal.

Thank you,
hen

How Not to Break Pile-Ups

Bob Furzer K4CY / 9K2ZZ

I offer the following non-prioritized list of operating techniques guaranteed to bring a fast-paced, orderly (no matter how heavy) pile-up to a grinding halt ….

QRP..QRP..QRP.. I fail to see the motivation or objective of this very common practice. For a start, I really don't care if the station is QRP or QRO; that is the operator's personal preference. If the operator is confident enough to think I can hear his plea for special consideration, then why doesn't he have the confidence that I can copy his callsign? I copy three letters (Q, R, & P), why couldn't I copy a few more and get the whole callsign?

Xray..Xray..Xray.. (ad nauseam) This practice seems to have spawned for list operations and is unfortunately becoming more and more commonplace. It is even spreading to CW. This is a sure-fire way to bring a snappy operation to a grinding halt. Not only does it necessitate several additional exchanges, but the Xray Xray station frequent feels compelled to repeat his full callsign several times to ensure I have, in fact, received it correctly. Not that it should be of concern to me, but I suspect that the FCC (or appropriate licensing authority) would be hard stretched to view this a correct station identification.

Can you move to…? Frequently, in the midst of a pile, I am requested by an avid DXer who needs a QSO on another band or mode if I will QSY. It never ceases to amaze me; I'm enjoying the pile-up. If I didn't, I wouldn't be running one!. I'm not about to quit just because someone needs me on another band. I have no objection to requests as to whether I operate CW (or SSB as the case may be) or when I will be on another band/mode, but the blatant request to move elsewhere without consideration for everyone else on frequency is a certain. formula for incurring my wrath.

My name is Bob. Bravo Oscar Bravo, my QTH is Atlanta Tango Lima Alpha November Tango Alpha (or even worse Alabama Tumultuous Louisiana etc.). It is frequently said that I have limited mental capacity, but I'm not a complete moron. I do know how to spell Bob, If I don't know Atlanta, and I'm curious, I'll ask. I'll avoid mentioning further numerous, totally superfluous, time-consuming, and aggravating phrases, expressions, and colloquialisms (Hi Hi, Old Man, Onetwothreefourfivebyonetwothreefourfiveoverover, Break Break, Please Copy, etc.).

'Nine Kilo Two Zulu Zulu, Nine Kilo Two Zulu Zulu, this is November Six Bravo Foxtrot Mike. QSL, you are also five and nine. Over, over.' Hey, I know my call (why repeat it once, never mind twice?). I know your call (I just gave you a report!). Why "Over Over," you are soliciting an additional transmission. Why any Overs at all? Just let go the PTT, footswitch, or let the VOX drop, or better still, simply sign off.

Only very rarely do I change my QTH, name, callsign, or QSL manager between QSOs. It is abundantly clear that stations realize they are missing a vital piece of information only

after they (or I) have terminated the QSO. Invariably the request for additional information comes as a belligerent unidentified demand over the top of another station's transmission. I identify my station at the end of each QSO, I identify my QSL manager and give my name (without phonetic spelling) whenever requested by the station I am in contact with. This apparently does not satisfy a significant number of operators. It is not sufficient to have broken the pileup to establish the QSO; there is the inexplicable urge to blow away the next poor guy by overriding the QSO with inane questions.

The key ingredients that appear lacking (again, not in order of priority) are: Common sense, patience, and the all important one: the ability to listen.

If you hear pileups spread neatly at five kHz across the band, then try listening for me at the lowest frequency pile-up. I have solved the problem of utter confusion caused by the Italian and Russian operators (they are consistently the worst operators I have ever heard, and I have absolutely no reservation saying so), I simply say 'Those stations with only two letters in their callsigns call me 5 up. Those stations with only three letters in their callsigns, call me 10 up. Everyone else, call me on this frequency. ' It actually works. I just stay where I am, simplex, and have snappy QSOs with the guys who know what they are doing.

If I am working stations who give two letters (heaven forbid) then by all means give me two letters, if not (and 'I won't!), then don't. If I can't spell Bob, then by all means spell your three- or four-letter name. If I'm working tail-enders, then tail-end, otherwise don't. If I haven't given my callsign, name, or QSL manager for several minutes, then ask.

If I ask stations for their grandmother's maiden name and their age, profession, marital status, and social security number, then give it. Otherwise don't!

Is this fun or what? Did you ever stop to consider that if this is a fun hobby, then why do we work DX? Some of you sure make it hard work. If you don't like the way I do it, or you find my operating practices offensive, then don't call me; go bother someone else. Just remember that while you are floundering with cute phonetics and exercising your right of verbal diarrhea, or expounding on the virtues of some esoteric and totally uninteresting subject, I have already terminated the' QSO and worked two other guys who actually wanted a quick QSO, because I'm long gone. I don't have to wait for you to finish mumbling salutations, all I have to do is say QRZ.
Oh well… QRZ the station with Xray Xray Over Over in the call…

3307. Minta tolong.....

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-08-15 00:44:56 UTC
From: Donny Sirait
Topic: 3307 Message: 3307

Dear teman teman,
Demi menghemat bandwidth dan spasi.... tolonglah ketika membalas posting mailnya di edit... ngga usah mengikutkan pesan terdahulu, kan judul threadnya kan sdh ada di subject, dan kalaupun perlu sekali mohon agar mailnya di edit dan hanya menyertakan pesan paling awal saja....
Bagi orang yang seperti saya yang membaca thread secara digest mail akan terlihat panjang sekali.... dan terkadang malah bisa ngga nyambung pembicaraannya. Mungkin bagi yang pakai MID hal ini ngga masalah tetapi bagi yang mailnya diset ke digest dan membacanya dengan browser akan kelihatan sekali banyak bandwidth yang terpakai sia sia (walaupun kelihatannya kecil tetapi kalikan saja dengan semua jumlah anggota mailing list ini).
Terima kasih atas perhatiannya dan selamat ber dx ria.

3310. Updated CQWW SSB Results Posted on CQ Website

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-08-15 02:28:33 UTC
From: Yb land Dx club
Topic: 3310 Message: 3310

http://cqnewsroom.blogspot.com/2012/08/updated-cqww-ssb-results-posted-on-cq.html

Updated CQWW SSB Results Posted on CQ Website

Updated and corrected SSB results for the 2011 CQ World Wide DX Contest have now been posted on the CQ magazine website. They may be accessed from the CQ home page (under current issue highlights), from the highlights page for the August issue and from the CQWW DX Contest page. The update resulted from the discovery of a programming error after the results went to press. Only one SSB certificate and one CW certificate (out of approximately 2600 awarded) were affected by the error, and with the new, corrected, results, all affected stations' scores went up, not down.

Corrected CW results will be posted to the CQ website around September 1, coinciding with release of the digital edition of the September issue of CQ.

OPDX Bulletin 1074.1 August 14, 2012
The Ohio/Penn Dx PacketCluster
DX Bulletin No. 1074.1
BID: $OPDX.1074.1
August 14, 2012
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)
Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, WA4DAN, AA4VK, F5NQL and VK2ARE for the following DX information.
CU1-CU9, AZORES (Press Release - Dated August 14t)[edited]
"ALL NINE AZORES ISLANDS, CU1 THROUGH CU9, ACTIVATED AT ONCE
>Are You Ready to Fly to Azores for Free by Making Nine QSOs?
>Yes indeed, those of you willing to spend 24 hours or less on the radio are eligible to participate in an Azores lottery for two all-paid packages to the beautiful Azores Islands in the Atlantic, completely free of charge. The project is organized by the Azores-Finland Friendship Consortium in partnership with the Amateur Radio Associations of the Azores Islands and supported by the Azores Promotion Agency (ATA) and Azorean Airlines (SATA). Just look at
>www.visitazores.comand make up your mind.
>Not many people know that the Azores consist of nine populated islands, stretching over a distance of 602 km (305mi) from East to West, next to USA and Europe. And it is not widely known that the Azores have their own airline (SATA) flying to each island, in addition to many destinations in Europe and North America. Each island has its own characteristics and its own blend and alone qualifies for your visit there.
>While these islands count for a single DXCC entity, they offer three (3) IOTA groupings.
>With this unique AZORES 9 ISLANDS HUNT, an invited international group of amateur radio operators together with resident Azores amateurs will be activating the nine islands, offering an opportunity to the world to contact these islands all at once over one weekend.
>Activity Weekend - Saturday, September 29th, 1200 UTC to September 30th, 1200 UTC (24 hours). These stations will be active starting Friday, September 28th as soon as they become operational.
>Frequency Windows
>CW: 7000-7015, 18080-18090 and 14050-14065 kHz
>SSB: 7175-7195, 18120-18135 and 14250-14275 kHz
>Nine Islands and their Stations - Santa Maria, CU1ARM; San Miguel, CU2ARA; Terceira, CU3URA; Graciosa, CU4ARG; Sao Jorge, CU5AM; Pico, CU6GRP; Faial, CU7CRA; Flores, CU8ARF; and Corvo, CU9AC.
>Operators and Island Hosts - Sergio/CU1AAD, Jose/CU2CE, Francisco/CU2DX, Guilherme/CU2IF, Domingois/CU3CS, Guilherme/CU4AB, Jose/CU5AM, Jorge/CU6AB, Manuel/CU7CA, Claudio/CU8AAE, Joao/CU9AC, Franz/DJ9ZB, Richard/DF9TF, Nigel/G3TXF, Michael/G7VJR, Diane/K2DO, Rich/KE3Q, Mike/KI1U, Marius/LB3HC, George/N2GA, Martti/OH2BH, Juha/OH8NC, Ghis/ON5NT, Carine/ON7LX, Claude/ ON7TK, Alex/OZ7AM, Kenneth/OZ1IKY, Yuri/VE3DZ and Ed/VE3FWA.
>Two Hunt Awards - Those making a QSO with at least 5 different islands will have a corresponding number of tickets placed into a lottery for a free trip to the Azores (e.g.

if you have QSOs with 7 islands, you will get 7 lottery tickets). Additionally, the first 25 operators making QSOs with all 9 islands will be eligible for a second lottery. The free trips are from the closest airport served by SATA; including flight, accommo- dation and transfers..
>During or immediately after the weekend, the logs will be posted on Club Log to display your band/mode slots. The lottery will be drawn on October 15, 2012.
>QSL Cards - All QSOs will be confirmed through the bureau network with special full-color cards. Direct QSL requests via Jose Melo, CU2CE."CY0 NEWS RELEASE (Dated August 12th)
The following is from the Sable Island Web page at:http://www.cy0dxpedition.com
"We are excited to announce that we have received approvals from 'Parks Canada', 'Canadian Coast Guard', and 'Officer-in-Charge, Sable Island' to operate amateur radio from October 8-17th, 2012.
>We should note, however, that our permit to operate includes several new restrictions on antennas (in addition to the traditional restrictions for Sable). The purpose of these restrictions are to minimize the environ- mental impact on the migratory bird population that may be present during the period that we are on Sable Island.
>We feel fortunate to have received the trust of 'Parks Canada' for this operation and consider it a privilege to be able to visit Sable Island. We will cooperate fully with these new restrictions to minimize potential environmental impact to the protected bird species.
>In the days ahead, we will assess the impact that these additional antenna restrictions may have on our operations and any adjustments that we may need to take relative to antennas that we will take to Sable Island. Further details of our operating plans will be posted to
>CY0dxpedition.com
>This will be our third attempt to get to Sable island (previous attempts, December 2010 and December 2011)......
>WA4DAN/CY0 and AA4VK/CY0"ZL9, CAMPBELL ISLAND (Update/Press Release #5)
"Preparations for the HARAOA ZL9HR DX'Pedition to Campbell Island in the Great Southern Ocean (IOTA OC-037) are on schedule for the activation dates of November 28th to December 9th this year.
>The team are delighted to announce a new sponsor in the Northern California DX foundation, this is in addition to the other sponsors with Spiderbeam sponsoring ZL9HR and supplying spiderbeam antennas and masts, 21 worldwide DX groups and the prestigious ARRL Colvin foundation award. Of course we should not forget the 36 individuals who are also sponsoring the DX'Pedition. Thanks to all of these.
>The containers to carry all required equipment are currently being prepared and loaded, ready to be shipped out of Sydney around the 15th of September.
>Please refer to the Web site
>ZL9HR.COMfor the full, up-to-date, information about this major DX'Pedition.
>73 from Ed, VK2ARE, Australian publicity Officer for ZL9HR"

http://www.clublog.org/mostwanted.php

DXCC Most Wanted List
The information generated in this report is empirical, using only DXers logs with more than 150 DXCCs worked. Additionally, only QSOs that have QSLs confirmed are considered to be worked, and only logs active in the last 15 years are used.
These reports are improved by greater participation. Please sign up if you are willing to add your QSOs to Club Log, and help improve the database - thank you!
The most wanted charts are rebuilt once per month, on average.

CY0 NEWS RELEASE - 12 August 2012

We are excited to announce that we have received approvals from "Parks Canada", "Canadian Coast Guard", and "Officer-in-Charge, Sable Island" to operate amateur radio from October 8 - 17, 2012.

We should note, however, that our permit to operate includes several new restrictions on antennas (in addition to the traditional restrictions for Sable). The purpose of these restrictions are to minimize the environmental impact on the migratory bird population that may be present during the period that we are on Sable Island.

We feel fortunate to have received the trust of "Parks Canada" for this operation and consider it a privilege to be able to visit Sable Island. We will cooperate fully with these new restrictions to minimize potential environmental impact to the protected bird species.

In the days ahead, we will assess the impact that these additional antenna restrictions may have on our operations and any adjustments that we may need to take relative to antennas that we will take to Sable Island. Further details of our operating plans will be posted to CY0dxpedition,com.

This will be our third attempt to get to Sable island (previous attempts, December 2010 and December 2011)
WA4DAN/CY0 and AA4VK/CY0

Sable Islands - Wild Horses
Sable Island: Located off the coast of Nova Scotia, Canada
Latitude 43.95 N; Longitude 59.92 W.
Nova Scotia WebCams

We would like to express our appreciation to Parks Canada, Officer-in-Charge Sable Island, and the Director of Marine Programs, Canadian Coast Guard for granting permission for the 2012 Sable Island DXpedition, and for the unique opportunity to experience the beauty and charm of this environmentally sensitive island and "Graveyard of the Atlantic".

Sable Island is located off the coast of Nova Scotia, Canada at Latitude 43.95 N; Longitude 59.92 W. about 300 km east-southeast of Halifax, NS.

Access to Sable Island will be by Britten-Norman Islander aircraft. Since there is no runway on Sable Island, landing will be on the beach on the south side of the island which has the best conditions for landing.

Weather conditions in October can be unpredictable due to fog or flooded beach conditions on Sable Island. We learned this first hand in December 2010 and again in December 2011, due to extended bad weather at Sable Island.

Another factor that could affect our scheduled arrival could be "beach conditions". If the beach is wet, that could impact the ability to safely land the aircraft which could result in delay.

Sable Island is an environmentally sensitive island. Our team is very appreciative for this opportunity and will always put the environment and wildlife (Grey Seal, wild horses, protected bird species, etc.) of Sable Island ahead of our operation.

3317. CQ WW SSB 2011 Results Feature Five "Withdrawn" Logs as SO2R Gets Close Log Check Attention

CQ WW SSB 2011 Results Feature Five "Withdrawn" Logs as SO2R Gets Close Log Check AttentionBy Jamie Dupree NS3T

The CQ WW DX Contest Committee crackdown on rules violators has snared several top operators, as five amateurs withdrew their entries after being asked about possible rules violations in the 2011 CQ WW SSB contest, including the defending SSB Assisted champ.
"The following stations withdrew their logs after they were contacted by the CQWWCC for violation of rule III.A," read the small type at the end of the CQ WW 2011 SSB results, which were just put on line.
That 2011 rule says that for "all single operator categories, all band or single band, only one signal is allowed at any time," said the CQ Magazine description.
The new rules for CQ WW allow a competitor to simply withdraw an entry, allowing them to avoid being officially sanctioned or disqualified for rules violations.
The five logs that were "withdrawn" for CQ WW SSB 2011 were:
* ER4DX - operated by Serge Rebrov UT5UDX; he was the defending 2010 Assisted champ and had claimed the 3rd highest score in 2011
* LZ8E - operated by Boyan Petkov LZ2BE; he had the 6th highest claimed score in Single Op Low Power worldwide
* US1I - Roman Solop had the #2 world claimed score in 20 meter High Power
* RC9O - Anatoly Polevik had the #17 world claimed score in Single Op High Power
* RG3K - Igor Burykh had the #49 world claimed score in Single Op High Power
Instead of a DQ or other penalty, the rules of CQ WW allow for someone to withdraw a log, as the five operators above did for CQ WW SSB 2011:
An entrant is free to withdraw his/her submitted log for any reason prior to receiving an official letter from the CQ WW Contest Committee. The log will then be handled per the entrant’s request. If after receiving an official letter from the CQ WW Contest Committee, an entrant chooses to withdraw their log, the entrant’s call will be listed at end of the results showing their log as having been withdrawn.
The CQ WW Contest Committee did not issue any Red or Yellow cards for the 2011 SSB test. In 2010, no logs were announced as "withdrawn" - but the CQ WW Contest Committee did issue 3 Red Cards and 2 Yellow Cards for rules violations.
SO2R Gets Fine Tooth Comb Review
As for this year's post-contest log checks, the CQ Magazine write up on CQ WW SSB 2011 says special attention was paid to SO2R entries, checking for multiple signals by single operators.
"It was discovered that several top scores did not have adequate protection against two signals at the same time," read the writeup by Contest Director Bob Cox K3EST.
"A single operator entrant can have only ONE signal on the air at ANY time. With the use of SDRs, the CQ WW CC can listen to the whole contest all the time," the writeup stated.
"The presence of two signals simultaneously on the air on the same band by any entrant, or two simultaneous signals on separate bands by any single operator category is now detectable."

You can see the results of the 2011 CQ WW SSB contest on the web site of CQ Magazine

DXNL 1793 - August 15, 2012
DX Newsletter

CO, Cuba:
Frank, CO2IR, will be QRV mostly in CW during his vacation until August 31st on 30m - 10m. QSL via bureau or direct via EB7DX.

DL, Germany:
On 2012-08-18 Helmut, DM2BPG and Erich, DL2HUC will activate the castle Roseburg (DL-02137) between 07:00 and 14:00 on 40m using the callsign DK0GYB/p with Special DOK 800ANHALT.
http://www.dk0gyb.de/

G, England:
Phil, G3SWH, will activate the special callsign M0RSE on 18/19 August in CW only on all bands.
QSL via G3SWH (bureau, direct, LotW, OQRS)
http://www.g3swh.org.uk/m0rse.html
http://www.g3swh.org.uk/decision.html
http://www.m0rse.org/

H4, Solomon Islands:
Ralph, H44RK, will, until late 2013, be QRV from Honiara on the north coase of Guadacanal island on 40m to 10m in SSB.
QSL only direct.

ON, Belgium:
The special event station ON4YOTA (Youngsters On The Air) will be on the air during the Youth Camp organized by UBA and VERON from August 19th to 26th.
QSL via ON9CFG. http://www.iaru-r1.org

PY, Brazil:
Mor, PT7ZT, activates (16 - 19 August) the Itapaje lighthouse (ARLHS BRA 057, DFB CE-02, DFCE CE-02, Admiralty G0114, WW Loc. HI07ac) as PT7ZT/p in SSB only. QSL via PT7ZT.

SP, Poland:
The special station SN17EGS will be QRV from August 15 - September 8 from the 17th European Shooting Brotherhood Meeting in Tuchola.
QSL via SQ2BNM.

During August 17-19 there will be a tournamet at the Liw castle, where all knights brotherhoods from the Polish Kingdom and all other neighbouring kingdoms were invited. Fight will take place both on foot and on horseback until the last drop of blood.
The fights of the knights will be transmitted with the use of

modern technologies by brother Mariusz, SQ8JCB brother Pawel,
SP5SMY and other brothers with the necessary licenses.
Everything will be heard on short waves marked as SN0LIW.
http://www.sn0liw.pl/

V3, Belize:
Travis, AF6WU (V31WU) and Kjerstin, KJ0VDA (V31DV) are QRV from
Caye Caulker (NA-073, WW Loc. EK57xr) August 16 - 20 on the HF
bands mostly in SSB.
QSLs via AF6WU.

VQ9, Diego Garcia:
Jim, VQ9JC (ND9M) is back on Diego Garcia (AF-006) until mid
November. The club station on the island was closed until further
notice, therefore he's currently only QRV in "Field Day style"
with monoband dipoles and 100W, daily between approximately
1230z to 1615z. Most operation will take place in CW.
QSL via ND9M.

African Tour (6W & C5):
Dom, M1TKA will tour West Africa as follows:
15 - 22 August 6W/M1KTA
22 - 29 August C5/M1KTA
He'll operate on HF and (if conditions permit) 6m.
QSL via M1TKA.
http://m1kta-qrp.blogspot.com/

Propagation forecast app:
DroidProp is a propagation forecast app for the HF bands, based
on VOCAP (Voice of America Coverage Analysis Program).
It calculates the current and future HF propagation conditions
on the device, an internet connection is only needed for
updating the solar data. It's currently still in beta state but
fully functional. Download (free) and information:
https://play.google.com/store/apps/details?id=info.schaeuble.droidprop

HK0NA LoTW:
Bob, N2OO, uploaded the HK0NA QSOs to LoTW. About 15.000 QSOs
appear to have been lost in the process, but he's working with
the ARRL to resolve this issue.

New RAC Sections for Ontario:
On September 1st, the following new sections will be in effect:
Ontario North (ONN)
Ontario East (ONE)
Ontario South (ONS)
Greater Toronto Area (GTA).
http:///www.rac.ca/en/news/bulletins/2012/Ont_Section_Boundaries._Ver_2.jpg

New Prefix for Niue:
On August 3d, Niue (ZK2) was issued the prefix block E6.

QSL-Status PJ7PT:
      QSL manager Wojciech, SP9PT, reportts that all QSOs have been
      uploaded to LoTW, all direct requests have been answered and
      bureau cards are answered as they arrive. If someone is missing
      a card, please get in touch by email: wklosok@...

QSL-Info:
      Phil, G3SWH, reports that regrettably, Andreas, 5R8FL, does not
      use his QSL manager services any more as of August 2012.
      http://www.g3swh.org.uk/

175 Jahre P&O-Faehren:
      GB175PO and TM175PO are special event callsigns operated from
      Dover and Calais to commemorate the 175th jubilee of the
      P&O ferries. Operation will take place throughout August,
      occasionally from the ferries.

Silent Key:
      The well known DXpeditioner Alex, UA9YAB, passed away aged 50
      during his DX-Pedition to Los Roques Island (SA-035) on August
      11. He suffered from a cardic arrest when he was swimming.

UPCOMING CONTESTS

18.8.   SARTG RTTY Contest (part 1)
18.8.   SARTG RTTY Contest (part 2)
18./19.8. DARC HF-Fax-Contest
18./19.8. Keymen's Club of Japan Contest
18./19.8. North American QSO Party
19.8.   SARTG RTTY Contest (part 3)

IOTA   compiled by Klaus, DL7UXG (e-mail: iota@...)

Island activities:

General: On the weekend 18/19 August the 15th "International Lighthouse
      Lightship Weekend" (ILLW) will take place. More information:
      http://www.illw.net
      http://www.illw.net/index.php/entrants-list-2012

AS-060; HL4 Chollabuk/Chollanam-Do Province Group: Members of Gwangju
      DX Club will be active as D7G from Kogum Island between August
      17-19th. Activity will be on 80-6 meters using CW, SSB and RTTY.
      QSL via HL4CEL.

AS-171; 4S; Sri Lanka's Coastal Islands: Members of the Radio
      Society of Sri Lanka will activate 4S7LGT from LH/Island
      Barberyn (ILLW LK0002, ARLHS SLI-002, TWLHD WLH 4S-001, WLOTA 0024)
      during the ILLW. QSL via 4S7LGT (direct or bureau).
      http://www.rssl.lk/photo-gallery/lighthouse-expedition/

EU-002; OH0; Aland Island: Normunds/YL3DQ will, until August 20th
      work from Aland Islands in holiday style as OH0/YL3DQ

on 80-10m in CW and RTTY. QSL via YL3DQ (direct or bureau)

EU-012; GM/MM; Shetland and Fair Isle: A YL expedition by Unni, LA6RHA
Chantal, PA5YL, Ruth, IT9ESZ/HB9LFM, Nicky, MM5YLO, Elaine,
2E1BVS and Denise, MM6ZDW is planning to activate Fair Isle
(IOSA SH-09, WLOTA 1319) between 16 and 22 August. Their call
will be GB2YLS and activity will take place on the HF bands in
SSB and CW. This operation includes a participation in the ILLW.
from Fair Isle South LH (ILLW UK0127, ARLHS SCO-079, BARLS A3750,
TWLHD WLH GM-028, WW Loc. IO99em, WAB NZ16).
QSL via MM5YLO (direct or bureau). http://www.radioclubs.net/gb2yls/

EU-040; CT; Estremadura Province group: Luis/CT1EJB and Armando/CT2JYX
will be active as CR5WFF once again. From August 17 to 20 they are
QRV from "Farol da Berlenga" (WCA CT-01001, DMHP LR-086). The QTH
is on Ilha da Berlenga (DIP ES-001, PIP NT-029, WFF CTFF-015,
WLOTA 1054). They will be QRV in SSB, RTTY and BPSK.
QSL via CT1EJB (direct or bureau).

EU-042; DL; Schleswig-Holstein State North West group: Mike/DL4ABO
will be on the air from Foehr Island (GIA N-017, WLOTA 4067)
August 18 to 25. Using the callsign DL4ABO/p he will work on
the HF bands in holiday style. QSL via Homecall (direct or bureau).

EU-047; DL; Niedersachsen State group: DA0L takes part in the ILLW from
the Borkum Lighthouse (ILLW DE0116).

EU-064; F; Pays De La Loire Region group: The "Radio Club Vendeen"
will activate the Sebastopol Polder Nature Park (FFF-218)
as F6KUF/P on August 20/21. The park is located on Noirmoutier
island (DIFM AT-020, WLOTA 1224). They are active on 80m - 10m
in SSB, CW and maybe PSK/RTTY. QSL via F6KUF (direct or bureau).

EU-101; OH6; Lansi-Suomi (Vaasa) Province group: Timo/OH6FMG
will activate Gashallen Lighthouse (ARLHS FIN-136; ILLW FI0015;
LOC KP02MN) on the ILLW. QSL via OH6FMG (direct or bureau)

EU-115; EI/GI/MI; Ireland (Ireland/Northern Ireland): Members of the
"Carrickfergus Amateur Radio Group" will show up as GN0LIX/p
on the ILLW from Chaine Memorial Tower (ILLW UK0033, BARLS A6031,
ARLHS NTI-004, WLOTA 1439, WW IO74cu) in Larne. Depending on the
condx they will be active on 40m, 20m or 10m in SSB.
QSL via bureau. http://www.radioclubs.net/carg

EU-116; GD/MM; Isle of Man: Members of the "Dundee Amateur Radio Club"
(Paul/GM0BKC, Pete/GM1CMF, Colin/GM4JPZ, Scott/MM0SVK, Mark/2M0LEW
and Ally/MM0DRA) will be QRV as GT4AAF/P from 18 - 25 August
from the Isle of Man (WLOTA 0449, WW IO74sf). They plan to work
on all bands and modes. QSL via GM0BKC (direct or bureau).

EU-136; 9A; Kvarner group: Vincenzo/IZ2WMW will work from Krk island
August 18th to 25th using the callsign 9A/IZ2WMW. He will use

QRP equipment (FT-817 and Dipole) on 14.260 and possibly also
around 18.128 and 21.260 MHz.
QSL via IZ2WMW (direct or bureau).

EU-184; OH8; Oulu Province group: Members of the "University of Oulu
Technical Students Radio Club" will be on the air as OH8T
on August 17-19 from Hailuto Island and Marjaniemi Lighthouse
(ILLW FI0025, ARLHS FIN-028, TWLHD WLH OH-015, WLOTA 0580).
QSL via OH8T (direct or bureau). http://oh8ta.fi/english/

NA-026; W2; New York State group: The "Great South Bay Amateur Radio
Club" activates Fire Island (USi NY013S) and it lighthouse (ILLW
US0019; ARLHS USA-286) on August 18/19. They will sign W2GSB on
80 - 10 m in CW, SSB and PSK31.
QSL direct (see QRZ.COM) and eQSL/LoTW.
http://www.gsbarc.org http://www.fireislandlighthouse.com/

NA-099; KP3/4; Puerto Rico: The Puerto Rico Amateur Radio League,
KP4ES, plans to do island hopping for the ILLW. The following
new USi references will be activated: PR047S - Cayo Afuera/Cayo
Real; PR048S - Cayo de Tierra; PR049S - Isleta Marina
QSL via NP3O (see KP4ES on QRZ.COM).

NA-145; PJ5,6; Sint Eustatius and Saba Islands: Until August 18th
Frank/K3TRM can be worked as PJ5/K3TRM from Sint Eustatius
on the HF bands. QSL via K3TRM (direct or bureau).

NA-161; KL; Alexander Archipelago: From August 17th to 19th,
Michael/KL7XK, Charles/WL7CSJ and Heinz/VA7AQ will be active as
KL7XK/p, WL7CSJ/p and VA7AQ/NL5 from Pleasant Island. They plan
to work from 30m to 15m in CW and SSB.
QSL via Homecalls (direct or bureau).

OC-137; VK4; Queensland State (South Coast) South group: VK4ILH will
be used by Derek, VK4MIA, Paul, VK4FPDW, Brooke, VK4KDX, Graham,
VK4GRA, Ewan, VK4ERM, Catherine, VK4GH, John, VK4IO and Luke,
VK3HJ from August 17th to 19th from Moreton LH (ARLHS AUS-039, ILLW
AU0009, WLOTA 2987, Admiralty K2854.1, WW. Loc. QG62rx). It's
the first activiation of this lighthoise.
QSL via VK4MIA (direct or bureau).
http://www.capemoreton2012.com/
https://www.facebook.com/VKLighthouse
http://youtu.be/29CmOjSC3uI

OC-139; VK5; South Australia State East Centre group: Paul/VK5PAS,
Sasi/VK5SN, Dave/VK3VCE, Mark/VK5VW, David/VK5KC, Hans/VK5YX and
Lesley/VK5LOL will use the callsign VI5CW from August 17th to 20th
from Kangaroo island. For the ILLW they will activate the Cape
Willoughby Lighthouse (ILLW AU-0095, ARLHS AUS-051, TWLHD WLH
VK-017, WLOTA 0869, Admiralty K2112).
QSL via VK5PAS (direct or bureau), eQSL and LoTW.

OC-143; YB4-6; Sumatra Island: Zen/YB0MZI is currently QRV on the
HF bands from Sumatra as YB0MZI/4.
QSL nur direct (siehe QRZ.COM).

OC-233; VK7; Tasmania's Coastal Islands: Mike/VK7FB and Anne/VK7BYL
will be QRV from the weather station and the lighthouse of
Tasmania (ILLW AU0101, ARLHS AUS-160, TWLHD WLH VK-063, WLOTA
0288, Admiralty K3614) from August 18 - 25 (including ILLW).
The lighthouse is in the National Park Tasmania (VKFF-481).
Mike and Anne used to be lighthouse keepers in this LH in 1969.
They will be QRV on the HF bands with an IC7000.
QSL via VK7FB (direct or bureau).

OC-233; VK7; Tasmania's Coastal Islands: Tony/VK3VTH will be active from
Currie Lighthouse (ILLW AU0016; WW Loc. QF10wb) on King Island as
VK3VTH/7 from August 16 to 19. On the first two days he'll be QRV
for a few hours after 0500z, for the ILLW he plans to be on the
air from 0000z to 0700z on 40m and 20m in SSB.
QSL via Homecall (direct or bureau)

SA-036; P4; Aruba Island: Jack/W6NF and his XYL Shelley/K7MKL will
visit P49Y (WLOTA 0033, LOC FK52AL) August 15th to 21st.
They will sign P40NF and P40S. Jack's focus will be on the
highbands (and 6m) in CW, Shelly plans to take part in the
SARTG RTTY Contest.

SA-099; PJ2; Curacao Island: For the ILLW, Louis/PJ2LS activates the
Noordpunt Lighthouse (ILLW AN0002) using the call PJ2L on the
HF bands. QSL via EB7DX (direct).
http://www.pj2ls.com/LighthousePJ2L.htm

Non-IOTA: CR6LH - Cabo da Roca LH: Jose Luis/CT1GZB, Carlos/CT1CSY
and Rafael/CT2JXT plan to be QRV as CR6LH from Cabo da Roca
(ILLW PT0015, DFP FES-01, ARLHS POR 007, Admiralty D2108, LOC
IM58gs) for the ILLW. They plan to operate on HF in SSB, RTTY,
PSK31 and CW.
QSL via CT1GZB (direct or bureau).
http://cq7c.no.sapo.pt/split.html

Leuchtturm-Aktivitaeten

CW1R - Punta del Este: The "Radio Club Uruguayo" will use the callsign
CW1R on August 17 - 19 from Punta del Este Lighthouse (ARLHS URU
008, ILLW UY0005, LOC GF25ma) from 80 - 10 m with at least two
stations in CW, SSB and digi modes. This includes the ILLW.
QSL via CX1AA.

II1PV - Punta Vagno: ARI Genova club (IQ1GE) will take part in the ILLW
from Punta Vagno Lighthouse (ILLW IT0018, WAIL LI-006, ARLHS ITA
151, Admiralty E1230, WW Loc. JN44lj).
QSL via bureau or direct (see QRZ.COM)

PA25SCH - Scheveningen SW Tower: For the ILLW, PA25SCH will be QRV from
"Scheveningen SW Tower" (ILLW NL0025, WW Loc. JO22dc). Activities
are planned in SSB on HF, VHF and UHF.
QSL via PD2RKG (direct or bureau).

PA6FUN - Kaapduinen Range Rear: PA6FUN will be QRV for the ILLW from
Kaapduinen Range Rear high (ILLW NL-0045, ARHLS NET-049) and at
the same time from Kaapduinen Range Rear front (ILLW NL-0044,
ARHLS NET-047, WW Loc. JO11sl).
QSL via PA3HHT (direct or bureau).

PI4WBR/LH - Willemstad LH: PI4WBR/LH will be the call in the ILLW from
Willemstad (ARLHS NET-075). QSL via PA3FTX (direct or bureau).

TC2ELH/TC6LHW - Oeluece & Civaburnu Feneri LH: The TCSWAT team
and the "Giresun Radio Amateurs and Nature Sports Club" will
use the callsign TC2ELH from August 18-20 from Karadeniz Eregli
Oeluece Lighthouse (ARLHS TUR-044) and TC6LHW from Civaburnu
Feneri Lighthouse (ARLHS TUR-002). Both activities count for
the WEBLOTA award. QSL via TA1HZ (direct or bureau).
http:/www.tcswat.org/awards/WEBLOTA/index.html

WFF Activities

YOFF: YP7P and YR7WFF will be QRV from the Parang reservate (YOFF-373,
WW Loc. KN15ti) from August 17 - 19. From an altitude of 2228m
they will be QRV in CW, SSB and digital modes on HF, VHF and UHF.
QSL for YR7WFF via YO7MGG and for YP7P direct via QRZ.COM.

OM Irsan (yg pakar sapi juga kambing rupanya),
Gadis "pemerah susu", maksudnya apa ?

- Gadis yg bekerja memerah susu kambing/sapi, atau
- Gadis yg membuat susu menjadi (berwarna) merah

;-)

NUSANTARA AWARD

FOREWORD

THE INDONESIAN ISLANDS HUNTER GROUPS (IIHG) consists of DXers who are interested in making contacts with amateur radio operators in different islands of Indonesia.
Membership of IIHG is free and is open to all interested amateur radio operators and SWL worldwide. There is no special requirements.
IIHG sponsors several special and attractive operating awards.

The main award is the NUSANTARA AWARD
The main goal of this award is to encourage amateur radio activities from as many different islands as possible in the vast archipelago of Indonesia.

For membership of IIHG, please contact
Steve Busono W2FB,

3 Margaret Drive, Somerset, NJ 08873 USA
Email : sbusono(ad)gmail.com

RULE & APPLICATION
Nusantara Award

General Rules :
1. Nusantara Award will be issued to licensed amateurs and SWL around the world for all for all 2 way contacts on HF bands (160m – 10m) including WARC bands. Contacts made after August 17, 1945 count for this award.
Repeater, satellite, eQSO, Echolink or other relay methods are NOT permitted.
2.a. Basic award is issued for contacting 10 different islands which must include a minimum of 5 out of 6 main islands of Jawa / Java, Sumatera / Sumatra, Kalimantan / Borneo, Sulawesi / Celebes, Irian / Papua, and Bali.
2.b. Endorsement sticker will be issued in increments of 10 for additional islands worked.
3. All islands claimed for the award must appear on a map and has a name.
4. QSL card must have printed name of the island from which the operation took place. For major or large islands, the name of a town or city on the island, or grid locator maybe sufficient. Please contact award manager when in doubt.
4.a. Please note that not all islands in this program have an IOTA Reference Number. Small islands, individual coastal islands, island in bay, in lake, in river and in estuary or which cannot be classified in IOTA Program might be still accepted for this award.
4.b. Group of islands with the same IOTA reference count for separate islands for this award, e.g. Bangka and Belitung are two separate islands for this award (OC-144)
5. Claim must be accompanied by QSL card list (GCR) furnished with the call signs of stations worked, dates, times, bands, modes and island name. Alternatively a list of stations worked with a copy of the QSL cards can be used as well. Applicants using e-mail, may attach the list and scans of the QSL cards. All QSL cards must be in possession and

must be produced upon request for inspection.

Application :
1. For DX station, the fee is 8 IRC, or 6 USD, or 5 Euros, for basic award. Endorsement fee is 1 IRC or 1 USD, or 1 Euro regardless of the level claimed. The fee covers the award and postage.
2. There is no fee for handicapped operators or SWL
3. Payment can be made by Paypal (preferred) or cash/IRC (at your own risk), Send the application and fee to Award Manager :

Stephan Busono W2FB (for DX)
3 Margaret Drive, Somerset, NJ 08873 USA
E-mail / Paypal : sbusono(ad)gmail.com

Adhi Widodo YB3MM (For DX and Indonesia) :
PO Box 6, Pandaan 67156 Indonesia
E-mail / Paypal: yb3mm(ad)mdxc.org

Nusantara Award

Aturan Umum :
1. Nusantara Award diberikan kepada Amatir Radio dan SWL di seluruh dunia untuk komunikasi di band HF (160m - 10m) termasuk WARC. Hanya kontak setelah tanggal 17 Agustus 1945 yang bisa digunakan untuk pengajuan award ini.
Repeater, satellite, eQSO, Echolink ataupun metode relay lainnya TIDAK diperbolehkan.
2.a. Basic award diterbitkan berdasarkan komunikasi dengan 10 pulau dan harus menyertakan minimal 5 dari 6 pulau utama yaitu Jawa / Java, Sumatera / Sumatra, Kalimantan / Borneo, Sulawesi / Celebes, Irian / Papua dan Bali.
2.b. Tambahan endorsement sticker untuk kenaikan tiap 10 pulau.
3. Pulau yang diajukan harus ada di peta dan mempunyai nama.
4. QSL card harus mencantumkan nama pulau yang diaktivkan. Sebagai pengganti nama pulau, nama kota atau kabupaten di pulau tersebut, atau grid locator juga bisa dipergunakan. Hubungi award manager untuk informasi lebih lanjut.
4.a. Harap dicatat bahwa tidak semua pulau memiliki Nomor Referensi IOTA. Pulau kecil, pulau pesisir, pulau di dalam teluk, di danau, di sungai dan di muara yang tidak dapat diklasifikasikan dalam program IOTA masih bisa diterima untuk award ini.
4.b. Pulau-pulau yang berada di group / kepulauan dengan nomor referensi IOTA yang sama dihitung sebagai pulau yang berbeda untuk award ini. Contoh: Pulau Bangka dan Pulau Belitung adalah dua pulau berbeda untuk award ini, meskipun mempunyai nomor IOTA yang sama OC-144.
5. Pengajuan award harus melampirkan daftar QSL Card (GCR) berisi callsigns, tanggal, waktu, band, mode dan nama pulau. Atau, bisa juga melampirkan fotokopi QSL card saat pengajuan. Pengajuan award bisa juga menggunakan e-mail dengan mengirimkan daftar QSL Card dan melampirkan hasil scan QSL card. QSL Card yang asli harus ada dan dapat segera ditunjukkan jika diminta untuk pemeriksaan.

Pengajuan Award :
1. Untuk Amatir Radio dan SWL di Indonesia, biaya award digratiskan. Pemohon diharapkan melampirkan perangko balasan Rp 7,500 untuk biaya pengiriman.
2. Bagi penyandang cacat, selain biaya award yang gratis, juga tidak diwajibkan untuk mengirimkan perangko balasan.
3. Kirimkan pengajuan award kepada Award Manager :

Adhi Widodo YB3MM (stasiun DX dan Indonesia)
PO Box 6, Pandaan 67156 Indonesia
E-mail / Paypal: yb3mm(ad)mdxc.org

Stephan Busono W2FB (hanya untuk stasiun DX)
3 Margaret Drive, Somerset, NJ 08873 USA
E-mail / Paypal : sbusono(ad)gmail.com

ARLD034 DX news

ZCZC AE34
QST de W1AW
DX Bulletin 34 ARLD034
From ARRL Headquarters
Newington CT August 16, 2012
To all radio amateurs

SB DX ARL ARLD034
ARLD034 DX news

This week's bulletin was made possible with information provided by CX3AL, F5TRO, NC1L, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

SRI LANKA, 4S. Members of the Radio Society of Sri Lanka will be QRV as 4S7LGT from the Barberyn Lighthouse, ARLHS SLI-002, on Barberyn Island, IOTA AS-171, during the ILLW. QSL via 4S7LGT.

SENEGAL, 6V. Dom, M1TKA is QRV as 6W/M1KTA until August 22. This may include a side trip to Goree Island, IOTA AF-060. Activity is on the HF bands using CW, SSB, RTTY and PSK and, if conditions permit, 6 meters as well. QSL to home call.

PORTUGAL, CT. Jose, CT1GZB, Carlos, CT1CSY and Rafael, CT2JXT plan to be QRV as CR6LH from the lighthouse at Cabo da Roca, ARLHS POR-007, during the ILLW. Activity will be on HF using CW, SSB, RTTY and PSK31. QSL via CT1GZB.

URUGUAY, CX. Members of the Radio Club Uruguayo will be QRV as CW1R from Punta del Este Lighthouse, ARLHS URU-008, during the ILLW. Activity will be on 80 to 10 meters using CW, SSB and various digital modes. QSL via bureau.

IRELAND, EI. Members of the Carrickfergus Amateur Radio Group will be QRV as GN0LIX/p from the Chaine Memorial Tower, ARLHS NTI-004, during the ILLW. Depending on conditions they will be active on 40, 20 or 10 meters using SSB. QSL via bureau.

FRANCE, F. Members of the Radio Club Vendeen will be QRV as F6KUF/p from the Sebastopol Polder Nature Park on Noirmoutier Island on August 20 and 21. Activity will be on 80 to 10 meters using CW, SSB and possibly RTTY and PSK. QSL via F6KUF.

SCOTLAND, GM. A group of operators are QRV as GB2YLS from Fair Isle until August 22. This includes an entry in the ILLW from the Fair Isle South Lighthouse, ARLHS SCO-079. Activity is on the HF bands using CW and SSB. QSL via MM5YLO.

SOLOMON ISLANDS, H4. Ralph, H44RK is QRV from Honiara on the north coast of Guadalcanal until late 2012. Activity is on 40 to 10 meters using SSB. QSL direct to home call.

REPUBLIC OF KOREA, HL. Members of the Gwangju DX Club are QRV as D7G from Kogum Island, IOTA AS-060, until August 19. Activity is on 80 to 6 meters using CW, SSB and RTTY. QSL via HL4CEL.

FINLAND, OH. Station OH8T will be QRV from the Marjaniemi Lighthouse on Hailuoto Island, IOTA EU-184, during the ILLW. QSL via bureau.

ALAND ISLANDS, OH0. Normunds, YL3DQ is QRV as OH0/YL3DW until August 20. Activity is holiday style on 80 to 10 meters using CW and RTTY. QSL to home call.

BELGIUM, ON. Special event station ON4YOTA will be QRV from August 19 to 26 for Youngsters On The Air. QSL via ON9CFG.

ARUBA, P4. Jack, W6NF and Shelley, K7MKL are QRV as P40NF and P40S, respectively, until August 21. Activity is on the HF bands and 6 meters using CW and RTTY. This includes an entry in the SARTG RTTY contest as P40S. QSL via operators' instructions.

CURACAO, PJ2. Louis, PJ2LS will be QRV as PJ2L from the Noordpunt Lighthouse during the ILLW. Activity will be on the HF bands. QSL direct via EB7DX.

AUSTRALIA, VK. Tony, VK3VTH/7 will be QRV from the Currie Lighthouse on King Island, IOTA OC-233, during the ILLW. Activity will be on 40 and 20 meters using SSB. QSL to home call.

LAKSHADWEEP ISLAND, VU7. A group of operators are QRV as VU7M from Minicoy Island, IOTA AS-106, until August 22. Activity is on 160 to 10 meters using mostly CW with some SSB and digital modes. This includes activating the Minicoy Lighthouse during ILLW. QSL to VU2JHM.

CHAGOS ISLANDS, VQ9. Jim, ND9M is QRV as VQ9JC from Diego Garcia, IOTA AF-006, until mid November. Activity is Field Day style using mostly CW between 1230 and 1615z daily. QSL to home call.

THIS WEEKEND ON THE RADIO. ARRL Rookie RTTY Roundup, ARRL 10 GHz and Up Contest, North American SSB QSO Party, International Lighthouse/Lightship Weekend, SARTG World Wide RTTY Contest, QRP CW Fox Hunt, NCCC CW Sprint Ladder, Russian District Award Contest, Keyman's Club of Japan CW Contest, CVA DX CW Contest and the SARL HF Digital Contest are all on tap for this weekend. The Run for the Bacon QRP CW Contest is scheduled for August 20. The SKCC CW Sprint

and CWops Mini-CWT CWTest are scheduled for August 22. Please see August QST, page 77 and the ARRL and WA7BNM Contest websites for details.

European CW Association - EUCWA

Croatian Telegraphy Club is International Radio Amateur's Association with free membership (no terms) for telegraphy lovers across the world.
Croatian Telegraphy Club invites you to become a member (at the same time member of the European CW Association - EUCWA), welcomes your membership application (no application form – only name, callsign and wish to become) and if submitted by E-mail membership is free (no cost) because it is Club's principle of supporting CW which is far more important than any financial consideration. In case your application is by post please include 8 USD or 5 euro cash in envelope which is a contribution towards postal charges including the package of Club's Certificate of membership .
CTC frequencies: 3.530 – 7.015 – 14.030 – 21.030 – 28.030 MHz.
Every second Friday in December from 00:00 UT to 24:00 UT we can get together on these frequencies because this is CTC's Birthday.
If you are existing member and wish to obtain CTC Certificate of Membership please send us by post 8 USD or 5 euro cash in envelope which will cover postal expenses ...

CW For Ever Croatian Telegraphy Club

Franjevacka 5
42220 Novi Marof Chairman Den - 9A3FO
Croatia, Europe Secretary Vlado - 9A3CY
E-mail: ctc@email.t-com.hr

CTC members

Croatian Telegraphy Club – CTC writes in all CW lovers from all parts of the world.
The membership by E-mail (ctc@email.t-com.hr) is free and CTC needs only your membership application (only name, call sign and wish to become).
Every CTC member is at the same time member of the European CW Association – EUCWA
For members Club publish Certificates of Membership .
At the same time if you like QRP take a look at QRZ.COM 9A0QRP …

CTC MEMBERS

Indonesia : YB0DPO-534, YB3TD-849, YB2BY-851, YB5QZ-1140, YC1KAF-1142, YB1KAR-1144, YB2SV-1378, YB6LD-1883, YD1HUH-1916, 4G4M-2042, YB1GJS-2092, YB5AQB-2133, YB1CGX-2219, YC1IVW-2249, YB2ERL-2344, YC0NCU-2449, YC1OI-2465, YC6BTY-2526, YD4NTS-2529, YB4IR-2589, YB0AL-2760, YC7JON-2776, YB0COX-2786, YF4KHZ-2832, YC1IT-2834, YC2LEV-2836, YC5NS-2837, YD1TNK-2846, YB2LSR-2975

CTC info

History & membership

On the 12th December 2001. several active radio amateur old timers, lovers of telegraphy, founded the Croatian Telegraphy Club - CTC.
Club welcomes membership applications from telegraphy lovers from all parts of the world. The only requirement for prospective members of CTC is that CW should be their main or only mode of operation on the amateur bands.
If membership application is submitted by E-mail, then no fee is required and membership is free (no money - mail us only your name and call sign) .In case application is by post please include 8 USD or 5 euro cash in envelope by airmail, which is a contribution towards postage including the package of Club’s Certificate of membership .
It is the Club's principle of supporting CW and that is far more important than any financial consideration.
In order to become a member of CTC, send your application, quoting call sign, date of birth and (where possible) E-mail address to :

Croatian Telegraphy Club
Franjevacka 5
42220 Novi Marof
Croatia, Europe
E-mail: ctc@email.t-com.hr

Rules of CTC are as follows:
1) CTC is an association with free membership for telegraphy lovers across the world.
2) The only requirement is that members be active radio amateur CW operators.
3) The aims of CTC are to support and promote CW as an active mode to teach new telegraphy operators
and to increase the numbers of CW operators on the amateur bands.
4) CTC will, from time to time, organise activity periods and contests.
5) CTC will have only a chairman and one secretary.
6) A membership number (one callsign – one membership number) will be issued to every member, which they will be able to quote on QSL cards, letters etc.
7) The Club logo is an image of a hand key with the text "Croatian Telegraphy Club".
8) The CTC can have a stamp like an emblem. A rubber "CTC logo" stamp will be available to members.
9) Although there is no membership fee, voluntary contributions can be made (towards the costs of orga-
nizing activity periods, contests etc)
10) 12th December 2001 is the inauguration date of CTC and on this date each year members can celebrate its“Birthday“ by their activity on the CW section of the radio amateurs bands .

******
Under or instead of the "Croatian Telegraphy Club" in our common symbol you can write in call sign - CTC # number .
This membership number is valid only for this call sign .
Because our Club is member of the European CW Association EUCWA, CTC members are allowed to use besides our Club's
this EUCWA symbol - (take a look at "Links") either alone (the best) or in combination with your club's symbol or on your QSL cards, whatever and wherever you like.
CTC frequencies : 3.530 - 7.015 - 14.030 - 21.030 - 28.030 MHz for daily CW meetings. Call : CQ CTC.
Every second Friday in December from 00.00 UT to 24.00 UT
we can be together on this frequencies (the CTC's Birthday).

If you wish the CTC Certificate of membership send us by post 5 euro or 8 USD cash in envelope which cover postal expenses to the address :

Croatian Telegraphy Club
Franjevacka 5
42220 Novi Marof
Croatia, Europe Chairman Den – 9A3FO

EUCWA

Government and representation :
- The Association is self-governing. Every three years one member-club having
Full membership of the Association shall nominate the "EUCW Chairman". Such clubs shall take it in turn to nominate the Chairman in accordance with the sequence of the following list. When a member-club is unable to nominate a Chairman at the appropriate time the retiring chairman has responsibility to seek.
- Each member-club is represented within the Association by an appointed EUCW Communications Manager (ECM). The CTC ECM is Den - 9A3FO.
- The EUCW is officially represented by the "EUCW Chairman". The term of office of the EUCW Chairman
   is 3 years.
- Member-clubs may use the official emblem of the Association.

Communication and Information:
- The official language is English.
- The Chairman shall send an EUCW Bulletin to all ECMs once every 3 months containing news and information of EUCW interest.
- Each ECM is required to keep all other ECMs informed concerning matters of EUCW interest, normally via the Chairman and the EUCW Bulletin, but by direct communication (E-mail) when there is insufficient time to circulate important information by normal means.
- ECMs are responsible for promoting awareness and support of EUCW activities within the membership of
their own clubs and encouraging co-operation between their own clubs and other EUCW member-clubs.
-They are also responsible for publicizing EUCW activities in the national amateur radio magazines in their
   own countries.

Membership:
- There is no membership fee.

Purpose:
- The purpose of the Association is: By the co-operation of member-clubs, to create support and encouragement for amateur radio CW activity and to defend such activity when it is threatened in an way.
- Using the Association as a platform-member-clubs may exchange ideas and information, arrange various activities involving mutual participation, and generally co-operate for the benefit of amateur radio CW operation.

THE EUROPEAN CW ASSOCIATION WORKED EUCW AWARD
(Original site on: http://www.agcw.de/eucw/eucwa.html)

General Rules
1. This prestigious award is available to all licensed radio amateurs and shortwave listeners anywhere in the world.
2. Only contacts made on or after 27th April, 1991, (the 200th anniversary of the birth of Samuel F.B.
    Morse) are valid for this award.
3. Applicants should submit a list of contacts made (or SWL-stations heard) for which QSL cards have
    been received. The list must be certified by a licensed amateur who is a member of an EUCW club,
    who should state the name of his/her club and membership number.
4. The list must include date of contact, callsign of station worked or heard; band; name of operator;
    QTH; EUCW club; and club membership number.
5. Refer to http://www.agcw.de/eucw/eucw.html to see a comprehensive list of EUCW member
    clubs.
6. Separate certificates will be issued for each class of award.
7. The fee for the award is EUR 6.-, or US$ 8, or 12 IRCs.
8. Applications for the award should be sent to the Award Manager:
    Werner „Joe“ Jochem, DK7VW
    Wendelsborn 34
    D-66606 St. Wendel, Germany
9. The Award Manager's decision is final on all applications.

Requirements for the Award
1. Confirmed CW only contacts (SWLs - CW stations heard) with 100 different stations who are members of EUCW clubs, over 3 different amateur bands with a minimum of 20 stations worked or heard in each
    band.
2. The total of 100 stations worked or heard over 3 bands must include at least 3 members of six diffe-
    rent EUCW clubs.
3. Up to 40 stations worked or heard on 27th April, 1991, the 200th anniversary of the birth of Samuel
    F.B. Morse, will count as double contacts. All other requirements remain unchanged.

Classes of Award
a) Standard award - 100 two-way contacts made using any authorised transmission power.
b) QRP award -100 two-way contacts made, with the applicant using not more than 5 watts out power.
c) SWL award - 100 stations heard using any power.Certificates
The attractive Award certificates are printed on heavy parchment type paper, depicting the map ofEurope "at the time of Samuel F.B. Morse." Click here to see the layout of the award.

Welcome to the official website of the Competition Green and Yellow
The CVA DX CONTEST is a contest sponsored by the School of Communications of the Brazilian Army

The Competition Yellow-Green (CVA) is one of the most important activities amateur radio of Brazil, lying in the current year, in its 53rd edition, which implies tradition and demonstrated proficiency over the years. The CVA DX Contest is always held the third weekend of August CW and fourth weekend of August SSB.

The CVA was built to celebrate the Week of the Soldier, by a Ministerial Notice on 16 June 1972, and aims to promote reconciliation among amateurs and associations radioamadorísticas - civilians and military from around the world - and mingle in the commemorative activities of amateur Soldier of the Week, publicizing the events related to August 25 and the image of Duque de Caxias, Patron of the Brazilian Army.

REGULATION OF GREEN AND YELLOW CONTEST

1.PERÍODO

Date	Mode	Time	Event
Penultimate Saturday August	CW	21:00 (UTC)	Home
Penultimate Sunday August	CW	21:00 (UTC)	End
Last Saturday in August	SSB	21:00 (UTC)	Home
Last Sunday in August	SSB	21:00 (UTC)	End

RULES OF THE CVA-DX

2. CATEGORIES

2.1 Categories CW and SSB:

(a) Single Operator, Single Band, High Power : 10, 15, 20, 40 and 80: All work and logging operation run by one person (the operator). Only a transmitted signal is permitted at any time. QSY to another band after 10 minutes the band has worked. The output power shall not exceed the maximum allowed by the legislation in force in the country. (1st place awards for national and international).

(b) Single Operator, Single Band, Low Power (up to 100 W) 10, 15, 20, 40 and 80m: All work and logging operation run by one person (the operator). Only a transmitted signal is permitted at any time. The total output power must not exceed 100 w (prize for 1st place 1st place national and international).

(c) Single Operator, All bands, QRP (up to 5 W): All work and logging operation run by one person (the operator). Only a transmitted signal is permitted at any time. QSY to another band after 10 minutes the band has worked. The total output power must not exceed 5w (prize

for 1st place 1st place national and international).

(d) Single Operator, All Bands, High Power: All work and logging operation is performed by one person (the operator). QSY to another band after 10 minutes the band has worked. The output power shall not exceed the maximum allowed by the legislation in force in the country. (1st place award for 1st place national and international).

(e) Single Operator, All Bands, Low Power: All work and logging operation is performed by one person (the operator). Only a transmitted signal is permitted at any time. QSY to another band after 10 minutes the band has worked. The maximum output power shall not exceed 100 watts (1st place award for 1st place national and international).

(f) MIL (stations Multi - operator located in Military Units): In this category the operators may be civilian or military stations operating within Military Units, Armed Forces or Auxiliary. (Awards: 1st place National and 1st International).

(g) Military Single Operator , All Bands Low Power : active and retiref military of Armed Forces and Auxiliary Forces (Military Police and Military Fire Brigade). All work and logging operation is performed by one person (the operator). Only a transmitted signal is permitted at any time. QSY to another band after 10 minutes the band has worked. The maximum output power shall not exceed 100 watts. (1st place award for 1st place national and international).

(h) Military Single Operator , All Bands High Power: active and retiref military of Armed Forces and Auxiliary Forces (Military Police and Military Fire Brigade). All work and logging operation is performed by one person (the operator). Only a transmitted signal is permitted at any time. QSY to another band after 10 minutes the band has worked. The output power shall not exceed the maximum allowed by the legislation in force in the country. (1st place award for 1st place national and international).

(I) Multi - Operator , Single Transmitter all bands high power: More than one person can contribute to the final score during the official competition. Only a transmitted signal is permitted at any time. QSY to another band after 10 minutes the band has worked. The output power shall not exceed the maximum allowed by the legislation in force in the country. (awards for 1st, 2nd and 3rd place nationally and 1st, 2nd and 3rd place international).

(j) Clubs: (Sum of scores of all participants): In this category there will be prizes for 1st, 2nd and 3rd place national and international place.

(l) HQ (Labres and Associations Recognized by IARU): In this category there will be prizes for the top finishers national and international.

(m) TEEN Single Operator (up to 17 years): In this category there will be prizes for the top finishers national and international.

n) Single Operator YL: Exclusive to Young Ladies, (awards for 1st place National and 1st place international).

ORVELAY: SUBCATEGORY CW and SSB

o) ROOKIE (rookie): To participate in this category, the operator must have been licensed to three (3) years or less from the date of the competition. Indicate the date of the first license in the field SOAPBOX and have never participated in the CVA DX with another prefix. Remarks: QSY only after a period of 10 minutes the band has worked. The ten-minute periods

are defined as beginning with the first logged QSO on a band. Only one signal to be transmitted by time.

3. EXCHANGE

a) Station Director CRAEC
RST + CVA (599 CVA ou 59 CVA)

b) Stations of LABRE and amateur associations recognized by the IARU
RST + HQ (599 HQ ou 59 HQ)

c) Station located in Military Units or Single Operator Military
RST + MIL (599 MIL ou 59 MIL)

d) Stations Brazilian
RST + UF (599 RJ ou 59 RJ)
* RJ is the UF of Rio de Janeiro.

e) Stations QRP
RST + QRP (599 QRP ou 59 QRP)

f) Stations YL
RST + YL (599 YL ou 59 YL)

g) Stations operated by TEEN ham aged less than or equal to 17 years.
RST + TEEN (599 TEEN ou 59 TEEN)

h) Stations DX
RST + DX (599 DX or 59 DX)
QRP: 599 QRP or 59 QRP
MIL: 599 MIL or 59 MIL
YL: 599 YL or 59 YL
HQ: 599 HQ or 59 HQ
TEEN: 599 TEEN or 59 TEEN

4. SCORE
1) will be valid all QSOs confirmed, a station worked per band. QSY only after a period of 10 minutes in the band. The ten-minute periods are defined as beginning with the first logged QSO on a band.
(a) Stations of Stations “PY”
Contacts between stations in Brazil = 2 pts
Contacts between stations in Brazil and DX = 3 pts
(b) Stations DX
Contacts between stations in the same country = 0 pt
Contacts between stations of different countries = 1 pt
Contacts with stations of Brazil = 3 pts
(c) All Seasons
Contacts with the station director (PT2CVA) = 10 pts
Contacts with stations HQ or MIL = 5 pts (regardless of country)
Contacts with QRP stations = 3 pts (regardless of country)

5. MULTIPLIERS:
Two types of multipliers will be used:
M1) multiplier for different UF contacted by Brazilian band.

M2) A multiplier different country contacted on each band.
Allowed contacts with stations in their own country for the credit multiplier.

* Federal Units:

Estado	UF	Estado	UF	Estado	UF
Acre	AC	Alagoas	AL	Amapá	AP
Amazonas	AM	Bahia	BA	Ceará	CE
Brasília	DF	Espírito Santo	ES	Goiás	GO
Maranhão	MA	Mato Grosso	MT	Mato Grosso do Sul	MS
Minas Gerais	MG	Pará	PA	Paraíba	PB
Paraná	PR	Pernambuco	PE	Piauí	PI
Rio de Janeiro	RJ	Rio G Sul	RS	Rondônia	RO
Rio G Norte	RN	Roraima	RR	Santa Catarina	SC
São Paulo	SP	Sergipe	SE	Tocantins	TO

6. SCORES
The final score is calculated by the following formula:
Total = total score (sum of QSO points of all bands) × M1 (UF all bands) x M2 (Countries worked from all bands).

7. DECLARATION:
By submitting an entry to the CVA DX CONTEST you agree that: 1) you have read and understood the contest rules and agree to follow the same, 2) you have operated in accordance with all rules and regulations pertaining to amateur radio in his country, three) your og can be opened to the public, and 4) all actions and decisions of the CVA DX Contest Committee are official and end.

8. LOGS AND RESULTS:
1) All logs must be submitted on the website of CRAEC (http://www.craec.org) until the 15th year the contest september The log must be submitted in Cabrillo format to: cw@... and ssb @ craec.org
2) The recommended software to record the Log is N1MM, update from V 8.5.12.
3)The latest update can be obtained (http://n1mm.hamdocs.com/tiki-list_file_gallery.php?galleryId=15).
4) N1MM software, can be obtained from: (http://n1mm.hamdocs.com/tiki-list_file_gallery.php?galleryId=7).
5) here is also a program called SD which is compatible with the CVA DX (http://www.ei5di.com/).
6) The results will be published on the website of CRAEC (http://www.craec.org) or (www.cvadx.org).

http://rdaward.org/rdac1.htm

The award program, for those who are interested in collecting districts of Russia.

What is RDA?
"RDA" (Russian District Award) is an International Award Program with the goal of attracting interest in Amateur Radio through the communication with various Districts of the Russian Federation. The "RDA" program is established to encourage making confirmed contacts with the greatest variety of Russian Areas. There are currently 6 different certificate awards varying in difficulty and complexity, and two plaque awards available for "Honor Roll" and "#1 Honor Roll".

RDA CONTEST - 2012 (RDAC)
1. Contest sponsors:
Contest is sponsored by TAG - Tambov Award Group, Russia

2. Contest Period:
08:00 UTC Aug 18 - 08:00 UTC Aug 19 2012 (24 hours format)

3. Bands:
1.8 - 28 mHz (WARC bands excluded)

4. Modes:
CW and SSB

5. Categories:
Foreign Entrants:
A-MIX-World (Single Op - MIX)
A-MIX-World-LP (Single Op - MIX - Low Power)
A-CW-World (Single Op - CW)
A-CW-World-LP (Single Op - CW - Low Power)
A-SSB-World (Single Op - SSB)
A-SSB-World-LP (Single Op - SSB - Low Power)
B-World (Multi Op - MIX)
Russian Entrants:
A-MIX-EUR - (Single Op - MIX - EU Russia)
A-MIX-EUR-LP - (Single Op - MIX - EU Russia - Low Power)
A-CW-EUR - (Single Op - CW - EU Russia)
A-CW-EUR-LP - (Single Op - CW - EU Russia - Low Power)
A-SSB-EUR - (Single Op - SSB - EU Russia)
A-SSB-EUR-LP - (Single Op - SSB - EU Russia - Low Power)
B-EUR - (Multi Op - MIX - EU Russia)
C1-MIX-EUR - (Single Op - MIX - Field - EU Russia)
C1-CW-EUR - (Single Op - CW - Field - EU Russia)
C1-SSB-EUR - (Single Op - SSB - Field - EU Russia)
C2-MIX-EUR - (Multi Op - MIX - Field - EU Russia)

A-MIX-ASR - (Single Op - MIX - AS Russia)
A-MIX-ASR-LP - (Single Op - MIX - AS Russia - Low Power)
A-CW-ASR - (Single Op - CW - AS Russia)
A-CW-ASR-LP - (Single Op - CW - AS Russia - Low Power)
A-SSB-ASR - (Single Op - SSB - AS Russia)
A-SSB-ASR-LP - (Single Op - SSB - AS Russia - Low Power)
B-ASR - (Multi Op - MIX - AS Russia)
C1-MIX-ASR - (Single Op - MIX - Field - AS Russia)
C1-CW-ASR - (Single Op - CW - Field - AS Russia)
C1-SSB-ASR - (Single Op - SSB - Field - AS Russia)
C2-MIX-ASR - (Multi Op - MIX - Field - AS Russia)

Notes:
5.1. Only one category may be entered.
5.2. C1 и C2 field category entrants must not use fixed stations and antenna systems; Using household 220V circuit is permitted; Portable operation "/p" designator must be used if the operation takes place from the participant's home oblast, in other cases it is not a mandatory requirement.
5.3. All categories of entrants are allowed to use packet and WEB clusters. Self-spotting is prohibited.

6. Band changes:
6.1 Single-op stations are not limited with band changes; Only one signal can be transmitted at any given time, violation of this rule forces disqualification of an entrant.
6.2 MOST stations are limited by "10 minutes" rule. Start time is determined on the first QSO made on that particular band. Only one signal can be transmitted at any given time. Exception: two signals on different bands are allowed if and only if the station on another (only one) “multiplier” band picked up a new multiplier. This “multiplier” band should also be changed on “10 minutes” rule.
6.3 Contacts violating 6.2 rule, should be shown in the log, they will neither be counted nor penalized for an entrant, but counted for the station contacted.

7. Dupes:
7.1 Dupes are contacts made with the same station on the same band and mode. All of MIXED category entrants can work the same station on both CW and SSB.
7.2 CW contacts made in the SSB portion of the band, and SSB contacts made in the CW portion of the band are prohibited. Violation of this rule leads to disqualification.
7.3 Entrants are strongly advised to leave DUPES in the log file. Dupe contacts are not penalized; one does not have to mark them in the electronic log submission, dupes should be marked in the paper log submissions only. If the first contact between stations is valid, dupes have 0 points value. If the first contact is not valid, the second (dupe) contact is accepted.
DO NOT DELETE DUPES!

8. Exchange:
8.1. Stations outside of Russia must give a signal report + QSO number, starting with 001; serial numbers are to be in chronological order regardless of the bands used.
8.2. Russian stations must give a signal report + RDA number.

9. QSO Points:
9.1. Russian stations:

- QSO with your own country (Russia on your continent) – 1 point;
- QSO with Russia on another continent - 2 points;
- QSO with a different country on your continent – 3 points;
- QSO with a C1 или C2 field entrant - 10 points;
- QSO with another continent – 5 points.
9.2. Non-Russian stations:
- QSO with Russian station – 10 points (regardless of continent).
9.3. Kaliningrad (UA2) is a separate DXCC entity and a separate Oblast, but points for QSO with Kaliningrad are counted as for European Russia.

10. Multipliers:
10.1. Russian stations: DXCC Entities on every band + RDA districts irrespective of band.
10.2. Non-Russian stations: RDA Districts.

11. Final Score:
11.1. Foreign entrants:
- the final score is the result of the total QSO points multiplied by the sum of RDA districts.
11.2. Russian entrants:
- the final score is the result of the total QSO points multiplied by the sum of RDA districts and country multipliers.

12. Penalties:
QSO is penalized (not credited) for the following:
- incorrectly logged calls (Bad Call);
- incorrectly logged exchange numbers;
- QSO is not present in the other station log (NIL);
- QSO time in entrant's log and other station's log difference is more than 3 minutes (except systematic computer errors);
- QSO bands or modes in entrant's log and other station's log differ.

13. Analysis
RDAC uses total computerised control. Every paper log submission is manually entered into computer. If a computer logging program was used in the contest, or used to transcribe a paper log submission, the contest sponsors ask entrants to send us their electronic log. RDAC Contest Committee decisions are final.

14. General Log Submission Requirements
14.1 Submit your log in the "CABRILLO for ARRL/CQ HF contests" format created by all major logging programs. File name should be YourCall.log. Russian stations should specify their RDA number in "SECTION:" string in the header header part of the electronic log.
14.2 Each QSO must contain call sign, time (UTC), band, RS(RST), exchange number (both sent and received - even for check logs).
14.3 It is allowed to show only RS(T) other than 59(9).

CHECKLOG
CHECKLOG-FIELD

14.4 Points and final score calculations are not necessary, calculations are done by our software.
14.5 In the header part of the electronic log submission you MUST specify a category of entrance and the full postal address for dispatch to the participant RDXC results, trophies, awards and certificates.
14.6 A plain-text file format is also acceptable.
14.7 Log submissions in MS Word, Excel or UUE-coded files may force disqualification of an entrant in case of wrong file conversion to plain-text format.
14.8 Submit your log in the Cabrillo file format by e-mail or on IBM, MS-DOS compatible computer disk.
14.9 Electronic logs must be submitted in Cabrillo file format. Be sure to put the station

call sign and the category in the "Subject:" line. Contest manager will acknowledge reception of your electronic log as soon as possible.
14.10 Electronic log submission on MS-DOS compatible disc should indicate call, filename and category of an entrant at the disc label.
14.11 DUPES should not be marked or deleted.

15. Log Submission Addresses and Terms
15.1 Electronic logs must be submitted via E-mail to:
rx3rc@....
Only CD or DVD (no paper logs) should be sent to:

Roman A. Novikov, P.O.Box 21, 392000 Tambov, Russia.

15.2 Contest manager will acknowledge reception of your electronic log in 24 hours.
15.3 Logs must be submitted to the contest sponsors within 30 days (no later than Sep 19 2012).
15.4 Final results - 20 Sep 2012.

16. Awards:
16.1 Results will be compiled separately for each of the following groups: European Russia, Asiatic Russia, and the rest of the World.
16.2 1st place plaques will be awarded in each category.
16.3 1st, 2nd and 3rd place certificates will be awarded in each category listed under Section 5.
16.4 Special plaques will be awarded to participants, activating RDA districts with 5% rating according to official "RDA Most Wanted" list at http://rdaward.org/mw.htm as for the day of the contest. The contest sponsors are seeking donors to sponsor plaques for different categories of entrants. List of categories and terms of sponsorship can be requested by e-mail. Donor's logos and information will be placed at RDAC Web-site. Contact contest manager at rx3rc@rdaward.org.

17. RDA Award Credits
17.1 All worked RDA Districts, confirmed by the entrants logs, will be credited for an entrant without QSL-cards.
17.2 Every entrant , who sends his log submission via e-mail, will be sent a list of confirmed RDA Districts.

RDA Contest Sponsors invite all the radio amateurs from Russia and foreign countries to take part in RDA 2012 Contest.

http://id.wikipedia.org/wiki/Daftar_pulau_terluar_Indonesia
Daftar pulau terluar Indonesia

Halaman ini memuat daftar 92 pulau terluar Indonesia berdasarkan Peraturan Presiden Nomor 78 Tahun 2005. Peraturan Presiden tersebut ditandatangani oleh Presiden Republik IndonesiaSusilo Bambang Yudhoyono pada 29 Desember 2005. Sebanyak 92 pulau di wilayah Indonesia berbatasan langsung dengan negara tetangga di antaranya: Malaysia (22), Vietnam (2), Filipina(11), Palau (7), Australia (23), Timor Leste (10), India (13), Singapura (4) dan Papua Nugini (1). Ke-92 pulau tersebut tersebar di 18 provinsi Indonesia yaitu Nanggroe Aceh Darussalam (6),Sumatera Utara (3), Kepulauan Riau (20), Sumatera Barat (2), Bengkulu (2), Lampung (1), Banten (1), Jawa Barat (1), Jawa Tengah (1), Jawa Timur (3), Nusa Tenggara Barat (1), Nusa Tenggara Timur (5), Kalimantan Timur (4), Sulawesi Tengah (3), Sulawesi Utara (11), Maluku Utara (1), Maluku (18), Papua (6) dan Papua Barat (3).
No. Nama pulau Koordinat titik terluar Perairan Wilayah administrasi Negara terdekat
1. Alor 8° 13′ 50″ LS, 125° 7′ 55″ BT Selat Ombai Kabupaten Alor, Nusa Tenggara Timur Timor Leste

Selamat sore rekan2 semuanya, malam ini saya mendapat kesempatan untuk menjadi Operator YB67RI di 20 m band, mohon bantuan kepada siapapun rekan2 disini yang bisa membantu saya untuk memberi tahu caranya memakai Logger32, N1MM atau Log4OM yg saya sudah download semuanya, namun belum bisa bagai mana cara mengisinya. Mohon bantuannya mengirimkan saya copy logger yang sudah terpakai untuk dapat saya contoh cara memamakinya dan sebelumnya saya ucapkan banyak terima kasih dan best regards de YB4TRY.

Thanks & regards,
Annes Samah (YB4TRY)

Selamat Sore OM

apakah Logger 32 nya sudah di install.
kalau belum pertama-tama di install dahulu logger 32 nya.
biasanya dengan double click pada program yang telah di download.

setelah terinstall
click pada file kemudian pilih menu change logbook
akan muncul windows baru " Logbook selection"
pada Field Logbook di isi saja YB67RI
Kemudian Operator di isi YB4TRY
kemudian Apply.

untuk entry qso pilih windows yang ada Operator: YB4TRY
ada menu Freq. mode dan band
dibawahnya ada call.

untuk mengganti freq: silahkan di isi pada field call : misalnya 14.250
untuk mengganti mode dan band di click saja pada mode dan band kemudian
akan keluar window dan silahkan diganti sesuai dengan modenya.

maaf OM Annes informasi ini mungkin kurang jelas dan terlalu singkat.
saya coba carikan yang sudah systematis tapi belum dapat infonya. OM.

Tambahan informasi:

di Logger 32 ada menu Help OM, silahkan di click dan semua informasi untuk installasi ada di sana OM.

Terimakasih

Dear All Operator,

now YB67RI QRT, thank you for your support
please, send your ADIF log to yb2dx@... or/and ybdxc@...
we will updating online on LOTW and OQRS clublog ASAP
see you next year, hihi

SB PROP @ ARL $ARLP033
ARLP033 Propagation de K7RA

ZCZC AP34
QST de W1AW
Propagation Forecast Bulletin 33 ARLP033
From Tad Cook, K7RA
Seattle, WA August 17, 2012
To all radio amateurs

SB PROP ARL ARLP033
ARLP033 Propagation de K7RA

There was a big drop in solar activity over the past week, with the average daily sunspot numbers declining nearly 42 points to 77.6, and average daily solar flux down 20 points to 114.7.

Solar flux has dropped below 100, where it is expected to remain through August 22. NOAA/USAF predicted solar flux on August 16 and 17 at 100, but it was actually 98.3 on August 16. The prediction for August 18 is 95, then 90 on August 19-22, then 100, 120 and 130 on August 23-25, then 135 on August 26-29. It is expected to drop below 100 again on September 12-15. This is almost exactly the forecast that was in the ARRL Letter on Thursday, with the August 23-24 sunspot numbers dropped by five points on each day.

Predicted planetary A index is 10 on August 17, 14 on August 18, 12 on August 19-20, then 8 on August 21, 5 on August 22-23, 8 on August 24-25, 12 on August 26, followed by 5 on August 27 through September 7, then 8 on September 8-10, and 5 on September 11-14. This is identical to the forecast in Thursday's ARRL Letter.

The weekly prediction of geomagnetic indicators from OK1HH says to watch for quiet to unsettled conditions August 17-20, mostly quiet August 21, quiet on August 22-24, quiet to active August 25-26, mostly quiet August 27-28, active to disturbed August 29-30, and quiet again on August 31 through September 1.

Many readers have commented that the short term view of the solar cycle has a recent peak around Fall 2011, yet predictions still focus on Spring 2013 for the peak of Cycle 24.

It is interesting to look back over the past two solar rotations, which is 55 days, and see an average compared with the same 55 days last year, June 23 through August 16. The average daily sunspot numbers for those dates in 2009-2012 are 3.3, 26.5, 61.2, and 91.6. If we want to look at last Fall's peak we can cherry pick the data,

and chose the 55 day period of November 7 through December 31, 2011. The average daily sunspot number then was 119.3, about 30% higher than current values.

This week N7QR, Russ Mickiewicz, of Portland, Oregon (and later reader David Moore, and others) sent information on a new method for predicting solar flares, by tracking decay rates in gamma radiation from radioactive elements. Read about it at http://phys.org/news/2012-08-solar-flares-advance.html.

Randy Crews, W7TJ of Spokane, Washington offered some opinions on future solar activity and propagation. He writes, "Reading K9LA's excellent article in QST this past July, the graph on the cover pretty well confirms the good HF propagation bestowed on DXers for now, and if one 'connects the dots' the HF propagation following the years after the peak (sometime in 2013) will be considerably different from what we all have experienced in the past 30+ years. Cycles 21, 22 and 23 were good strong normal sunspot cycles. As we all can conclude from the numerous forecasts, Cycle 24 will be a very low one. There will be much lower highs to drop from once the decline begins, and the low point of Cycle 24 will occur much sooner, unlike the many years of previous cycles where solar activity declined from solar flux values of 200+. Carl is right. Enjoy and make the most of propagation now. Once the cycle turns, everyone will be surprised at the swiftness of the decline of high band propagation."

George Kutcher, K3GWK of Jenkinsburg, Georgia mentioned that "There is a simple sunspot data app for the iPhone, iPad and iPod Touch. The app is called 'Sunspot' by AMI Mobile. There is a cost for the app. 'Sunspot' is a simple application to display 3-hour WWV space weather and NOAA sunspot data on your iPhone, etc. Data is updateable on demand, as well as current trending from the previous data set."

Brendan Wahl, WA7HL of Bisbee, Arizona likes the N0HR Propfire program for the Firefox web browser. It displays the geophysical and solar data that WWV transmits at 18 minutes after each hour, and can also display sunspot number. You can get it for free at, http://www.n0hr.com/Propfire.htm.

N0AX reports that DX Sherlock has a new URL at, http://www.dxmaps.com/.

Turns out our Sun is not perfectly round. Check it out at http://www.cbsnews.com/8301-205_162-57494899/the-suns-strange-shape-revealed/.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service web page at,

http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for August 9 through 15 were 124, 105, 98, 76, 62, 46, and 32, with a mean of 77.6. 10.7 cm flux was 131.2, 125.4, 119.7, 112.3, 108.1, 105.8, and 100.7, with a mean of 114.7. Estimated planetary A indices were 6, 4, 4, 7, 9, 7, and 6, with a mean of 6.1. Estimated mid-latitude A indices were 7, 4, 5, 7, 8, 7, and 7 with a mean of 6.4.

Dear All

sehubungan dengan rencana Ulang Tahun pertama ybdxc, kami mengusulkan mengadakan sesuatu yang berkesan yakni DXpedition ke Nusa Kambangan dengan pertimbangan 1. Mudah dicapai areanya dan belum pernah qrv 2. IOTA OC-237 Java coastal Island 3. LOTA ARLHS IDO-060 Cimiring Lighthouse 4. Termasuk dalam daftar 92 pulau terluar perbatasan NKRI 5. Alcatraz versi indonesia, worldwide known.

Lets get lost to Nusa Kambangan YBDXC DXpedition, WHY NOT? Kami mengharapkan tanggapan rekan2 sehingga kegiatan ini bisa terlaksanakaan

Regards
Budi YF1AR

3350. Perkenalan : Dragon DX Club

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-08-21 04:37:47 UTC
From: Martinus Jap
Topic: 3350 Message: 3350

Sejarah :
Embrio dari club ini sebenarnya berasal dari tim contester YE2R yang telah berkiprah sejak dari tahun 2009, Kami menyadari bahwa YE2R adalah sebuah call-sign dimana bukan merupakan sebuah Nama Club, suatu ketika YE2R juga harus dipakai oleh kelompok lain sesuai dengan keperluan dan kebutuhannya. akhirnya kelompok ini menyadari bahwa perlu sebuah identitas diri untuk kelompok ini.

Ide nama Dragon DX club ini adalah karena di tahun 2012 ini adalah tahun yang luar biasa, dimana menurut kalender China tahun ini adalah Tahun Naga, disamping itu kebahagian-kebahagaian lain terjadi di grup YE2R di tahun ini disamping kegiatan Amatir Radio tersebut, akhirnya pada tanggal 29 February 2012 disepakati sebagai hari lahirnya Dragon DX Club, yang anggotanya adalah sebagian besar dari ex-tim kontes YE2R.

Aktifitas :
aktifitas kami selama ini hanya pada ikut serta kontes CQWW SSB sejak 2009, tentunya kami juga berharap suatu ketika kami pun juga bisa berkiprah di kegiatan-kegiatan lain di dunia amatir radio, kami juga ingin bisa berbagi pengetahuan tentang amatir radio kepada teman-teman yang lain yang mungkin baru pertama kali menginjak di dunia amatir radio.
Rencana dalam waktu dekat ini adalah, kami akan menjadi bagian lagi dalam kontes dunia CQWW SSB 2012 pada tanggal 27-28 Oktober nanti, QTH : YB2DX , Jl. Pierre Tendean 17 , Purwodadi - Grobogan 58111 Jawa Tengah.
Kami mengundang temen-teman dimanapun anda berada tanpa kecuali apakah sudah menjadi anggota ORARI ataukah belum, pengurus atau bukan pengurus, tua atau muda, OM atau YL untuk melihat secara dekat kegiatan ini.

Financial :
Memang betul sekali bahwa kegiatan ini tak lepas dari dana operasional, akomodasi operator dll, sejak kami berkiprah, kami hanya mengandalkan swadaya keuangan seluruh anggota tim dan beberapa dungkungan dari sponsorship beberapa waktu kegiatan yang lalu.

Pada kesempatan ini pula kami ingin menyampaikan apabila nanti ada pemerhati dan yang tergerak hatinya yang akan mendukung secara financial (sponsorship) melalui aktifitas kami ini kami akan sangat berterima kasih sekali , dan tentunya akan terjadi timbal balik yang akan saling menguntungkan antara kedua belah pihak nantinya.

demikian sekelumit tentang Dragon DX Club.

Seno, YB2LSR
Yang dituakan oleh temen2 di club DDXC padahal masih muda :-)

terima kasih banyak info nya teman, 73

Pada 21 Agustus 2012 11:37, Martinus Jap <yb2lsr@yahoo.com> menulis:

> **
>
>
>
> Sejarah :
> Embrio dari club ini sebenarnya berasal dari tim contester YE2R yang telah
> berkiprah sejak dari tahun 2009, Kami menyadari bahwa YE2R adalah sebuah
> call-sign dimana bukan merupakan sebuah Nama Club, suatu ketika YE2R juga
> harus dipakai oleh kelompok lain sesuai dengan keperluan dan kebutuhannya.
> akhirnya kelompok ini menyadari bahwa perlu sebuah identitas diri untuk
> kelompok ini.
> Ide nama Dragon DX club ini adalah karena di tahun 2012 ini adalah tahun
> yang luar biasa, dimana menurut kalender China tahun ini adalah Tahun Naga,
> disamping itu kebahagian-kebahagaian lain terjadi di grup YE2R di tahun ini
> disamping kegiatan Amatir Radio tersebut, akhirnya pada tanggal 29 February
> 2012 disepakati sebagai hari lahirnya Dragon DX Club, yang anggotanya
> adalah sebagian besar dari ex-tim kontes YE2R.
>
> Aktifitas :
> aktifitas kami selama ini hanya pada ikut serta kontes CQWW SSB sejak
> 2009, tentunya kami juga berharap suatu ketika kami pun juga bisa berkiprah
> di kegiatan-kegiatan lain di dunia amatir radio, kami juga ingin bisa
> berbagi pengetahuan tentang amatir radio kepada teman-teman yang lain yang
> mungkin baru pertama kali menginjak di dunia amatir radio.
> Rencana dalam waktu dekat ini adalah, kami akan menjadi bagian lagi dalam

> kontes dunia CQWW SSB 2012 pada tanggal 27-28 Oktober nanti, QTH : YB2DX , Jl.
> Pierre Tendean 17 , Purwodadi - Grobogan 58111 Jawa Tengah.
> Kami mengundang temen-teman dimanapun anda berada tanpa kecuali apakah
> sudah menjadi anggota ORARI ataukah belum, pengurus atau bukan pengurus,
> tua atau muda, OM atau YL untuk melihat secara dekat kegiatan ini.
>
> Financial :
> Memang betul sekali bahwa kegiatan ini tak lepas dari dana operasional,
> akomodasi operator dll, sejak kami berkiprah, kami hanya mengandalkan
> swadaya keuangan seluruh anggota tim dan beberapa dungkungan dari
> sponsorship beberapa waktu kegiatan yang lalu.
> Pada kesempatan ini pula kami ingin menyampaikan apabila nanti ada
> pemerhati dan yang tergerak hatinya yang akan mendukung secara financial (
> sponsorship) melalui aktifitas kami ini kami akan sangat berterima kasih
> sekali , dan tentunya akan terjadi timbal balik yang akan saling
> menguntungkan antara kedua belah pihak nantinya.
>
> demikian sekelumit tentang Dragon DX Club.
>
> Seno, YB2LSR
> Yang dituakan oleh temen2 di club DDXC padahal masih muda :-)

Bisa aja ini OM Hen,.......... :-D

Iya nih sudah pada sepuh-sepuh perlu re-generasi , yg muda2 harus mulai disiapkan nih, spy tidak hilang begitu aja.
Tp ada yg menarik disini adalah, temen2 di daerah2 lain juga sdh mulai aktif lagi.

Pls ur support OM Hen

Alhamdulillah kalo semakin banyak kader2 DXer yg muncul.
Walaupun sempat mendem gak aktif sejak menikah di tahun 1988-89 saya tetap memperpanjang IAR dan waktu ada milis ORARI yg saya ikuti dan banyak membahas isu2 DXing - saya mulai tertarik lagi utk on air waktu dinas di makassar.

Semoga Dragon DX Club makin maju dan makin banyak memunculkan DXers baru yg mumpuni hasil godogan di kawah chandradimuka di grobogan.

Yes....

Roger that OM Hen,

Sayapun juga berharap demikian,
Semoga hobby amatir radio ini bukan hanya diartikan secara sempit, namun betul betul secara harafiah Amatir / Ham Radio itu sendiri "back to basic", mengembangkan hobby sangat diharapkan, namun tidak mem-bias-kan hobby ini ke arah lain.

Apresiasi untuk OM Hen yg selama ini masih concern terhadap AR, semoga langkah OM Hen-pun juga bisa ditiru temen2 lain.

Semoga selain DDXC, ada juga kawah chandra-dimuka lain yg akan ambil bagian menggodog dx-er2 baru.

Thanks for ur support

INDONESIA Nusantara Award
The Nusantara Award will be issued to licensed amateurs and SWLs for making 2 way contacts on HF bands (160m – 10m) including WARC bands with a minimum of 10 different islands of Indonesia on or after August 17, 1945. Repeater, satellite, eQSO, Echolink or other relay methods are NOT permitted. The 10 islands must include a minimum of 5 out of 6 main islands of Jawa / Java, Sumatera / Sumatra, Kalimantan / Borneo, Sulawesi / Celebes, Irian / Papua, and Bali.
Note: The web site contains a 1.4 MB PDF document of the 13,200 different islands comprising Indonesia.
Endorsement stickers will be issued in increments of 10 for additional islands worked. All islands claimed for the award must appear on a map and have a name. Each QSL card must have the printed name of the island from which the operation took place. For major or large islands, the name of a town or city on the island, or grid locator maybe sufficient. Please contact award manager when in doubt. Not all islands in this program may have an IOTA Reference Number. Small islands, individual coastal islands, islands in a bay, in a lake, in a river and in an estuary or any which cannot be classified in IOTA Program might be still accepted for this award. Groups of islands with the same IOTA reference count for separate islands for this award, e.g. Bangka and Belitung are two separate islands for this award (OC-144)
Your claim must be accompanied by certified list (GCR) showing the call signs of stations worked, dates, times, bands, modes and island name. Alternatively a list of stations worked with a copy of the QSL cards can be used as well. Applicants using e-mail, may attach the list and scans of the QSL cards. All QSL cards must be in possession and must be produced upon request for inspection.
For DX station, the award fee is 8 IRCs, $US6 , or 5 Euros for basic award. The Endorsement fee is 1 IRC, $US1, or 1 Euro regardless of the level claimed. The fee covers the award and postage.
There is no fee for handicapped operators or for SWLs. Payment can be made by Paypal (preferred) or cash/IRC (at your own risk), Send the application and fee to Award Manager :
Please click on the following link for a copy of the application form.
https://docs.google.com/open?id=0B7INkCueULd0T3pjQ09SMU1MVnc
DX Stations should apply to:
Stephan Busono W2FB, 3 Margaret Drive, Somerset, NJ 08873 USA
E-mail / Paypal : sbusono(at)gmail.com
Indonesian and DX should apply to:
Adhi Widodo YB3MM, PO Box 6, Pandaan 67156 Indonesia.
E-mail / Paypal: yb3mm(ad)mdxc.org

http://www.islandradio.org/index.html

IREF is an organization created to provide support to IOTA expeditions. The Foundation will depend on contributions from members on at least an annual basis. IREF has been born out of a grass roots desire to advance the sport of "Island Chasing" and has not received any endowments to help achieve these goals. IREF is a 501(c)(3) organization.

About IREF

IREF is an organization created to provide support to IOTA expeditions. The Foundation will depend on contributions from members on at least an annual basis. IREF has been born out of a grass roots desire to advance the sport of "Island Chasing" and has not received any endowments to help achieve these goals. IREF is a 501(c)(3) organization.This designation allows US contributors to deduct contributions to IREF, Inc. from their federal income taxes.

IREF is an international organization. The Board of Directors is made up of members from Great Britain, Portugal, Japan, and the United States. The Board will make all of the expedition funding decisions. The principles that the foundation are based on are:

> To provide funding and other support for expeditions to IOTA qualified islands for the purpsoses of operating amateur radio & promote radio science through portable island operations
> To provide funding and other support to amateurs resident on IOTA qualified islands where such assistance can be shown to improve their capabilities in achieving the same objectives.
> Promote International goodwill through amateur radio.
> Advance the body of knowledge for those interested in portable island radio operations in areas of expedition planning, antenna use and deisgn, radio propogation studies, and general radio science
> Unite amateur radio operators as a potential force to deal with issues concerning the advancement of the amateur radio hobby
> Promote expedition effectiveness by encouraging multi-operator, around the clock operating
> Promote prompt QSL delivery

The categories of membership are:
> Lifetime Membership ~ $500USD
> Sustaining Membership ~ $250USD
> Supporting Membership ~ $100USD
> Contributing Membership ~ $99USD or less

We will recognize each contributor on this web page. The amounts above are suggestions only, any contribution will be appreciated. Contributions may be made in the form of checks to the postal address below or by

credit card through the PayPal service. Click the button below to use
the PayPal service.

How IREF evaluates expeditions

The purpose of the following grading scale is to help with the decision of
how much support is granted by IREF to an expedition. The areas of
interest are the rarity of the island, number of operators, operating
strategy, number of stations, QSL practices, the expense of reaching the island and the net
experience of the expedition team. This process is
only be a tool in helping the board of trustees make its funding
decision.

CategoryCriteria Points
Rarity of Island
 New IOTA 20
 Top 5% 18
 Top 10% 16
 Top 20 14
 top 30 10
 Top 50 5
 * Percentages deal with the need within the continent that the island is found
Number of Operators
 3+ 10
 2 7
 1 3
 *An operator consists of a licenced amateur radio operator
Operating Strategy
 24 hours per day 10
 18 Hours per day 7
 12 hours per day 5
 8 hours per day 3
 * The times represent operating hours during a day
Number of Days Operating
 4+ 10
 3 7
 2 5
 1 2
Number of bands used
 7-9 10
 5-6 9
 4 - must include 4 of the 5 primary bands: 3.5, 7, 14, 21, 28 8
 3 - Must include 3 of the 5 primary bands 6
 5 - Must include either 14 or 21 MHz 5
 1 - Must be either 14 or 21 MHz 2
Number of stations
 2+ 10
 1 5
QSL Practice
 Within 3 months 10
 Within 4 months 7

Within 5 months 5
Expedition Experience
2+ expeditions - based on difficulty & success 6-10
1 expedition - based on difficulty & success 1-5

Difficulty of reaching the island and the net experience of the operating team will be evaluated and used to help make decisions regarding the funding of the expedition. This process can be used as an incentive for additional funding after the expedition if certain goals are attained. For example, a limited funding commitment to a certain expedition because of lack of experience, etc., however if a significant number of QSO's, QSL timing, etc. are achieved additional funding could be forthcoming.

http://www.dxer.org/qsling.html

SUCCESSFUL QSLing - by HS0ZCW

Steps in sending a direct QSL to a DX station:
1. Obtain correct address via qrz.com or use the GO List for QSL manager addresses, or search the Web via Google or dxer.org.

2. Consult the DX station’s web site or web information for special instructions (such as "direct only," "no IRC," or whatever).

3. Send via Air Mail. If you know the DX station has postal theft problems, send via Registered Mail (or via FedEx if you are really desperate—one good FedEx is better than three lost Air Mails).

4. Write your own QSL card clearly in permanent black ink.

5. Use UTC/GMT times and dates only. Be sure to label which number is the date and which number is the month and year (for example, is 9/2/03-- Sept. 2, 2003 or is it Feb. 9, 2003 or maybe March 2, 1999 or Feb. 3, 2003?).

6. Clearly mark if your contact was a QSO or if you are a SWL.

7. Be sure your own call sign is printed clearly ON THE SAME SIDE OF YOUR CARD as the contact information (YOUR CALL SIGN ALONG WITH time, date, band, mode, etc.).

8. Use very clear type face for your printed call sign. No Old English type; no cute curlicues, etc. Put a slash in all zeros. Be sure your number one, your I and your lower case l (L) are clearly different (note problems with 1, I and l, can you tell the difference?). Oh and Zero and V and U are problems. Use upper case block letters only.

9. If you are THANKING receipt of a QSL, mark that clearly or you will get a second card and will waste time and money.

10. Always enclose a self-addressed return envelope (sae) that has:
a. Your complete address, printed CLEARLY, and include your
country - not everyone knows AK is in the USA !
b. Do not affix postage to this envelope* unless you are absolutely sure the DX guy can use it at his point of mailing. (I get USA postage affixed, but I want to mail it from Thailand… duh!)
c. Try to avoid folding your sae; use nesting envelops. If you just must fold the sae, never fold it exactly in half d. Use press-on/self-stick envelops and fold the flap open--that is, back over the address side so that the envelop is fully open. OR, if you use wet-to-seal glue envelops, which are stronger, be aware that these may self-seal in humid environments. ALWAYS fold wet-to-seal envelops open to avoid self-sealing.
e. Place the non-info side of your card against the sticky part of your sae or place the green stamp against the sticky part of your sae.
f. Do not put anything inside your sae.

g. Write your call sign on the sae where that writing will be covered when the sae is sealed by the DX operator—in the place where the glue will stick. This allows finding your envelop and your card when the two have been accidentally separated.
h. Because almost all mail today is air mail, use pre-printed air mail envelops or print "air mail" on your sae.
i. Envelops that are pre-printed with "return postage paid" are GREAT !

11. The outer envelop:
a. Do not seal your outer envelop so that a finger can not get into the flap to open it.
b. Use "security envelop" which has colored printing inside to retard seeing through the outer envelop.
c. You can not configure your envelop to stop postal theft so just use normal sealing methods and skip inserting extra paper hoping to stop postal people seeing through your envelop. Super sealing jobs invite attention of postal thieves.
d. Do not write any ham radio information, like call signs, on the outside of your envelops. Use non-smear permanent ink.
e. Use post office frank for postage. If you affix real stamps, you invite theft of the whole envelope and contents so that the thief can steal the stamps.

12. Also enclose:
a. USA currency ($1 is rarely enough these days, $2 is good, more if you feel generous) - See note below....**
b. Try to avoid IRCs because of problems cashing them in.
c. *Loose postage for the DX operator’s country, if you want to do an extra favor.
d. Do NOT fold the currency bills EXACTLY in half.
e. If you send no sae, no currency, nor stamps, expect a card back via the buro, if you get one at all.
f. **If you are sure that the DX operator’s country forbids its citizens from having USD, it is best to include postage for that country or, in last resort, use IRCs. Use only USA Dollars, not other country’s currencies.

13.Note that
a. Some operators like to get a separate card for each contact, and it is best to QSL in this way.
b. If you send cards for more than one call sign (generally, not a good practice), be sure to increase your donation for return postage due to increased effort and cost.
c. The best envelopes are made of Tyvek which is very water resistant, almost impossible to tear or puncture, but can be cut easily with a knife for opening. Write on Tyvek only with permanent markers to avoid wet smears. Tyvek does not take sticky labels well and needs extra long runs of good tape.

14. Look at the mail you have prepared and mentally try to use what you have created. That is, put yourself in the recipient’s place and test your methods.
**Do not expect a return card just because you sent money. Any money you send is a free gift. If you think otherwise, then you are purchasing a QSL card which is contrary to the ham spirit.
a. Do not send a second request until 6 months have passed since the first request. Mark your second request with "second request."
b. Do not email the DX operator to inquire about your QSL or your contact until a year has past.
c. Be sure you have envelops on file with your buro.

d. Look at http://www.ac6v.com/qsltips.htm, too.
e. Enjoy old fashioned paper… it is so personal and fun !
f. A note about postal theft: Thieves who steal mail on a regular basis seek envelopes that form a pattern: (a) many similar ones to the same address, (b) thickness more than 1 paper sheet, and (c) from rich countries. Thieves doing this regularly can not be stopped by inserted carbon paper, valuables hidden inside inner envelopes, or other "tricks" because they simply open ALL envelopes fitting the pattern, take the valuables, and destroy the rest (thus destroying the evidence of their theft). Some thieves steal only for rare or odd stamps. Ham radio QSL mail makes a very easily identifiable pattern that simply can not be defeated by the usual tricks, so skip the tricks. Instead, try Registered Mail or, if desperate, use FedEx, UPS, or DHL. Even if you disguise your mail to look like an advertisement or typewritten official mail, the determined regular thieves may well steal EVERYTHING to an address known to get QSLs.

WHAT SHOULD BE PRINTED ON A GOOD QSL CARD?
Front of Card:
The call sign in clear type face (see #8 above).
The DXCC entity as given in DXCC list, not just the name of a country***.
ITU zone number
CQ Magazine zone number
Grid locator
Notation if this is an island (and IOTA number if possible).
If USA, give county
Latitude and longitude of the station location.
Operator name and address*** or qrz.com notation.
On the front or rear of the card, this info needs to be added:
PSE or TNX QSL marked.
Use the standard info box with the info stated in this order, left to right or on two lines:
Confirming QSO with
Day
Month
Year
Time in UTC or GMT only
Frequency or Band (band is all DXCC wants, but lots of ops like to state the exact operating frequency in MHz—I like to put a freq that implies either SSB, CW, or RTTY; for example, I use 14.2 for 20meter SSB and 14.0 for 20meter CW contacts as a second indicator of the mode.
RS(T)
2-Way Mode.
If a computer printed label is used, try to format the label with these same words and order of the information.
Sign the card with your name or initials. For labels, make the strokes of your pen signature touch a part of your label or use a uniquely shaped rubber stamp stating "Verified by <your call sign>" that touches part of the label.
Repeat your call sign on both sides of a double sided card.
If you must use information formats that allow marking a choice of band and mode, circle the correct band and mode words rather than marking out what does not apply. Be clear!
If you have more than one call sign on your card, clearly mark which call sign applies to this specific contact.

***If your card is for a DXCC entity that is a different country from the mailing address, be sure to clearly state the DXCC entity for which this card applies.
The most appealing art on a QSL is, first, an operator photo; second, something personal and unique about the operator (family photo, pet, other hobby, etc.) and otherwise pictures of unique local items. A QTH locator map is a nice touch. I have seen rigs and antennas before—omit if not really unique. Pose your face turned toward the camera in front of your rig or stand by your antenna to get it all in one photo.

Thank you ......
Thank you .....
OM Irsan,

Ahhh, nggak lahh ga ada yg istimewa, peralatan kami semua adalah peralatan yg lama-lama. Yg membuat kami bisa eksis sampai sekarang adalah semua karena perjuangan dari anggota-anggota tim kami, heheheh...

Mohon dukungannya dan doa restu OM Irsan ya,

Thanks and regards
Seno

Hallo OM Eddy,

thank you thank you ...
ga ada singkatannya OM

Dragon = Naga
alasan kenapa mengambil nana Dragon DX Club, yaitu :

1. kebetulan tahun ini kan tahun naga
2. salah satu anggota club kami panggilannya pak Dragon

3. ada dua pasang anggota club kami melangsungkan pernikahannya di tahun naga.
YB2BBY dengan YB2VTO dan YB3MM dengan YB2TET

4. ada salah satu anggota kami dikaruniai seorang bayi kecil Little Dragon, "harmonic" dari YB2TJV

5. Bulan February di tahun naga ini ada 29 hari

maka dari itu kami seluruh anggota sepakat untuk memilih nama Dragon DX Club.

NB : Oktober nanti kalo Pak Eddy longgar waktu silakan melihat kegiatan kami dari dekat ya, sekaligus silahturahmi dan kemungkinan nanti ada rencana diisi dgn acara2 lainnya, saya sebagai orang yang belum tua tapi di-tua-tuakan oleh temen temen manut (nurut) aja lah....

Terima kasih
Salam 73

Seno YB2LSR

Topic: 3372 Message: 3372

Terima kasih banyak atas tips QSLingnya.

Saya kadang juga merasa waswas saat kirim QSL card ke DXpedition (manajer atau ybs sendiri) karena pasti akan banyak amplop surat yg diterimanya dan berpeluang dicuri.

Mengenai tip perangko yg ditempelkan, kalau saya justru berusaha memberikan lembar perangko yg lebih banyak, tapi sayangnya perangko sekarang sudah terbatas.
Kadang saya masih "sedikit kuciwa" bila terima amplop QSL yg perangkonya menggunakan mesin perangko, model potongan kertas tertulis biaya/porto yg bukan perangko.

Pada pengiriman QSL paling tidak untuk tujuan eropa dg perangko Rp 7500,- saya akan tempel 3 perangko berbeda gambar @ Rp 2500,- seri propinsi, seri binatang atau apapun yg ada.
Tapi sekarang koq jadi waswas juga kalo ternyata perangko jadi incaran tangan2 jahil juga.

Saat ini masih menunggu kedatangan balasan beberapa QSL yg belum jelas nasibnya.

http://www.dxer.org/qsling.html

SUCCESSFUL QSLing - by HS0ZCW

Steps in sending a direct QSL to a DX station:
1. Obtain correct address via qrz.com or use the GO List for QSL manager addresses, or search the Web via Google or dxer.org.

2. Consult the DX station’s web site or web information for special instructions (such as "direct only," "no IRC," or whatever).

3. Send via Air Mail. If you know the DX station has postal theft problems, send via Registered Mail (or via FedEx if you are really desperate—one good FedEx is better than three lost Air Mails).

4. Write your own QSL card clearly in permanent black ink.

5. Use UTC/GMT times and dates only. Be sure to label which number is the date and which number is the month and year (for example, is 9/2/03-- Sept. 2, 2003 or is it Feb. 9, 2003 or maybe March 2, 1999 or Feb. 3, 2003?).

6. Clearly mark if your contact was a QSO or if you are a SWL.

7. Be sure your own call sign is printed clearly ON THE SAME SIDE OF YOUR CARD as the contact information (YOUR CALL SIGN ALONG WITH time, date, band, mode, etc.).

8. Use very clear type face for your printed call sign. No Old English type; no cute curlicues, etc. Put a slash in all zeros. Be sure your number one, your I and your lower case l (L) are clearly different (note problems with 1, I and l, can you tell the difference?). Oh and Zero and V and U are problems. Use upper case block letters only.

9. If you are THANKING receipt of a QSL, mark that clearly or you will get a second card and will waste time and money.

10. Always enclose a self-addressed return envelope (sae) that has:
a. Your complete address, printed CLEARLY, and include your country - not everyone knows AK is in the USA !
b. Do not affix postage to this envelope* unless you are absolutely sure the DX guy can use it at his point of mailing. (I get USA postage affixed, but I want to mail it from Thailand… duh!)
c. Try to avoid folding your sae; use nesting envelops. If you just must fold the sae, never fold it exactly in half d. Use press-on/self-stick envelops and fold the flap open--that is, back over the address side so that the envelop is fully open. OR, if you use wet-to-seal glue envelops, which are stronger, be aware that these may self-seal in humid environments. ALWAYS fold wet-to-seal envelops open to avoid self-sealing.
e. Place the non-info side of your card against the sticky part of your sae or place the green stamp against the sticky part of your sae.
f. Do not put anything inside your sae.
g. Write your call sign on the sae where that writing will be covered when the sae is sealed by the DX operator—in the place where the glue will stick. This allows finding your envelop and your card when the two have been accidentally separated.
h. Because almost all mail today is air mail, use pre-printed air mail envelops or print "air mail" on your sae.
i. Envelops that are pre-printed with "return postage paid" are GREAT !

11. The outer envelop:
a. Do not seal your outer envelop so that a finger can not get into the flap to open it.
b. Use "security envelop" which has colored printing inside to retard seeing through the outer envelop.
c. You can not configure your envelop to stop postal theft so just use normal sealing methods and skip inserting extra paper hoping to stop postal people seeing through your envelop. Super sealing jobs invite attention of postal thieves.
d. Do not write any ham radio information, like call signs, on the outside of your envelops. Use non-smear permanent ink.
e. Use post office frank for postage. If you affix real stamps, you invite theft of the whole envelope and contents so that the thief can steal the stamps.

12. Also enclose:
a. USA currency ($1 is rarely enough these days, $2 is good, more if you feel generous) - See note below....**
b. Try to avoid IRCs because of problems cashing them in.
c. *Loose postage for the DX operator’s country, if you want to do an extra favor.
d. Do NOT fold the currency bills EXACTLY in half.
e. If you send no sae, no currency, nor stamps, expect a card back via the buro, if you get one at all.

f. **If you are sure that the DX operator’s country forbids its citizens from having USD, it is best to include postage for that country or, in last resort, use IRCs. Use only USA Dollars, not other country’s currencies.

13.Note that
a. Some operators like to get a separate card for each contact, and it is best to QSL in this way.
b. If you send cards for more than one call sign (generally, not a good practice), be sure to increase your donation for return postage due to increased effort and cost.
c. The best envelopes are made of Tyvek which is very water resistant, almost impossible to tear or puncture, but can be cut easily with a knife for opening. Write on Tyvek only with permanent markers to avoid wet smears. Tyvek does not take sticky labels well and needs extra long runs of good tape.

14. Look at the mail you have prepared and mentally try to use what you have created. That is, put yourself in the recipient’s place and test your methods.
**Do not expect a return card just because you sent money. Any money you send is a free gift. If you think otherwise, then you are purchasing a QSL card which is contrary to the ham spirit.
a. Do not send a second request until 6 months have passed since the first request. Mark your second request with "second request."
b. Do not email the DX operator to inquire about your QSL or your contact until a year has past.
c. Be sure you have envelops on file with your buro.
d. Look at http://www.ac6v.com/qsltips.htm, too.
e. Enjoy old fashioned paper… it is so personal and fun !
f. A note about postal theft: Thieves who steal mail on a regular basis seek envelopes that form a pattern: (a) many similar ones to the same address, (b) thickness more than 1 paper sheet, and (c) from rich countries. Thieves doing this regularly can not be stopped by inserted carbon paper, valuables hidden inside inner envelopes, or other "tricks" because they simply open ALL envelopes fitting the pattern, take the valuables, and destroy the rest (thus destroying the evidence of their theft). Some thieves steal only for rare or odd stamps. Ham radio QSL mail makes a very easily identifiable pattern that simply can not be defeated by the usual tricks, so skip the tricks. Instead, try Registered Mail or, if desperate, use FedEx, UPS, or DHL. Even if you disguise your mail to look like an advertisement or typewritten official mail, the determined regular thieves may well steal EVERYTHING to an address known to get QSLs.

WHAT SHOULD BE PRINTED ON A GOOD QSL CARD?
Front of Card:
The call sign in clear type face (see #8 above).
The DXCC entity as given in DXCC list, not just the name of a country***.
ITU zone number
CQ Magazine zone number
Grid locator
Notation if this is an island (and IOTA number if possible).
If USA, give county
Latitude and longitude of the station location.
Operator name and address*** or qrz.com notation.
On the front or rear of the card, this info needs to be added:
PSE or TNX QSL marked.

Use the standard info box with the info stated in this order, left to right or on two lines:
Confirming QSO with
Day
Month
Year
Time in UTC or GMT only
Frequency or Band (band is all DXCC wants, but lots of ops like to state the exact operating frequency in MHz—I like to put a freq that implies either SSB, CW, or RTTY; for example, I use 14.2 for 20meter SSB and 14.0 for 20meter CW contacts as a second indicator of the mode.
RS(T)
2-Way Mode.
If a computer printed label is used, try to format the label with these same words and order of the information.
Sign the card with your name or initials. For labels, make the strokes of your pen signature touch a part of your label or use a uniquely shaped rubber stamp stating "Verified by <your call sign>" that touches part of the label.
Repeat your call sign on both sides of a double sided card.
If you must use information formats that allow marking a choice of band and mode, circle the correct band and mode words rather than marking out what does not apply. Be clear!
If you have more than one call sign on your card, clearly mark which call sign applies to this specific contact.
***If your card is for a DXCC entity that is a different country from the mailing address, be sure to clearly state the DXCC entity for which this card applies.
The most appealing art on a QSL is, first, an operator photo; second, something personal and unique about the operator (family photo, pet, other hobby, etc.) and otherwise pictures of unique local items. A QTH locator map is a nice touch. I have seen rigs and antennas before—omit if not really unique. Pose your face turned toward the camera in front of your rig or stand by your antenna to get it all in one photo.

Strategies for Successful QSLing
John Eisenberg, K6YP
NCDXC Meeting, May 17, 2012

Thanks to John Miller K6MM
John very kindly allowed me to use many images of his DX QSLs from his web site
Please see www.k6mm.com for more cards and other interesting material

Agenda
. Why QSL?
. Options available
. The QSO
. Your QSL card
. How to get your card to the DX station?
. How to get his card to come back to you?
. Tricks of the trade

Why QSL?

It’s an all time new one You want the card!
You want to confirm a new band mode
The ham on the other end needs your QSL
It’s a memorable QSO. You’d like to QSL.

LOTW (Logbook of the World)
. Service provided by ARRL OK for DXCC!
. Secure and essentially free!
. You need to keep a computerized log
. The DX station must also use Logbook
. LOTW is a topic unto itself. See www.arrl.org
. You won’t get a card!

QSLing via the Bureau
The BURO system is also very low cost
The service is also administered by ARRL
Many entities have a BURO
Dick Letrich W6KM handles outgoing cards
NCDXC pays to ship your cards to ARRL and pays the ARRL service fees.
But BURO cards often take more than a year to return!

Outgoing Buro System
Read instructions on ARRL web site
Make sure BURO exists for each contact

Presort your cards as instructed
Give your card deck to Dick Letrich W6KM

Some Countries Have No Incoming BURO
225 Countries are served by BURO system
Exceptions are mostly islands Full list of exceptions on ARRL web site
Many EU countries, Russia, Japan, South Africa and Zambia only serve members of their own national radio society.

BURO Incoming QSLs are Easy Too
Read 6th area BURO instructions on ARRL site.
Sign up with 6th area incoming BURO
Send correct envelopes and $$$ to 6th area BURO
Every 3 to 6 months you get a surprise package
Buro notifies you when $$$ or supplies run low
QSLing via BURO trades speed for cost!

Requesting QSL's using OQRS
OQRS = Online QSL Request System
Used mostly by major DXpeditions
Easy, convenient and avoids postal problems
Usually offers fast response
Not inexpensive!
Easy way to donate to DX op

Direct QSLing
The traditional method of QSLing
You must get your QSL to the DX station
Unless he uses a manager this may be tougher than many people think

The all important QSO
Be certain you really made the contact!
– The DX op said W6 Alpha Tango Echo 59
– You said QSL 59 Thank you, Thank you
– You are W6 Alpha Tango Xray
There was no QSO unless you plead with the DX or his manager and get very lucky!

Log the QSO Correctly
. Its easy to forget you just changed bands
. The 8/7/8 problem. Use DD/MM/YY
. Always always use UTC for both time & date!
. Set clock to WWV. Helps DX find busted calls
. Don't bust the DX's call in your log!

Dealing With Old QSOs
Old QSOs can be difficult
Calls get used over again by different Ops
DXers or their managers move or even die
Logs and QSL cards are lost
Try to make your QSL request within one year of the QSO

Getting the DX’s Address
Google his call! He may have a web site
QRZ.com is a useful resource
Follow QSL instructions given by DX/QRZ
Check multiple sources for his address
– www.qrz.com
– www.qslinfo.de
– www.ik3qar.it/manager/
– www.n4gn.com/qsls.html
Does he have a manager?

Many DX Stations have Managers
Many managers are in the US (SASE, $0.45)
Some Dxers have Eu mangrs (SAE,GS, $1.05)
– (Two ounces is $1.85)
Some Don’t and have dishonest postal systems
– A92GR certified ($13)
– OD5NH (Follow instructions)
– Rusty tells the story that CR5AR (1959) send ur card back and asked for more $$$

Components of a QSL Package
. Your properly completed QSL card
. Either 2-3 Green Stamps (GS) or 1-2 IRC
. An optional donation to help cover DX station’s or mgr’s costs
. A self addressed (SA) return envelope
. The outer envelope

Your QSL Card
 An attractive card helps “It’s the bait!”
– Use clear, simple, easy to read fonts
– Your call and all QSO info on one side of QSL
– Your name/address/postal code/USA
– Your county and grid square Affiliations such as ARRL, NCDXC, NCDXF Place for DX station’s call
– QSO (DD/MM/YY), UTC, Band, Mode, RS(T)
– Check boxes for Pse QSL or Tnx QSL

Filling In the QSL
– Write clearly with a ‘no smudge’ pen or print a stick on Avery label
– Make sure your ink won’t run if wet
– Make NO corrections. Redo the card
– Check everything against your log
– Even if two stations have same manager, always use one QSL for each DX call sign
– Include a short personal note

QSL Sources Ask Your Friends!
US sources
– W4MPY ($83-$130/1K)
– Star Cards ($100-$180/1K)
Bulgarian sources
– LZ1JZ (Good rep)
– LZ3HI (Check)

Russian sources
– UA3AA (Check)
– UT5XO (Ukraine good)

Return Postage
SASE for US stations and Managers
Green stamps (GS) are US dollars
– Two to three GS are needed for Europe
– GS are usually the most welcome option IRCs may also be used
International Reply Coupons
– Get them at Post Offices ($2.10 valid 12/31/13)
– You can buy at a discount from QSL managers
– IRCs have a short validity period (<2 years)

Problems with IRCs
Welcome in many countries but not all
– Jamaica, Taiwan, Lebanon, Ivory Coast, Cambodia, Colombia, Egypt, El Salvador, Iran, Libya, Paraguay, PNG do not accept IRCs
Some countries do not give full value for IRCs
Two IRCs are required in:
– Armenia, Croatia, Italy, Japan, DutchAntilles, Georgia, South Africa, Switzerland, Tajikistan and Venezuela

Green Stamps are preferred but ….
. Cash if seen in envelope is often stolen
. GS are illegal or not recommended in some countries: Azerbaijan, Tajikistan, Uzbekistan, India
. Use two GS for most places, three for: Germany, Slovakia. Consider using $2.00 bills
. GS still are preferred and more valuable than the equivalent in IRCs in many places
Given the choice use Green Stamps!

Where to Put Your QSL & GS/IRC
Put both in the opaque SA return envelope
– Do not seal the envelope
– Do not fold it
– Use no tape in SA return envelope

The Self Addressed Return Envelope
Envelope should fit European sized card
– Minimum 6in x 4in Eu QSL is 9 x 14 cm
Use opaque security #9 envelope
– Envelope should have stout self adhesive seal

What Goes On the Return Envelope
Address the envelope to yourself
– Your Name and address (Include USA)
– Use a printed non smear Avery label
Also include your return address
– If the primary address is obscured, the QSL may still reach YOU!
If addressee is a US station or manager
– Don’t forget US first class postage ($0.45)

The Outer Envelope
Must fit return SA envelope
– Use opaque security #10 envelope
– Envelope should have a stout self adhesive seal
Only one DX call sign per envelope
Many call lookup programs can print labels AC Log, QRZ.com

What Goes on the Outer Envelope
The DX station's name and address
– Do NOT include his call sign
– Make no mention of amateur radio
– Don't forget his country (Address bottom line)
Your own return address (Include USA)
– Do NOT include your call sign
Call signs are a red flag that says to the post office employee "Open me I contain $$$"

Putting it All Together
Put return SAE with QSL & GS/IRC in outer envelope with its flap UP
– Fix in outer envelope with a tiny piece of tape
– Check with a 150 watt lamp for opaqueness!
– You are off to the Post Office

Total Cost of a Direct QSL
How do you want to confirm your QSOs
– Your QSL card $0.10
– The outer envelope $0.06
– The inner envelope $0.04
– International postage $1.05
– GS $2.00-$3.00
– Donation Optional
– Total cost less donation $3.25-$4.25
– 100 direct cards can be quite pricey. A BURO card costs one thin dime!

Don't pester the DX operator…...
It's OK to ask a DX station
– For advice on how to QSL him
– Never ask him if he has received your card!
– Unless 9 months to a year have gone by!
– Don't forget the DX op or manager has a job and a family too

Donations
Most QSL managers really appreciate a small donation with your QSL
– Covers envelopes and gasoline to post office
The DXop depends on your donations to cover the cost of his trip
Be as generous as you can be.

Patience, Patience, Patience
Don't expect direct QSLs for 4-6 months
– Managers must wait for cards and logs
Don't expect BURO cards for 1 or 2 years
Getting a manager mad at you is not a good thing!

Remember
The final courtesy of a QSO is the QSL!

Thanks and 73, John K6YP

http://www.ncdxc.org/presentations/2011/Intro%20to%20DXing.pdf

Introduction to DXing
By Craig Bradley, AE6RR
Pacificon 2011

Craig Bradley, AE6RR Craig Bradley, AE6RR
•Previously WV6SVW and WA6SVW
–1961 to 1967
•Relicensed in 2004 as AE6RR
–Started with 0 countries worked
–Current total 207 worked / 199 confirmed
•Past President of the NCDXC

Audience Audience
•How many are new hams (1 year or less)?
•How many are new to HF (new General)?
•How many have worked some DX?
•How many have 100 countries worked?
•How many have DXCC?

Elements of DXing Elements of DXing
•Why we DX and what is “DX”
•How to find the DX
•How to work them
•Logging
•DX Contests
•QSLing
•Awards
•Propagation
•Modes other than SSB
•Reference Material

Why we DX and what is “DX”? And other definitions
Why do we DX?
•There are several reason why Hams like to work DX
•The excitement or thrill of talking to someone in a distant land
•The challenge of making the contact
•Completion with other Hams
•Awards
What is DX?
•“DX” is a shorthand abbreviation for “Long Distance”
•Most US Hams consider DX as a station outside of the continental US, North America or a separate DXCC entity
•Some will say that DX is a country that is “harder to work”
–i.e. Japan and Canada are easy (at least for West Coast)

DXCC
•ARRL DX Century Club (DXCC)
–Amateur Radio’s premier award
–Basic award for working at least 100 entities
–DXCC Top of the Honor Roll (worked them all)
–More on this award later

What is an Entity?
•Many people talk about working “countries”
•Entities are “discrete geographical or political” areas
•The 48 contiguous US states are one entity
•Hawaii and Alaska are separate entities
•There are currently 341 separate entities
•The newest one is South Sudan
•Check the ARRL web site for a complete list

Types of DX
•Amateur Radio operators living in foreign countries
•Travelers visiting in foreign countries
–Vacationers and on work assignments
•Expeditions (DXpeditions)
–Groups of hams on organized trips to activate a “rare” country
–Usually on the air 24/7 with multiple stations

How to Find the DX
Listening
Packet Clusters
News letters
Repeater

Listening – Where’s the DX?
•DX Windows - SSB
–80m – 3790-3800 (Extra)
–40m – 7075-7100 (Requires split operation to US band)
–20m – 14190-14200 (Extra)
–15m – 21295 +/- (General)
–10m – 28495 +/- (Tech)

•20m is quite often the best DX band
–A lot of DX will be down in the Extra band but some will listen up
–You will find some EU, South Pacific and JA stations up in the General band
–20m can be tough with a small station – most DXers will have high power and a beam
•Check the highest (frequency) band that is open first
–The higher bands are quieter and larger
–Most experienced hams will move up as the bands open up
Tune around and listen, you might be surprised and be the first to find DX calling CQ
•Listen for spots on the NCDXC repeater (146.36)

•DXpeditions
–Announced well in advance
–Usually announce their preferred frequencies on their web site
–Usually transmit in the Extra band
–Will sometimes listen up in the General band

–Will almost always be spotted
•You can work a lot of DX in the General bands
•But you might want to consider working on that Extra…

Packet Clusters
•Packet Clusters are a mechanism to disseminate DX spots using digital packet protocols
•History
–Packet Clusters originated as 2m packet stations
–Most are now in the Internet
•What is a spot?
–A spot will contain the DX station's Call, Frequency, the spotter's call, the time and any comments that the spotter puts in such as the split frequency (QSX)
•Pros & Cons
–Once a station is spotted, a pileup usually starts
–Rule: if they have not been spotted, work'em first, then spot'em
•Were to get the spots
–DX Summit – HTML web page http://www.dxsummit.fi
–Telnet – W4UAT.no-ip.com, N7OD.pentux.net, many others
•Many logging programs have a Telnet window for a packet cluster
–DX stations that you need can be "flagged"
–You can click on a spot to tune your ratio, point your beam (if you have one) and start the QSO log entry
•Smart phone aps
–NKCCluster (for Android)

News Letters
•A good source of information
–Announced operations
–Who was heard where and when
–QSL info
–Status of major DXpeditions
•Some email newsletters
–ARRL DX News – free to ARRL members
•Signup on the ARRL web site
–The Daily DX -http://www.dailydx.com/
•Free 2 week trial – subscription $28/6mo, $49/year
•Great daily source of very current information
•Special announcements are sent out when news breaks
•QSL info, QSLs received etc.

How to Work Them
Get Them In the Log

The Exchange The Exchange
•Listen to a few QSOs first – find out what info the DX wants
•The basic exchange is call and signal report (usually 59)
–It is not necessary to give the DX's call
–Be sure that he/she has your call correct
–If you heard your call correctly
•"You are 59 QSL?"
–If he did not get your call correct, do not give a signal report until he gets it right

•“Alpha Echo Six Radio Radio QSL?”
•If the DX is having problems with a couple of letters in your call try some different phonetics
–If he has problems with my prefix, I will switch from Alpha Echo to America England Six
•Once the DX gets your call correct, do not give it again, just give him your report
•Some individual DX stations like to get your name in the log and maybe your state – only give it if asked or if he gives his info
•If there is a pileup, don’t go into a long exchange (QTH, equipment, weather) unless he starts it or has been having “mini ragchews”

The Simplex Pileup
•Simplex – the DX is listening on his or her transmit frequency – simplex pileups are tough
•If the DX does not control the pileup, it becomes a mess quickly – know when to move on
•Listen for a while before jumping in
–How are the stations that are getting through doing it?
–Is everyone “tail ending”?
–Is there a rhythm?
•Is the DX taking a list?
•YLs have an advantage as they have a higher pitched voice
–You can move up a couple of hundred Hz on USB to make your voice sound higher

The Split Pileup
•Split – the DX is listening on a different frequency
•Know how to operate your radio in split mode
–Be able to move your transmit frequency quickly
•Listen for the DX to announce were he is listening
–Up 5, up 5-10, 200 to 220, etc.
–The split frequency may be spotted (QSX) but verify, it may have moved
–If the DX announces a new frequency – try to get there first before the crowd, you need to be fast!
–If the pileup is spread out, try the upper edge on USB, lower on LSB
•Listen to the pileup
–A second receiver is handy for this (K3, FT-1000, etc.)
–Does your radio have a TF Set button?
–The A/B select button may also be used
–Try to find the station being worked and get on that frequency
–Is the DX tuning up or down between QSOs?
–If so go a little up or down from the last station
–When a QSX frequency is spotted try it quickly as the whole pileup may move there soon

Play the Propagation
•For most DX (especially DXpeditions) there will be an optimum time of the day for your area
•For DX to the West (Pacific & Asia) wait until the East coast loses propagation (late afternoon on the high bands)
•Wait for the DX to announce NA or West Coast only – a good operator will know when he has propagation to which areas

Chasing DX on a Repeater
•A great way to coordinate DX chasing is via a repeater

•Those of us in the NCDXC use club's repeater for spotting DX and sometimes for spotting his split frequency
•One station will listen in the pileup and announce the DX's listening frequency when he works a station
•This can be a lot of fun

Good Operating
•Listen to the DX station for instructions
•If you can't copy the DX and his instructions, don't call
•If the DX comes back with a partial call and it is not yours – stop calling
•Be sure that you are on the correct VFO and in the band before making a LID out of yourself!
•Don't be a DX cop, there are plenty of "well qualified" ones out there
–If someone is on the wrong VFO and he is not QRMing the DX, why do you want him to compete with you in the pileup?
–Let the DX operator deal with it

Logging
Keeping track of your QSOs Keeping track of your QSOs

Basic Logging
•After you have worked them, be sure to log the QSO correctly
–The time should be in UTC
–Be sure that you get the correct date in UTC
–You can log the frequency in MHz, KHz or band
–You should have fields to log QSLs sent and received
–The ARRL paper log works but computer logging will be well worthwhile

Computer Logging
•Let the computer do the work
–Time & Date can be automatically entered from your system clock
–The computer can read the frequency and mode directly from your radio
–QSL tracking can be much easier
•Reports of countries/states worked/needed can generated
•Lists of needed QSLs can be generated
–The program can automatically get the stations QSL information from QRZ.com
•QSL labels can be printed
•If you are just getting started in DXing
–Now is the time to start your computer log
–Don't wait until you have a big data entry chore
•There are many programs available
–Most are free
–I use XMLog http://www.xmlog.com/
•A computer logging program will also allow you to easily upload your log to the ARRL Log Book of The World (LoTW), Club Log and other sites

DX Contests
A Great Opportunity to Work Many DX Stations or Entities in One Weekend

DX Contesting
•Many DX locations are activated that may not be normally on the air
–Galapagos Is.

–Canary Is.
–Many Caribbean Is.
•There are big contest stations that are normally only used during contests
–They have big signals
–They want to work everyone for points
They are usually on the air a few days before the contest for testing
–Many use LoTW

DX Contests
•Major Fall Contests
–CQ WW DX Contest – SSB last weekend in October
•Major Spring Contests
–ARRL International DX Contest – SSB 1st weekend in March
–CQ WPX Contest – SSB last weekend in March
•There are many others including other modes
–CW
–RTTY – many RTTY stations submit to LoTW
•Subscribe to the ARRL Contester's Rate Sheet for up to date info and lists of contests coming up

QSLing
Get the Proof They Only Count if Confirmed

How to QSL
•Cards
–You can have cards printed by many printers the specialize in QSL cards – see ads in QST and CQ or online
–You can print your own cards with your computer
•QSLmaker (download from QRZ.com)
•Envelopes
–Send your cards in a envelope with return postage
•#10 Security is best to prevent postal theft in 3rd world countries
•Send International Reply Coupons (IRCs) for international
•Or send green stamps (US $)
–Send an SAE if you want a reply - #9 Self Seal is best (it won't glue it's self closed in the mail)
•Do not put the DX's call or your call on the envelope!
–Postal thieves in 3rd world countries have learned that an envelope with amateur radio call letters on it will probably contain money
•Initial the contact info and write a short note on the card
–I once got a card back with a note stating that he didn't want it because I did not initial it or write something on it
•QSL Corner on QRZ.com has some great QSLing tips
•Track your sent and received cards in your log
•Organize your QSL card collection
–A recipe file box works well
–They are hard to find on the wall when you are ready to get them checked for an award

QSL Information
•Lookup the station on QRZ.com
–Hopefully, you will find an address

•There are more links on the NCDXC web site
•You can always try a search on the stations call
–Check for QSL instructions
•Many DX stations have a QSL manager
•They may request special postage (green stamps, one or more IRCs, etc.)
•Some only QSL through the bureau (buro)

QSL Services
•ARRL Incoming QSL Bureau
–You should have envelopes (address labels) and postage on file
•Some DX stations may send you a card or return yours through the bureau
–See the ARRL web site for details
•ARRL Outgoing Bureau
–You can save postage
–The NCDXC has a free outgoing service for members

ARRL Logbook of The World
•Online confirmation of QSOs
–Can be used for DXCC credit
–Can be used for WAS credit
–You can apply for awards online
•Saves the cost of sending cards
–Stamp = $0.98, IRC = $2.10, + Envelopes & Cards
•I currently have 3,800 QSOs with 1,268 confirmed on LoTW
•Many contest stations submit logs after the contest so they won't get so many cards – especially RTTY contesters

Chasing the QSLs
•Track your QSL status
–Most logging programs will do this
–Critical QSOs
•QSLs not sent
•Outstanding QSLs
•What if you don't get cards back?
–If you have other QSOs with the same entity, send them cards
–If there is an email address on QRZ.com, send a polite email
–Try to work another station in that entity

Awards
Time for the Wallpaper

Worked All Continents
•WAC is the easiest award to get
–You don't need Antarctica
–NA – North America
•Your neighbor down the street qualifies
–SA – South America
•Easy; Brazil, Argentina most late afternoons on 20 – 10m
–OC – Oceania
•Hawaii is easy from here in the evenings on 20m
–AS – Asia

•Japan is usually easy – afternoons on the high bands
–EU – Europe
•Northern EU is usually the easiest look for openings in the mornings on the high bands, late night on the low bands
–AF – Africa
•Hardest one - try mid to late afternoons on the high bands
•Canary Is. during a contest is the best bet
•See the ARRL web site for rules – cards (6) must be sent to ARRL HQ for confirmation or be in your DXCC record

DX Awards
•ARRL DXCC
–100 Entities minimum
–Modes – SSB, CW, Digital (includes RTTY)
–Bands – 160M through 2M
–Endorsements – 150, 200, 250, 275, 300, etc., Honor Roll
•CQ DX Award (same as DXCC)
•CQ DX Field Award
–Based on major grid squares (fields)
–50 fields for basic award
–Maritime Mobiles count
•Many others

Propagation
•A basic knowledge of propagation can be useful
–When is the best time to listen for a particular DX?
–Which bands are best at what time?
•Some general rules
–The low bands (160, 80 and 40) are best at night or over dark paths
–The higher bands (20 and up) are best during the day or over sunlight paths
•Some good source of current conditions are
–Propagation - http://dx.qsl.net/propagation/index.html
–ARRL Propagation de K7RA – free email newsletter from ARRL
–Ham CAP - http://www.dxatlas.com/
•There is a lot of info on the web, much more than can be presented here

Other Modes
•Consider modes other than SSB
–Do you need a quiet mode of operation?
•No shouting into the microphone
•Don’t wake up the family
–There is a lot of DX on CW and other modes
•Digital computer sound card modes
•PSK31 is a very good low power (low SNR) mode
•RTTY is very popular, there are many RTTY contests and most DXpeditions now operate RTTY
•CW
–Many DX stations only operate CW
–Good low SNR mode – gets through in bad conditions
–During a CW contest there is a lot of good DX going to waste
–It can be done with a computer…

DXCC Lessons Learned
•Contests, Contests, Contests
•Keep up on the QSLs
–Don’t let it become a big chore
–If you don’t get an entity confirmed in a reasonable time, you can send another card or email
•QSL those bands and modes
–Especially for DXpeditions where you may have worked them on multiple bands and modes
–You may want them some day for 5-Band DXCC or other modes

Reference Material
•Books on DXing
–The Complete DX’er by Bob Locher, W9KNI (Idiom Press)
–AC6V’s DXing 101 by Rod Kinkins, AC6V (AC6V pub.)
–ON4UN’s Low-Band DXing by John Devoldere, ON4UN (ARRL pub.)

DX Clubs
•Northern California DX Club
–Major DX club
–Co-sponsor of the International DX Convention in Visalia
–Meets 3rd Thursdays of the month in San Jose
–Monthly news letter on the web site
–Repeater and reflector for DX chasing
–Free outgoing QSL bureau service
–You do not need to hold DXCC to join
–More info at http://ncdxc.org
–Please visit our booth in the exhibit hall

DX Forum
•There will be a DX Forum in this room following this presentation
•Panel Members
–Norm Wilson, N6JV
–Paul Ewing, N6PSE
–John Eisenberg, K6YP
–John Miller, K6MM

Questions?
•Be sure to stay around for the forum

Good Luck & Good DX

Do you remember Do you remember Gus Browning W4BPD?
Those were the days when I started my DXing

Since my P5 -QSO in December 8th, 2001 all Since my P5 -QSO in December 8th, 2001 all countries are worked and also confirmed. countries are worked and also confirmed.

Why W4BPD as an example?Why W4BPD as an example?

.He made one guy DX-peditionsHe made one guy DX-peditions
.Usually few days per DXCC entityUsually few days per DXCC entity
.Few thousands QSO’s per DXCC entityFew thousands QSO’s per DXCC entity
.Quite moderate antennas and radiosQuite moderate antennas and radios
.A gentleman
.He was the Danny Weil VP2VB of the 60’s with Colvins W6KG and W6QL

From moderate style to DX-pedition Industry?

Moderate styleModerate style
.1-5 participants
.1-2 active stations, natural breaks for natural breaks for sleeping etc
.Own financing, maybe some sponsors and donations

Industry style
.5-50 participants
.24 hrs activity with three or more stations
.A lot of sponsors, donations and still money begging other hams

One grasshopper can be beautiful but if One grasshopper can be beautiful but if you have billions of those they will you have billions of those they will destroy everything..destroy everything..

My question is:

Is industry style DX-pedition like a huge amount of grasshoppers – they do not leave anything behind?
After ten days operation - e.g. with ten stations - everybody has that country. The ‘value’ of the DXCC entity is gone
DXing is no more a fun of finding and working rare stations ?
Is this killing the DXCC -program?

I’m an idealist!I’m an idealist!

.I love operating - it’s a great fun
.While I travel I always try to find opportunities to operate
.I do not want to owe any QSO’s to those who have possibly given money to me – that’s why I’m not taking such money
.In the beginning of my working career I was a – today I use my old writer skills cover the costs of my DX-peditions
.My moderate DX-pedition station consists of IC-7000 xcvr, LDG AT-7000 tuner and FD-4 windom. . It’s a handbag station!
.I have nothing against amplifiers or beams but those are increasing costs and effort - sometimes you’ll find a local ham who will rent you his facilities (like Ed, VP9GE)rent you his facilities (like Ed, VP9GE)
.This is a hobby – not a profession
.I’m not going to DX-peditions for killing myself by operating too many hours a day
.I ‘hate’ those who are announcing on the DX-cluster: A bad DX-pedition, bad op’s etc
.I use a narrow window for listening – I do not have a right to steal e.g. 30 kHz for my pile up
.Too many DXers fly into a temper in the pile up’s – it is not fun

Small is beautiful approach

.To have fun and nice pile up’s (even with handbag station: 100 w and windom)
.To enjoy both traveling and operating
.To give nice contacts to other hams
.To be free of donators requirements
.To keep in mind: this is a hobby.
 FOR ME A HOBBY MEANS: enjoying!

Thank you!

Dear Teman-teman YBDXC

melihat perkembangan di mailing list ORARINews, dan melihat web blog YBDXC.net
mengusulkan apakah tidak sebaiknya ditambahkan halaman yang menginformasikan maksud dan tujuan dari YBDXC.
mengingat di dalam anggota ORARI, ada yang ORARI Organisasi, ada yang ORARI kegiatan amatir radionya, ada juga ORARI Orong-orong (mendapatkan ijin hanya untuk melindungi stationnya tetapi kegiatannya tidak mencerminkan keamatir radioan).

dengan adanya informasi ini dengan mudah orang tahu bahwa tujuan dari YBDXC ini apa. dan tidak salah persepsi seperti yang disampaikan YB4KB pada mailing list ORARINews.

mungkin orang ingin masuk dan merasa ekslusif menjadi anggota YBDXC, padahal tujuan utamanya adalah untuk tempat sharing pengalaman dan pengetahuan DXing untuk setiap anggota Amatir Radio (ORARI),

Kenapa timbul kesan ekslusif club ini, mungkin cara untuk menjadi Anggotanya cukup berat dan tidak mudah setiap orang dapat menjadi anggotta walaupun sudah dianggap senior dan puluhan tahun menjadi amatir radio, padahal maksudnya adalah anggota YBDXC diharapkan dapat sharing pengalaman dan pengetahuan tentang dxing adalah mereka yang pernah dan sudah melakukan dxing, yang mana ukurannya adalah yang disyaratkan YBDXC.

kemudian apa bedanya dengan Dragon DX Club, seperti yang disampaikan OM Seno diawali dengan Team contest YE2R,
jelas dari DDXC ini saya dapat banyak pengalaman bagaimana menyiapkan station untuk contest, peralatan-peralatan apa yang menunjang contest, management contest, dll. sehingga menurut saya orientasinya berbeda dengan YBDXC. kalau salah mohon koreksinya teman-teman.

dan betul seperti yang disampaikan OM Irsan di Mailing List ORARINews bahwa kemungkinan besar sosialisasi mengenai maksud dan tujuan YBDXC dan DDXC perlu sampaikan lebih baik lagi.

Demikian teman-teman usulan dan mohon sharing dari teman-teman tentang usulan ini.

Terimakasih.

Om Imam, bisa titip usulan utk Biro QSL orpus gak? Kalau bisa QSL yg datang utk anggota YBDXC dikirim ke YBDXC HQ, sbb kalau ke lokal masing2 mungkin takut tercecer, bukan brarti tdk percaya dgn lokalnya masing2 tapi kasus seperti saya yg tinggal di luar Jakarta sdh tdk bisa kelokal. Ini usulan yang bagus OM Zaini, karena memang kita tidak tahu apa yg terjadi dgn QSL cards tsb setelah meninggalkan Orpus/Orda. Sempat menjadi topik pembicaraan waktu saya di Jakarta awal bulan ini dgn rekan2 YBDXC dan dengan Pak Gjelani YB1GJS sendiri yg menangani Buro/Award di Orpus.

Hanya apakah Orpus tidak keberatan kan ini menambah kerjaan mereka, karena QSL yang masuk harus disortir bukan hanya per call area, lalu dipisahkan yg member YBDXC, nah mereka harus selalu punya daftar member yang up to date. Secara ideal yang terbaik adalah kalau yang menangani QSL buro di Orpus itu anggota YBDXC sendiri, lebih hebat lagi kalau seperti di USA ini, penanganan QSL buro di call area masing2 dijalankan oleh DX clubs, seperti W2 buro yang dikelola oleh Northern Jersey DX Association (NJDXA).

Selamat jalan Pak Imam dan semoga sukses pembicaraannya dgn Orpus.

Subject: Bls: [YBDXC_News] Maksud dan Tujuan YBDXC

OM Joko,
Saya tgl 28 agus malam di jakarta dan 29 agus kita mau kunjungan ke orpus dan berdiskusi ttg YBDXC, sorenya saya kembali ke Palembang

Utk usulan OM Joko apakah bisa kita bicarakan lebih dalam secara langsung supaya bisa direalisasikan dengan baik, jika tgl tsb bisa jumpa sangat bagus dan sekalian bersilahturahmi lebaran

Regards

Subject: [YBDXC_News] Maksud dan Tujuan YBDXC

Dear Teman-teman YBDXC

melihat perkembangan di mailing list ORARINews, dan melihat web blog YBDXC.net
mengusulkan apakah tidak sebaiknya ditambahkan halaman yang menginformasikan maksud dan tujuan dari YBDXC.
mengingat di dalam anggota ORARI, ada yang ORARI Organisasi, ada yang ORARI kegiatan amatir radionya, ada juga ORARI Orong-orong (mendapatkan ijin hanya untuk melindungi stationnya tetapi kegiatannya tidak mencerminkan keamatir radioan).

dengan adanya informasi ini dengan mudah orang tahu bahwa tujuan dari YBDXC ini apa. dan tidak salah persepsi seperti yang disampaikan YB4KB pada mailing list ORARINews.

mungkin orang ingin masuk dan merasa ekslusif menjadi anggota YBDXC, padahal tujuan utamanya adalah untuk tempat sharing pengalaman dan pengetahuan DXing untuk setiap anggota Amatir Radio (ORARI),

Kenapa timbul kesan ekslusif club ini, mungkin cara untuk menjadi Anggotanya cukup berat dan tidak mudah setiap orang dapat menjadi anggotta walaupun sudah dianggap senior dan puluhan tahun menjadi amatir radio, padahal maksudnya adalah anggota YBDXC diharapkan dapat sharing pengalaman dan pengetahuan tentang dxing adalah mereka yang pernah dan sudah melakukan dxing, yang mana ukurannya adalah yang disyaratkan YBDXC.

kemudian apa bedanya dengan Dragon DX Club, seperti yang disampaikan OM Seno diawali dengan Team contest YE2R,
jelas dari DDXC ini saya dapat banyak pengalaman bagaimana menyiapkan station untuk contest, peralatan-peralatan apa yang menunjang contest, management contest, dll. sehingga menurut saya orientasinya berbeda dengan YBDXC. kalau salah mohon koreksinya teman-teman.

dan betul seperti yang disampaikan OM Irsan di Mailing List ORARINews bahwa kemungkinan besar sosialisasi mengenai maksud dan tujuan YBDXC dan DDXC perlu sampaikan lebih baik lagi.

Demikian teman-teman usulan dan mohon sharing dari teman-teman tentang usulan ini.

Terimakasih.

Mohon bantuan rekan-rekan yang mengetahui atau juga sudah menjadi
member ARLHS (Amatir Radio Ligh House Society).
Saya telah membaca di List ARLHS Database, bahwa :

Lighthouse TANJUNG NUSANIWE (Buru); IDO-317; 3o 47’ 0” S, 128o 05” 0”E; PI46AF

Seharusnya ada di Pulau Ambon, di Kecamatan Nusaniwe, Desa Latuhalat, Kota Ambon.
Saya belum mengetahui data tersebut diatas "(Buru)" ada karena ada yang On Air dari
Pulau Buru dengan mengatasnamakan Lighthouse TANJUNG NUSANIWE atau dari
Societynya sendiri yang menulisnya??

Saya ingin merubahnya menjadi Lighthouse TANJUNG NUSANIWE (AMBON).
Tentunya ini memerlukan pembuktian yg diperlukan seperti :
- Saya mendaftarkannya ke ARLHS
- Saya menjadi member ARLHS (INACTIVE MEMBER)
- Atau mungkin ada cara lain yang rekan-rekan mengetahuinya?

Sebelumnya saya mengucapkan terima kasih atas saran dan petunjuk
yang diberikan, dan saya telah siap untuk menjadi INACTIVE MEMBER ARLHS.

Salam saya

Martin YB8VM

OM Martin

Untuk merubah data lighthouse yg dimaksud, tdk harus menjadi member dr ARLHS (Amateur Radio Lighthouse Society), cukup kirimkan data Koordinat nya, Foto2 dan data pendukung lainnya, misalnya Nomor Registrasi dr Kantot Navigasi setempat, dan dikirimkan ke Jim Weidner, K2JXW, nanti beliau akan mempertimbangkan dan memutuskannya.

Untuk inctive membership itu diperlukan kalau OM Martin mau mencantumkan Logo ARLHS di QSL Card kita, krn logo tsb ada hak patennya. Jika hanya merubah data atau meluruskan data dr suatu LH, tdk perlu bayar.

Kami di tahun 2010 pernah mengaktifkan satu mercu suar di pantai selatan Kebumen, dengan nama Klirong lIghthouse, ARLHS IDO-374. Waktu itu kami menggunakan callsign khusus YE2H, bisa di cek di QRZ.com datanya.

Demikian sharing info dr kami, good luck OM

Salam

Dani

Om Dani,
Terima kasih atas petunjuknya.
Saya akan coba lengkapi data-data seperti yg
Om Dani sampaikan, agar data nya lebih lengkap dan jelas.
Saya ingin menjadi inactive member
karena ada beberapa hal yg saya
inginkan, tetapi dgn syarat harus member.
Well Om Dani nanti dilihat dulu kelanjutanya setelah saya dapatkan
konfirmasi dari Jim K2JXW.

Tnx Om Dani, gl.

Martin YB8VM.

Mohon bantuan rekan-rekan yang mengetahui atau juga sudah menjadi
member ARLHS (Amatir Radio Ligh House Society).
Saya telah membaca di List ARLHS Database, bahwa :
Lighthouse TANJUNG NUSANIWE (Buru); IDO-317; 3o 47’ 0” S, 128o 05” 0”E; PI46AF
Seharusnya ada di Pulau Ambon, di Kecamatan Nusaniwe, Desa Latuhalat, Kota Ambon.
Saya belum mengetahui data tersebut diatas "(Buru)" ada karena ada yang On Air dari
Pulau Buru dengan mengatasnamakan Lighthouse TANJUNG NUSANIWE atau dari
Societynya sendiri yang menulisnya??

Saya ingin merubahnya menjadi Lighthouse TANJUNG NUSANIWE (AMBON).
Tentunya ini memerlukan pembuktian yg diperlukan seperti :
- Saya mendaftarkannya ke ARLHS
- Saya menjadi member ARLHS (INACTIVE MEMBER)
- Atau mungkin ada cara lain yang rekan-rekan mengetahuinya?

Sebelumnya saya mengucapkan terima kasih atas saran dan petunjuk
yang diberikan, dan saya telah siap untuk menjadi INACTIVE MEMBER ARLHS.

Salam saya

Martin YB8VM

OM Siregar,
Thanks, tapi frekwensi telepati kita sepertinya belum matched atau decoder saya bermasalah - karena belum berhasil "mendecode" apa2 yang telah disampaikan OM Siregar nih. HI

salam dari ibukota utk yg di kotaraja

http://www.jarl.or.jp/English/4_Library/A-4-3_Contests/2012AA_rule.htm

The 53rd ALL ASIAN DX CONTEST - 2012

01.CONTEST PERIOD
(1) CW: From 00:00 UTC the third Saturday of June to 24:00 UTC the next day
<48 hours> (June 16-17,2012)
(2) Phone: From 00:00 UTC the first Saturday of Sept. to 24:00 UTC the next day
<48 hours> (Sept. 1-2, 2012)
02. BANDS
Amateur bands 160m(CW only), 80m, 40m, 20m, 15m, 10m03. ENTRY CATEGORIES
■Asian stations （Japanese(JA) stations is included）

Item CATEGORY
Single Operator Single Band High Power SO160HP ~ SO10HP
Low Power SO160LP ~ SO10LP
All Band High Power SOABHP
Low Power SOABLP
Multi-Operator Single Transmitter (multi band only) M/S
Multi-Operator Multi Transmitter
(multi band only) M/M
■DX（Non-Asian stations）

Item CATEGORY
Single Operator Single Band SO160 ~ SO10
All Band SOAB
Multi-Operator Single Transmitter (multi band only) M/S
Multi-Operator Multi Transmitter
(multi band only) M/M

Note1: Single Operator stations means that one person performs all concerned operations during contest period. Use of Packet Cluster is permitted.
2: Low Power stations are limited 100W output or less. No limitation on High Power stations.
3: Junior stations' operator age must be 19 years old or younger, and Seniors operators must be 70 years old or older.(For JA stations only)
4: 10 minutes rule(CQ WW method) is applied to Multi-Operator Single Transmitter stations. The 10 minutes rule means that only one transmitter on one band is permitted during any 10 minutes period, defined as starting with the first logged QSO on a band. However, one-and only one other band may be used during any 10 minutes period if and only if the station worked is a new multiplier. This rule is applied to not only the running stations, but also to the stations searching for multipliers respectively.

◇ Power, Type of Emission and Frequencies:Within the limits of own station license.

04. CONTEST CALL
(1) CW ..... "CQ AA"
(2) Phone..... "CQ AA Contest"

05. EXCHANGE
(1) For OM stations: RS(T) report plus operators' age
For example (If operator is 25 years old): Phone.....5925, CW.....59925
(2) For YL stations: RS(T) report plus operators' age, but if the operator does
not want to send her age, RS(T) report plus "00" (zero zero) can be sent.
For example (the operator is 25 years old):
Phone.....5925(or 5900), CW.....59925(or 59900)
(3) For Multi-Operator stations: RS(T) report plus the averaged age of operators,
but if each operator wishes, the age of active operator can be sent.
For example (the operators are 25 and 35 years old):
Phone.....5930 for all operators
(or 5925 for 25 years old operator and 5935 for 35 years old operator),
CW.....59930 for all operators
(or 59925 for 25 years old operator and 59935 for 35 years old operator)
06. PROHIBITION ON THE CONTEST
(1) No cross band contacts is permitted.
(2) No change of operating site is permitted.
(3) For single Operator and Multi-Operator Single Transmitter entry:
Transmitting two signals or more at the same time, including cases of
different bands, is not permitted.
(Except transmitting two signals to get New Multiplier under the 10 minutes rules)
(4) For Multi-Operator's entry: Transmitting two signals or more at the same time
within the same band is not permitted.
(5) No operation from two sites or more for Multi-Operator's entry.
(6) No contact made through repeaters is permitted.07. POINTS AND MULTIPLIERS
(1) For Asian stations:
① Points.....Completed contact will be scored as follows. Contact among same
entities will neither count as a point nor a multiplier. Duplicate contact with
the same station on same band will not count as a point.

160m band.....3 points per Asian QSO. 9 points per Non-Asian QSO.
80m band .....2 points per Asian QSO. 6 points per Non-Asian QSO.
10m band .....2 points per Asian QSO. 6 points per Non-Asian QSO.
Other bands....1 point per Asian QSO. 3 points per Non-Asian QSO.

②Multipliers.....The total number of different entities
(according to the DXCC List) worked on each band.
(2) For non-Asian stations:
① Points.....Completed contact with Asian stations
(excluding U.S. auxiliary military radio stations in the Far East, Japan)
will be counted as follows:

160m band.....3 points
80m band .....2 points
10m band .....2 points
Other bands.....1 point

② Multipliers.....The total number of different Asian Prefixes
(according to the WPX Contest rules) worked on each band.

(3) JD1 stations.
●JD1 stations on Ogasawara (Bonin and Volcano) Islands belong to Asia.
●JD1 stations on Minami-tori Shima(Marcus) Islands belong to Oceania.

(4) Maritime Mobile Stations
For all maritime mobile stations at any location (no matter outside or inside Asia), completed contacts with only Asian stations can be counted. The total score will be published in the contest results. But, they will not be ranked. Contacts points with maritime mobile stations will be considered as same as contacts among Asian stations. But, it will not count as multiplier.

08. SCORING
(1) Multi-band
(The total of the contact points on each band) x
(The total of the multipliers on each band)
(2) Single-Band
(The total contact points on the band) x (The total multipliers on the band)

9. REPORTING
(1) Submit a summary sheet and logs of only one entry classification.
E-mail submission will be welcomed.
●E-mail submission
JARL Format or Cabrillo Format.

The E-log Reception list as following URL shows all received E-mail submission by contest. These data are automatically updated but it may take several minitues before the list is next updated.

- CW http://www.jarl.com/contest/eloglist/received-aacw.htm
- Phone http://www.jarl.com/contest/eloglist/received-aaph.htm

(2)The submission address is as follows
●E-mail submissions to:
①CW.....aacw@...
②Phone.....aaph@...

●The submission address of the mail to:
JARL, All Asian DX Contest, 170-8073, Japan
Indicate CW or Phone on the envelope.

◆Deadlines for submissions:
①CW.....July 31, 2012
②Phone.....October 31, 2012

◇ INSTRUCTIONS ON THE SUMMARY AND LOG SHEET
It is recommended to use JARL A.A. Contest Log and Summary sheet which are available from JARL HQ for two IRC and SAE. (Summary and Log are available as "PDF files" from the JARL Web site)a． Each Summary sheet must include your DXCC entity, callsign used, entry class, multipliers by band, points by band and total score. It should also include a signed declaration indicating that you have observed the rules and regulations of the contest. Multi-Operator stations must submit a list of all operators call-sign or name.b． Log sheet must contain band, date, time in UTC, call of

station worked, exchange sent, exchange received, multipliers and QSO points. Use a separate sheet for each band.(For Single Transmitter entry:in order of the time contacted). Multipliers should be clearly marked by entities or Asian prefixes, first time worked on each band.
10. AWARDS:
(1) For both CW and Phone, certificates will be awarded to those having the highest score in each category in proportion to the number of participants from each entity and also those from US CQ Zone 3, 4, and 5 in the United States.

① If the number of participants are 10 or less there will be an Award only to the highest scorer
② From 11 to 20 ..... Awards to the highest scorer and the runner-up
③ From 21 to 30 ..... Awards to the top three
④ 31 or more ..... Awards to the top five

(2) The highest scorer among JARL members of each category in each area of Japan,under the condition having a ranking within top half, will receive a certificate from JARL. However,this rule doesn't apply to those who received the highest scorer of the entity certificate.
(3) The highest scorer on each Continent of the Single Operator Multi Band category will receive a medal from JARL and a certificate from the Minister for Internal Affairs and Communications, Japan.
(4) The highest scorer of the Multi-Operator Single Transmitter and Multi Transmitter category on each Continent will receive a medal from JARL.
(5) Special plaques will be awarded to the stations in the categories mentioned in a separate page.

11.DISQUALIFICATIONS:
(1) False statements in the report.
(2) Violations of the contest rules.

12.ANNOUNCEMENT OF RESULTS:

Results will be published in the Spring, 2013 issue of JARL News and also will be appeared on JARL's web site (http://www.jarl.or.jp).
For those wishing to receive contest results by post, please enclose two IRC with your log.

The Contest Award will be issued to whom fulfill the certain requirements during the contest period.
The detailed information will be appeared in a separate page.

15.LIST OF ASIAN ENTITIES:

-- Spratly Is.
3W,XV Vietnam
4J,4K Azerbaijan
4L Georgia
4S Sri Lanka
4X,4Z Israel
5B,C4,P3 Cyprus
7O Yemen
8Q Maldives(*)

http://www.darc.de/referate/dx/contest/waedc/en/rules/

Worked All Europe DX Contest - Rules 2012
(2012-06-26)
The Deutscher Amateur Radio Club (DARC) invites radio amateurs world wide to participate in the annual WAE DX Contest.
1 Times
CW: August, second full weekend
Saturday, August 11, 2012, 0000 UTC until Sunday, August 12, 2012, 2359 UTC
SSB: September, second full weekend
Saturday, September 8, 2012, 0000 UTC until Sunday, September 9, 2012, 2359 UTC
RTTY: November, second full weekend
Saturday, November 10, 2012, 0000 UTC until Sunday, November 11, 2012, 2359 UTC
2 Bands
3.5 - 7 - 14 - 21 - 28 MHz.
According to IARU recommendations operation should be avoided outside contest-preferred segments. No operation to take place on:
CW : 3560-3800; 7040-7200; 14060-14350 kHz
SSB: 3650-3700; 7050-7060; 7100-7130; 14100-14125; 14300-14350 kHz.
3 Categories
* SINGLE-OP LOW
Max. output 100 watts - all bands. Only one signal permitted at any time.
* SINGLE-OP HIGH
Output higher than 100 watts - all bands. Only one signal permitted at any time.
* MULTI-OP
Band changes are allowed every 10 minutes; this includes all activities of a main station, including QSO & QTC traffic and CQing.
Only exception: Working of a multiplier. Other transmitters may be used in parallel to the main station to work multipliers on other bands.
* SWL
(see §12)
Notes:
* Transmitters, receivers and antennas used in the contest must be located within a 2 km diameter circle.
* The use of DX spotting nets is allowed in all categories.
4 Off Times
Single Operator stations may only operate 36 out of the 48-hour contest period.
The total of 12 hours off time may be taken in one part but not more than three parts. The off times must be shown on the summary sheet. If operation is interrupted for more than 12 hours the three longest off time periods must be a minimum of 12 hours.
5 Exchange
A contest QSO can only be conducted between a European and a non-European station (exception: RTTY, see §13). The exchange consists of RS/RST and a progressive serial number starting with 001. If the station worked does not send a serial number, log the contact

with number 000. Each station can be credited only once per band.
6 Multiplier
For non-European stations the multiplier is the number of countries defined in the WAE Country List (see below) worked per band.
For European stations every non-European DXCC entity counts as a multiplier.
Exception: In the following countries up to ten numerical call areas count as multipliers: W, VE, VK, ZL, ZS, JA, PY and RA8/RA9 and RAØ -- without respect to their geographical location.
Examples: W1, K1, KA1 and K3../1 count as W1;
VE1, VO1 und VY1 count as VE1;
JR4, 7M4 und 7K4 count as JA4;
ZL2 and ZL6 are two different multipliers.
Multiplier bonus: Country multiplier points are "weighted" by band. Multiply the number of countries worked on 3.5 MHz by four, on 7 MHz by three, and on 14/21/28 MHz by two. The total multiplier is the sum of the weighted multiplier points of all bands.
7 QTC Traffic
Additional points can be achieved by QTCs. A QTC is the report of a contest QSO back to a European station (exception: RTTY, see §13).
The following rules apply:
1. A QTC contains time, call sign and serial number of the reported QSO. Example: "1307 DA1AA 431" means that DA1AA was worked at 1307 UTC and sent serial number 431.
2. Each QSO may only be reported once as a QTC. The QTC may not be reported back to the original station.
3. Every QTC that was correctly transferred, counts one point for the sender and one point for the receiver.
4. Two stations may exchange up to 10 QTCs maximum. The two stations may establish contact several times to complete the quota.
5. QTCs are transferred by means of QTC series. A QTC series is a block of one (minimum) to ten (maximum) QTCs. QTC series are numbered using the following scheme: The first figure is the progressive serial number starting with one; the second figure denotes the number of QTCs in the series. Example: "QTC 3/7" means this is the third QTC series transmitted by this station and it contains seven QTCs.
6. For every QTC series that is transmitted or received, the QTC number, time and frequency band of the QTC transmission must be logged. If any of this data is missing from your log, no credit will be given for this QTC series.
8 Scoring
The final score is the result of total QSOs plus QTCs on all bands multiplied by the sum of all multipliers weighted by the band bonus factor (see §6).
9 Disqualification
Violation of the rules of the contest or unsportsmanlike conduct will be deemed sufficient cause for disqualification. The decisions of the contest-committee are final.
10 Submissions
URL: http://www.waedc.de
Messages to contest manager (no logs): waedc-info@...
Logs need to be sent in STF or Cabrillo-Format to the following e-mail address:WAEDC CW : waecw@...c.de WAEDC SSB : waessb@... WAEDC RTTY : waertty@...
Be sure to put the station call sign into the subject of each message.
By submitting an electronic log, the participant claims to fully accept the rules of the contest. A written declaration is not necessary.
Note: After publication of the results all logs will be put into the DARC Contest Logbook (DCL).

Hand-written logs:
After the contest use a proper logging program or LM from DL8WAA to enter your data.
See Link: http://contestsoftware.com/e/home.htm
If you do not have a computer, please ask a friend or family member to import the log.
11 DX & Contest Club Competition
The club score is calculated by adding the final results of all participating club members in all three WAE contests, excluding SWLs. To be counted, the name of the club has to be indicated in the log on a separate header line using the keyword "CLUB".
The club must not be an official national amateur radio club. For a club to be listed, a minimum of three logs must be submitted.
A trophy is sponsored for the top DX (non-EU) and the top EU clubs.
For DL stations participating in the German DARC/VFDB-Clubmeisterschaft put your DOK in the log on a separate header line using the keyword "SPECIFIC".
12 Special Rules for SWLs
SWLs record stations working in the WAEDC. Participation is only possible as a single operator all bands. Every call sign heard - European or non-European station - may be credited only once per band. Both call signs of a contest QSO have to be recorded.
Each station that is logged including the serial number that was sent by that station, counts one point. Every complete QTC which includes all QTC series information (up to a maximum of 10 per station) also counts one point.
Multipliers are counted according to the criteria indicated in §6, but both European and non-European multipliers are counted. A call sign can only be counted as a multiplier, if the serial number it sent was recorded. In the best case, for a completely recorded QSO, two points and two multipliers can be credited.
13 Special Rules for RTTY
In the RTTY portion of the WAEDC there are no continental limits; everybody can work everybody. Only QTC traffic must be performed between different continents.
Every station may send and receive QTCs. The sum of QTCs exchanged between two stations (sent plus received) must not exceed 10 (ten).
The European and non-European multipliers indicated in §6 count for all stations.
14 Log Deadline
Log deadline is always two weeks or, more specific, the third Monday after the end of the contest.
CW: August 27; SSB: September 24; RTTY: November 26, 2012.
15 Criteria for WAEDC Awards and Plaques
Continental winners will receive a plaque. Printable online certificates will be availabe for all stations on result publication.
Entries from countries split by numerical call areas for multiplier reasons (see §6) will be listed according to their reported location within their respective geographical call area.
Stations who activate a WAE country for the WAEDC from where no log was received over the last three years will be recognized as "WAEDC Hero" and receive a special prize.
For 2012 these 9 countries are:
1AØ, HV, JW, JW/b, JX, R1F, SV/A, YU8, ZB
Stations who have been in the Top-Ten/Top-Six list for at least five times can apply for a special plaque.
The WAEDC committee reserves the right to honor special contest activities with additional plaques.
WAE Country List
1AØ, 3A, 4O, 4U1I, 4U1V, 9A, 9H, C3, CT, CU, DL, E7, EA, EA6, EI, ER, ES, EU, F, G, GD,

GI, GJ, GM, GM/s, GU, GW, HA, HB, HBØ, HV, I, IS, IT, JW, JW/b, JX, LA, LX, LY, LZ, OE, OH, OHØ, OJØ, OK, OM, ON, OY, OZ, PA, R1F, RA, RA2, S5, SM, SP, SV, SV/A, SV5, SV9, T7, TA1, TF, TK, UR, YL, YO, YU, YU8, Z3, ZA, ZB.[R1M removed]

Kepada Rekan,

bersama ini kami lampirkan ringkasan data operator dan logsheet YB67RI

data operator, akan dicetak pada qsl card
mohon yang belum terdatar, harap memberitahukan
apabila terdaftar tetapi tidak ON AIR harap memberitahukan juga
apabila terdaftar dan ON AIR, tidak perlu konfirmasi ulang

data logsheet, akan diupload pada clublog OQRS dan LOTW
mohon yang belum kirim, harap kirim segera
apabila sudah kirim tetapi tidak terdaftar harap kirim ulang
apabila sudah terdaftar, tidak perlu konfirmasi ulang

MOHON DIKOREKSI apabila ada data yang salah

mohon maaf atas ketidak nyamanan ini
terima kasih atas partisipasinya

daftar lengkap pada lampiran
YB9WAN dan YC2CYU tidak ada alamat email, mohon bantuan untuk menyampaikan

SB DX ARL ARLD035
ARLD035 DX news

This week's bulletin was made possible with information provided by NC1L, QRZ DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

GHANA, 9G. Emil, ZS6EGB will soon be QRV as 9G5ZS. Activity is on the HF bands. QSL via operator's instructions.

ANGOLA, D2. Paulo, CT1FJZ is now QRV as D2FJZ from Benguela and Huambo for one year while on work assignment. He is active on 80 to 10 meters using SSB mainly on the weekends and during limited times weekdays. QSL to home call.

PHILIPPINES, DU. Alan, W7XA is QRV as DU1/W7XA from the Tagaytay Ridge until August 27. Activity is on 20, 17 and 15 meters using mostly CW with some SSB. QSL to home call.

NORTH COOK ISLANDS, E5. Andy, AB7FS is QRV as E51AND from Palmerston, IOTA OC-124, for the next three weeks. Activity is on 40 and 20 meters on the ANZA net. QSL to home call.

THAILAND, HS. Dennis, K7BV, is QRV as HS0ZKS until September 2. Activity is on the HF bands. QSL to home call.

JAPAN, JA. Special event station 8J4MANGA is QRV until November 10 during the 13th International Comic Artist Conference. In addition, special event station 8J4SINWA is QRV during the "Japan Myth Expo" in Shimane until November 11. QSL both stations via bureau.

EGYPT, SU. Members of the Egyptian Radio Amateurs Society are QRV from Abu Quear, Alexandria as special event station SU30ASR until September 2 to celebrate the 30th anniversary of Arab Scouts Radio Camp. Activity is on the HF bands using CW, SSB and various digital modes. QSL via SM5AQD.

CRETE, SV9. Luc, ON6DSL will be QRV as SV9/ON6DSL/p from August 27 to September 3 while on holiday. Activity will be on the HF bands using SSB. This includes some SOTA activity. QSL to home call.

GABON, TR. Alain, TR8CA is back here and is usually QRV on 15 meters using CW around 1600z. QSL via F6CBC.

EUROPEAN RUSSIA, UA. Special event station R1000M is QRV until September 30 in celebration of the 1000th anniversary of the Unity of the Mordovian People with Peoples of Russia State. QSL via RA4UVK.

MICRONESIA, V6. Yoshi, JJ8DEN is QRV as V63PR from Falalop Island, Ulithi Atoll, IOTA OC-078, until September 3. Activity is on 160 to 10 meters using CW, RTTY, PSK31 and JT65A. QSL direct to home call.

ROMANIA, YO. A group of operators are QRV as YP1S from Sacalinu Mare Island, IOTA EU-183, until August 29. QSL via YO9FNP.

THIS WEEKEND ON THE RADIO. QRP CW Fox Hunt, NCCC Sprint CW Ladder, Hawaii QSO Party, SCC RTTY Championship, YO DX HF Contest, Kansas QSO Party, QRP ARCI CW Welcome to QRP, Ohio QSO Party, CVA DX SSB Contest and the SARL HF CW Contest are all on tap for this weekend. Please see August QST, page 77 and the ARRL and WA7BNM Contest websites for details.

3402. ARLP034 Propagation, August 24, 2012

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-08-26 18:13:42 UTC
From: Yb land Dx club
Topic: 3402 Message: 3402

SB PROP @ ARL $ARLP034
ARLP034 Propagation de K7RA

ZCZC AP35
QST de W1AW
Propagation Forecast Bulletin 34 ARLP034
From Tad Cook, K7RA
Seattle, WA August 24, 2012
To all radio amateurs

SB PROP ARL ARLP034
ARLP034 Propagation de K7RA

Weak solar activity continues. Average daily sunspot numbers for the seven days of August 16-22 were down 23 points, or 30 percent, to 54.6. Average daily solar flux dropped a little over 16 percent, or 18.7 points, to 96. These figures offer a comparison between August 9-15 and the latest reporting period, August 16-22.

Solar flux is expected to rise above 100 soon, with predicted flux values from NOAA/USAF at 100 on August 24-25, 105 on August 26-27, 110 on August 28-29, 115 on August 30, and peaking at 130 on August 31 and September 1. The prediction shows September 2 with a flux value of 125, then 120 on September 3-5, 115 on September 6-8, 110 on September 9, 105 on September 10, then dipping below 100 on September 12-15. The next peak is expected in the three days following the Autumnal Equinox, with flux values at 135 on September 23-25.

Predicted planetary A index values are 5 on August 24-25, then 10 and 8 on August 26-27, then 5 again on August 28 through September 7, and 8 on September 8-9, then 5 on September 10-14, then 12 on September 15-16, 8 on September 17-18, and 5 again through the end of September.

OK1HH predicts the geomagnetic field will be quiet to unsettled on August 24-25, quiet to active on August 26, mostly quiet on August 27-28, active to disturbed on August 29, quiet on August 30-31, mostly quiet on September 1, quiet to unsettled September 2-4, quiet on September 5-7, mostly quiet on September 8-9, quiet to active September 10, quiet on September 11, quiet to unsettled September 12, quiet on September 13, and quiet to unsettled September 14-15.

Spaceweather.com reports "the Sun's x-ray output has nearly flatlined." Look at readings from 12 years ago, in the summer of 2000:
http://www.swpc.noaa.gov/ftpdir/indices/old_indices/2000_DSD.txt

Now compare those numbers with recent x-ray activity:
http://www.swpc.noaa.gov/ftpdir/indices/DSD.txt

The daily x-ray background flux is shown in the fourth column to the right of the daily sunspot number. Here is the x-ray flux shown in a graph for the past few days: http://www.swpc.noaa.gov/today.html

The letters and numbers in the x-ray flux column in the previous two pages correspond to the values on the right side of the graph on the last page. Looking back in March, May, July and September of 2000 you can see higher numbers indicated by the letter C, but nothing at that level recently. The background x-ray flux is a good indicator for the level of energy from the sun charging the ionosphere. The more the ionosphere is energized, the higher the MUF or Maximum Usable Frequency is in general, although the MUF varies considerably according to time of day, season, and the end-points of the path under consideration.

Larry Godek, W0OGH of Gilbert, Arizona wrote on August 23: "WOW! Is it ever all over the place today. To start with we had a short opening on 6 meters down TG9 (Guatemala) way. Then I went up to 20 meters to put in some time doing the WSPR thing. 2 watts to a 4 element Yagi up 30 feet is all I use on 20. In the time frame after my transmit cycle I had reports from LA9, VE6, YV4, VK2, KL1 plus other places around the USA. The beam was pointed to about 45 degrees (northeast). What good is a beam doing you if your signal is going every which way? Watching the WSPR map showed a lot of good long haul signals."

(The WSPRnet map Larry speaks of is at
http://wsprnet.org/drupal/wsprnet/map. Note you can select which band you want to observe in a drop-down below the map).

"When I worked the TG9 station on 6 meters, the beam (which is atop the tower with the 20 meter beam) was also pointed off to the northeast. That's where his signal was strongest."

"Working 40 meters today around 2 PM (Arizona time) the band got really noisy with QRN. Signals were still good though and then the QRN went away. Since then signal strength has swung all over the place. Not slow drawn out QSB but fairly quick acting changes. This morning on 40 we had real short propagation to the southeast part of the state, no more than 150 miles. Then it swung around to where normal east-west signals became more prominent and the fellows southeast of here were out of the picture. Nothing really special about the K, A or SFI index at the time."

"I'd suggest folks take a look at that WSPRnet map when they go looking for DX. While it doesn't show every country on the air, you can at least get an idea of where propagation is good toward. Nice map features as well."

Thanks, Larry!

Jon Jones, N0JK had a comment in response to Randy W7TJ in last week's bulletin. Jon wrote, "My opinion is solar cycle 24 will probably be a two-peak cycle. First peak was fall of 2011. The second peak hopefully spring of 2013. Agree with Randy W7TJ -- enjoy the propagation this fall and spring of 2013. This may be as good as it gets on 10 meters and 6 meters for many, many years."

John Van Dalen, N7AME of Everett, Washington wrote: "I have to agree with Randy Crews, W7TJ of Spokane. The DX activity for the Seattle area has been dismal. I only have small windows to operate right now and they are 0200-0400z each evening and most weekends. I look at the spotting sites on the internet and Europe and Russia are having a great time as is most of the east coast. Oh for a solar cycle like 22 or 23."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@....

For more information concerning radio propagation, see the ARRL Technical Information Service at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. Find more good information and tutorials on propagation at http://myplace.frontier.com/~k9la/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for August 16 through 22 were 34, 42, 56, 69, 52, 64, and 65, with a mean of 54.6. 10.7 cm flux was 98.3, 95.1, 97, 96.2, 96.2, 94.2, and 94.8, with a mean of 96. Estimated planetary A indices were 11, 10, 11, 12, 12, 7, and 6, with a mean of 9.9. Estimated mid-latitude A indices were 10, 11, 11, 10, 11, 7, and 6 with a mean of 9.4.

Dear All,
dalam jadwal Operating saya sempat tidak dapat On Air, sebab pada saat tersebut saya sakit gigi mendadak, sehingga hanya sempat On perangkat tetapi tidak melanjutkan Panggilan,
semua Log Sheet hasil Operating telah saya kirimkan.
Terima kasih

Agus Gunarso - YB1LZ

Kepada Rekan,

bersama ini kami lampirkan ringkasan data operator dan logsheet YB67RI

data operator, akan dicetak pada qsl card
mohon yang belum terdatar, harap memberitahukan
apabila terdaftar tetapi tidak ON AIR harap memberitahukan juga
apabila terdaftar dan ON AIR, tidak perlu konfirmasi ulang

data logsheet, akan diupload pada clublog OQRS dan LOTW
mohon yang belum kirim, harap kirim segera
apabila sudah kirim tetapi tidak terdaftar harap kirim ulang
apabila sudah terdaftar, tidak perlu konfirmasi ulang

MOHON DIKOREKSI apabila ada data yang salah

mohon maaf atas ketidak nyamanan ini
terima kasih atas partisipasinya

OM Seno-YB2SLR,
saat ini saya tiba di Semarang ikut Sertifikasi Cisco (Senin - Kamis), Kamis sore ke Jogja, Sabtu pagi ke Solo (nengok Ibu sebelum balik Bandung) Minggu siang balik Bandung,
Panjenengan di Solo mana?
Sakit gigi emang report banget, sakitnya merembet ke semua badan tapi ga ada yg nengok bawain "makanan", kalau sakit hati bisa dilupakan dengan CQ..CQ..CQ.. Calling CQ and Standing By..... apa lagi dapet entity baru, lupa sakit hatinya.

Gun - YB1LZ/2(Semarang)

From: Onny Moektiono
Topic: 3315 Message: 3408

Selamat Pagi, salam sehat dan sejahtera selalu untuk kita semua.

Mohon maaf, saya selama 2 hari sesuai jadwal tugas yaitu tanggal 16 dan 17 Agustus 2012 pukul 14:00 - 17:00 UTC tidak dapat on air karena sakit (Demam dan Diare) dan akhirnya harus dirawat di RSPI Jakarta dan baru boleh pulang hari Minggu tanggal 19 Agustus 2012

Permohonan ijin ini sudah saya sampaikan kepada om Yana YB1AR by BBM pada hari Kamis tanggal 16 Agustus 2012 siang.

Selamat dan sukses untuk rekan2 YBDXC, semoga penugasan lainnya dapat ikut kembali berpartisipasi dalam kondisi sehat. Amin

Terimakasih..
Onny M

Subject: [YBDXC_News] YB67RI Operator dan Logsheet

Kepada Rekan,

bersama ini kami lampirkan ringkasan data operator dan logsheet YB67RI

data operator, akan dicetak pada qsl card
mohon yang belum terdatar, harap memberitahukan
apabila terdaftar tetapi tidak ON AIR harap memberitahukan juga
apabila terdaftar dan ON AIR, tidak perlu konfirmasi ulang

data logsheet, akan diupload pada clublog OQRS dan LOTW
mohon yang belum kirim, harap kirim segera
apabila sudah kirim tetapi tidak terdaftar harap kirim ulang
apabila sudah terdaftar, tidak perlu konfirmasi ulang

MOHON DIKOREKSI apabila ada data yang salah

mohon maaf atas ketidak nyamanan ini
terima kasih atas partisipasinya

daftar lengkap pada lampiran
YB9WAN dan YC2CYU tidak ada alamat email, mohon bantuan untuk menyampaikan

OM Seno-YB2SLR,
saat ini saya tiba di Semarang ikut Sertifikasi Cisco (Senin - Kamis), Kamis sore ke Jogja, Sabtu pagi ke Solo (nengok Ibu sebelum balik Bandung) Minggu siang balik Bandung,
Panjenengan di Solo mana?
Sakit gigi emang report banget, sakitnya merembet ke semua badan tapi ga ada yg nengok bawain "makanan", kalau sakit hati bisa dilupakan dengan CQ..CQ..CQ.. Calling CQ and Standing By..... apa lagi dapet entity baru, lupa sakit hatinya.

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, NG3K & ADXO, W3UR & The Daily DX, WK3N, N4AA & QRZ DX, N4JF, KH6BZF, K8GI, K8YSE, W8GEX & 60m News, W9ILY, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, F5NQL, F6AJA & Les Nouvelles DX, G3RWF, G3SXW, I1JQJ/IK1ADH & 425 DX News, JH0MGJ, OZ6OM & 50 MHz DX News, PA0ABM, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, VA3RJ & ICPO, the VHF-DX-Portal (MMMonVHF) and ZS6AYU for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 19th-August, through Sunday, 26th-August there were 221 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, D6, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ7, PY, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T5, T8, TA, TF, TG, TI, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP8, VP8/h, VP9, VQ9, VR, VU, VU7, XE, XU, YA, YB, YI, YK, YL, YN, YO, YS, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZD9, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3A, MONACO. Nobby, G0VJG, will be active as 3A/G0VJG between October 1-5th. Activity will be on the HF bands using 100 watts and SSB only. QSL via G0VJG.

5X, UGANDA (Update). Nick, G3RWF, informs OPDX that he is returning to Uganda on October 16th, and expects to be on the air probably the next day as 5X1NH. He mentions that he will return to the UK on December 12th, and states, "Same set-up as usual - mixture of bands and modes". This probably means 80-10 meters, and he prefers to operate CW, but will also be on the Digital modes with some SSB. There will be no 160m (no room for an antenna) and 6 meters is not licensed. Operations will be limited because Nick does voluntary work at the "Mountains of the Moon University" in Fort Portal, so activity will be during his off hours. He adds that he is carrying all of his gear there (rig is K3). Nick has put over 100k QSOs in the log from Uganda and is looking for more! If you hear Nick's callsign before the 16th of October it is a PIRATE!. ADDED NOTE FROM NICK: He will be active as 5B/G3RWF during the month of September while on holiday.

9G, GHANA. Emil, ZS6EGB, is back in Ghana as of July 20th, under a new assignment with the Mining Group operating in the Central Province. He states, "We are setting up a new Clinic and will only be operational after my vacation." Please look for 9G5ZS on most bands. His usual setup will be an Icom 706mkIIG and a HyGain Vertical plus Dipoles for the low bands. QSL via ZS6EGB (see QRZ.com).

AH0, MARIANA ISLANDS. Look for 19 year old university students Seiya "Sam"/JE1XUZ (KH0XH) and Yuzo/JQ2WTT (KH0XW) to be active as AH0BT from the Saipan BBQ Contest Club on Northern Mariana Islands, Saipan Island (OC-086) between August 29th and September 2nd. Activity will be focused on the All Asian DX SSB Contest (September 1-2nd) as a Multi-Single entry. QSL via 7L1FPU.

AH0, MARIANA ISLANDS. Kuroi, JH0MGJ/AL5A, will be active as AL5A/AH0 from Saipan Island (OC-086) between September 7-9th. He states that he will be looking "for many friends who will be in the Europe". QSL via LoTW. If you want a paper QSL (if it is necessary), his QSL Manager is JA7JEC.

C2, NAURU ISLAND. Yoosuke "Yuki", JH1NBN, will be active as C21BN (and possibly a special callsign) from Nauru between September 3-10th. Activity will be on 40-10 meters using simple antennas with 100 watts. QSL via his home callsign.

C6, BAHAMAS. Robert, AK4BM, will be active as C6AGT from Green Turtle Cay (NA-080) between December 2012 and January 2013 (Specific dates were not provided). He plans to have a beacon (most likely on 10 meters) active during the day and will be operating SSB, and possibly the Digitial modes (PSK31 and JT65) during the evenings on various bands between 40-10 meters, as conditions permit. He may also operate from other uninhabited islands around Green Turtle Cay using a low power transmitter (Yaesu 817nd) using wire antennas, and probably on the 20 meter band. All QSL cards will be returned with a photo QSL from the island upon his return. Please send them direct to his home callsign AK4BM (w/SASE/Green Stamps appreciated, but not required).

E5, NORTH COOK ISLANDS. After trying to head back to South Cook Islands, the sail boat developed some problems and the skipper decided to take

Andy/AB7FS (E51AND) and his XYL Kathy back to Palmerston Atoll (OC-124), North Cook Islands. The couple will now stay until the middle of September. Look for Andy to be active mainly on CW around 14048 kHz. He often checks into the ANZA Net on 14183 kHz after 0500z. QSL via AB7FS.

EA8, CANARY ISLANDS. Luis, EA8AY, from the Island of Tenerife (DIE S-012, WLOTA 1276), announced that he will be in the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (??) entry. This will be his first SSB contest. QSL via W2GR or LoTW. Visit his Web site at:
http://www.ea8ay.com/ef8x

EL, LIBERIA. Look for the VooDoo Contest Group to once again be active from here between November 21-27th. This is their 24th straight year. Operations will be from a location just South of Monrovia, the capital of Liberia. Their main goal is to be an entry in the CQWW DX CW Contest (November 24-25th) as a Multi-Multi category using the callsign EL2A. Outside of the contest the operators will use their own personal call-signs. Operators mentioned are Ned/AA7A (EL2NS), Roger/G3SXW (EL2A), Fred/G4BWP (EL2WP), John/G4IRN (EL2RN), Mike/KC7V (EL2MF), Lee/KY7M (EL2LF) and Bud/N7CW (EL2CW). QSL via their home callsign. Logs will be uploaded to LoTW.

DXPEDITION STORIES AVAILABLE ON THE WEB. The DXItalia Web page provides interesting DXpedition stories with pictures at: http://www.dxitalia.it
Presently, there are stories about:
* The CY9M 2012 Story: http://www.dxitalia.it/web/2012/08/the-cy9m-2012-story
* HK0NA MALPELO 2012: http://www.dxitalia.it/web/2012/05/hk0na-malpelo-2012
* 3D2R – From problems to success
(2011): http://www.dxitalia.it/web/2012/05/3d2r-from-problems-to-success

DXPEDITION VIDEOS OF THE WEEK. With more and more DXpeditions putting their videos on YouTube and other Web services, we decided to list them (possibly) each week. For this week's listings:
2011 - Buddies in the Caribbean 2011 Mini-DXpedition to Dominica:
http://www.youtube.com/watch?v=xWbeHhtYS0o (Part 1)
http://www.youtube.com/watch?v=ughibaIckGU (Part 2)
2010 - CQ7OA Berlenga Island (EU-040)
DXpedition: http://www.youtube.com/watch?v=_BFvuCCunE0
2009 - Buddies in the Caribbean (FS/PJ6 & PJ7) Suitcase DXpedition:
http://www.youtube.com/watch?v=Y7l8fdgGkHA

If you have a DXpedition 'video' available on the Web and would like to have it listed in the OPDX, PLEASE send the URL to use, and we will publish it.

HK, COLOMBIA. Members of the DX Colombia Amateur Radio Club (DXARC) and some Argentine operators will activate the "Jumanji Contest Station" as HK1NA during the CQWW DX SSB Contest (October 27-28th) as a Multi-Multi entry. Operators mentioned are Jorge/HK1R, Sal/HK1T, Pedro/HK1X, Sandra/HK3JJB, Mario/HK3O, Camilo/HK3TU, Faber/HK6F, Luis/HK6P, Daniel/LU3CT, Victor/LU3JVO, Toribio/LW1DTZ and Tim/LW9EOC. QSL via K6IPM. Visit the DXARC Web page at: http://dxarc.org

IOTA NEWS.....

EU-025. Members of the Arcibessi DX & Contest Group will be active as II9P from Sicily Island during the All Asian DX SSB Contest (September 1-2nd) and CQWW DX SSB Contest (October 27-28th) as a Multi-Op entry. QSL via IT9CHU or LoTW. Operators mentioned for the CQWW DX SSB Contest are Antonello/IT9EQO, Carmelo/IT9AUG, Fabio/IT9GSF, Marcello/IT9CJC, Gianni/IT9BUN, Gene/IT9NJE, Marc/IT9ACN, Frederic/ON4LG and Romeo/S52RU. Visit the II9P Web page at: http://ii9p.com

EU-045. Look for IB0E to be active from Isola di Ventotene (IIA LT-011, MIA MI-118, WFF IFF-110, WLOTA 1403) by the time you read this. Activity will last until August 31st. Activity will be on 80-10 meters using SSB and the Digital modes with two stations on the air. QSL via operator's instructions.

EU-165. Riccardo, IZ5JMX, will be active as IM0/IZ5JMX from San Pietro Island between September 2-14th. Activity will be on 40-10 meters using SSB only. QSL via the Bureau to his home callsign.

EU-171. Members of the Dutch Contest Group (Zeeuws-Vlaanderen [PI4DX]) will be active as OV2T from Jutland Island, Denmark, between August 29th and September 4th. Activity will be holiday style using SSB and CW, and perhaps some RTTY. During the weekend of September 1st, they will join the local OZ5GX group from Saeby, Denmark, during IARU region One Field Day as OZ5GX/P. QSL Manager for OV2T is PA0ABM, direct or by the Bureau. QSL via OZ5GX via info on QRZ.com.

EU-172. Operators Harry/PA1H and Nico/PA7PA will be active once again as OZ/homecall from Langø Island (FY-025) between October 4-12th. Langø Island belongs to Langeland Island, but it'?s off Langeland. Actually it's a very small island with only one house. The operators were active from here in 2009 and 2010. Activity will be on 80-10 meters, especially 30 meters and using more Digital modes. When possible 160 meters too. There will be special attention this time for stations outside Europe. QSL via their home callsigns, direct or by the Bureau.

EU-174. Members of the "White Tower DX Team" will be active as J48SV from Samothraki Island (MIA MG-100, WLOTA 4166, GIOTA NAS-032) between August 24-27th. QSL via SV2FPU.

OC-170. Operators Reinhard/DF4TD, Steve/VK2SJK, Nigel/VK6NI and Wally/VK6YS will be active as VK6DWI from Woody Island between November 9-13th. They will run fairly simple stations with a pair of Icom IC7000s, verticals and a Spiderbeam. The team plans to have two stations on air whenever they have propagation. More details are forthcoming, and updates can be found at: http://www.westozdx.net/IOTAS/OC170/OC170.html

J2, DJIBOUTI. Christian, F5MBF, has been in Djibouti since July and has been awaiting a callsign. He finally received the callsign J28NC. He is

expected to stay in Djibouti for at least two years. Activity will be mainly CW with some SSB using a 80-10m vertical. He is expecting a beam to be shipped to him. QSL route has not been provided.

KH6BZF PROPAGATION FORECAST/REPORT (August 27th-September 2nd)....

Aug/27th	AN	Aug/30th	AN	Sep/01st	AN

NH8, SWAINS ISLANDS. Another press release was posted on the Swains Island Web page <http://nh8s.org/pages/news.html> with pictures on August 25th, this time from Alex Jennings. In short, David Jennings and his advance crew departed Pago harbor on the "MV Sili" for Swains Island on August 24th. They took with them all the materials and supplies to set up two operating stations, as well as sleeping quarters, a kitchen and restroom facilities. They were also able to take all of the radio equipment that was shipped in from California from the operators. Read the complete press release at the above Web link. Remember, we should hear NH8S possibly September 5th.

QSLS RECEIVED VIA THE BUREAU: 8J1RL, A35AY, A71DLH, AM1KR, BO0M, BU2AW, BV0EXPO, BV3FG, BW0S, BW1/VR2RR, BW2000, DR1A, DX2DP, EN20UARL, EO20IGN, EO20UU, FJ/OS1T, GB5RST, GR0RPM, H55MX, HD2M, IE9Z, JX/G3SXW, LY25QT, OH0I, OX3XR, PG540BUFFALO, PP0T, V5/DL2SL, V63X and XW0ZJZ

SILENT KEY. Eric, SM1TDE, informs OPDX that Lars Rooth, SM1BOE (he was an operator at HV3SJ), became a Silent Key (SK) on July 21st, at the age of 90 years old. He served in the British Army during WW2, acted as teacher for Pope Johannes Paulus and worked for the Swedish language program of Vatican Radio among other things. For more info on Lars Rooth, SM1BOE, see:
http://www.news.va/en/news/jesuit-father-lars-rooth-passes-away
http://archive.catholicherald.co.uk/article/3rd-may-1994/6/rare-sort-of-priest-in-sweden

OTHER SILENT KEYS MENTIONED:
George Varvitsiotes, K6SV (ex-WB6DSV), Ham Radio Outlet (HRO) Vice President, became a Silent Key on August 21st.

Joel P. Kleinman, N1BKE, of Meriden, Connecticut, and QST Managing Editor, became a Silent Key on August 18th.

Victor (Vic) Poor, W5SMM, of Melbourne, Florida, a recipient the "ARRL President's Award" became a Silent Key on August 17th.

OPDX and its readers would like to send out our deepest sympathy to the family and friends of the above mentioned.

PJ2, CURACAO ISLAND. The German team of Anja/DH2AK and Wilf/DL1HTM will be active as PJ2/homecall from Curacao Island between August 26th and September 1st. They plan to operate from the PJ2A club station, mainly on 20 and 15 meters SSB. QSL via their home callsigns.

SPECIAL OPDX BULLETIN. If you missed OPDX.1075.1, containing press releases/updates on the upcoming NH8S Swains Island and ZL9HR Campbell Island DXpedition, go to the OPDX's Home page at:

http://www.papays.com/opdx1075.1.html

SV9, CRETE. Operators Alberto/EA1SA and YL Silvia/EA1AP will be active as SV9/homecall from Crete (EU-015) between September 9-15th. Activity will be on 80-6 meters using CW, SSB and RTTY. They will use a vertical dipole arrays and other wire antennas. QSL via their home callsigns.

SW9, CRETE. Uli, DJ9XB, will be active as SW9XB from Crete Island during the month of September. He will be active in the CQWW DX RTTY Contest (September 29-30th) as a Single-Op entry. QSL via his home callsign or LoTW.

TI, COSTA RICA. Alan, K0AV, will once again be active as TI5A during the CQWW DX CW Contest (November 24-25th) as a Single-Op/All-Band entry. QSL via TI5KD or LoTW.

V6, MICRONESIA. As this was been written, Yoshi, JJ8DEN, is expected to once again be active as V63PR from Micronesia, but this time from Falalop Island, Ulithi Atoll, Yap State (OC-078), until September 3rd. It was mentioned on QRZ.com: "This schedule might change or cancel without previous notice due to flight to/from Falalop Island." Activity will be on 160-10 meters using CW, RTTY, PSK31 and JT65A if possible. QSL via JJ8DEN, direct (w/SASE: Please send European type envelope with 2 USDs or 1IRC) or by the Bureau (Do NOT send QSL to V63 Bureau).

Z2, ZIMBABWE (Also 9J). Gerard (Gert), ZS6AYU, will be active as Z21GF from Victoria Falls between October 22-25th. Activity will be holiday style on 40-10 meters using CW only. He informs OPDX that he will use a Cushcraft R7000 vertical running 400 watts. QSL via ZS6AYU, direct or by the Bureau. ADDED NOTE: Gert also mentions that he intends to visit Zambia (Waiting for the license) between October 19th and October 22nd.

ZD9, GOUGH ISLAND (Bad and Good News). Its seems the DX community has been duped on the Paul, ZD9KN, operation from Gough Island (AF-030). ZD9KN is a PIRATE! Several sources report that Johan, ZS1A, has confirmed that the callsign ZD9KN has never been issued. So, do not waste time working this station if you hear him.

The good news is that Gerard ZS6KX/ZS7KX will be going to Gough Island sometime September for one year. He is hoping to be issued the callsign ZD9KX and is awaiting for the approval/license. QSL route TBA. Look for more details to be forthcoming.

http://cqnewsroom.blogspot.com/2012/07/erin-king-ak4jg-named-2012-young-ham-of.html

Erin King, AK4JG, Named 2012 Young Ham of the Year

Seventeen-year-old Erin King, AK4JG, of Columbus, Georgia, has been selected as the Amateur Radio Newsline Young Ham of the Year for 2012. She was recognized for promoting amateur radio through a video she made of launching the mailing tube in which her acceptance letter to the Massachusetts Institute of Technology (MIT) arrived as an amateur radio high-altitude balloon payload. The award was scheduled to be presented at the Huntsville (Alabama) Hamfest in August.CQ is a corporate co-sponsor of the Young Ham of the Year Award. For more on Erin, see September's "Zero Bias" editorial.

www.qrz.com/db/ak4jg

Daughter of K4ETY. MIT class of 2016!

Member of Columbus Amateur Radio Club (W4CVY) and Russell County Radio Club (WX4RUS). Founder and President of Columbus High School Radio Club (W4CHS).

I enjoy contests (Field Day, School Club Roundup) and using radio for high-altitude balloon missions. I am a part of the DREAMS high-altitude balloon program at Columbus High, and have participated in six flights so far. I also conducted my own balloon launch on January 16, 2012. The payload was my MIT tube - the container they sent my early-action acceptance letter in - containing two APRS trackers and a GoPro HD video camera. The mission was for MIT's "Hack the Tubes" project for the class of 2016's early admits.

OM Seno-YB2SLR,
saat ini saya tiba di Semarang ikut Sertifikasi Cisco (Senin - Kamis), Kamis sore ke Jogja, Sabtu pagi ke Solo (nengok Ibu sebelum balik Bandung) Minggu siang balik Bandung,
Panjenengan di Solo mana?
Sakit gigi emang report banget, sakitnya merembet ke semua badan tapi ga ada yg nengok bawain "makanan", kalau sakit hati bisa dilupakan dengan CQ..CQ..CQ.. Calling CQ and Standing By..... apa lagi dapet entity baru, lupa sakit hatinya.

OM Busan,
Format tanggal pada form untuk DDXCC ini gimana sih ddmmyy plus utc atau gimana ?
Karena dari form yg dibuat oleh JA1WWO, ketika saya masukkan data dg format dd/mm/yy utc di sheet "QSO Data" maka pada sheet 2 yg di linked munculnya satu jumlah angka (bukan tanggal).

Contohnya : pada QSO Data kolom "Date & Time" --> 26/05/2012 7:56:00
Pada Sheet 2 yg di linked itu pada kolom "Date & Time" tertulis :
41055,33056 Jadi waktu data QSO ini saya import ke application formnya ARRL - error.

Mohon penjelasannya dong..

Dear Teman-teman

Jika tertarik apply Diamond DXCC berikut rulesnya

DXCC Diamond Challenge Rules

1. The Diamond DXCC Challenge Awards are available to all amateurs worldwide who contact a minimum of 100 countries from the Diamond DXCC List. US Amateurs must be members of the ARRL. Generally, the rules for the Diamond DXCC Challenge are the same as the rules for the DXCC Program, except as listed here.
2. Contacts must be made from within the same DXCC entity by the same operator.
3. Contacts must be made during 2012 - from 0000Z on 1 January, 2012 through 2359Z on 31 December, 2012. All Amateur bands may be used except for 60 Meters.
4. There are no mode endorsements or band endorsements. The Diamond DXCC Challenge is considered

to be a Mixed-Mode/Mixed-Band award. There are no
  power categories or restrictions for the award.
  5. Confirmations are not required to obtain this award, but HQ will
  review submitted entries for accuracy and validity.
  6. The Diamond DXCC Challenge certificate will be available for working
  100 entities and will be endorseable with stickers at the following levels:
  125, 150, 175, 200, and 225. At the end of the Diamond DXCC Award year,
  sometime in February, 2013, we will send endorsement stickers in one
  mailing to everyone who qualified for them.
  7. The Diamond DXCC Award certificate fee is $13 including shipping
  within the USA, and $14 including shipping outside the USA. Participants
  must purchase a Diamond DXCC certificate with their first submission, but
  after that there will be no charge to update your record in the
standings
  table.

sekarang tersedia Aplication OnLine http://www.arrl.org/diamond-dxcc

setelah Log in

Welcome to ARRL's Diamond DXCC

  - Find out more about the DXCC Award Program <http://www.arrl.org/dxcc>.
  - Find out more about Diamond DXCC <http://www.arrl.org/diamond-dxcc>.

Submitting Your Diamond DXCC Application Online — Step by Step

  1. Now that you have logged in, you may go to the *Enter
QSOs*<https://p1k.arrl.org/diamond-dxcc/diamond-entry.php> tab
  and begin entering your QSO information. All your entries are saved when
  you
hit the *Save Button*. You may leave the *Enter
QSOs*<https://p1k.arrl.org/diamond-dxcc/diamond-entry.php> tab
  at any time while entering QSOs, and return to it later.
      1. You must enter all of the required data for each card to receive
      credit.
      2. You may enter your QSO data in any order. During the submission
      process Diamond DXCC will produce a*Diamond DXCC Record Sheet* for
      you.
  2. View import Scorecard
directions<https://p1k.arrl.org/diamond-dxcc/excel.php>
  .
  3. When you have finished entering data for the QSOs you want to submit,
  you may begin the application process by clicking on the *Submit

Application* <https://p1k.arrl.org/diamond-dxcc/diamond-award.php> tab
  and proceed sequentially through the *Application*, *Payment*, *Preview
  Application* steps.
  4. The *Preview Application* step of the *Submit
Application*<https://p1k.arrl.org/diamond-dxcc/diamond-award.php> tab
  provides a *Submit Application* button. Clicking this button completes

the application process and saves your application.
5. You do not have to send any paperwork to ARRl HQ when you
electronicaly submit a Diamond DXCC application.
6. Once you have submitted an application by clicking the *Submit
Application* button, you cannot make further changes or add QSOs to this
submission. You cannot
start a new application in the Diamond DXCC system
until your pending application has been processed by ARRL
HQ<http://www.arrl.org/support>.
You may continue to use the *Enter
QSOs*<https://p1k.arrl.org/diamond-dxcc/diamond-entry.php> tab
to enter new QSOs.

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-08-27 07:25:07 UTC
From: Djoko Marjono Susilo
Topic: 3397 Message: 3416

OM Hen, waktu pertama saya sempat coba dengan exel format dari arrl.
saya mengisi tanggalnya seperti berikut: 2012-03-25-013000
YYYY-MM-DD-hhmmss

tapi kemudian setelah melihat di web dan ada online application dan
setelah saya coba ternyata lebih mudah menggunakan online karena kita
tidak perlu lagi mengirimkan aplication kita ke awards manager ARRL.
keuntungannya dari segi waktu.

dari tanggal saya submit sampai persetujuan hanya butuh 4 hari saja,
jika ada yang kurang pass dalam penulisannya mereka akan email dan
koreksi.
Setelah aplikasi kita disetujui (minimal 100 entities) kemudian kita
tetap dapat melanjutkan perburuan entities untuk Diamond DXCC sampai
akhir program.
untuk dapat endorsement 125, 150, 175, 200, and 225. At the end of
the Diamond DXCC Award year, sometime in February, 2013

Demikian informasi yang dapat saya sampaikan.

tnx 73

djoko

From: hendro s.joedho
Topic: 3397 Message: 3417

OM Djoko,
Iya, saya gunakan online application ini dan saya mencoba import dari log yang saya ambil beberapa waktu yll dari webnya ARRL.
Formatnya ceritanya dibuat urut sesuai DXCC list oleh JA1WWO utk memudahkan kita mengisi logsheet itu baru selanjutnya log yang sudah urut sesuai callsign dipindah secara otomatis ke format yg alphabetic - country name tahun 1937.

Nah, format log ini yg saya import ke online application. Hasilnya error pada date/time - tetapi akhirnya saya lihat juga data masuk juga tapi data Date (dd-mm) adalah tgl. hari ini 27-08 = tgl. entry, bukan tgl.QSO.
Apakah selanjutnya kita edit saja, tapi koq gak lengkap termasuk bandnya gak ada.

73 es tnx
hen-yc0qr

Subject: Bls: [YBDXC_News] Fw: [orari-news] Diamond DXCC

OM Busan,
Format tanggal pada form untuk DDXCC ini gimana sih ddmmyy plus utc atau gimana ?
Karena dari form yg dibuat oleh JA1WWO, ketika saya masukkan data dg format dd/mm/yy utc di sheet "QSO Data" maka pada sheet 2 yg di linked munculnya satu jumlah angka (bukan tanggal).

Contohnya : pada QSO Data kolom "Date & Time" --> 26/05/2012 7:56:00
Pada Sheet 2 yg di linked itu pada kolom "Date & Time" tertulis :
41055,33056 Jadi waktu data QSO ini saya import ke application formnya ARRL - error.

Mohon penjelasannya dong..

73 es tnx

Dear Teman-teman

Jika tertarik apply Diamond DXCC berikut rulesnya

DXCC Diamond Challenge Rules

1. The Diamond DXCC Challenge Awards are available to all amateurs worldwide who contact a minimum of 100 countries from the Diamond DXCC List. US Amateurs must be members of the ARRL. Generally, the rules for the Diamond DXCC Challenge are the same as the rules for the DXCC Program, except as listed here.
2. Contacts must be made from within the same DXCC entity by the same operator.
3. Contacts must be made during 2012 - from 0000Z on 1 January, 2012 through 2359Z on 31 December, 2012. All Amateur bands may be used except for 60 Meters.
4. There are no mode endorsements or band endorsements. The Diamond DXCC Challenge is considered
to be a Mixed-Mode/Mixed-Band award. There are no power categories or restrictions for the award.
5. Confirmations are not required to obtain this award, but HQ will review submitted entries for accuracy and validity.
6. The Diamond DXCC Challenge certificate will be available for working 100 entities and will be endorseable with stickers at the following levels: 125, 150, 175, 200, and 225. At the end of the Diamond DXCC Award year, sometime in February, 2013, we will send endorsement stickers in one mailing to everyone who qualified for them.
7. The Diamond DXCC Award certificate fee is $13 including shipping within the USA, and $14 including shipping outside the USA. Participants must purchase a Diamond DXCC certificate with their first submission, but after that there will be no charge to update your record in the
standings
table.

sekarang tersedia Aplication OnLine http://www.arrl.org/diamond-dxcc

setelah Log in

Welcome to ARRL's Diamond DXCC

- Find out more about the DXCC Award Program <http://www.arrl.org/dxcc>.
- Find out more about Diamond DXCC <http://www.arrl.org/diamond-dxcc>.

Submitting Your Diamond DXCC Application Online — Step by Step

1. Now that you have logged in, you may go to the *Enter QSOs*<https://p1k.arrl.org/diamond-dxcc/diamond-entry.php> tab and begin entering your QSO information. All your entries are saved when you hit the *Save Button*. You may leave the *Enter QSOs*<https://p1k.arrl.org/diamond-dxcc/diamond-entry.php> tab at any time while entering QSOs, and return to it later.
    1. You must enter all of the required data for each card to receive credit.
    2. You may enter your QSO data in any order. During the submission process Diamond DXCC will produce a*Diamond DXCC Record Sheet* for you.
2. View import Scorecard directions<https://p1k.arrl.org/diamond-dxcc/excel.php>.
3. When you have finished entering data for the QSOs you want to submit, you may begin the application process by clicking on the *Submit Application* <https://p1k.arrl.org/diamond-dxcc/diamond-award.php> tab and proceed sequentially through the *Application*, *Payment*, *Preview Application* steps.
4. The *Preview Application* step of the *Submit Application*<https://p1k.arrl.org/diamond-dxcc/diamond-award.php> tab provides a *Submit Application* button. Clicking this button completes the application process and saves your application.
5. You do not have to send any paperwork to ARRl HQ when you electronicaly submit a Diamond DXCC application.
6. Once you have submitted an application by clicking the *Submit Application* button, you cannot make further changes or add QSOs to this submission. You cannot start a new application in the Diamond DXCC system until your pending application has been processed by ARRL HQ<http://www.arrl.org/support>.
You may continue to use the *Enter QSOs*<https://p1k.arrl.org/diamond-dxcc/diamond-entry.php> tab to enter new QSOs.

OM Busan,
Format tanggal pada form untuk DDXCC ini gimana sih ddmmyy plus utc atau gimana ?
Karena dari form yg dibuat oleh JA1WWO, ketika saya masukkan data dg format dd/mm/yy utc di sheet "QSO Data" maka pada sheet 2 yg di linked munculnya satu jumlah angka (bukan tanggal).

Contohnya : pada QSO Data kolom "Date & Time" --> 26/05/2012 7:56:00
Pada Sheet 2 yg di linked itu pada kolom "Date & Time" tertulis :
41055,33056 Jadi waktu data QSO ini saya import ke application formnya ARRL - error.

Mohon penjelasannya dong..

73 es tnx

Dear Teman-teman

Jika tertarik apply Diamond DXCC berikut rulesnya

DXCC Diamond Challenge Rules

1. The Diamond DXCC Challenge Awards are available to all amateurs worldwide who contact a minimum of 100 countries from the Diamond DXCC List. US Amateurs must be members of the ARRL. Generally, the rules for the Diamond DXCC Challenge are the same as the rules for the DXCC Program, except as listed here.
2. Contacts must be made from within the same DXCC entity by the same operator.
3. Contacts must be made during 2012 - from 0000Z on 1 January, 2012 through 2359Z on 31 December, 2012. All Amateur bands may be used except for 60 Meters.
4. There are no mode endorsements or band endorsements. The Diamond DXCC Challenge is considered
to be a Mixed-Mode/Mixed-Band award. There are no power categories or restrictions for the award.
5. Confirmations are not required to obtain this award, but HQ will review submitted entries for accuracy and validity.
6. The Diamond DXCC Challenge certificate will be available for working 100 entities and will be endorseable with stickers at the following levels: 125, 150, 175, 200, and 225. At the end of the Diamond DXCC Award year, sometime in February, 2013, we will send endorsement stickers in one mailing to everyone who qualified for them.
7. The Diamond DXCC Award certificate fee is $13 including shipping within the USA, and $14 including shipping outside the USA. Participants must purchase a Diamond DXCC certificate with their first submission, but after that there will be no charge to update your record in the
standings
table.

sekarang tersedia Aplication OnLine http://www.arrl.org/diamond-dxcc

setelah Log in

Welcome to ARRL's Diamond DXCC

- Find out more about the DXCC Award Program <http://www.arrl.org/dxcc>.
- Find out more about Diamond DXCC <http://www.arrl.org/diamond-dxcc>.

Submitting Your Diamond DXCC Application Online — Step by Step

1. Now that you have logged in, you may go to the *Enter QSOs*<https://p1k.arrl.org/diamond-dxcc/diamond-entry.php> tab and begin entering your QSO information. All your entries are saved when you hit the *Save Button*. You may leave the *Enter QSOs*<https://p1k.arrl.org/diamond-dxcc/diamond-entry.php> tab at any time while entering QSOs, and return to it later.
    1. You must enter all of the required data for each card to receive credit.
    2. You may enter your QSO data in any order. During the submission process Diamond DXCC will produce a*Diamond DXCC Record Sheet* for you.
2. View import Scorecard directions<https://p1k.arrl.org/diamond-dxcc/excel.php>.
3. When you have finished entering data for the QSOs you want to submit, you may begin the application process by clicking on the *Submit Application* <https://p1k.arrl.org/diamond-dxcc/diamond-award.php> tab and proceed sequentially through the *Application*, *Payment*, *Preview Application* steps.
4. The *Preview Application* step of the *Submit Application*<https://p1k.arrl.org/diamond-dxcc/diamond-award.php> tab provides a *Submit Application* button. Clicking this button completes the application process and saves your application.
5. You do not have to send any paperwork to ARRl HQ when you electronicaly submit a Diamond DXCC application.
6. Once you have submitted an application by clicking the *Submit Application* button, you cannot make further changes or add QSOs to this submission. You cannot start a new application in the Diamond DXCC system until your pending application has been processed by ARRL HQ<http://www.arrl.org/support>.
You may continue to use the *Enter QSOs*<https://p1k.arrl.org/diamond-dxcc/diamond-entry.php> tab to enter new QSOs.

OM Hen, untuk tanggal diedit saja, sesuaikan tgl qso.
Sesuai dengan rules no 4. Tidak ada kategori, mode atau band.

4. There are no mode endorsements or band endorsements. The Diamond DXCC
  Challenge is considered to be a Mixed-Mode/Mixed-Band award. There are no
  power categories or restrictions for the award.

tnx 73.

OM Djoko,
Iya, saya gunakan online application ini dan saya mencoba import dari log yang saya ambil beberapa waktu yll dari webnya ARRL.
Formatnya ceritanya dibuat urut sesuai DXCC list oleh JA1WWO utk memudahkan kita mengisi logsheet itu baru selanjutnya log yang sudah urut sesuai callsign dipindah secara otomatis ke format yg alphabetic - country name tahun 1937.

Nah, format log ini yg saya import ke online application. Hasilnya error pada date/time - tetapi akhirnya saya lihat juga data masuk juga tapi data Date (dd-mm) adalah tgl. hari ini 27-08 = tgl. entry, bukan tgl.QSO.
Apakah selanjutnya kita edit saja, tapi koq gak lengkap termasuk bandnya gak ada.

73 es tnx
hen-yc0qr

Dear Teman-teman

Jika tertarik apply Diamond DXCC berikut rulesnya

DXCC Diamond Challenge Rules

1. The Diamond DXCC Challenge Awards are available to all amateurs worldwide who contact a minimum of 100 countries from the Diamond DXCC List. US Amateurs must be members of the ARRL. Generally, the rules for the Diamond DXCC Challenge are the same as the rules for the DXCC Program, except as listed here.
2. Contacts must be made from within the same DXCC entity by the same operator.
3. Contacts must be made during 2012 - from 0000Z on 1 January, 2012 through 2359Z on 31 December, 2012. All Amateur bands may be used except for 60 Meters.
4. There are no mode endorsements or band endorsements. The Diamond DXCC Challenge is considered
to be a Mixed-Mode/Mixed-Band award. There are no power categories or restrictions for the award.
5. Confirmations are not required to obtain this award, but HQ will review submitted entries for accuracy and validity.
6. The Diamond DXCC Challenge certificate will be available for working 100 entities and will be endorseable with stickers at the following levels:

125, 150, 175, 200, and 225. At the end of the Diamond DXCC Award year, sometime in February, 2013, we will send endorsement stickers in one mailing to everyone who qualified for them.
7. The Diamond DXCC Award certificate fee is $13 including shipping within the USA, and $14 including shipping outside the USA. Participants must purchase a Diamond DXCC certificate with their first submission, but after that there will be no charge to update your record in the standings
table.

Welcome to ARRL's Diamond DXCC

- Find out more about the DXCC Award Program <http://www.arrl.org/dxcc>.
- Find out more about Diamond DXCC <http://www.arrl.org/diamond-dxcc>.

Submitting Your Diamond DXCC Application Online — Step by Step

1. Now that you have logged in, you may go to the *Enter QSOs*<https://p1k.arrl.org/diamond-dxcc/diamond-entry.php> tab and begin entering your
QSO information. All your entries are saved when you
hit the *Save Button*. You may leave the *Enter QSOs*<https://p1k.arrl.org/diamond-dxcc/diamond-entry.php> tab at any time while entering QSOs, and return to it later.
    1. You must enter all of the required data for each card to receive credit.
    2. You may enter your QSO data in any order. During the submission process Diamond DXCC will produce a*Diamond DXCC Record Sheet* for you.
2. View import Scorecard directions<https://p1k.arrl.org/diamond-dxcc/excel.php>
.
3. When you have finished entering data for the QSOs you want to submit, you may begin the application process by clicking on the *Submit

Application* <https://p1k.arrl.org/diamond-dxcc/diamond-award.php> tab and proceed sequentially through the *Application*, *Payment*, *Preview Application* steps.
4. The *Preview Application* step of the *Submit Application*<https://p1k.arrl.org/diamond-dxcc/diamond-award.php> tab provides a *Submit Application* button. Clicking this button completes the application process and saves your application.
5. You do not have to send any paperwork to ARRl HQ when you electronicaly submit a Diamond DXCC application.
6. Once you have submitted an application by clicking the *Submit

Application* button, you cannot make further changes or add QSOs to this
submission. You cannot
start a new application in the Diamond DXCC system
until your pending application has been processed by ARRL HQ<http://www.arrl.org/support>.
You may continue to use the *Enter QSOs*<https://p1k.arrl.org/diamond-dxcc/diamond-entry.php> tab
to enter new QSOs.

DX Code Of Conduct

I will listen, and listen, and then listen again before calling.
I will only call if I can copy the DX station properly.
I will not trust the DX cluster and will be sure of the DX station's call sign before calling.
I will not interfere with the DX station nor anyone calling and will never tune up on the DX frequency or in the QSX slot.
I will wait for the DX station to end a contact before I call.
I will always send my full call sign.
I will call and then listen for a reasonable interval. I will not call continuously.
I will not transmit when the DX operator calls another call sign, not mine.
I will not transmit when the DX operator queries a call sign not like mine.
I will not transmit when the DX station requests geographic areas other than mine.
When the DX operator calls me, I will not repeat my call sign unless I think he has copied it incorrectly.
I will be thankful if and when I do make a contact.
I will respect my fellow hams and conduct myself so as to earn their respect.

#1 I will listen, and listen and then listen again before calling.
  This seems so obvious but it is the most vital thing to do. Careful listening rather than rushing to transmit will get the DX into your log. You must listen to find out whether the DX is working split and if so, where is he listening? Then you need to listen to the calling stations in order to determine what the DX station is doing. For example, he may be working gradually up or down the pile-up frequency range – and you need to find the best spot to call. And it may be time to ask yourself: “Do I really need to work this bit of DX, right now? Can I wait a while for the pile-up to subside?”

#2 I will only call if I can copy the DX station properly.
   You also need to listen carefully to determine how well you can hear the DX station to be sure you will hear his reply to your call and to avoid causing interference by transmitting at the wrong time. It is extremely frustrating for a DX station to return a call to a station that is unable to hear him, thereby causing incessant QRM.

#3 I will not trust the Cluster and will be sure of the DX station’s callsign before calling.
   Cluster spots often show the wrong call sign. Before you log a station, you should hear the station’s callsign on the air – don’t trust spotting networks. The DX operator should send his call sign at regular intervals. Unfortunately, not all operators do this!

#4 I will not interfere with the DX station or anyone calling and will never tune up on the DX frequency or in the QSX slot.
   Sadly, this covers a multitude of operators, employing poor operating practices. We are frequently afflicted with “Policemen,” people who repeatedly jump in to tell callers that

“the DX is listening up” – often adding a gratuitous insult. The rule is quite simple: never, ever transmit on the DX frequency for any purpose whatsoever.

#5 I will wait for the DX station to end a contact before calling.

If you transmit before a QSO is over, you are likely to interfere with the exchange of information, lengthening the QSO and slowing the process. It may seem clever to “nip in” as the previous contact is ending but many DX stations don’t like it, as such operating may break the pattern of the operator, which is what helps everyone to know when to transmit.

#6 I will always send my full call sign.

This is essential for CW and SSB, because incomplete calls lead to an extra transmission, slowing the operator’s progress with the pileup. If the operator is responding to partial call signs, it may appear that you should call with only several letters. Generally, this is not the case. Always use your full call sign.

#7 I will call and then listen for a reasonable interval. I will not call continuously.

Continuous calling is selfish and arrogant. With a computer or memory keyer, it is easy to send continuously. Unfortunately, it prevents you from listening and knowing what is taking place. In addition, it raises the QRM floor greatly, making life difficult for the DX station and everyone else.

#8 I will not transmit when the DX operator calls another callsign, not mine.

Perhaps this is intuitively obvious, but it is a common occurrence. If it is clear that the station is not calling you, do not transmit.

#9 I will not transmit when the DX Operator queries a call sign, not like mine.

In life outside amateur radio it would simply be considered rude to answer when someone else is asked a question! How do you know if the station is calling you? Perhaps the DX operator has a partial version of your call. Is it me? “The timing is right!” Yes, the timing may seem right, but it may also be “right” for many other stations. If the DX is actually calling you and hears nothing, he will call you again. Then you can call. Only one letter from your call sign is NOT enough, however. Calling when not being addressed raises the floor level of QRM and slows progress dramatically.

#10 I will not transmit when the DX operator requests geographic areas other than mine.

You must recognise and accept that when an operator is calling for a specific geographic area (e.g. NA for North America, AS for Asia), you must not call until the operator’s instructions change. Even if his choice appears incorrect, you must follow his instructions. The DX operator is in control. Here’s an important point: If a DX operator is working, some area, perhaps North America , and he fails to say so between QSOs, do not begin calling immediately. Call only when it is clear that the operator’s instructions have changed. To do otherwise is impolite and simply slows the process.

#11 When the DX operator calls me, I will not repeat my callsign unless I think he has copied it incorrectly.

If you repeat your call sign, the DX station may think that he has your call sign wrong. He might then listen very carefully – again – thus slowing the process. A DX operator will generally log what he has if you say nothing further.

#12 I will be thankful if and when I do make a contact.

There should certainly be a pride of accomplishment when you get a QSO with a guy in a far-away entity. But before you start basking in the glow of accomplishment, think about the help you received from your partners, perhaps Mr. Icom, Mr. Alpha, and Mr. Force 12. If

your ego still feels a need to take ALL the credit, try again. But this time turn off your amplifier and connect your rig barefoot to a dipole. If you get through the pile up this time, then YOU, as the operator, can take more of the credit.

You should also acknowledge that you would not have had the contact without the skill of the operator at the other end who undoubtedly made sacrifices to be there for you. So be thankful for all this help you received.

#13 I will respect my fellow hams and conduct myself so as to earn their respect.

Respect is about behaving well toward others. DXing is very competitive. If you operate otherwise, you may acquire a bad reputation. DXing will be the most fun for everyone if we all behave with politeness, mutual respect and even a bit of humility!

DXpeditioners' Code of Conduct

This DXpeditioners' Code is to help maximize the fun for all participants. As the DX operator, you play a critical role in pileups: you are "in charge". Dealing with an unruly pileup of discourteous operators who have forgotten about ethical behavior is NOT fun. So it makes sense to plan and train ahead of time on how best to deal with the situation.

Good operators at the DX end and courteous behavior at the other end of the QSO can greatly increase the total number of QSOs logged. It has been demonstrated that pileups can be kept reasonably under control if the DX operator follows certain 'rules'. Luckily, some top operators have given us the benefit of their experience. Please peruse these suggestions.

It is also important that you tell the thousands of hams who want a QSO that you expect them to operate ethically in accordance with the DX Code of Conduct. If your DXpedition has a website or just a page at QRZ.com, please consider posting a notice on your website.

As a starter, consider posting our mascot with a link to this site. You may be as creative as you like. You might consider posting the Code itself on your website, just copy and paste . Whatever suits you. For further assistance, click here. For an example of how this might look, click here.

We also hope that you will tell us that you have linked to us so and we can publish your DXpedition and website at this site. More important, we hope that this initiative will play a positive role in making sure that you enjoy your trip.

NOTE: This page is organized as a Table of Contents. Click on each topic to go to a section of the document that explains it further. Some sections have links to a third page with even more details and links to various resources we think may help. Enjoy!

Do your Homework
Keep the DX community informed
Check TX frequency AND the RX range before starting up
You are the Boss and You are in Charge
Announce Your Callsign Frequently
Use Split Operation
Establish and Maintain a Rhythm
Work and log dupes, it's quicker
Give QSY/QRT information before leaving the pile-up
Establish a "Friendship" with the Pileup
Avoid working by numbers, continents are OK

Repeat corrected callsigns so everyone is sure of being safely logged
Be a role model

#1 Do your homework
Edison famously said, "Genius is one percent inspiration and ninety-nine percent perspiration. In DXpeditioning, success is ninety percent preparation.

Before traveling, read "DXpeditioning Basics ” by N7NG.This freely available publication is a must read for every DXpeditioner. Another good resource is "DX-peditioning Behind the Scenes" by Neville Cheadle, G3NUG & Steve Telenius-Lowe, G4JVG. You can order directly from the author by clicking on the title.

Study the propagation before you travel. There are three important population centers in the world: Europe, North America and Asia . From wherever you are, two are likely to be easy. The third one is the most difficult to work from your destination location so it becomes your “target area.” Make sure that you work the target area any time any band is open to that area.

Practice your QSO technique. Pick out the weaker stations. Provide training to your less-experienced operators in the finer points of both SSB and CW operating.

#2 Keep the DX community informed
The DX community appreciates a well organized website, some of which are works of art. If your operation is smaller and you do not plan to have a "full service" website, at least set up a QRZ.com page that states your location, dates of operation, and QSL information. Even with a complete website, a QRZ.com page with a link to your main website makes you easier to find.

#3 Check TX frequency AND the RX range before starting up
Always check for a clear TX frequency and find a clear RX range before starting up on a band. As a DXpeditioner, you have powerful tools to control the frequencies you use. If you have previously announced your frequencies, try to stick with them. However, conditions might demand a change. You may have to select your pileup RX place in a spot other than the busiest part of the band.

#4 You are the Boss and You are in Charge
In order to maintain control of the pileup you must operate in such a manner as to make control possible. It is easy to lose control of a pileup, and if you do, it may be your fault. Maintain good QSO mechanics. Use the same general pattern for every QSO. Select a callsign from the pile and stay with it until a satisfactory QSO results. If it is not possible to finish a QSO, solicit QSOs again. NEVER select another callsign without soliciting QSOs – QRZ, CQ, etc.

Issue clear instructions to the pileup and stick to them – always. For example, if you catch only part of someone’s call and give the partial out, do not work anyone else until you have completed with that station. If you call “NO EU,” DO NOT work any European callers. Ignore rude callers. Breaking your own rules just creates chaos. Stay in charge, but never shout to nor lecture the crowd.

#5 Announce Your Callsign Frequently, like (almost) every QSO
You should give you callsign often enough so that no one has to ask. If you don't give your call often enough, some callers will just log whatever callsign was last spotted on a

DXcluster (right or wrong) and some will ask for your call. That wastes time, interrupts your flow, and energizes the ever present frequency cops. Once per QSO is not too often.

If you are blessed with a real long callsign such as SV9/ON4ZZZZ/P, that's a lot to mention after every QSO so just be alert. If you hear someone asking “QRZ” or “What’s the DX?” on your TX frequency, you have waited too long.

#6 Use Split Operation

Assuming that you have gone to some relatively rare entity, you can start out by assuming that you will be dealing with a pileup. Don't wait until you have a large number of callers. Start out by operating split immediately. As soon as you are spotted on a DXcluster, the whole world will descend on you and you might as well be ready.

#7 Establish and Maintain a Rhythm

Standardize your transmitted messages as much as possible. For instance send a QSL or TU message at the end of every QSO and maintain a consistent pattern to help callers synchronize with you. That reduces the amount of out-of-turn calling. This is a well established technique for controlling a pileup. It gives the callers solid guidance in determining when and when not to call.

#8 Work and log dupes, it’s quicker

Work and log dupes: it is quicker than telling the duplicate callers that they are dupes, and it may be that they were unsure of a previous QSO. Use your website to announce your policy on duplicates, for example “Please work us only once on each band/mode slot to give others a chance for a new one.”

#9 Give QSY/QRT information before leaving the pileup

When you are about to leave the pileup, say what you are doing. Announce if you will QSY to another band/mode, perhaps giving out your new TX frequency. If you are going QRT for a while, give out your QSL information and website address. Don’t say, “QRX 5” unless you definitely are going to come back within 5 minutes as this just extends the band pollution unnecessarily.

if you don’t know how long you will be, it is better to say, “QRT,” but then come back on later when you are ready. When you get tired, slow down and take extra care over accuracy. If you start making too many mistakes, take a break and maybe a short sleep, whatever suits your body’s natural rhythm.

#10 Establish a “Friendship” with the Pileup

This is called the conversational style of pileup operating. This is perhaps one step beyond being friendly and not lecturing. It helps control the nature of the situation. Rather than have a group of antagonistic hounds, you put the callers at ease, and in the end give them confidence that you are fully interested in making a QSO with each of them. This style of operating is NOT a substitute for poor operating procedure, however.

Also remember the many operators who are not regular CW operators. They want a QSO too but may be able to copy code at, say, 20 wpm. DXpedition operators are sometimes whizzing along at 40 wpm. So keep an ear out for the guy who is calling at 20 wpm and respond to him at a speed he can copy easily. You will make another grateful friend.

Also remember that many operators have 100 watts and wire antennas. After the big guns all have their QSOs, work these guys because they are the backbone of the amateur radio community.

#11 Avoid working by numbers, continents are OK

When possible, try to avoid subdividing a pileup by numbers. Depending on propagation, try working a whole continent or several continents, or NOT working a particular continent. At times only working by numbers will work, however. Whatever method you choose, be sure to inform the pileup after every QSO.

Don't break your own rule by working your pals in NA if you are asking for "Eu."

#12 Repeat corrected callsigns so everyone is sure of being correctly logged

A valid QSO is when both stations have copied content and have logged it correctly. It is unrealistic to think that you will copy 100% of all callsigns the first time. On CW do not send a “question mark,” as in “ABC?” when returning to a partial callsign. For some obscure reason many (undisciplined) pileup callers take a 'question mark' as the sign to start transmitting again, although the partial callsign does not resemble their callsign.

So when you respond to a call with a partial as “ABC 5nn” and W5ABC responds, “W5ABC W5ABC 5nn TU,” it is proper that you respond “W5ABC QSL TU” That way W5ABC knows he is in the log and does not have to call again later to make sure.

If you made a mistake with someone’s call, he may keep calling you. Repeat his call or work them again, using “TU”, “QSL”, “CFM” or “You’re in the log” to let them know for sure that they are safely logged. This is even more important if you do not have an online log with daily updates.

#13 Be a role model

Standardize your transmitted messages as much as possible. For instance send a QSL or TU message at the end of every QSO and maintain a consistent pattern to help callers synchronize with you. That reduces the amount of out-of-turn calling. This is a well established technique for controlling a pileup. It gives the callers solid guidance in determining when and when not to call.

Conclusion

A number of people contributed to this document. It is thus a compendium of the work of others, here presented in a format that hopefully has included the best of what experienced DXpeditioners have had to say about this topic.

In the end, if DXpeditioners are better prepared, insist on good operating behavior from those calling them, and if those at the other end adhere to the DX Code of Conduct, everyone will have more fun. And that’s what it’s about.

Contesters' Code of Conduct

• The primary aim of a contest QSO is to exchange only the essential QSO information (normally callsigns, reports and contest-specific information such as zones number, state or serial number) as efficiently (meaning quickly and yet accurately) as possible. In most contests, anything further (greetings, QTH or station details etc.) is superfluous, slows down the QSO rate and reduces the achievable score

• If you hear a contest in progress and want to join in, look up the contest rules to find out what information to
send and whether you are eligible to participate. Check out the contest calendar and links to contest websites at http://www.hornucopia.com/contestcal/weeklycont.php

• Listen carefully before calling a contest station, ensuring that you have their callsign correct and haven’t already worked them. There are good logging programs that will help eliminate duplicate QSOs that waste valuable time.

• Consciously avoid causing interference, for example by transmitting an over modulated signal or CQing on a
frequency that is already in use Remember, listen first and listen hard and try calling "QRL?" before operating.
Don’t operate ‘split’ unless it is absolutely necessary.

• Call a contest station that is CQing at just the right instant, giving your full callsign once. That is usually enough. Most stations leave only a few brief seconds between their CQ calls so it is important to synchronize your call with their listening periods. Good stations get a rhythm going and it will help if you get in tune with that rhythm.

• Stand by for a moment if they go back to someone else. You shouldn’t have to wait very long. If they are really busy, make a note of their frequency and spend a few minutes hunting for other stations to work, then come back for another call.

• If they send your correct callsign plus a report and contest information, respond with just a report and contest information. However, if they send your callsign incorrectly, hesitate briefly just in case they are working someone else, but if you are certain they are working you, respond by sending just your full callsign again, once or twice but with no report until they get your callsign correctly.

• Do your level best to log their callsign and exchange information accurately, and to ensure they have all your
information correct (e.g. - repeating the essential information if conditions are marginal). Sometimes several
repeats are needed to complete the QSO but this is necessary to claim the points and avoid penalties.

• Having met the primary aim, you will both be grateful for the efficient QSO and points. It is polite for the CQ station to send “Thank you“ or “TU” to confirm the QSO has been logged. This reduces unnecessary duplicate QSOs due to not knowing whether the QSO was complete, and is the cue to move on to the next QSO.

• Remain courteous at all times, even when you are stressed or tired. If another station encroaches onto the
frequency you are using, use your filters, turn your antenna, ask them politely to move a little HF or LF as
appropriate and/or shift your frequency a little to reduce mutual interference, or take this as an opportunity to go searching for new QSOs on the same or another band.

• Respect other amateurs who are not in the contest, for instance by obeying ‘contest-preferred' frequencies and avoiding frequencies used by beacons, nets, DXpeditions and other modes. Keep the WARC bands a contest-free safe haven for those who do not enjoy contests.

• If you are using a club or another amateur’s station for the contest, be a good guest, for example by being
careful with the equipment, tidying up afterwards and not annoying other people in the house.

• Play fair. For example, if you are using DX Cluster to find new multipliers, spot multipliers for other contestants too.

• Comply fully with the rules of the contest both in letter and in spirit. Don’t even bend them.

• Take as much pride in your station and operating techniques as in the contest certificates and plaques hanging on your shack wall. Learn to take advantage of the propagation and make the effort to listen for weak callers.

Most of all, be polite, efficient and friendly and stick to the rules to earn the respect of your fellow amateurs.

The Code of Conduct for Using the DXcluster

• The clue is in the name. Only ‘spot’ genuine DX, ie relatively rare or exotic calls on that band, mode and time.

• ‘Spot’ DX stations that are ‘lonely’ but don’t ‘spot’ those who have been found the "proper" way, by operators who actually listen for DX. Give them a chance to get their QSO because the mob will decend on them as soon as they are spotted.

• Dont 'spot' stations that are already very busy or struggling to control their pile-ups – give them a break! Real DXers will probably be in the pile-up, if not in the log already. Repeatedly spotting’ huge pile-ups is showing off and merely encourages yet more QRM from those who are too lazy or incompetent to find DX for themselves.

• Avoid ‘spotting’ stations that have just been ‘spotted’ by someone else, unless you have useful additional information to pass on. Definitely don’t ‘spot’ a station that has just been ‘spotted’ by a million others, no matter how excited you are.

• It is impolite to ‘self-spot’ (‘spot’ your own callsign) unless you are desperately trying to start activity on an open but quiet band – and even then it is preferable to ‘spot’ a real DX station with a comment to the effect that the band is open.

• Never ‘self-spot’ in a contest; that is definitely cheating. Posting the ‘spot’ under a friend’s callsign or a fake call doesn’t make it any more ethical.

• Please do not ‘spot’ the exact QSX frequency for DX stations operating split – it just makes the pile-up on that frequency even more difficult for them to handle. It is also unnecessary; “Up” or “Down” is reminder enough because real DXers will of course listen first!

• Get the DX call and frequency right, double-check the information before ‘spotting’ and treblecheck
after ‘spotting’. Correct your mistakes promptly and apologetically, and learn the lesson.

• Respect the DX station’s wishes regarding ‘spotting’ if they indicate (whether on the air or on their QRZ page or website) that they do, or do not, want to be ‘spotted’.

• Use your own call (remembering that your IP address is logged automatically) and be polite.

• Never insult anyone via DXcluster; it is only a hobby – and we know your IP address.

• Do not post pseudo-spots begging for QSOs, QSYs, new modes or whatever. DXcluster is not e-mail. Assume the DX is either not monitoring the cluster, or is too busy to respond.

• Do not post lame ‘non-spots’ saying you cannot hear someone. Nobody but you really cares. (Telling us that you cannot hear the DX on your 18 element 160 metre yagi at 600 feet is fine though because we will all be laughing at you for playing ‘chequebook radio’.)

• Do not post brag spots (“Worked with 3mW!”, “Yipeee!!”, “Easy on my 24 ele quad” and “Thanks for DXCC#678”).

• Do not create and ‘spot’ fake callsigns just to test your software; ‘spot’ the station TE1ST as the DXcluster network doesn’t circulate spots with that call. (Definitely avoid ‘spotting’ fake calls starting with exotic prefixes (such as P5) as that is guaranteed to excite those who have DXcluster alarms set for their last few DXCC countries.)

• Do not try to make, complete or arrange DX QSOs via DXcluster. It is unsporting, cheating even.

• Do post helpful comments eg IOTA reference, QSL information etc.

• Configure the DXcluster filters appropriately. If you get annoyed at VHF spots, ANN/ALL announcements or beacon spots, just cut out the QRM using the DXcluster filtering facilities.

• Hint: while you may enjoy the challenge of mastering the DXcluster’s somewhat obscure and limited filtering commands, software such as VE7CC’s CC User and logging programs such as Logger32 make spot filtering much easier and more flexible. Another excellent program is DX Monitor at http://ve3sun.com/

Semula saya pikir tetap dibutuhkan data mode,band,utc untuk bahan check & recheck validitas QSO yg dilaporkan.
Tapi ya semoga bisa dengan data itu saja.

Semula saya mau menunggu kesempatan worked dengan YB7, masalahnya masak dari YBland gak bisa lengkap, tapi ya semoga buat endorsement bisa QSO dg YB7 nantinya.

Sorry tadi saya posting berulang karna sepertinya gagal terkirim, ternyata bisa terkirim.

OM Hen, untuk tanggal diedit saja, sesuaikan tgl qso.
Sesuai dengan rules no 4. Tidak ada kategori, mode atau band.

4. There are no mode endorsements or band endorsements. The Diamond DXCC
  Challenge is considered to be a Mixed-Mode/Mixed-Band award. There are no
  power categories or restrictions for the award.

tnx 73.

Djoko

OM Djoko,
Iya, saya gunakan online application ini dan saya mencoba import dari log yang saya ambil beberapa waktu yll dari webnya ARRL.
Formatnya ceritanya dibuat urut sesuai DXCC list oleh JA1WWO utk memudahkan kita mengisi logsheet itu baru selanjutnya log yang sudah urut sesuai callsign dipindah secara otomatis ke format yg alphabetic - country name tahun 1937.

Nah, format log ini yg saya import ke online application. Hasilnya error pada date/time - tetapi akhirnya saya lihat juga data masuk juga tapi data Date (dd-mm) adalah tgl. hari ini 27-08 = tgl. entry, bukan tgl.QSO.
Apakah selanjutnya kita edit saja, tapi koq gak lengkap termasuk bandnya gak ada.

73 es tnx

Subject: Bls: [YBDXC_News] Fw: [orari-news] Diamond DXCC

OM Busan,
Format tanggal pada form untuk DDXCC ini gimana sih ddmmyy plus utc atau gimana ?
Karena dari form yg dibuat oleh JA1WWO, ketika saya masukkan data dg format dd/mm/yy utc di sheet "QSO Data" maka pada sheet 2 yg di linked munculnya satu jumlah angka (bukan tanggal).

Contohnya : pada QSO Data kolom "Date & Time" --> 26/05/2012 7:56:00
Pada Sheet 2 yg di linked itu pada kolom "Date & Time" tertulis :
41055,33056 Jadi waktu data QSO ini saya import ke application formnya ARRL - error.

Mohon penjelasannya dong..

73 es tnx
hen-yc0qr

Sent: Sun, Aug 26, 2012 11:39:16 AM

Dear Teman-teman

Jika tertarik apply Diamond DXCC berikut rulesnya

DXCC Diamond Challenge Rules

1. The Diamond DXCC Challenge Awards are available to all amateurs worldwide who contact a minimum of 100 countries from the Diamond DXCC List. US Amateurs must be members of the ARRL. Generally, the rules for the Diamond DXCC Challenge are the same as the rules for the DXCC Program, except as listed here.
2. Contacts must be made from within the same DXCC entity by the same operator.
3. Contacts must be made during 2012 - from 0000Z on 1 January, 2012 through 2359Z on 31 December, 2012. All Amateur bands may be used except for 60 Meters.
4. There are no mode endorsements or band endorsements. The Diamond DXCC Challenge is considered
to be a Mixed-Mode/Mixed-Band award. There are no power categories or restrictions for the award.
5. Confirmations are not required to obtain this award, but HQ will review submitted entries for accuracy and validity.
6. The Diamond DXCC Challenge certificate will be available for working 100 entities and will be endorseable with stickers at the following levels: 125, 150, 175, 200, and 225. At the end of the Diamond DXCC Award year, sometime in February, 2013, we will send endorsement stickers in one mailing to everyone who qualified for them.
7. The Diamond DXCC Award certificate fee is $13 including shipping within the USA, and $14 including shipping outside the USA. Participants must purchase a Diamond DXCC certificate with their first submission, but after that there will be no charge to update your record in the
standings
table.

sekarang tersedia Aplication OnLine http://www.arrl.org/diamond-dxcc

setelah Log in

Welcome to ARRL's Diamond DXCC

- Find out more about the DXCC Award Program <http://www.arrl.org/dxcc>.
- Find out more about Diamond DXCC <http://www.arrl.org/diamond-dxcc>.

Submitting Your Diamond DXCC Application Online — Step by Step

1. Now that you have logged in, you may go to the *Enter QSOs*<https://p1k.arrl.org/diamond-dxcc/diamond-entry.php> tab and begin entering your
QSO information. All your entries are saved when you
hit the *Save Button*. You may leave the *Enter QSOs*<https://p1k.arrl.org/diamond-dxcc/diamond-entry.php> tab at any time while entering QSOs, and return to it later.
    1. You must enter all of the required data for each card to receive credit.
    2. You may enter your QSO data in any order. During the submission process Diamond DXCC will produce a*Diamond DXCC Record Sheet* for you.

2. View import Scorecard
directions<https://p1k.arrl.org/diamond-dxcc/excel.php>
.
3. When you have finished entering data for the QSOs you want to submit,
you may begin the application process by clicking
on the *Submit

Application* <https://p1k.arrl.org/diamond-dxcc/diamond-award.php> tab
and proceed sequentially through the *Application*, *Payment*, *Preview
Application* steps.
4. The *Preview Application* step of the *Submit
Application*<https://p1k.arrl.org/diamond-dxcc/diamond-award.php> tab
provides a *Submit Application* button. Clicking this button completes
the application process and saves your application.
5. You do not have to send any paperwork to ARRl HQ when you
electronicaly submit a Diamond DXCC application.
6. Once you have submitted an application by clicking the *Submit
Application* button, you cannot make further changes or add QSOs to
this
submission. You cannot
start a new application in the Diamond DXCC system
until your pending application has been processed by ARRL
HQ<http://www.arrl.org/support>.
You may continue to use the *Enter
QSOs*<https://p1k.arrl.org/diamond-dxcc/diamond-entry.php> tab
to enter new QSOs.

Saya menggunakan format excel dari ARRL lebih mudah, menurut saya sich. Sebab masing2 tinggal kebiasaan aja. Kalau format jam saya pakai hanya hh:mm, mudah2an makin banyak yang klaim DDXCC.
Mumpung masih ada waktu.
Tnx YB1LZ

3425. ADIF Convert to EXCEL

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-08-27 10:46:17 UTC
From: Imam YB4IR
Topic: 3424 Message: 3425

melalui logging software, kita export dalam bentuk ADIF dan nanti di conver keEXCEL

Pada Excel Tentunya haus kita urutkan dulu berdasarkan DXCCnyadan di sort. lantas kita hapus (kita ambil setiap DXCC satu QSO saja)

Untuk ADIF convert to EXCEL ambil disini: http://www.mydarc.de/DL1HW/adif_en.html

Semoga berhasil.

OM Seno-YB2SLR,
saat ini saya tiba di Semarang ikut Sertifikasi Cisco (Senin - Kamis), Kamis sore ke Jogja, Sabtu pagi ke Solo (nengok Ibu sebelum balik Bandung) Minggu siang balik Bandung,
Panjenengan di Solo mana?
Sakit gigi emang report banget, sakitnya merembet ke semua badan tapi ga ada yg nengok bawain "makanan", kalau sakit hati bisa dilupakan dengan CQ..CQ..CQ.. Calling CQ and Standing By..... apa lagi dapet entity baru, lupa sakit hatinya.

OM Seno-YB2SLR,
saat ini saya tiba di Semarang ikut Sertifikasi Cisco (Senin - Kamis), Kamis sore ke Jogja, Sabtu pagi ke Solo (nengok Ibu sebelum balik Bandung) Minggu siang balik Bandung,
Panjenengan di Solo mana?
Sakit gigi emang report banget, sakitnya merembet ke semua badan tapi ga ada yg nengok

bawain "makanan", kalau sakit hati bisa dilupakan dengan CQ..CQ..CQ.. Calling CQ and Standing By..... apa lagi dapet entity baru, lupa sakit hatinya.

Hehehe....
OM Djoko, apalagi yang 40M lebih repot lagi saya naikinnya - waktu masih pakai AT-180 antenna tunernya saya masih berani ke 40M dengan antenna 15m.
Kadang ikutan nyeletuk, kalo kebetulan "kesabet" splatter dari ponakan yg sedang QSO di 40M dengan rekan di Jawa Timur/Sidoarjo. HI.
Kalo di 40M sepertinya gak sulit untuk cari kesempatan QSO dengan rekan2 se Nusantara, apalagi ada net disana.

Yang sedang terpikir mungkin akan buat antena 20M sederhana, karena katanya masih ada "ce;ah" utk digunakan penggalang disitu.

OM Hen,
Kalau ada 40m antenna dapat dicoba di 7.040 banyak teman2 dari call area 7

OM Hen,
kenapa ga nyoba pake Speader Beam aja, lebih simpel, ringan, 5 band dan pengarah lagi.
kalau perlu info detail via japri, nanti saya tunjukan mesti kontak siapa, tinggal pasang ringan dan gain lumayan.
saya juga mau pasang untuk yang 30 Meter Band.
Tnx

YB1LZ/2

Hehehe....
OM Djoko, apalagi yang 40M lebih repot lagi saya naikinnya - waktu masih pakai AT-180 antenna tunernya saya masih berani ke 40M dengan antenna 15m.
Kadang ikutan nyeletuk, kalo kebetulan "kesabet" splatter dari ponakan yg sedang QSO di 40M dengan rekan di Jawa Timur/Sidoarjo. HI.
Kalo di 40M sepertinya gak sulit untuk cari kesempatan QSO dengan rekan2 se Nusantara, apalagi ada net disana.

Yang sedang terpikir mungkin akan buat antena 20M sederhana, karena katanya masih ada "ce;ah" utk digunakan penggalang disitu.

mantab tuh Spyder Beam,

Bagaimana buat topik lagi spyder beam, mungkin OM Gun bisa sarankan
materialnya bisa didapat dimana disini.

yang tahu Braket tengahnya bisa dibuat OM Ken YB1KEN

mohon pencerahan OM Gun, sebaiknya buat topik baru ya OM.
Tnx

OM,
Waktu saya ikutan bantu panitia pernikahan puterinya salahsatu direktur di kantor, saya ngetik tata upacara pernikahan adat jawa tengah.

Karena ada yg sangat menarik pada salahsatu buku yg dibuat, yaitu kalimat2 kromo hinggil saat penyerahan air utk kedua mempelai "mandi bersama": (di tempat masing2 lho)- jadi saya simpan satu copy. Bagus & lengkap.

Sapa tahu nanti besanan sama orang jawa yg pakai upacara pernikahan adat lengkap (repot tapi ya). HI.

Hallo OM Eddy,
thank you thank you ...ga ada singkatannya OM
Dragon = Nagaalasan kenapa mengambil nana Dragon DX Club, yaitu :
1. kebetulan tahun ini kan tahun naga2. salah satu anggota club kami panggilannya pak Dragon
3. ada dua pasang anggota club kami melangsungkan pernikahannya di tahun naga.YB2BBY dengan YB2VTO dan
YB3MM dengan YB2TET
4. ada salah satu anggota kami dikaruniai seorang bayi kecil Little Dragon, "harmonic" dari YB2TJV
5. Bulan February di tahun naga ini ada 29 hari
maka dari itu kami seluruh anggota sepakat untuk memilih nama Dragon DX Club.
NB : Oktober nanti kalo Pak Eddy longgar waktu silakan melihat kegiatan kami dari dekat ya, sekaligus silahturahmi dan kemungkinan nanti ada rencana diisi dgn acara2 lainnya, saya sebagai orang yang belum tua tapi di-tua-tuakan oleh temen temen manut (nurut) aja lah....

Terima kasihSalam 73

Hallo OM Eddy,
thank you thank you ...ga ada singkatannya OM
Dragon = Nagaalasan kenapa mengambil nana Dragon DX Club, yaitu :
1. kebetulan tahun ini kan tahun naga2. salah satu anggota club kami panggilannya pak Dragon
3. ada dua pasang anggota club kami melangsungkan pernikahannya di tahun naga.YB2BBY dengan YB2VTO dan
YB3MM dengan YB2TET
4. ada salah satu anggota kami dikaruniai seorang bayi kecil Little Dragon, "harmonic" dari YB2TJV
5. Bulan February di tahun naga ini ada 29 hari
maka dari itu kami seluruh anggota sepakat untuk memilih nama Dragon DX Club.
NB : Oktober nanti kalo Pak Eddy longgar waktu silakan melihat kegiatan kami dari dekat ya, sekaligus silahturahmi dan kemungkinan nanti ada rencana diisi dgn acara2 lainnya, saya sebagai orang yang belum tua tapi di-tua-tuakan oleh temen temen manut (nurut) aja lah....

Terima kasihSalam 73

Dear OM Seno,

Saya senang kalau bisa membantu rekan yang sefaham dan seminat.

Makasih sudah balas QSL card saya, sebenernya untuk YB2LSR saya sudah punya QSL cardnya dengan data: 09-Dec-2002; 1548UTC; 14MHz; 59; SSB. Namun waktu itu Anda QSOnya dengan YB7VCW. Jadi dengan YB7XO belum gitu.. :)

Sudah pasang DP bln May. Wkt off June, putus kena angin.
Karena tiap hari hujan, blm bs pasang lagi.
Senin-Sabtu, kerja dr jam 6 - 18. Kadang sampai malam. Minggu libur.

Brp kali Tx dr teman di Luwuk (YB8NHQ, dll)
Hampir tiap malam minggu, ke Luwuk. Kumpul dg teman2 Orari lokal Luwuk.

Dear OM Jo,

Lama OM, 10+ tahun lah kira2. Terakhir kita ketemua waktu Anda ada project di Pasir Ridge (UNOCAL). Kapan ya ketemuan lagi. Sehat2 semua ya OM Jo.

Waktu OM Ferry SK saya lagi tidak di Balikpapan,cuma dapat berita dari rekan ORARI via SMS.

Biografi Dragon DX Club

YB2LSR Martinus Jap

Embrio dari club ini sebenarnya berasal dari tim contester YE2R yang telah berkiprah dari tahun 2009, Kami menyadari bahwa YE2R adalah sebuah call-sign dimana bukan merupakan sebuah Nama Club, suatu ketika YE2R juga harus dipakai oleh kelompok lain sesuai dengan keperluan dan kebutuhannya. akhirnya kelompok ini menyadari bahwa perlu sebuah identitas diri untuk kelompok ini.

Ide Dragon DX club ini adalah karena di tahun 2012 ini adalah tahun yang luar biasa, dimana menurut kalender China tahun ini adalah Tahun Naga, disamping itu kebahagian-kebahagaian lain terjadi di grup YE2R di tahun ini disamping kegiatan Amatir Radio tersebut, akhirnya pada tanggal 29 February 2012 disepakati sebagai hari lahirnya Dragon DX Club, yang anggotanya adalah sebagian besar dari ex-tim kontes YE2R.

Dear Uncle Bam, (Pak Dhe Bambang)

matur nuwun Pak Dhe atas atensinya dan kesediaan panjenengan untuk men-up load di e-qsp as a little bit history of our club,
sebetulnya kami pada awal terbentuknya club kami ini sdh announce ke temen2, cuman gak banget-banget gitu supaya tidak menimbulkan sensasi yang terlalu heboh karena sebetulnya kelompok kami ini anggotanya melulu hanya temen2 yang seneng kontes aja, seperti yang pernah saya ceritakan dulu bahwa kelompok terbentuk dari tim kontes YE2R tahun 2009 yang lalu dimana operatornya terdiri dari bukan hanya dari call area "2" saja namun juga dari call area yang lain, dan karena dari solidnya tim work antara angoota dari tim ini maka kami sepakat untuk membentuk club Dragon dx-club ini, saya kira ini ga bertentangan dengan aturan apapun, karena sperti layaknya kelompok/club yg lainya sbg contoh, Club PSK31, Club CW-Jogja, Club Fox Hunting Club e-QSO, Club i-QSO, dll banyak sekali yang sebetulnya masih dibawah naungan ORARI, malah ironisnya seperti Club Kucing Garong / Iwak-iwak yang mungkin tidak jelas legalitasnya, disini saya maksudkan apakah semua anggotanya
berijin, ataukah cara mengudara mereka juga menggunakan prosedur yang baik / benar karena yg pernah kami dengar mereka tidak pernah menyebutkan callsign, itu malah tidak pernah diunggah ke tingkat prosedural organisasi.
beberapa hari yang lalu waktu kami mengumumkan kembali di milist orari-news dengan judul "perkenalan Dragon DX Club" ternyata sempat menimbulkan riak di milist, kami memahami betul kepada yang menimbulkan riak ini karena mungkin tidak tahu awal rimbanya keberadaan dan kegiatan kami, atau minimnya pengetahuan tentang AR itu sendiri.
sebetulnya arah dari announcement kami ke milist ini kembali adalah untuk memberitahukan bahwa club kami ini nanti akan berkiprah kembali di kontes CQWW 2012 tgl 27/28 Oktober mendatang dan mohon doa restu.

Pak Dhe bilamana nanti ada waktu tgl 27/28 Okt mendatang silakan untuk bisa singgah tempat kami bertanding, Grobogan rumah YB2DX

anyway , natur nuwun atas segala dunkungannya.

salam hormat,

Seno Laser

Embrio dari club ini sebenarnya berasal dari tim contester YE2R yang telah berkiprah dari tahun 2009, Kami menyadari bahwa YE2R adalah sebuah call-sign dimana bukan merupakan sebuah Nama Club, suatu ketika YE2R juga harus dipakai oleh kelompok lain sesuai dengan keperluan dan kebutuhannya. akhirnya kelompok ini menyadari bahwa perlu sebuah identitas diri untuk kelompok ini.

Ide Dragon DX club ini adalah karena di tahun 2012 ini adalah tahun yang luar biasa, dimana menurut kalender China tahun ini adalah Tahun Naga, disamping itu kebahagian-kebahagaian lain terjadi di grup YE2R di tahun ini disamping kegiatan Amatir Radio tersebut, akhirnya pada tanggal 29 February 2012 disepakati sebagai hari lahirnya Dragon DX Club, yang anggotanya adalah sebagian besar dari ex-tim kontes YE2R.

Pilih yang peringatan ulangtahunnya 4 tahun sekali, ya OM Seno ?

OM Seno,

Kalo boleh sekalian tanya skema/diagram interface yg menggunakan OT-240.
Selama ini yang ada khan skema pake 1:1 trafonya (600 ohm).

Dear Uncle Bam, (Pak Dhe Bambang)

matur nuwun Pak Dhe atas atensinya dan kesediaan panjenengan untuk men-up load di e-qsp as a little bit history of our club,
sebetulnya kami pada awal terbentuknya club kami ini sdh announce ke temen2, cuman gak banget-banget gitu supaya tidak menimbulkan sensasi yang terlalu heboh karena sebetulnya

kelompok kami ini anggotanya melulu hanya temen2 yang seneng kontes aja, seperti yang pernah saya ceritakan dulu bahwa kelompok terbentuk dari tim kontes YE2R tahun 2009 yang lalu dimana operatornya terdiri dari bukan hanya dari call area "2" saja namun juga dari call area yang lain, dan karena dari solidnya tim work antara angoota dari tim ini maka kami sepakat untuk membentuk club Dragon dx-club ini, saya kira ini ga bertentangan dengan aturan apapun, karena sperti layaknya kelompok/club yg lainya sbg contoh, Club PSK31, Club CW-Jogja, Club Fox Hunting Club e-QSO, Club i-QSO, dll banyak sekali yang sebetulnya masih dibawah naungan ORARI, malah ironisnya seperti Club Kucing Garong / Iwak-iwak yang mungkin tidak jelas legalitasnya, disini saya maksudkan apakah semua anggotanya
berijin, ataukah cara mengudara mereka juga menggunakan prosedur yang baik / benar karena yg pernah kami dengar mereka tidak pernah menyebutkan callsign, itu malah tidak pernah diunggah ke tingkat prosedural organisasi.
beberapa hari yang lalu waktu kami mengumumkan kembali di milist orari-news dengan judul "perkenalan Dragon DX Club" ternyata sempat menimbulkan riak di milist, kami memahami betul kepada yang menimbulkan riak ini karena mungkin tidak tahu awal rimbanya keberadaan dan kegiatan kami, atau minimnya pengetahuan tentang AR itu sendiri.
sebetulnya arah dari announcement kami ke milist ini kembali adalah untuk memberitahukan bahwa club kami ini nanti akan berkiprah kembali di kontes CQWW 2012 tgl 27/28 Oktober mendatang dan mohon doa restu.

Pak Dhe bilamana nanti ada waktu tgl 27/28 Okt mendatang silakan untuk bisa singgah tempat kami bertanding, Grobogan rumah YB2DX

anyway , natur nuwun atas segala dunkungannya.

salam hormat,

Seno Laser

Om Seno yg di Tua kan di DDXC
Apakah DragonDXC hanya akan mengkhususkan diri di Mode SSB karena dalam sejarahnya YE2R (callsign station contest) hanya mengikuti ssb contest saja (CQWW dan CQWW160)....
Karena Club station yg anda sebutkan sebagai contoh semuanya bukan dgn mode ssb (Digital,CW,FoxHunting,EQSO,IQSO).Bgmana dgn Mode yg lain ??

Yang muda yg masih pingin belajar mohon infonya,
YC2WAN (belum pernah DX)

Thanks responnya Pak Wan-Wan,

Mohon agar tidak membiaskan ke topik lain,
Sy hya mencontohkan club-club(komunitas) yg pernah ada saja bukan specifikasi mau bermain di bagian apa, mohon utk tidak tersinggung, smoga qsl

Sementara ini, DDXC club dgn QRV YE2R di phone mode aja sementara ini mengingat anggota tim banyak berdomisili dari bbrp call area yg berbeda, jadi sudah barang tentu pertimbangan waktu, financial (belum ada sponsorship tetap) , tenaga dll yg harus diperhitungkan. Sudah merupakan hal yg sangat beruntung bagi kami bisa berkumpul paling tidak setahun sekali. Dan sekali lagi perlu di ingat bahwa kegiatan ini hya hobby jadi kita mengacu aja pada kode etik AR, jadi bukan merupakan suatu pengejaran prestasi, just enjoy aja.
jadi kesimpulannya yg ada dulu aja deh, kita masih kecil kok.

Sy kira tim kami masih jauh dibelakang tim kontes anda YE2S yg memiiki 2 jenis mode (Phone / CW) tim yg bagus dan solid, serta peralatan2 yg lengkap dan canggih. Yg masih blm kami pyai.
Jadi malah kami yg seharusnya belajar dari Pak Wan-Wan

Terima kasih atas supportnya

Salam
Seno laser

Dear OM Seno,

Saya senang kalau bisa membantu rekan yang sefaham dan seminat.

Makasih sudah balas QSL card saya, sebenernya untuk YB2LSR saya sudah punya QSL cardnya dengan data: 09-Dec-2002; 1548UTC; 14MHz; 59; SSB. Namun waktu itu Anda QSOnya dengan YB7VCW. Jadi dengan YB7XO belum gitu.. :)

OM Hen,
Kayaknya udh dibalas sama OM Ricky kemarin : "OM Hendro,

Untuk saat ini saya hanya bisa QRV 20m. Mudah2an kita bisa ketemu suatu saat."

Regards,
Ricky

Gitu dech..beliau berarti ga QRV di 15M band..yaa

Oh, sorry.

Thank OM Irsan, saya lagi kesulitan akses internet nih, padahal mailbox penuh banget - apalagi salahsatu milis yg saya ikuti rada edhan... HI.
Tidak melarang posting yg cuma sebaris, sekata, ganti isi posting tanpa ganti judul, wuih ini yg selalu cepat bikin penuh mailbox. Cuma seru2an aja.

Semoga nanti juga bisa ketemu atau saya yang bikin antena yg lain.

Oke Pak Seno,

TQ info agenda DragonDXC yg akan QRV pada ssb (phone) min 1x dalam setahun . Wah om seno merendah sekali kalau DragonDX club dikatakan kecil lalu yang besar seperti apa ya ??? ... Benar sekali kata om seno pembiasan pembiasan jangan sampai ada di organisasi ini nggak maju maju tapi malah jalannya mundur

Mana bisa station YE2S dan YE2W mendahului suhu nya (YB2DX -Grobokan station) semua peralatan dari beliau takut di EMBARGO ... Hahahaha

De YC2WAN

Thanks responnya Pak Wan-Wan,

Mohon agar tidak membiaskan ke topik lain,
Sy hya mencontohkan club-club(komunitas) yg pernah ada saja bukan specifikasi mau bermain di bagian apa, mohon utk tidak tersinggung, smoga qsl

Sementara ini, DDXC club dgn QRV YE2R di phone mode aja sementara ini mengingat anggota tim banyak berdomisili dari bbrp call area yg berbeda, jadi sudah barang tentu pertimbangan waktu, financial (belum ada sponsorship tetap) , tenaga dll yg harus diperhitungkan. Sudah merupakan hal yg sangat beruntung bagi kami bisa berkumpul paling tidak setahun sekali. Dan sekali lagi perlu di ingat bahwa kegiatan ini hya hobby jadi kita mengacu aja pada kode etik AR, jadi bukan merupakan suatu pengejaran prestasi, just enjoy aja.
jadi kesimpulannya yg ada dulu aja deh, kita masih kecil kok.

Sy kira tim kami masih jauh dibelakang tim kontes anda YE2S yg memiiki 2 jenis mode (Phone / CW) tim yg bagus dan solid, serta peralatan2 yg lengkap dan canggih. Yg masih blm kami pyai.
Jadi malah kami yg seharusnya belajar dari Pak Wan-Wan

Terima kasih atas supportnya

Salam
Seno laser

Om Seno yg di Tua kan di DDXC
Apakah DragonDXC hanya akan mengkhususkan diri di Mode SSB karena dalam sejarahnya YE2R (callsign station contest) hanya mengikuti ssb contest saja (CQWW dan CQWW160)....
Karena Club station yg anda sebutkan sebagai contoh semuanya bukan dgn mode ssb (Digital,CW,FoxHunting,EQSO,IQSO).Bgmana dgn Mode yg lain ??

Yang muda yg masih pingin belajar mohon infonya,
YC2WAN (belum pernah DX)

Dear Uncle Bam, (Pak Dhe Bambang)

matur nuwun Pak Dhe atas atensinya dan kesediaan panjenengan untuk men-up load di e-qsp as a little bit history of our club,
sebetulnya kami pada awal terbentuknya club kami ini sdh announce ke temen2, cuman gak banget-banget gitu supaya tidak menimbulkan sensasi yang terlalu heboh karena sebetulnya kelompok kami ini anggotanya melulu hanya temen2 yang seneng kontes aja, seperti yang pernah saya ceritakan dulu bahwa kelompok terbentuk dari tim kontes YE2R tahun 2009 yang lalu dimana operatornya terdiri dari bukan hanya dari call area "2" saja namun juga dari call area yang lain, dan karena dari solidnya tim work antara angoota dari tim ini maka kami sepakat untuk membentuk club Dragon dx-club ini, saya kira ini ga bertentangan dengan aturan apapun, karena sperti layaknya kelompok/club yg lainya sbg contoh, Club PSK31, Club CW-Jogja, Club Fox Hunting Club e-QSO, Club i-QSO, dll banyak sekali yang sebetulnya masih dibawah naungan ORARI, malah ironisnya seperti Club Kucing Garong / Iwak-iwak yang mungkin tidak jelas legalitasnya, disini saya maksudkan apakah semua anggotanya
berijin, ataukah cara mengudara mereka juga menggunakan prosedur yang baik / benar karena yg pernah kami dengar mereka tidak pernah menyebutkan callsign, itu malah tidak pernah diunggah ke tingkat prosedural organisasi.
beberapa hari yang lalu waktu kami mengumumkan kembali di milist orari-news dengan judul "perkenalan Dragon DX Club" ternyata sempat menimbulkan riak di milist, kami memahami betul kepada yang menimbulkan riak ini karena mungkin tidak tahu awal rimbanya keberadaan dan kegiatan kami, atau minimnya pengetahuan tentang AR itu sendiri.
sebetulnya arah dari announcement kami ke milist ini kembali adalah untuk memberitahukan bahwa club kami ini nanti akan berkiprah kembali di kontes CQWW 2012 tgl 27/28 Oktober mendatang dan mohon doa restu.

Pak Dhe bilamana nanti ada waktu tgl 27/28 Okt mendatang silakan untuk bisa singgah tempat kami bertanding, Grobogan rumah YB2DX

anyway , natur nuwun atas segala dunkungannya.

salam hormat,

Seno Laser

OM Irsan beberapa bulan yll saya juga coba PSK31, masih trial & error ada 5-6 QSO yg satu dari P'cis confirmed via LoTW. Agak ribetnya karena switching PC-MIC masih blm OK, jadi misalnya saat sedang terpasang interface dan saya mau segera gunakan SSB, harus cabut kabel interface yg ke rig diganti mic.
Sekarang malahan interfacenya ngadat, gak bisa transmit.

OM Ricky,
Semula saya sempat mikir setelah target 15M tercapai, maka saya akan modifikasi Yagi ini menjadi 20M - tapi saya juga pingin icip2 PSK31 juga di 15M - jadi yg mungkin cari space di rumah RSSS ini utk antena 20M.

Atau seperti yg disarankan rekan2 utk nyoba spiderman eh spiderbeam antenna.

OM Hen,

Sebaiknya dipertahankan antena 15M buat PSK31, n mulai fokus kesana..saya lagi cari rig satu lagi utk phone mode, yg skrg low power lbh cocok utk disandingkan dg interface RTTY.. Ga apa-apa banyak maunya..berarti tandanya kita produktif .. Realisasi tinggal tunggu waktunya..ga usah ngoyo..nikmati aja yg ada..hehehe

Okay OM Irsan...
20M gak mendesak khan.... (kalo kamar ukuran 20M persegi luas banget gak desak2an).

Salahsatu AR Wland yg juga baru nyoba PSK31 bilang kadang terima info yg berlebihan seperti grid locator dsb seperti pada mode phone.
Buat dia yg penting callsign, report, nama op, QTH.

Beda2 sih tiap oraNG.

OM Joni,
Atau yang perlu (saya) bikin antenna 20M - jadi bisa ketemu.
Tapi sementara ini aplikasi sudah saya kirimkan kemarin - masih cukup waktu untuk nambah2 sampai Desember 2012 nanti. Insya Allah.

Topic: 3499 Message: 3499

The 53rd ALL ASIAN DX CONTEST - 2012

01.CONTEST PERIOD
(1) CW: From 00:00 UTC the third Saturday of June to 24:00 UTC the next day
<48 hours> (June 16-17,2012)
(2) Phone: From 00:00 UTC the first Saturday of Sept. to 24:00 UTC the next day
<48 hours> (Sept. 1-2, 2012)
02. BANDS
Amateur bands 160m(CW only), 80m, 40m, 20m, 15m, 10m03. ENTRY CATEGORIES
■Asian stations （ Japanese(JA) stations is included ）

Item CATEGORY
Single Operator Single Band High Power SO160HP ~ SO10HP
Low Power SO160LP ~ SO10LP
All Band High Power SOABHP
Low Power SOABLP
Multi-Operator Single Transmitter (multi band only) M/S
Multi-Operator Multi Transmitter
(multi band only) M/M
■DX (Non-Asian stations)

Item CATEGORY
Single Operator Single Band SO160 ~ SO10
All Band SOAB
Multi-Operator Single Transmitter (multi band only) M/S
Multi-Operator Multi Transmitter
(multi band only) M/M

Note1: Single Operator stations means that one person performs all concerned operations during contest period. Use of
Packet Cluster is permitted.
2: Low Power stations are limited 100W output or less. No limitation on High Power stations.
3: Junior stations' operator age must be 19 years old or younger,
and Seniors operators must be 70 years old or older.(For JA stations only)
4: 10 minutes rule(CQ WW method) is applied to Multi-Operator
Single Transmitter stations. The 10 minutes rule means that only one transmitter on one band is permitted during any 10 minutes period, defined as starting with the first logged QSO on a band. However, one-and only one other band may be used during any 10 minutes period if and only if the station worked is a new multiplier. This rule is applied to not only the running stations, but also to the stations searching for multipliers respectively.

◇ Power, Type of Emission and Frequencies:Within the limits of own station license.

04. CONTEST CALL
(1) CW ..... "CQ AA"
(2) Phone..... "CQ AA Contest"

05. EXCHANGE
(1) For OM stations: RS(T) report plus operators' age
For example (If operator is 25 years old): Phone.....5925, CW.....59925
(2) For YL stations: RS(T) report plus operators' age, but if the operator does not want to send her age, RS(T) report plus "00" (zero zero) can be sent.
For example (the operator is 25 years old):
Phone.....5925(or 5900), CW.....59925(or 59900)
(3) For Multi-Operator stations: RS(T) report plus the averaged age of operators, but if each operator wishes, the age of active operator can be sent.
For example (the operators are 25 and 35 years old):
Phone.....5930 for all operators
(or 5925 for 25 years old operator and 5935 for 35 years old operator),
CW.....59930 for all operators
(or 59925 for 25 years old operator and 59935 for 35 years old operator)
06. PROHIBITION ON THE CONTEST
(1) No cross band contacts is permitted.
(2) No change of operating site is permitted.
(3) For single Operator and Multi-Operator Single Transmitter entry:
Transmitting two signals or more at the same time, including cases of different bands, is not permitted.
(Except transmitting two signals to get New Multiplier under the 10 minutes rules)
(4) For Multi-Operator's entry: Transmitting two signals or more at the same time within the same band is not permitted.
(5) No operation from two sites or more for Multi-Operator's entry.
(6) No contact made through repeaters is permitted. 07. POINTS AND MULTIPLIERS
(1) For Asian stations:
① Points.....Completed contact will be scored as follows. Contact among same entities will neither count as a point nor a multiplier. Duplicate contact with the same station on same band will not count as a point.

160m band.....3 points per Asian QSO. 9 points per Non-Asian QSO.
80m band .....2 points per Asian QSO. 6 points per Non-Asian QSO.
10m band .....2 points per Asian QSO. 6 points per Non-Asian QSO.
Other bands....1 point per Asian QSO. 3 points per Non-Asian QSO.

②Multipliers.....The total number of different entities (according to the DXCC List) worked on each band.
(2) For non-Asian stations:
① Points.....Completed contact with Asian stations (excluding U.S. auxiliary military radio stations in the Far East, Japan) will be counted as follows:

160m band.....3 points
80m band .....2 points
10m band .....2 points
Other bands.....1 point

② Multipliers.....The total number of different Asian Prefixes
(according to the WPX Contest rules) worked on each band.

(3) JD1 stations.
●JD1 stations on Ogasawara (Bonin and Volcano) Islands belong to Asia.
●JD1 stations on Minami-tori Shima(Marcus) Islands belong to Oceania.

(4) Maritime Mobile Stations
For all maritime mobile stations at any location (no matter outside or inside Asia), completed contacts with only Asian stations can be counted. The total score will be published in the contest results. But, they will not be ranked. Contacts points with maritime mobile stations will be considered as same as contacts among Asian stations. But, it will not count as multiplier.

08. SCORING
(1) Multi-band
(The total of the contact points on each band) x
(The total of the multipliers on each band)
(2) Single-Band
(The total contact points on the band) x (The total multipliers on the band)

9. REPORTING
(1) Submit a summary sheet and logs of only one entry classification.
E-mail submission will be welcomed.
●E-mail submission
JARL Format or Cabrillo Format.

The E-log Reception list as following URL shows all received E-mail submission by contest. These data are automatically updated but it may take several minitues before the list is next updated.

- CW http://www.jarl.com/contest/eloglist/received-aacw.htm
- Phone http://www.jarl.com/contest/eloglist/received-aaph.htm

(2)The submission address is as follows
●E-mail submissions to:
①CW.....aacw@...
②Phone.....aaph@...

●The submission address of the mail to:
JARL, All Asian DX Contest, 170-8073, Japan
Indicate CW or Phone on the envelope.

◆Deadlines for submissions:
①CW.....July 31, 2012
②Phone.....October 31, 2012

◇ INSTRUCTIONS ON THE SUMMARY AND LOG SHEET
It is recommended to use JARL A.A. Contest Log and Summary sheet which are available from JARL HQ for two IRC and SAE. (Summary and Log are available as "PDF files" from the JARL Web site) a . Each Summary sheet must include your DXCC entity,
callsign used, entry class, multipliers by band, points by band and
total score. It should also include a signed declaration indicating that you have observed the rules and regulations of

the contest.
Multi-Operator stations must submit a list of all operators call-sign or name. b． Log sheet must contain band, date, time in UTC,
call of station worked, exchange sent, exchange received, multipliers
and QSO points. Use a separate sheet for each band.(For Single
Transmitter entry:in order of the time contacted). Multipliers should be clearly marked by entities or Asian prefixes, first time worked on each band.
10. AWARDS:
(1) For both CW and Phone, certificates will be awarded to those having the highest
score in each category in proportion to the number of participants from each entity
and also those from US CQ Zone 3, 4, and 5 in the United States.

① If the number of participants are 10 or less there will be an Award only to
the highest scorer
② From 11 to 20 ..... Awards to the highest scorer and the runner-up
③ From 21 to 30 ..... Awards to the top three
④ 31 or more ..... Awards to the top five

(2) The highest scorer among JARL members of each category in each area of
Japan,under the condition having a ranking within top half, will receive
a certificate from JARL. However,this rule doesn't apply to those who
received the highest scorer of the entity certificate.
(3) The highest scorer on each Continent of the Single Operator Multi Band
category will receive a medal from JARL and a certificate from the Minister
for Internal Affairs and Communications, Japan.
(4) The highest scorer of the Multi-Operator Single Transmitter and Multi Transmitter
category on each Continent will receive a medal from JARL.
(5) Special plaques will be awarded to the stations in the categories mentioned
in a separate page.

11.DISQUALIFICATIONS:
(1) False statements in the report.
(2) Violations of the contest rules.

12.ANNOUNCEMENT OF RESULTS:

Results will be published in the Spring, 2013 issue
of JARL News and also will be appeared on JARL's web site
(http://www.jarl.or.jp).
For those wishing to receive contest results by post, please enclose two IRC with your log.

The Contest Award will be issued to whom fulfill the certain requirements during the contest period.
The detailed information will be appeared in a separate page.

15.LIST OF ASIAN ENTITIES:

23 NOVEMBER TO 3 DECEMBER 2012
What started out to be a small local DX-pedition has developed into a multi National team effort. Our aim...To give as many deserving DX'ers Lesotho on as many bands as possible, in CW SSB and RTTY.
We will be running 3 good stations 24/7 and have some really good operators.
See you all in the Pile-ups.

Background to Lesotho
Lesotho (i/lɨ'su:tu:/ li-SOO-too), officially the Kingdom of Lesotho, is a landlocked country andenclave, completely surrounded by its only neighboring country, the Republic of South Africa. It is just over 30,000 km2 (11,583 sq mi) in size with a population of approximately 2,067,000.[1] Its capital and largest city is Maseru. Lesotho is a member of the Commonwealth of Nations. The nameLesotho translates roughly into the land of the people who speak Sesotho.[4] About 40% of the population live below the international poverty line of US $1.25 a day.

Band Plan
160m
CW 1.820 up SSB 1.840 up
80m
CW 3.520 up SSB 3.780 up
40m
CW 7.026 up RTTY 7.038 up SSB 7.160 up
30m
CW 10.105 up RTTY 10.138 up
20m
CW 14.020 up RTTY 14.085 up SSB 14.185 up
17m
CW 18.075 up RTTY 18.102 up SSB 18.150 up
15m
CW 21.020 up RTTY 21.085 up SSB 21.220 up
12m
CW 24.895 up RTTY 24.922 up SSB 24.945 up
10m
CW 28.015 up RTTY 28.080 up SSB 28.480 up
NO 60m - Licence does not cover it-Sadly!
This is HF Dx Pedition No 6m- Sorry!

QSL Information Page

NO Bureau qsl's will reach us!!
DIRECT REQUESTS
LESOTHO DX PEDITION 2012
P O BOX 29169
SUNRIDGE PARK
6008

SOUTH AFRICA
To cover cost we request a donation of $3 with your QSL card. Please no IRC as it is difficult to convert at the post office.
OQRS system will also be implemented just after the expedition.
LOGS WILL BE UPLOADED TO LOTW WITHIN 6 MONTHS AFTER THE EXPEDITION HAS BEEN COMPLETED.

OM Joni,
Saya catat/logging QSO utk DDXCC ini menggunakan format excel yg dibuat oleh JA1WOO (cmiiw) yg sudah urut sesuai prefix yg lalu dilink ke format ARRL sekalian dihitung jumlah entitynya.

Nah, waktu kirim aplikasinya via online saja dan data utk aplikasi saya impor dari data yg saya buat.
Memang sempat ada error, tapi akhirnya bisa direvisi karena hanya tgl/bulan saja yg salah.

Gak perlu kirim aplikasi tertulis via pos.

Hi Friends,

Many thanks to YB4IR, YB7XO, and YB8BYL, YB9WZJ, and banyak lagi
YB0/YB1/YB2/3 yang sudah on air
dan ber-QSO dengan saya untuk Diamond DXCC tahun 2012 ini.

Kalau saja ada YB/YC6 untuk Danau Toba Award masih kurang 4, dan YB3/YC3
dari Surabaya untuk Pahlawan Award,
saya masih kurang juga kurang jelas berapa lagi yg harus dibutuhkan, mari
kita coba sked, Solar Flux meningkat sampai awal September ini, jadi
membantu propagasi untuk YB Land to Pantai Timur USA.

73, Steve, W2FB

QSL Card Info:
1.Direct request via surface mail post.

Mail your qsl card and qso details to :

wim on4cit/5v7th
Waaltjes 8
3920 Lommel
Belgium

i can accept US$ and Euro's.
Please No IRC's. Funds+IRC is oké.
Do not forget to include a return air mail enveloppe with your adres.

include with your QSL Card
By direct post (in europe) = minimum 2 US$ or 1,70 Eur
By direct post (outside europe) = minimum 3 US$

2.QSL VIA BUREAU.
Mark your QSL card VIA: ON4CIT .
Notice that it sometimes takes a long time before you receive free 5v7th qsl via bureau.

3. LOTW
I wil be uploading all qso's to LOTW later this year.
This could take a wile because direct qsl is priority.

9M4SLL: LIMITED GEAR, OFF THE CHARTS PERFORMANCE!
Reviewing the summer of 2012 from a DX perspective requires us to talk about the 9M4SLL DXpedition to Pulau Layang Layang, Spratly Islands (AS-051) between August 7th and 13th. It hasn't been the only activation from that archipelago this year, but the light or "limited" formula chosen for this "radioadventure" consists of two operators (John, 9M6XRO, andSteve, 9M6DXX) with one station each and only vertical antennas - making it, along with the results achieved, a natural subject for discussion in the DX community. So, once the starring characters of 9M4SLL were back home, we chatted with Steve Telenius-Lowe, 9M6DXX, about the operations from the South China Sea. Guess what… once again, the need for a big antenna was overshadowed by the facts.
Since 1965, the year of the very first activation, you were the 25th team of OMs who have activated the Spratly Islands. Only 23 havesucceeded in thisundertaking and it doesn't look like an easyfeat. How did your idea ofactivating Spratly see thethe light of day, and what –in particular- made it a reality?
It is true that in the past it has been difficult and even dangerous to activate the Spratly Islands. The situation became easier in the early 1990s, when Malaysia opened a dive resort on the Layang Layang Island (formerly called Swallow Reef). Most of the operations from the Spratly group since then have been from Layang Layang.
As two Malaysia licensed OMs, I think it wouldn't have been toodifficult to obtain authorizations and licensing, or is this wrong?
Licensing is relatively easy. Although both John, 9M6XRO, and I already had valid Malaysian licences, for this operation we wanted a separate licence document which had "Pulau Layang Layang" written on it so that there could be no doubt at all by the ARRL DXCC desk that we were properly licensed to operate from this particular island. Here we would like to thank BARC, the Borneo Amateur Radio Club, of which John and I are both Life Members, and in particular BARC President, Hamid, 9W6MID, who applied for a group special event licence for this operation. We were granted the callsign 9M4SLL.
However, because Layang Layang is governed under the Malaysian Protected Area and Protected Places Act of 1959, in addition to the amateur radio licence it is also necessary to get separate operating permission from the Malaysian government, and this can be more difficult to obtain.
You decided for a "limited" equipment solution: vertical antennasonly and two 400 watt stations. Was this imposed due to the logistical situation or was this a deliberate choice?
There is a weight restriction on the aircraft that fly between Kota Kinabalu (9M6) and Layang Layang. Depending on the number of passengers, sometimes a small plane such a Twin Otter is used, so we planned to take the minimum amount of equipment while still having two stations, each with linears.
The choice of vertical antennas was deliberate. For a location where it is possible to mount the antennas very close to the ocean it is now becoming accepted that a simple vertical antenna will work much better than any horizontal beam, unless the beam is mounted very high above ground, which is usually impossible for a portable DXpedition.
One area where we saved on weight was with the coaxial cable we used. A 100m roll of 'Aircell 5′ coax weighs only 3.8kg, yet it has lower loss than RG-58 or even RG-8X. A new roll of 'Aircell 5′ was cut into lengths of 30m and 70m and this is what we used to feed the two verticals.
While heading to Spratly, did you happen to think about ourcolleagues who, in 1983, lost their lives while trying to reach the Archipelago?
Yes, we have talked about this. In fact I met one of the survivors of that tragedy a year or two after the event and he was able to describe his experiences personally to me, so I have never forgotten it. However, the situation these days is very different as there are charter flights directly to Layang Layang island, and a comfortable resort there when you arrive.

You already have been a member of the 9M0C team, which operated from Layang Layang in 1998. What main differences do you see between your two experiences on Spratly and which of those two gave you the most intense feelings, from a radio and strictly personal standpoint?
The island itself has changed since 1998! More land has been reclaimed from the sea and the aircraft runway has been extended to allow larger planes to land. Trees that had only recently been planted in 1998 are now mature and in some cases quite tall. In 1998 there were millions of sea birds nesting on the island; today there are very few. A 'bird island' has been created in the lagoon to allow the birds to nest and roost without being disturbed by the planes landing and taking off several times a week.
The two DXpeditions were also quite different. 9M0C was a bigger group and made 65,524 QSOs, the largest number from a single operation from Spratly (a record that still stands). Because there were more operators, there was more relaxation time and a chance to get a good night's sleep unless you were operating during the night shift, in which case you could sleep during the day. The 9M4SLL operation was much more intense: with just two operators and two stations we tried to keep both stations on the air for as long as possible each day. Both expeditions were equally enjoyable though!
Now, to DXpedition results: 18,227 QSOs is your final number. Did this figure meet your expectations?
It more than met our expectations. I have always reckoned that 1000 QSOs per station per day is a good target for a DXpedition. But on this trip, thanks to a combination of an almost perfect antenna location with some good propagation – and putting in some long operating hours! – we exceeded that target by almost 50%. The 18,227 QSOs were made in 6 days and 7 hours of operating, although by the first night we only had one antenna working, so we did not have two stations on the air until well into the second day of operations.
Which part of the world experienced a better window from Layang Layang? I guess that anyone reading your stats can't explain the only 75 contacts with South America. Was that hard to achieve from there? For example, Brazil is a country where we know there are a lot of DXers.
The final statistics for our DXpeditions, in terms of QSOs number and percentage, are as follows:

Africa	121	0.7%
Asia	5839	32.0%
Europe	9609	52.7%
North America	2281	12.5%
Oceania	302	1.7%
South America	75	0.4%
Totals	18,227	100%

At first this low figure for South America might seem surprising, but it can be explained. The antipodes of Layang Layang are in Brazil and often the PY / PT stations had good signals, but other South American countries were heard only very infrequently. But as we were using omnidirectional vertical antennas we cannot be accused of never beaming to South America!
But look now at the figure for Oceania. We made only 302 QSOs with Oceania (almost all VK, ZL or KH6). Australia is approximately the same distance from Spratly as is Japan, and we made over 5800 QSOs with Asia (mainly JA), so where were all the VK DXers? Given that it is an easy path to VK, but a very difficult one to South America, it is perhaps not really surprising that there are so few QSOs with that continent.
How hard was it, being just two operators, to manage "extendedoperational shifts," such as the ones you completed during the seven day period for 9M4SLL?
We had some sleepless nights. Most days we would operate through the night, until at least 3.00am or 4.00am local time. On one occasion John, 9M6XRO, operated all day and then operated the whole night, until after sunrise, with short breaks only for food. We were lucky with propagation, with 12m and 15m staying open until 2.00am local time (1800UTC), 17m staying open till 4.00am (2000UTC), and 20m sometimes open the whole night. Against that, though, all the bands were very quiet from about an hour after sunrise until about 4.00pm (0800UTC). It was still possible to work JA, HL etc on 17m and 15m during these daylight hours, but the rates were slow and so after a couple of days of late nights operating we tended to sleep late during the morning and start operating seriously after lunch time.
1190 QSOs make upyour "score" on RTTY, which, in my opinion, is not bad. Ifyou were going to doLayang Layang

again, would you consider operating PSK, along with other digital modes?
Probably not. PSK counts the same as RTTY for DXCC but is much slower, so we would probably just stay with RTTY. Of course if we had an operator who was particularly keen on using PSK we would not rule it out, but it is not really a major DXpedition mode.
Was there a QSO or band opening during this DXpedition which you feel particularly impressive making the whole experience “worth the travel?“ What stands out in your mind the most from this experience?
Yes, there was. I can’t speak for John, but for me it was a great 12m SSB opening one night. Don, N1DG, had alerted me to the fact that there was sometimes a 12m long-path opening from the East Coast of USA and Canada to South-East Asia, late at night local time when you might have thought the band was ‘dead’.
I had previously been on 12m during the day, but the band apparently died around 0945UTC (just before sunset). I went back on 12m at 1515UTC (11.15pm local time) and was surprised to find it wide open to Europe. And I mean wide open – some of the European signals were S9+20dB. The pile-up was just enormous.
The first North American – KK9DX – came though at 1556UTC, but although I regularly took a stand-by for North or South America there was nothing (except S9+ Europeans!) for almost another hour, when PS8CC made it through the pile-up at 1650UTC. A little later the band opened to the East Coast, and some W1s and VE1s, including N1DG, were worked between 1710 and 1815.
The long-path North Americans were mostly extremely weak, not even S1, whereas many of the Europeans were still S9, so I was grateful that the European pile-up was generally well-behaved and allowed me to listen for, and work, the very weak North Americans without breaking in on top. Later still the opening moved to W2, W3, and W4 before the band finally faded out at 1845UTC (2.45am local time!).
In three and a half hours I worked 560 QSOs and although the overall rate of 160 Q/hr was not particularly high I was pleased because the European pile-up was enormous (which actually slows down the rate), and yet it was still possible to work many weak North Americans over a very difficult path.
John went on 12m CW the following night to try to work more North Americans, but although he also had very good propagation to Europe he did not work a single North American on that night – I was just very lucky with conditions the previous night.
Do you think that DXpeditioning could offer an interesting base for the formation of younger operators? From that perspective, do you think organizationss or radio clubs should encourage more (even financially) young operators to engage in DXpeditions, maybe at first not to the most sought after entities, but certainly to some of the more interesting ones?
Yes indeed, and this is already being done. I am a founder member of the UK-based ‘Five Star DXers Association’ (which incidentally was formed after the 1998 9M0C Spratly DXpedition). Our next big DXpedition was D68C (Comoros, 2001) in which we sponsored Mark, M0DXR, to join us on the DXpedition. Mark has gone on to do a number of DXpeditions of his own and has become one of the UK’s top contest operators on both SSB and CW. I know other major DXpeditions have also sponsored young operators in a similar way.
But young operators in Europe are fortunate as there are many interesting DX locations which are easy to get to and which need not be expensive. For example, from the UK, GD, GJ and GU are all within easy reach, while from France or Italy there are 3A, TK, IS0 and perhaps even places like T7, HV and 1A which are relatively inexpensive to visit. And then there are also numerous IOTA locations all over the world which make interesting DXpedition locations. So I would encourage young operators to organise their own DXpeditions to places such as these, with or without more experienced (i.e. older!) operators, and gain experience that way.http://www.dxcoffee.com/eng/2012/08/29/9m4sll-light-gear-heavy-results/

Hi Steve

Senang bisa membantu Steve dengan 1 kredit YB9 west Papua (PK6 waktu itu) dalam Diamond DXCC.
Sorry ya, sudah berkali-kali Steve balik YB land dan saya belum ada kesempatan untuk EYE BALL.
Semoga kesempatan berikutnya. mungkin tahun depan :)

de yb9wzj

Dari: Stephan Busono <sbusono@...>
Judul: [YBDXC_News] Diamond DXCC YB4,YB7,YB8 THANK YOU
Kepada: YBDXC_News@yahoogroups.com
Tanggal: Rabu, 29 Agustus, 2012, 10:36 PM

Hi Friends,

Many thanks to YB4IR, YB7XO, and YB8BYL, YB9WZJ, and banyak lagi YB0/YB1/YB2/3 yang sudah on air
dan ber-QSO dengan saya untuk Diamond DXCC tahun 2012 ini.

Kalau saja ada YB/YC6 untuk Danau Toba Award masih kurang 4, dan YB3/YC3 dari Surabaya untuk Pahlawan Award,
saya masih kurang juga kurang jelas berapa lagi yg harus dibutuhkan, mari kita coba sked, Solar Flux meningkat sampai awal September ini, jadi membantu propagasi untuk YB Land to Pantai Timur USA.

73, Steve, W2FB

DXNL 1795 - Aug 29, 2012
DX Newsletter

5B, CYPRUS, AS-004
Nick,G3RWF, will be active as 5B/G3RWF while on holiday in September.
QSL via homecall.

9G, GHANA
Emil,ZS6EGB, is working in Ghana again and plans to become active as
9G5ZS after his holiday using an Icom 706mkIIG, a HyGain vertical and
dipoles for the lowbands. QSL via homecall.

C2, NAURU, OC-031
Yoosuke "Yuki",JH1NBN, will be QRV as C21BN (and maybe also with a
special call) from Nauru (OC-031) from Sep 3-10. He will work with
100 watts using simple antennas on 40m-10m. QSL via homecall.

CT3, MADEIRA, AF-014
Helge,CT9/DG3FAW, Knut,CT9/DJ6KS, and Matthias,CT9/DJ8OG, plan to show
up from Madeira (AF-014) in SSB/RTTY/PSK on 80m-10m (maybe also 6m)
from Sep 4-11. DJ8OG will take part in the WAE SSB Contest using CR3L
as single op/high power. QSLs via homecall, CR3L via DJ6QT.
See also: http://www.cr3l.de

E5, NORTH COOK ISLANDS, OC-124
Andy,AB7FS, is QRV as E51AND from Palmerston (OC-124) for the next
three weeks. Listen for him on 40m and 20m and in the ANZA net on
14183 kHz after 0500 UTC. QSL via homecall, unfortunately only direct.

G, ENGLAND, EU-005
The "Kent Weald Radio Club" is working as GB1HA from the Headcorn
Aerodrome in Kent to support the air ambulance and other local
charities until Sep 2. They are demonstrating amateur radio on HF
and VHF to any visitors. QSL via bureau.

The "Ballymena Amateur Radio Club" celebrates the 150th anniversary
of the West Church in Ballymena by activating GB150WCB on Sep 1.
QSL via bureau.

HA, HUNGARY
The "Debrecen Radio Sports Club" celebrates the 20th Debrecen Civis
Amateur Radio Meetingn by using the special call HG20CRT until Dec 31.
The club members are working in all modes on all bands.
QSL cards will be sent after the activity via bureau.
Direct QSLs via HA0KA.

I, ITALY
The special call II3PAN will be used from Sep 1-20 to mark the
30th anniversary of the adoption of the MB339 aircraft by the National
Aerobatic Patrol (the Tricolour Arrows aerobatic team of the Italian
Air Force). QSL via IV3IUM.

Fabio Bonucci,IK0IXI, will be active as II0FIST to celebrate the
silver jubilee of the FISTS CW Club (1987-2012) from Sep 2-8.
QSL via IK0IXI. See also: http://www.fists.co.uk

KH0, NORTHERN MARIANAS, OC-086
The 19 year old students Yuzo,JQ2WTT (KH0XW), and Seiya "Sam",
JE1XUZ (KH0XH), will be QRV from the Saipan BBQ Contest Club (OC-086)
from Aug 29 until Sep 3. They will join the All Asian DX SSB Contest
on Sep 1/2 as AH0BT. QSL for AH0BT via 7L1FPU.
All other QSLs via homecalls, unfortunately only direct.

KH8/S, SWAINS ISLAND, OC-200
The team will be arriving on Swains Island (OC-200) on Sep 5 and leave
on Sep 19. They will operate as NH8S with seven stations in CW, SSB
and RTTY from 6m-160m (incl. 60m) around the clock for 14 days.
Great emphasis will be put in working European stations. Like all
major DXpeditions today this is a very expensive trip with total costs
estimated to be 200,000 US $. Each member has paid 8000 US $ plus his
costs to get to American Samoa. Donations are welcome via our website.
QSL via bureau/OQRS/LoTW or direct via AA4NN, Swains Island DXpedition,
PO Box 5005, Lake Wylie, SC 29710, USA.
Their website is: http://www.nh8s.org

LZ, BULGARIA
Nasko,LZ1YE, celebrates his 40th anniversary on air this year. He will
use the special call LZ40YE on all bands until the end of December.
QSL via homecall.

OE, AUSTRIA
The special club stations OE2XXM and OE5XXM are working in SSB mainly
on 80m/40m and on 2m/70cm from the International HAM meeting in Gosau
using the special ADL 553 every year from July 1-31 and from Sep 1-30.
See also: http://www.qrz.com/db/oe2xxm or http://www.qrz.com/db/oe5xxm
QSLs via bureau.

ON, BELGIUM
The clubstation ON4OSA, member of the Belgian Amateur Union celebrates
it's 20th birthday of the weekly news transmissions for radioamateurs.
The special event station ON20OSA is active until the end of the year.
QSL via bureau, LoTW, eQSL.

SV9, CRETE, EU-015
Uli,DJ9XB, will spend his holidays on Crete (EU-015) in September and
plans to become active as SW9XB. He will be active also in the upcoming
CQWW DX RTTY Contest (Sep 29/30). QSL via homecall, LoTW.

TR, GABON
    Alain,TR8CA, is back in Gabon and usually can be found in CW on 15m
    around 1600 UTC. QSL via F6CBC, unfortunately only direct.

UA, RUSSIA
    The new award program "Gallery of the Great Genius of Russia" (GGGR)
    was launched in Russia. following special event stations will be active
    between Sep 1 and Nov 30:
        R15GGGR Op: RK1AN
        R14GGGR Op: RZ1AWZ
        R21GGGR Op: UA2FDM
        R45GGGR Op: UA4LAQ
        R65GGGR Op: RU6BS
        R75GGGR Op: UA6MM
        R71GGGR Op: RK6AH
    All QSLs via UA6MM.

V5, NAMIBIA
    Hans,DF2UU, is working as V5/DF2UU in CW/SSB on 6m-160m until Sep 16.
    He will sign V55V in the SSB Fieldday (Sep 1/2) and in the WAE SSB
    Contest (Sep 8/9). QSL for V5/DF2UU via homecall, V55V via DJ8VC.

V6, MICRONESIA, OC-078
    Yoshi,JJ8DEN, is QRV as V63PR from Falalop Island (Ulithi atoll/OC-078)
    working in CW, RTTY, PSK31 and JT65A on 160m-10m until Sep 3.
    QSL via homecall, unfortunately only direct.

YA, AFGHANISTAN
    Ilian,LZ1CNN (ex YI9LZ), is active on the air as T6LG in SSB and CW
    on all bands from September until February 2013. QSL via LZ1ZF.

ZD9, GOUGH ISLAND, AF-030
    Gerard,ZS6KX, aka ZS7KX from the SANAE 4 base in Queen Maude Land in
    Antarctica, is now staying on Gough Island (AF-030) starting in Sep.
    He asked for the callsign ZD9KX.

DXpedition stories: The DXItalia Web page provides interesting DXpedition
    stories with pictures at: http://www.dxitalia.it

PIRATES: ZD9KN who was announced in the last DXNL, is a Pirate! There is no
    one named Paul on the island and the callsign has not been issued.
    See also: http://forums.qrz.com/showthread.php?358481-ZD9KN-is-a-
    Pirate!-By-W3UR-Bernie-McClenny-The-Daily-DX
    2E0HKM, 2O0HKM, HV0E, HV1PBH, IZ0VHS and MJ0HKM are also Pirates.

SILENT KEYS: QST Managing Editor Joel P. Kleinman, N1BKE, of Meriden, CT,
    died from injuries received during a house fire. He was 64. Kleinman
    was responsible for the coordination, organization, control and
    completion of all aspects of QST's editorial content since 2001.
    Kleinman's wife Jayne survived the fire, but is currently in the
    intensive care unit of a local hospital. Kleinman came to ARRL in 1976.
    "Joel was obsessed with making QST the best Amateur Radio magazine it
    could be, but he pursued that obsession with uncommon dignity and

kindness," said QST Editor Steve Ford, WB8IMY.
"With the passing of Joel Kleinman, N1BKE, we have lost not only a respected professional colleague, but also a friend," said ARRL President Kay Craigie, N3KN. "The shocking circumstances of his death sharpen the sadness we feel."
"Joel was a gifted writer and editor," said ARRL Chief Executive Officer David Sumner, K1ZZ. "Amateur Radio is the richer today because he chose to devote his talents to the work of the ARRL."
The DARC sent condolences to the ARRL. Everybody is remembered of the former chairman of the DARC Committee for DX and HF Contesting Dr. Lothar Wilke,DL3TD, recently elected to the CQ Contest Hall of Fame who died under similar conditions last year.
The ARRL is collecting condolence messages to forward to Joel's family. If you would like send a message, please e-mail it to news@...
Other radio friends who passed away recently are:
Victor D. Poor, W5SMM, Araldo Ramundo,I8RAR, Enrico Lombardo,IT9TDJ, Thomas L. Hise,NC0O, Marilyn S. Carpenter,N8OAM, Finlay Bruce,ZL4HI, Helio M. de Carvalho,PY2BBO, and George Varvitsiotes,K6SV.
Our condolences and sympathy are with their families and friends.
We do not want to be sad that we lost him, but grateful that we could get to know him as a radio friend. We will always keep him in memory.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Sep 1 Russian RADIO RTTY WW Contest
Sep 1 CW open Competition (part 1+2)
Sep 1/2 JARL All Asian DX Contest
Sep 1/2 IARU Region 1 Fieldday
Sep 1/2 IARU Region 1 145 MHz September Contest
Sep 2 CW open Competition (part 3)
Sep 2 DARC 10m Digital Contest Corona
Sep 3 QCWA QSO Party

A word to the All Asia DX Contest: There is no law against giving a brief RST to a calling FD station. Usually the short report is given faster than explanating the participation in the AA-DX Contest and you are working only Asian stations. A short report means Ham Spirit and the Fieldday station is glad about a new multi.

IOTA compiled by Klaus, DL7UXG (e-mail: iota@...)

Island activities:
ILLW review: The "International Lighthouse Lightship Weekend 2012" took place on Aug 18/19. You can find the first impressions and photos on:
http://illw.net/index.php/reports-2012

AF-016, FR, Reunion Island: Michael,DF8AN, is visiting Reunion Island (DIFO FR-001, WFF FFF-011, WLOTA 1812) from Sep 2-10 and plans to show up as FR/DF8AN mainly in CW. QSL via DF8AN.

AF-090, 5R, Madagascar's Coastal Islands East: Moise,F4EZG, will be QRV in SSB on 40/20/15/10m signing 5R8VE from Nosy Alanana Island (WLOTA 0888) from Sep 1-3. QSL via F4EZG.

AS-013, 8Q, Maldive Islands: Juergen,OE4JHW, plans a mini DXpedition to the Lhaviyani atoll from Sep 2-14. Listen for 8Q7OE mainly in SSB and BPSK on 40m-10m (BPSK during the night hours). QSL via OE4JHW.

AS-149, R0F, Sakhalin's Coastal Islands: Gennady,R3BY, Max,RU5D, and Oleg,R7LP, are working in SSB and CW on 40-10m signing RI0FM from Moneron Island (RR-16-01, RDA SL-16) between Aug 28 and Sep 2. QSL via R3BY (bureau/direct).

R10RLHA is working from the lighthouse (RR16-01, ASR-047, LH-0006) on Moneron Island on Aug 30/31. QSL via RA1QY (bureau/direct).

EU-025, IT9, Sicily: Members of the Arcibessi DX & Contest Group will be QRV as II9P in the All Asian DX SSB Contest. QSL via IT9CHU, LoTW. See also: http://ii9p.com

EU-032, F, Poitou-Charentes Region group: Ben,ON5GQ, will spend his holidays on Ile d'Oleron (DIFM AT-025, WLOTA 1369, DPF 19, DDFM17) and will be active as F/ON5GQ on HF from Sep 1-14. QSL via ON5GQ. See also: http://www.on5gq.be

EU-146, PA, Zuid Holland/Zeeland Province group: PA6FUN will take part in the upcoming IARU Region 1 145 MHz September Contest from Schouwen Duiveland between Aug 31 and Sep 2. QSL via PE1GUR (bureau/direct).

EU-165, IM0, Sardinia's Coastal Islands: Riccardo,IM0/IZ5JMX, will be active from San Pietro Island working only in SSB on 40m-10m from Sep 2-14. QSL via homecall.

EU-171, OZ Jylland North Group: Members of the Dutch Contest Group (PI4DX) will be QRV in holiday style signing OV2T from Jutland in SSB and CW (maybe also some RTTY) between Aug 29 and Sep 4.
They will join the team of OZ5GX/p during the IARU Region 1 Fieldday. QSL for OV2T via bureau or direct to PA0ABM. QSL for OZ5GX/p via OZ5GX.

NA-143, W5, Texas State East (Matagorda to Jefferson County) group: Joe,K5KUA/5, will once again be active from Galveston Island (NA-143, USi TX001S) mainly in SSB on 80m-10m between Aug 31 and Sep 3. If time permits he will make also some CW QSOs. QSL via K5KUA.

NON IOTA: The TC Special Wireless Activity Team and the Giresun Radio Amateurs and Nature Sports Club will be active as TC6ILH from Inebolu lighthouse (WEBLOTA 6, Loc KN61vx) between Aug 30 and Sep 2. QSL via TA1HZ (bureau/direct). See http://www.tcswat.org/awards/WEBLOTA

TC2AL, Amasra Lighthouse: Another activity by the TC Special Wireless

Activity Team and the Giresun Radio Amateurs and Nature Sports Club
is planned as TC2AL from Amasra lighthouse (WEBLOTA 7, Loc KN61es)
on Sep 1/2. QSL via TA1HZ (bureau/direct).
See also: http://www.tcswat.org/awards/WEBLOTA

The Radio Club du Bassin d'Arcachon (F5KAY) will be active as TM5O from
Ile aux Oiseaux (DIFM AT-028) on Sep 1/2. Two stations will be QRV on
80m/40m/20m in SSB, CW and digital modes. QSL via F8IHE.

FFF: The radio club F8KGH will be active from the national park FFF-002 on
HF/VHF between Aug 31 and Sep 2. They will take part also in the
IARU Region 1 145 MHz Contest. QSL via F8KGH (bureau/direct).

YOFF: YP7P/YR7WFF will be QRV from the area YOFF-373 in SSB, CW and digital
modes on HF and VHF between Aug 31 and Sep 2. Their QTH is a mountain
with a height of 2.228m (Loc KN15ti). QSL via YO7MGG (bureau/direct).

Lighthouse activities

OM Gun,
Saya gunakan format dari ARRL yang dipermudah utk pengisiannya oleh JA1WWO.
Di sheet "Data QSO" kita masukkan callsign, date&time, band, mode - lalu point otomatis terisi.
Nah, pengisian date & time ini yg sempat bermasalah karena hasilnya tertulis ########, sedangkan di format ARRL aslinya pada kolom Date&Time tertulis :
40969,68819
Waktu data ini saya masukan ke form aplikasi online ternyata jadi error (ya iyalah wong isinya bukan date/time).

Tapi akhirnya data masuk juga cuma tgl.nya yg tercantum adalah tgl saya masukan aplikasi = 27/08/2012 sehingga terpaksa satu per satu saya revisi. HI.
Sampai saat ini belum lihat hasilnya, apakah gak bermasalah di DXCC Desk.

Saya menggunakan format excel dari ARRL lebih mudah, menurut saya sich. Sebab masing2 tinggal kebiasaan aja. Kalau format jam saya pakai hanya hh:mm, mudah2an makin banyak yang klaim DDXCC.
Mumpung masih ada waktu.
Tnx YB1LZ

OM Djoko,
Saya juga kirim via online, bukan cuma hemat waktu tapi juga hemat biaya. HI.
Waktu saya kirimkan sesuai hitungannya log ARRL sih ada 142 entities - tapi saya lihat koq ada beberapa callsign yg dihitung jadi 2 entities. cmiiw

Semoga aja di sisa waktu tahun 2012 ini bisa nambah lagi, minimal bisa 150 entities. HI.

Judul: Re: Bls: [YBDXC_News] Fw: [orari-news] Diamond DXCC

OM Hen, waktu pertama saya sempat coba dengan exel format dari arrl.
saya mengisi tanggalnya seperti berikut: 2012-03-25-013000
YYYY-MM-DD-hhmmss

tapi kemudian setelah melihat di web dan ada online application dan
setelah saya coba ternyata lebih mudah menggunakan online karena kita
tidak perlu lagi mengirimkan aplication kita ke awards manager ARRL.
keuntungannya dari segi waktu.

dari tanggal saya submit sampai persetujuan hanya butuh 4 hari saja,
jika ada yang kurang pass dalam penulisannya mereka akan email dan
koreksi.
Setelah aplikasi kita disetujui (minimal 100 entities) kemudian kita
tetap dapat melanjutkan perburuan entities untuk Diamond DXCC sampai
akhir program.
untuk dapat endorsement 125, 150, 175, 200, and 225. At the end of
the Diamond DXCC Award year, sometime in February, 2013

Demikian informasi yang dapat saya sampaikan.

tnx 73

Om Hendro

Selamat ya, 142 DXCC dari 230an DXCC untuk DDXCC

de yb9wzj

Tanggal: Kamis, 30 Agustus, 2012, 7:53 PM

OM Djoko,
Saya juga kirim via online, bukan cuma hemat waktu tapi juga hemat biaya. HI.
Waktu saya kirimkan sesuai hitungannya log ARRL sih ada 142 entities - tapi saya lihat koq ada beberapa callsign yg dihitung jadi 2 entities. cmiiw

Semoga aja di sisa waktu tahun 2012 ini bisa nambah lagi, minimal bisa 150 entities. HI.

Judul: Re: Bls: [YBDXC_News] Fw: [orari-news] Diamond DXCC

OM Hen, waktu pertama saya sempat coba dengan exel format dari arrl.
saya mengisi tanggalnya seperti berikut: 2012-03-25-013000
YYYY-MM-DD-hhmmss

tapi kemudian setelah melihat di web dan ada online application dan
setelah saya coba ternyata lebih mudah menggunakan online karena kita
tidak perlu lagi mengirimkan aplication kita ke awards manager ARRL.
keuntungannya dari segi waktu.

dari tanggal saya submit sampai persetujuan hanya butuh 4 hari saja,
jika ada yang kurang pass dalam penulisannya mereka akan email dan
koreksi.
Setelah aplikasi kita disetujui (minimal 100 entities) kemudian kita
tetap dapat melanjutkan perburuan entities untuk Diamond DXCC sampai
akhir program.
untuk dapat endorsement 125, 150, 175, 200, and 225. At the end of
the Diamond DXCC Award year, sometime in February, 2013

Demikian informasi yang dapat saya sampaikan.

tnx 73

djoko

SB DX @ ARL $ARLD036
ARLD036 DX news

ZCZC AE36
QST de W1AW
DX Bulletin 36 ARLD036
From ARRL Headquarters
Newington CT August 30, 2012
To all radio amateurs

SB DX ARL ARLD036
ARLD036 DX news

This week's bulletin was made possible with information provided by DH2PC, NC1L, QRZ DX, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

MADAGASCAR, 5R. Moise, F4EZG will be QRV as 5R8VE from Nosy Alanana Island, IOTA AF-090, from September 1 to 3. Activity will be on 40, 20, 15 and 10 meters using SSB. QSL to home call.

MALDIVES, 8Q. Hamad, 8Q7HA has been active on 17 meters using SSB around 1700z. QSL via 9K2HS.

NAURU, C2. Yuki, JH1NBN will be QRV as C21BN and possibly with another special call from September 3 to 10. Activity will be on 40 to 10 meters. QSL to home call.

MADEIRA ISLANDS, CT3. Helge, DG3FAW, Knut, DJ6KS and Matthias, DJ8OG will be QRV as CT9/home calls from September 4 to 11. Activity will be on 80 to 10 meters, and possibly 6 meters, using SSB, RTTY and PSK. DJ8OG will be QRV as CR3L in the upcoming WAE SSB contest. QSL all calls to home calls and CR3L via DJ6QT.

THAILAND, HS. Dennis, K7BV will be QRV as E2E in the All Asian SSB DX contest and outside the contest as HS0ZKS. QSL via operator's instructions.

ITALY, I. Members of the Arcibessi DX and Contest Group will be QRV as II9P from Sicily in the All Asian DX SSB contest. QSL via IT9CHU.

DJIBOUTI, J2. Christian, F5MBF is QRV as J28NC while here for two years. Activity is on 80 to 10 meters using mostly CW with some SSB. QSL via operator's instructions.

SVALBARD, JW. Erik, LA2US is QRV as JW2US from Bear Island, IOTA EU-027, until November 30 while on work assignment at a meteorological station located about 50 meters from Tromso University. He is generally active on 40, 30 and 20 meters. QSL to home call.

MARIANA ISLANDS, KH0. Yuzo, JQ2WTT and Seiya, JE1XUZ are QRV as KH0XW and KH0XH, respectively, from Saipan, IOTA OC-086, until September 3. They will be QRV as AH0BT in the All Asian DX SSB contest. QSL AH0BT via 7L1FPU and all others direct to home calls.

SWAINS ISLAND, KH8. A large group of operators will be QRV as NH8S from September 5 to 19. Activity will be on 160 to 6 meters, including 60 meters, using CW, SSB and RTTY with seven stations active around the clock. QSL direct to AA4NN.

DENMARK, OZ. Members of the Dutch Contest Group are QRV as OV2T from Jutland Island until September 4. Activity is holiday style on the HF bands using SSB, CW and possibly some RTTY. They will also take part in the OZ5GX/p operation during the IARU Region 1 Field Day. QSL OV2T via PA0ABM and OZ5GX via operators' instructions.

FRANZ JOSEF LAND, R1/F. Eugene, RI1FJ has been QRV on 20 meters using CW around 0330z. QSL via UA2FM.

GABON, TR. Alain, TR8CA is usually QRV on 15 meters using CW around 1600z. QSL direct via F6CBC.

EUROPEAN RUSSIA, UA. Special event station R1150I will be QRV from September 2 to 9 in celebration of the 1150th anniversary of the Izborsk Fortress. QSL via bureau. In addition, a number of stations will be QRV with the suffix SRR from September 4 to 13 in celebration of the 10th anniversary of IARU membership of the Soyuz Radiolyubitelej Rossii. Some of these stations will operate in the All Asian SSB DX contest and the upcoming WAE SSB contest. QSL via operators' instructions.

NAMIBIA, V5. Hans, DF2UU is QRV as V5/DF2UU until September 16. Activity is on 160 to 6 meters using CW and SSB. He will be active as V55V in the IARU Region 1 SSB Field Day and the upcoming WAE SSB contest. QSL V5/DF2UU via home call and V55V via DJ8VC.

MICRONESIA, V6. Yoshi, JJ8DEN is QRV as V63PR from Falalop Island, IOTA OC-078, until September 3. Activity is on 160 to 10 meters using CW, RTTY, PSK31 and JT65A. QSL direct to home call.

THIS WEEKEND ON THE RADIO. The All Asian DX Phone Contest, RSGB SSB Field Day, IARU Region 1 SSB Field Day, DARC 10-Meter Digital Contest, Russian World Wide RTTY Contest, QRP CW Fox Hunt, NCCC Sprint CW Ladder, Wake-Up. QRP CW Sprint, CWOps CW Open, Colorado QSO Party, AGCW Straight Key CW Party and the Tennessee QSO Party will certainly keep contesters busy this upcoming weekend. The MI QRP Labor Day CW Sprint and QCWA QSO Party are scheduled for

September 3. The ARS Spartan CW Sprint is scheduled for September 4. Please see September QST, page 79 and the ARRL and WA7BNM Contest websites for details.

http://forums.qrz.com/showthread.php?346468-Malaysian-amateur-radio-league-(-marl-)

Malaysian amateur radio league (marl)
Malaysian Amateur Radio League (MARL) has been registered yesterday - May 16th, 2012. It is an effort on a body unifying and representing all amateur radio associations in Malaysia. Members are amateur radio associations only. MARL is an organization designed to represent and voice out the interest and opinion of all Malaysian amateur radio assignment holders. It is an approach modeling on Communications & Multimedia Act 1998 requirements on formation of industry forums.

Subject: [orari-news] Baru dari negara Jiran: MARL (Malaysian Amateur Radio League)

Rekan-2, ini ada informasi fresh dari negara tetangga kita, mereka baru saja mendirikan satu perkumpulan besar untuk mendampingi MARTS (Malaysian Amateur Radio Transmitter and Society)sbg induk Organisasi, dengan namaMARL (Malaysian AMaateur Radio League)sebagai partner dan pengendali semua club-club station termasuk club dx-ing di yang ada di Malaysia.
Berikut ringkasannya...
semoga bermanfaat

salam
DANI
YB2TJV

About
MARL - TO REPRESENT ALL AMATEUR RADIO SOCIETIES IN MALAYSIA UNDER "ONE VOICE".
Email: marl.gabungan@...
Mission(a). Menggabungkan semua persatuan dan kelab berdaftar radio amatur di Malaysia sebagai satu representasi bersepadu semua pemegang lesen aparatus radio amatur di peringkat kebangsaan dan juga antarabangsa;

(b). Sebagai badan induk yang menjaga kepentingan semua pemegang lesen aparatus radio amatur di Malaysia;

(c). Sebagai badan induk yang menyuarakan pendapat bersepadu semua pemegang lesen aparatus radio amatur di Malaysia secara adil dan saksama;

(d). Badan rasmi yang dipertugaskan untuk berurusan dengan mana-mana kementerian, jabatan, agensi dan badan kerajaan atau bukan kerajaan di peringkat Malaysia atau antarabangsa yang melibatkan hal ehwal, kepentingan atau pendapat pemegang lesen aparatus radio amatur di Malaysia;

(e). Memastikan segala berita, keputusan, ketetapan dan maklumat dari mana-mana kementerian, jabatan, agensi dan badan kerajaan atau bukan kerajaan di peringkat Malaysia atau antarabangsa yang melibatkan hal ehwal, kepentingan atau pendapat pemegang lesen aparatus radio amatur disebarkan dengan telus;

(f). Membuat perancangan bersepadu untuk memastikan kemajuan dan perkembangan arena radio amatur di Malaysia khususnya dan antarabangsa amnya.

DescriptionMARL - has been established to unite all HAM Societies / Clubs, registered under ROS / ROY. The Committee members are representative from all the HAM Societies / Clubs.

AwardsJAWATANKUASA PENAJA MARL

(1) Presiden: Y.A.M Tengku Sri Temmengung Raja D.K, S.S.M.T, Y.A.M Dato' Seri Tengku Baharuddin Ibni AlMahrum Sultan Mahmud Al Muktafi Billah Shah (9M2TBM)
(2) Naib Presiden: Abdul Aziz Bin Mohd Noor (9M2AU) - MARES
(3) Setiausaha: Abd lah @ Abdullah Bin Awang (9W2HOZ) - JASRA
(4) Pen. Setiausaha: Azmeir Bin Zaki (9W2EKP) - JASRA
(5) Setiausaha Kerja: Ashwar Bin Abdul Aziz (9W2FG)
(6) Pen. Setiausaha Kerja: Mohd Iqbal Bin Mohd Noor (9M2BAL)
(7) Bendahari: Amrun Bin Mamat (9W2HAV) - SQUAD 99
(8) AJK: Fahroradzi Bin Ibrahim (9W2BBS) _ MARES
: Marzuki Bin Saad (9M2MZ) - Kedah HF
: Jamaludin Bin Mat Akhir (9W2BDS) - KSRAC
: Khairul Asyraf Bin Jaafar (9W2CRO) - MERACC
: Mohamad Alawi Bin Md Noor (9W2AWQ) - AKRAB
: Abu Hashim Bin Nordin (9W2AHJ) - SIK AMATEUR

Products(1) memohon kepada pihak kementerian supaya dihapuskan semua Fees dan mencadangkan hanya yuran minima, iaitu RM5 ATAU RM10 sahaja dikenakan bagi perkhidmatan yang diberikan. Alat Komunikasi tersebut adalah barang kawalan walaupun cukai nya telah dihapuskan namun perlu ada kawalan. Dicadangkan agar dalam borang AP berkenaan di lampirkan salinan AA dan Kad Pengenalan sahaja dan bayaran yang minima sebanyak RM5 /RM10 atau kurang dari itu, dengan ini ia tidak membebankan pengguna radio amatur.

(2) memohon di hapuskan cukai kepada ANTENNA, ROTATOR, LINEAR AMP, ATU, Aksesori Radio Amatur dll.

(3) 60 meter band perlu di pohon untuk “experimental” saperti yang dilakukan oleh Negara-negara di Eropah, Amerika dan lain-lain lagi. Ini penting kerana jika 40 meter dan 80 meter band tidak boleh berhubung maka band yang di tengah iaitu 60meter adalah satu lagi pilihan ianya baik untuk kegunaan ketika bencana untuk perhubungan jarak 500Km ke 1,000KM.

(4) Callsign Allocation perlu diperbetulkan contohnya 9M4 (angka 4) bukanlah untuk repeater atau club station atau untuk

alokasi lesen yang baharu akan tetapi ianya adalah untuk “call area” maksudnya angka salepas prefix adalah untuk negeri/state ini yang di praktikan oleh negara2 luar.

(5) Fees RM 60 untuk AA harus dihapuskan. Yuran AA kelas A & B perlu dikaji semuala ini kerana di US dan UK Lesen Radio Amatur adalah PERCUMA tak dikenakan apa-apa bayaran.

(6). Permohonan AA bagi warga-warga asing perlu di permudahkan.

(7) Menjadi Timbangtara kepada semua persatuan / kelab HAM dan pengiat radio amatur.

(8) Mewakili semua persatuan2 / kelab HAM untuk berurusan dengan pihak Kerajaan bagi menjaga kepentingan dan kebajikan pengiat radio amatur di Malaysia.

(9)Mengadakan aktiviti2 yang mempunyai kaitan didalam kegiatan radio amatur.

Makasih mba Deta, iya aku berlebaran ria...
Semua manusia ngga ada yg sempurna, pasti pernah berbuat salah... Aku juga mohon dimaafkan lahir bathin ya..

Kapan ya kita ketemuan, waktu di Sahid kemarin cuma sebentar ya, ngga jadi ngobrol2...

Yg penting doaku buat kalian berdua, semoga rukun dan damai sejahtera, tambah solid team contestnya...

Salam kangen buat YB2VTO

ASTRA
Persatuan Radio Amatur Melayu Malaysia

Sejarah
Sejarah Ringkas Penubuhan
Penubuhan sebuah persatuan baru radio amator mula dicadangkan dalam satu perjumpaan tidak resmi. Cadangan ini dikemukakan setelah beberapa cadangan yang dibuat oleh kalangan tertentu beberapa tahun sebelum itu tidak menjadi kenyataan setelah mendapat tentangan dari segelintir ham Melayu. Malah cadangan hanya tinggal cadangan, tidak ada sebarang usaha ke arah menjayakan penubuhan persatuan berkenaan.
Perjumpaan Pertama
Tarikh : 6 Julai 1997
Jam : 4.00 Petang
Tempat : No. 73, Lorong Melati 5, Taman Chengai Indah, Telok Chengai, 06600 Alor Setar, Kedah
Tujuan : Cadangan menubuhkan persatuan mula dibincangkan.
Yang Hadir :
1. Khalijah Husain [Kedah]
2. Masrani Mahlan [Kedah]
3. Mohd Pudzi Ali [Kedah]
4. Ahmad Kamel Kasim [Kedah]
5. Azmi Abdullah [Pulau Pinang]
6. Zainal Abedin Md Yacob [Pulau Pinang]
7. Burhanuddin Wahi [Pulau Pinang]
8. Amir Hassan [Pulau Pinang]
9. Abd Aziz Abdullah @ Sin Ja Koon [Kedah]
10. Md Zahir Chin [Kedah]
Semua yang hadir pada perjumpaan berkenaan bersetuju agar usaha ke arah menubuhkan persatuan dijalankan walaupun akan menghadapi tentangan dari pihak tertentu yang mungkin akan cuba melemahkan usaha berkenaan.
Perjumpaan Kedua
Tarikh: 20 Julai 1997
Jam : 3.30 Petang
Tempat : Lot 195, Kampung Tok Kesop, 06000 Jitra, Kedah
Tujuan : Merangka perlembagaan persatuan
Yang Hadir :
1. Azmi Abdullah [Pulau Pinang]
2. Burhanuddin Wahi [Pulau Pinang]
3. Mohd Pudzi Ali [Kedah]
4. Zainal Abedin Md Yacob [Pulau Pinang]
5. Ahmad Kamel Kasim [Kedah]
Urusan untuk membuat jemputan ke Mesyuarat Agung Penubuhan diserahkan kepada: 9M2BA

[Azmi], 9W2BB [Amir] dan Masrani Mahlan.
Perjumpaan Ketiga – Mesyuarat Agung Penubuhan
PERSATUAN RADIO AMATOR MELAYU UTARA SEMENANJUNG MALAYSIA [The Malay Amateur Radio Society of Northern Peninsular Malaysia] yang merangkumi Negeri Kedah, Perlis, Pulau Pinang dan Perak Utara ditubuhkan dengan resminya pada 2 OGOS 1997 dalam Mesyuarat Agung Penubuhannya yang dihadiri seramai 22 orang peminat Radio Amator.
Tarikh : 2 Ogos 1997
Jam : 8.30 malam
Tempat :No. 73, Lorong Melati 5, Taman Chengai Indah, Telok Chengai, 06600 Alor Setar, Kedah
Yang Hadir:
0001 – Ahmad Kamel Kasim [Kedah]
0002 – Mohd Pudzi Ali [Kedah]
0003 – Anuar Ahmad [Kedah]
0004 – Marzuki Saad [Kedah]
0005 – Haji Shamsuddin Teh [Kedah]
0006 – Azmi Abdullah [Pulau Pinang]
0007 – Zainal Abedin Md Yacob [Pulau Pinang]
0008 – Burhanuddin Wahi [Pulau Pinang]
0009 – Amir Hassan [Pulau Pinang]
0010 – Mat Isa Baharom [Kedah]
0011 – Masrani Mahlan [Kedah]
0012 – Faisul Aris Othman [Kedah]
0013 – Haji Abd Rahim Othman [Kedah]
0014 – Md Zahir Chin [Kedah]
0015 – Khalijah Husain [Kedah]
0016 – Abd Aziz Abdullah @ Sin Ja Koon [Kedah]
0017 – Che Zaim Bahari [Kedah]
0018 – Ishak Ahmad [Kedah]
0019 – Zulkifli Mohamad [Kedah]
0020 – Noor Azman Zakaria [Kedah]
0021 – Ayub Hassan [Kedah]
0022 – Kamaruzzaman Didok [Kedah]
Sebenarnya cadangan awal yang dikemukakan untuk nama persatuan ialah PERSATUAN ASTRONOMI DAN RADIO AMATOR MELAYU UTARA SEMENANJUNG MALAYSIA atau ringkasnya ASTRA [yang bermaksud AST = Astronomi, manakala RA = Radio Amator]. Tetapi, setelah difikirkan kepentingan masa depan orang Melayu dalam bidang radio amator, mesyuarat menolak nama berkenaan. Akhirnya diputuskan bahawa nama yang akan digunakan ialah PERSATUAN RADIO AMATOR MELAYU UTARA SEMENANJUNG MALAYSIA [The Malay Amateur Radio Society of Northern Peninsular Malaysia]. Walaupun begitu nama ASTRA terus diterima pakai.
Jawatankuasa Penaja – 2 Ogos 1997
Presiden [P] : Marzuki b Saad
Naib Presiden 1 [P] : Haji Shamsuddin b Teh
Naib Presiden 2 [P] : Azmi b Abdullah
Setiausaha Kehormat [P] : Ahmad Kamel b Kasim
Pen Setiausaha Kehormat [P] : Zainal Abedin b Md Yacob
Bendahari Kehormat [P] : Md Isa b Baharum
Ahli Jawatankuasa [P]:
Burhanuddin b Wahi
Masrani b Mahlan
Mohd Pudzi b Ali

Faisul Aris b Othman
Anuar b Ahmad
Amir Hassan
Juru Audit [P]:
Haji Abd Rahim b Othman
Md Zahir b Chin
Pada 6 Julai 1998, Mesyuarat Agung Tahunan ASTRA Kali Pertama diadakan di Universiti Sains Malaysia (USM) Pulau Pinang dengan pemilihan Jawatankuasa Pengurusan 1998-1999:
Presiden – Azmi Abdullah, Naib Presiden 1 – Marzuki Saad, Naib Presiden 2 – Abd Rahim Abd Rahman, Setiausaha Kehormat – Zainal Abedin Md Yacob, Penolong Setiausaha Kehormat – Mohd Khalid Hj Mohd Yusof, Bendahari Kehormat – Burhanuddin Wahi, Ahli Jawatankuasa – Anuar Ahmad, Abdul Ssukur Haji Ahmad, Zulkifli Hashim, Haji Shamsuddin Teh dan Shafiee Omar. QSL Manager (InWard-OutWard) – Zulkifli Hashim, Editor Buletin ASTRA – Zainal Abedin Md Yacob dan Pegawai Seranta – Marzuki Saad. Juru Audit – Mohd Nor Azlan Ujang dan Idris Hussin.

MARTS
Malaysian Amateur Radio Transmitter's Society

Get to know us better
What is Amateur Radio?
Amateur Radio is a radio service that anyone can get involved with. Amateur radio is also known as" Ham" radio, which you may have heard of it at one time or another. No one knows for sure why amateur radio operators are called hams, the original meaning has been lost over the years. Many theories exists as to the meaning of "ham", but nothing concrete. Amateur radio operators have been around since the beginning of radio, but the Amateur Radio Service did not come along until the advent of a licensing body.

During the beginning of radio, around the turn of the century, many basement experimenters built radio transmitters and receivers. These were called Spark Gap transmitters. They occupied a very wide bandwidth when transmitting. These stations would interfere with ship to shore communications on several occasions with their wide bandwidth transmissions. After years of complaints from these ship to shore stations, and among other concerns, it was decided that this new technology needed a structure and regulation. Hence the US FCC (Federal Communications Commission) was born, it was called something else at that time. Band segments were set aside for each specific service that was created and the "amateurs" enjoyed their own segments of the radio spectrum. Extending up into the HF, VHF and UHF bands, which at that time were considered "worthless”! Hams enjoy worldwide communications daily using homemade as well as commercially built equipment. Amateurs do not broadcast their transmissions, they have two-way communications with other amateurs. In fact, it is illegal for amateurs to broadcast information for the general public on the amateur radio bands or communicate with non-amateurs. Every amateur radio station has a call sign and in Malaysia the amateur radio license is issued by the Suruhanjaya Multimedia dan Komunikasi or Malaysian Communication and Multimedia Commission (MCMC). Other countries have their own licensing body, and just about every country in the world has an amateur radio service. Internationally, the requirements for obtaining a license are similar. A ham in China is required to take a test similar to that of a ham in the USA or any other country, although the licensing structure may vary with regards to license classes. All amateurs are restricted to the same bands or frequencies depending on his or her class of license. Just like all air traffic is controlled on the same frequencies around the world. It would be very difficult if you didn't know where to look for other amateurs!

Amateurs provide emergency communications when disaster strikes around the world. Floods, earthquakes, fires, tornadoes etc. have all called the active ham into public service. Providing emergency communications when ordinary communications are out of service. Thereby making the amateur radio service a vital source for communications when needed. Many lives have been saved over the years because of amateur radio, vital life saving

information has been passed through amateur radio stations. It is a hobby and no monetary gains can be made from the use of amateur radio, which is strictly prohibited. Amateur radio is not CB radio. Citizens Band, or CB, is a completely different service altogether . One of the goals of amateur radio is to spread “international goodwill " around the world amongst other hams, it is kind of like a brotherhood of sorts. Countless friendships have grown through the means of amateur radio. Hams on one coast become friends with hams on the other, people that otherwise would have never known about each other have met while enjoying their hobby. Sure, there are times when someone will do or say something on the air that invokes an argument or rude behavior. But like any aspect of the human society, we learn to deal with it and make amends. For the most part, hams are ladies and gentlemen, and respect the wishes of others. Most hams will welcome you into their "roundtable" at anytime, provided you follow good operating practices. Many are very willing and eager to help a beginner with his or her station operation or getting licensed.

Have you recently received your amateur radio operators license and don't know what to do with it? Why not check out your local radio club and find an "Elmer”? Don't know what an "elmer" is? Then keep reading. Questions have been asked on some "insiders" information as to what some of the lingo which you hear on the bands means. So hopefully answers to some of your questions can be found here and clear up some of the "mysterious" words and phrases you will encounter while tuning to the ham frequencies. Most phrases and "codes" come from communicating via morse code. It is much faster to send a series of code letters or numbers than it is to spell each word out one at a time. Therefore, a group of codes was derived to make it easier on the Morse operator during his/her sending. I will not list them all as most are not relevant to your operating practices, but will list the most common ones heard on the bands today.
The meanings carry over to phone (SSB, AM, FM) as well as the digital modes . Try to refrain from using the "Q" codes on phone unless the band conditions are really poor. Why? Because if you are communicating with someone else who speaks your same language (which is most likely) there is no need to use codes as they will better understand you if you speak plain English (or whatever language you are speaking!).
An "elmer" is a kindly ham who helps newcomers get started in amateur radio. Many are happy to invite you into their "shacks" for a demonstration as to how an amateur radio station operates. Others enjoy helping with the testing procedures, and getting a station set up and on the air. Many Elmers can be found at your local ham radio club, contact the Malaysian Amateur Radio Transmitters' Society (MARTS) for information on any clubs you may have in your area.(. . . less)

Early Radio Amateur Activities in Malaya
Amateur radio, the scientific hobby that brings together enthusiasts in many parts of the world, irrespective of race, creed, or social standing, was first introduced into Malaya in the late 1920s. Amongst the early pioneers was R.E. Earle, VS1AB, who was active during 1928 to 1930. At that time, overseas transmissions were scarce and irregular. Also the late G.M. Salt, VS2AF, who commenced in 1930 from Glenmarie Estate, Batu Tiga, Selangor, and the late T.G. Laver, VS2AC, from Masai, Johor. The late A.N. Randall, VS3AB, operated from Johor Bahru. Reg. Hollis-Bee of the Public Works Department operated as VS2AG from Kuala Kangsar, Perak. During 1932, VS2AF and VS2AB operated successfully on 56 MHz over a distance of 10 miles.

E.C. Yates, VS1AD, was operating on the 20 and 40 meter bands in between 1920 and 1930 on Phone and CW (continuous wave). During 1930, he obtained permission from the Posts and Telegraphs to opera a broadcast service on 42 meters. Programs were broadcasted on Monday,

Wednesday, and Friday evenings from 6 pm to 8 pm, and on Sunday mornings from 11 am to 1:30 pm. In 1932, he relayed the dance music from the Adelphi Roof Garden on the occasion of the Annual Ball of the Singapore Amateur Radio Society. These transmissions were well received throughout Malaya. In November 1933, the Posts and Telegraphs granted a license under the call of 2HI in the 49 meter band, and the broadcasts were concluded on the 42 meter band.

Jim Macintosh, VS2AA, came on the air during January 1934. Using only 5 watts, he established two-way working with five out of the six continents on 40 meters CW during his first month. The missing continent was South America, which is still a difficult continent to contact. Before the year was out, never using more than 20 watts, he had his WAC (Worked All Continents), and WBE (Worked all British Empire). The first WAC for Malaya was made by A.N. Randall, VS3AB.
In the early days, communication was restricted to CW. But today, Malaysian amateurs, perhaps better known as hams, can be heard in most evenings on 15 and 20 meter bands conversing on phone with other hams in Australia, north America, Europe, Africa, and occasionally with the extreme ends of the earth, eg. Virgin Islands.
For local contacts between amateurs in Malaysia, the 40 meter band is the most popular. And there has been a regular Sunday morning phone net for several years. It usually ets going at around 9:30 am, and sometimes lasts into the early afternoon.
Since the World War II, groups keen amateurs have formed societies to promote their interests, and lend a helping hand to the beginners. The Perak Radio Society and Selangor Radio Society were formed in 1947, whilst the Malayan Amateur Radio Transmitters' Society was registered in 1952. The latter's chief function being to act as a central bureau for both inward and outward QSL cards (confirmation of contact) between the Malayan stations and amateurs situated overseas.
The Selangor Radio Society was the result of the untiring efforts of the first president, Jim Macintosh, VS2AA, Law Joo Ghin, VS2AO, N.L. Narayan, VS2CN, N.A.K. Nair, Au Yong Siew Thong, and Rodgers Rowe.
The Singapore Amateur Radio Transmitting Society was founded in 1949. Amongst these who attended the inaugural meeting were Ted Yates, VS1AD, Reg Hollis-Bee, VS1AG, Mike de Cruz, VS1DU, Charles Salton, VS1DV, Ken de Souza, VS1CZ, and John Osborne, VS1BO.
The tendency had been for the Malaysian Amateur Radio Transmitters' Society (MARTS) founded in 1952, to expand at the expense of the local societies with the result that the smaller societies have been wounded up. The service provided to members will then be always up to the standard envisaged by its founders.(. . . less)

MARTS – How it started
After the winding up of the numerous amateur radio societies in Malaya at that time, the hams started to consolidate and looked toward a central body to serve and looked after their interests. The founding of MARTS was the work of the following hams, who remained in office for many years after is formation: Eu Khuan Kew, VS2BS, J.E. Hemphil, VS2CR, S.A. Faulkner, VS2DB, and C.E. Salton, VS2DV. Call sign prefixes used then were VS1 for Singapore, VS2 for Malaya Federated States, VS3 for Malaya Non-Federated States, VS4 for Sarawak, VS5 for Brunei, and ZC5 for British North Borneo.

Full membership was opened to radio amateurs in the Federation of Malaya, Singapore, British North Borneo, Brunei, Sarawak, and Christmas Island. Total membership was less than 100 members, and the society's registered address was PO Box 600 in Penang.
Radio communication was confined only to the HF bands using the AM and CW modes only. After the Emergency period, the VHF band was opened to the hams. And from then on the introduction of repeaters came about, after VHF FM amateur radio communication gaining popularity among the members. In 1975, The first VHF repeater, 9M2RUK, was installed by

MARTS on Gunung Ulu Kali in Genting Highlands for covering the Klang Valley, and its surroundings. Subsequently it was followed by the setting up of the 9M2RBB repeater on Penang Hill in 1984, Gunung Ledang repeater 9M2RGL, Kuala Lumpur's 9M2RKK and 9M2RKL also followed suit. In 1989, the Gunung Pulai repeater 9M2RGP was put up, and one year later te Kangar repeater 9M2RMK was installed.(. . . less)

The Repeater Linking Project
Repeaters do a good job of increasing radio communication coverage. And since then, they have been providing useful services to its members, and during times of emergencies. Since their first installation in 1975, these repeaters only served the local coverage area. If any hams wanted to talk to other hams in other states using this mode, they would have met with disappointment. The thought of being able to use the walkie-talkie for a ham lives in Penang to talk to another ham lives in Johor or Malacca with just the press of the PTT (push to talk) has always been a dream. The reality that confronts MARTS to put up such a system was beyond the financial means and resources at hand.

In 2005, a task group was finally put together by MARTS to look into the possibility to link up the many repeaters situated in the various states. The need to have a complete radio communication coverage in peninsular Malaysia was further spurred after the tsunami in 2005. MARTS felt obligated to serve the community in imes of emergency and disaster. By having radio communication coverage during these times, much help can be rendered toward to the support, health, and rescue agencies.
MARTS is a society that welcomes all hams to be members. It does so without any discrimination toward race, creed or religion. Being an open society, it is very fortunate to have in its membership many employees of Motorola, who have come forward to give support and help toward this project to link up the repeaters. Having professionals in various fields of engineering as its members, MARTS was able to obtain technical formation from these people to form a working paper for the implementation of this project. Support in the form of technical expertise and equipment made the project a reality. Extra repeaters were installed on Bukit Bendera in Penang, Gunung Berincang in Cameron Highlands, Gunung Ulu Kali in Genting Highlands, Gunung Ledang in northern Johor, and Gunung Pulai in southern Johor. For safety and security reasons the repeaters were all installed at Telekom Malaysia hill station towers and buildings.
Today, we have the completed task: ability to QSO (contact) from the north of peninsula Malaysia in Perlis till Johor Bahru in the south.

OM Joni,

Yah itu, tapi saya masih ragu - selintas saya lihat koq ada yg masuknya dobel padahal saya entrynya cuma sekali, seperti :

P29FR : - New Guinea Teritory/Papua New Guinea
         - Papua Territory Papua/Island of New Guinea

YJ0VK : - New Hebrides, British New Hebrides (Merged with FU8)

         - New Hebrides, French New Hebrides (Merged with YJ)

YB9WZJ masuknya di :

New Guinea, Netherlands Papua and West Papua Provinces, Indonesia YB9RAA-YB9YZZ YB9WZJ 02-19

Tambahan lainnya khan kebetulan ada special call dari Gdanks waktu World Cup (SN2012GD) dan dari India juga ada special call Kerajaan Goa (AU50GOA).

25 August 2012 A.R.I. DX Bulletin

No 1112

==========

*** 4 2 5 D X N E W S ***

**** DX INFORMATION ****

==========

Edited by I1JQJ & IK1ADH

Direttore Responsabile I2VGW

8Q - Juergen, OE4JHW will be active as 8Q7OE from Kuredu Island, Maldives (AS-013) on 2-14 September. He will operate holiday style on 40-10 meters SSB and BPSK (during his night hours). QSL via home call, direct or bureau, LoTW and eQSL.

E5_nc - Andy, E51AND (AB7FS) will be on Palmerston Atoll (OC-124), North Cook Islands until "sometime in the middle of next September", The Daily DX reports. Andy operates straight key QRS CW around 14048 kHz, and often checks into the ANZA net which meets at at 05:15 UTC daily at 14183 kHz. QSL via AB7FS.

F - The Radio Club du Bassin d'Arcachon (F5KAY) will be active as TM5O from Ile aux Oiseaux (not IOTA, DIFM AT-028) on 1-2 September. Two stations will be QRV on 80, 40 and 20 metres SSB, CW and digital modes. QSL via F8IHE, direct or bureau.

F - Ben, ON5GQ, will be active holiday style as F/ON5GQ from Oleron Island (EU-032) on 1-14 September. QSL via home call, direct or bureau. [TNX rsgbiota.org]

G - Russell, G5XW will be active as G5XW/p from the Isle of Wight (EU-120) on 26-27 August. QSL via home call, direct only. [TNX rsgbiota.org]

I - Fabio, IK0IXI will be active as II0FIST on 2-8 September to celebrate the 25th anniversary of the FISTS CW Club, the International Morse Preservation Society (www.fists.co.uk). QSL via IK0IXI.

KH0 - Look for JQ2WTT as KH0XW (QSL direct to home call) and JE1XUZ as KH0XH (QSL direct to home call) to be active from Saipan (OC-086) from 29 August to 3 September. They will participate in the All Asian DX SSB Contest (1-2 September) as AH0BT (QSL via 7L1FPU). [TNX NG3K]

PJ2 - Anja, DH2AK and Torsten, DL1THM will be active again as PJ2/DH2AK and PJ2/DL1THM from Curacao (SA-099) from 26 August to 1 September. They will operate holiday style mainly SSB on 20 and 15 metres. QSL via home calls, bureau preferred. [TNX DX Newsletter]

SU - Special callsign SU30ASR will be in use from 24 August to 2 September to celebrate the 30th Arab Scout Camp in Abu Quear, Alexandria. Said SU1SK, Atef SU1AO and Ayman SU1AR plan to operate SSB, CW and digital modes on 160-10 metres. QSL via SM5AQD (direct

only). [TNX SU1SK]

SV9 - Luc, ON6DSL will be active as SV9/ON6DSL/p from Crete (EU-015) from 27 August to 3 September. He will operate SSB only with 5 watts. QSL via home call, direct or bureau. [TNX NG3K]

TA - The TC Special Wireless Activity Team (www.tcswat.org) and the Giresun Radio Amateurs and Nature Sports Club will be active as TC6ILH from Inebolu Lighthouse on 30 August-2 September and as TC2AL from Amasra Lighthouse on 1-2 September. QSL via TA1HZ.

UA - Gennady R3BY, Maxim RU5D and Oleg R7LP will be active as RI0FM from Moneron Island (AS-149) from 28 August to 2 September. They will operate CW and SSB on 40-10 metres. QSL via R3BY, direct and bureau. On 30-31 August they plan to be QRV as R10RLHA/0 (QSL via RA1QY) from the lighthouse. [TNX qrz.ru]

V6 - Yoshi, JJ8DEN will be active as V63PR from Falalop Island (OC-078) from 24 August to 3 September (the trip depends on the flights to/from the island, and the schedule might change or even be cancelled). He plans to operate RTTY, CW, PSK31 and JT65A on 160-10 metres. QSL via JJ8DEN, direct or bureau.

W - Once again Joe, K5KUA will be active as K5KUA/5 from Galveston Island (NA-143) from 31 August to 3 September. While on the island he usually operates CW on 40-10 metres. QSL via home call, direct or bureau. [TNX rsgbiota.org]

ZD9 - ZS1A reports that Gerard de Jong, ZS6KX will be on Gough Island (AF-030) "from sometime September 2012" and will apply for the ZD9KX callsign. His QSL route will be announced in due course. [TNX MM0NDX]

425 DX NEWS MAGAZINE ---> The July 2012 issue is now available for download at www.425dxn.org/monthly/index.html. [TNX IZ3EBA]

CAMPBELL ISLAND 2012 ---> "We are on schedule and the project planning is well underway", the ZL9HR team wrote on 21 August. "The team is busily working on all aspects of the DXpedition", which will take place from 28 November to 9 December. Read the latest news, including ZL9HR's QSLling policy, at www.campbell2012.com

SWAINS ISLAND 2012 ---> The NH8S DXpedition cargo has arrived in American Samoa. The international team of 20 operators (9V1FJ/ZS1FJ, AA4NN, DJ2VO, DL3DXX, K5AB, K9CS, K9CT, K9NW, N2TU, N4HH, N6HC, N6HD, NA6M, ND2T, SM5AQD, W6KK, W8GEX, W8HC, W8TN and WB9Z) is scheduled to depart American Samoa on 4 September, for the 23 hour boat ride to Swains. They will be running seven stations from 6 to 160m, including 60m. They will be on CW, SSB and RTTY around the clock for 14 days. Great emphasis will be in working European stations. Plans are to update logs on a daily basis by satellite

phone. The team will have two pilot stations (Valerie, NV9L for North America and Col, MM0NDX for Europe). Total costs are estimated to be $200,000. Each member has paid $8000, plus his cost to get to American Samoa. Anyone who wants to contribute defray the cost of the trip, can go to the expedition's website and click on the donations link. Read the latest press release (#3, 22 August) at www.nh8s.org [TNX W8GEX]

+ SILENT KEYS + Victor D. Poor (W5SMM) passed away on 17 August at the age of 79. Last month he received the ARRL President's Award for his contributions to the development of digital communications systems (Winlink 2000 and its predecessor Aplink) in the Amateur Radio Service. He was also one of the major forces behind the development of the modern microprocessor. Other recently reported Silent Keys include Araldo Ramundo (I8RAR), Enrico Lombardo (IT9TDJ), Marilyn S. Carpenter (N8OAM), Thomas L. Hise (NC0O), Helio M. de Carvalho (PY2BBO), Finlay Bruce (ZL4HI), Ham Radio Outlet (HRO) Vice President George Varvitsiotes (K6SV) and QST Magazine's Managing Editor Joel P. Kleinman (N1BKE), who died from injuries received during a house fire.

Super Check Partial Database Files for Amateur Radio Contesting
About SCP
There are contesters out there who can remember every call they have ever worked. For the rest of us, it is all we can do to remember who we worked in the contest just hours before! The Super Check Partial database files provide a list of callsigns used by active contesters. The data comes from Cabrillo logs contributed by contesters themselves. Contributed logs from the past 24 months are used to create the database. These logs are combined and filtered so that they result in a fairly good (but not perfect) list. The files do not contain any QSO data, such as state, CQ zone, Maidenhead Grid Locator, etc. Super Check Partial is a feature that K1EA first introduced in his CT logging software. However, it is now supported by all the major contest logging programs. It enables the use of the database to extend the list of calls that appear in the check partial call window. Used correctly, it can help you more quickly pull a call out of the QRM. Used incorrectly,

e.g. to guess calls, it can result in stupid mistakes and significant score reductions. Caveat emptor!
The files provided are a set of super check partial databases created using tools developed by Jim, AD1C and Ken, K1EA. The dta files can be used with CT, WriteLog, TRlog, SD, N1MM Logger, NA, Win-Test, and others. The scp file is for use with Win-Test.
Note: If your callsign does not appear in the latest version of the database and you would like to add it, please send me an email at logs@supercheckpartial.com. I will add the callsign in the next release. However, remember that this is a database
of active contesters. The best way to keep your callsign in the database is to make contest QSOs!
How to Download
Download the zip file to get all of the files, or click on each to download them individually. (Depending on your browser, you may have to right click on the link and select Save Target As...)
Master Files (July 11, 2012)
Below are files for the main Super Check Partial database. These files are generated from all contest logs donated by the contesting community regardless of mode.
File Name
Description
Calls
Size
scp_VER20120711.zip All master files below contained in one zip file. 1318 Kb
master.dta File with all calls.
Use this for international contests where anyone can work anyone. 41,935 1104 Kb
masterdx.dta File with DX calls (outside W/VE)
Use this for DX contests such as the ARRL DX Contest (from W/VE side). 27,849 764 Kb
masusve.dta File with only W/VE calls.
Use this when working from the DX side of the ARRL DX Contest or for W/VE domestic contests. 15,077 347 Kb
masterss.dta File with only W, VE and US Territory calls.
Use this when working the ARRL November Sweepstakes Contest. 15,362 355 Kb
master.scp File with all calls.
For use with Win-Test software. It contains all calls in an ASCII format. 41,935 296 Kb
The main database set of files was created out of 3,196,815 QSOs from 3,269 logs. The full data set contained 98,560 unique calls which were filtered to create the master files.
A version number has been included in all files in the format VERyyyymmdd.
RTTY Master Files (July 11, 2012)
Below are files for the RTTY-only Super Check Partial database. These files are generated using only RTTY contest logs donated by the contesting community.
File Name
Description
Calls
Size
SCPRTTY_VER20120711.zip All RTTY master files below contained in one zip file. 185 Kb
mastertty.dta File with all RTTY calls.
Use this for RTTY contests where anyone can work anyone. 11,615 309 Kb
mastertty.scp File with all RTTY calls.
For use with Win-Test software. It contains all calls in an ASCII format. 11,615 82 Kb
The database set of files was created out of 594,195 QSOs from 868 RTTY logs. The full data set contained 20,437 unique calls which were filtered to create the master files.
A version number has been included in all files in the format VERyyyymmdd.

Log Submission Instructions
The more logs that are contributed, the better the database. Follow the instructions below to have your logs included:
* Send Cabrillo files only!
* File name must be call.log (exactly the same way you submit it to the contest sponsor!)
* Files should be as attachments to an email. You can put them in a zip file, but it is better if you don't.
* Logs from any contest are accepted. Some of the more commonly donated logs come from:
CQ WW DX - CW, Phone, RTTY
CQ WPX - CW, Phone, RTTY
CQ 160M - CW, Phone
ARRL DX - CW, Phone
ARRL Sweepstakes - CW, Phone
ARRL RTTY Roundup
ARRL 10M
ARRL 160M
IARU Radiosport
Russian DX Contest
Worked All Europe - CW, Phone, RTTY
* Only logs from the past 2 years are needed (to keep the data "fresh"). That means you only should submit logs from 2010 and later.
* Submit files at any time. Send them in at the same time you submit to the contest sponsor!
* Send to logs@supercheckpartial.com
All files submitted become the property of WA1Z and will be used only for the purpose of creating the master call files.
If you would like to have your call blocked from appearing in the SCP files, please send an email tologs@... as well. Some people have chosen to do this because they don't want others to use assistance in copying their callsign.
New versions of the master files may be created at any time. Expect new files in January and October in advance of the Spring and Fall contest seasons. You can view the release history here.
If you find busted calls in the master files, or you want to have your call excluded from the master files, please send an email to logs@....

3533. Contest Country Files

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-08-31 12:47:57 UTC
From: Yb land Dx club
Topic: 3533 Message: 3533
Attachments: 1 described; binary payloads are missing from this source WARC

http://www.country-files.com/cty/

The files were last updated on 10 August 2012

This is the home of the contest country files. These files are used by amateur radio contest logging software (and other related programs) to help determine country multipliers from a callsign. The files are updated regularly throughout the year and changes are announced on the various contest and logging software reflectors.
To download the file(s) you need, please click on the link above that corresponds to the software you are using. Also read "Download Instructions" in the next section below.

Download Instructions
Clicking on any of the country file links below should prompt you to save (download) the file. If the file is displayed in the browser window instead, return to this page (using your browser's Backbutton) and follow these instructions to save it:
Chrome: Right-click on the file name and choose "Save link as..."
>Firefox: Right-click on the file name and choose "Save Link As..."
>Internet Explorer: Right-click on the file name and choose "Save Target As..."
>Netscape Navigator: Hold the SHIFT key down while clicking on the hyperlink (file name) and your browser will prompt you to save the file.
>Safari: Hold the CTRL key down while clicking on the hyperlink (file name) and choose "Download Linked File As..."
NOTE: All links below are to the current version of the files. To download a ZIP file containing all the files in the current or an older version, follow the Revisions link on the left, and click on the appropriate link to the right of the date.
NOTE: There are two different versions of CTY.DAT, CTY_WT.DAT, CTY_WT_MOD.DAT and WL_CTY.DAT. Beginning with CTY-1805, full callsigns in the file are prefixed with the '=' character. Some older logging programs will ignore these callsigns, so "old" format versions of the files (without the '=') are available. If you click on the appropriate link below for your software, you will get the correct version of country file.

Version Information
To see the country file change history, click on the Revisions link on the left.
Once the file is downloaded and installed, there are several ways to tell what version of the country file you have:
1. In your logging program, try to log the callsign "VERSION" (on a DX cluster node, use the SH/H VERSION or SH/SUN VERSION command). Each version of the country files will return a different country (except for Win-Test, see #3 below). That country will be indicated in the release notes for that version.

2. Open the country file using a text editor like Notepad. Find the entry for Canada, VE. In the list of prefixes/callsigns, you'll find a "callsign" that looks like:

VERyyyymmdd
where "yyyymmdd" is the date of the release. For example, CTY-1812 was released on 10 November, 2008 so the version string in this case is "VER20081110".
3. The Win-Test files (cty_wt.dat and cty_wt_mod.dat) have their own version information at the top of the file. You can see the version number only by going to Options | Data Files | Country Files. You can not log the callsign VERSION, it will just come up as Canada, regardless of the country file version.
Except for Win-Test, the CTY file name (i.e. CTY-1812) can not be found in the file.

A Note about USA Callsign Exceptions
Many USA callsigns are not in the CQ or ITU zone indicated by the number in the callsign. For example, K5ZD is in CQ Zone 5, not Zone 4. The country files do list a number of these callsigns with the correct zone. However, they don't list everyone, only the most active contesters. Here's how the list is created:
1. Using the Super Check Partial Database of active contesters, build a list of callsigns that are found in 100 or more logs. 100 is an arbitrary number, but it tends to limit the number of callsign/zone exceptions to around 500, which seems like a reasonable number of active contesters.

2. For each callsign that met the criteria in #1 above, predict the CQ and ITU zones based on the number in the callsign. For example, '1' is CQ zone 5, '5' is ITU zone 7, etc.

3. For each callsign that met the criteria in #1 above, look up the callsign in the current FCC database, and determine the CQ and ITU zones based on the state (as listed). For example, Wyoming is CQ Zone 4, California is ITU zone 3. The ITU zone is determined from the state only for states that reside entirely within a single ITU zone (like Indiana, not Illinois).

4. If the CQ or ITU zone from step #2 does NOT match the CQ or ITU zone from step #3, add an exception to the country file, showing the actual CQ and/or ITU zones.
That's the process, plain and simple. It's fully automated, and rewards the most active contesters. If you want to "get on the list", then "get on the air"!
If you do not live in or operate from the state listed as your callbook address, let me know if it would result in a change to your CQ or ITU zone. Many states cross ITU zone boundaries, so it's harder to get the ITU zone exceptions correct. If your ITU (or CQ) zone is incorrect, let me know and it will be fixed in the next release.

N1MM 8.6.2 and later
Save WL_CTY.DAT to your N1MM Logger directory and run Tools | Import Country List from downloaded file into the database you plan to use.

3535. Trs: Diamond DXCC Application Corrections

Yahoo group: YBDXC_News (2012-06 — 2012-12)
Date: 2012-08-31 13:34:16 UTC
From: hendro s.joedho
Topic: 3535 Message: 3535

Saya gak tahu pasti, VP8DMH itu QTH tepatnya dimana, karena di QSL cardnya juga gak nyebut apakah di :
- South Georgia Isl.
- South Shetland Isl.

- South Orkney Isl.
- South Sandwich Isl.
Yang pasti bukan Falkland Island.

Di aplikasi, VP8DMH saya masukkan ke S.Georgia, jadi mungkin memang gak masuk ke 4 kepulauan itu, jadi akhirnya yg diakui hanya 141 entities. Alhamdulillah.

Yang banyak tersisa adalah negara2 di South America yang susah sekali buat didengar, apalagi buat dipanggil. HI.

Subject: [YBDXC_News] Trs: Diamond DXCC Application Corrections

Saya gak tahu pasti, VP8DMH itu QTH tepatnya dimana, karena di QSL cardnya juga gak nyebut apakah di :
- South Georgia Isl.
- South Shetland Isl.

- South Orkney Isl.
- South Sandwich Isl.
Yang pasti bukan Falkland Island.

Di aplikasi, VP8DMH saya masukkan ke S.Georgia, jadi mungkin memang gak masuk ke 4 kepulauan itu, jadi akhirnya yg diakui hanya 141 entities. Alhamdulillah.

Yang banyak tersisa adalah negara2 di South America yang susah sekali buat didengar, apalagi buat dipanggil. HI.

Iya tuh,
Tega sekali ya mereka men'daur ulang' bangkai ayam menjadi bakso.
Sama sekali gak memikirkan kesehatan orang2 yang memakan bakso dari daging yg sudah busuk ditambah lagi dengan bahan2 kimia berbahaya.

Kalo di Medan atau Papua ada yang bisa memanfaatkan daging ayam tiren (mati kemaren) - peternakan/penangkaran buaya.
Yang di medan pernah saya datangi karena jadi obyek wisata, di jawa timur - kota tepatnya saya lupa, bangkai ayam dijadikan makanan ikan lele yang dipelihara.
Pemanfaatan yg positif.

OM Busan.
Seperti yg saya sampaikan sebelum ini, VP8DMH yg sempat QSO dg saya ini - ada di HB64ok - mungkin posisinya bukan di 4 kepulauan yg ada di daftar Diamond DXCC.
Tapi yg penting khan gak masalah utk DXCC.

Yg lebih menggembirakan saya adalah pernyataan OM Busan : "my best friend YC0QR.....".

Exactly so. I was only active from South Georgia on 2011/03/26
-- other than that, all VP8DMH activity has been from Antarctica
proper (including a variety of difference bases and islands, but
of course that's not important for DXCC.)

According to my log, I worked your friend from Halley 5 as
opposed to Halley 6, which makes it HB64ok instead of HB64vj.
Both are HB64 though, and if you check that on a map it's a long
way from South Georgia!

DXCC COUNTRY/ENTITY REPORT
According to the AR-Cluster Network for the week of Sunday, 26th-August, through Sunday, 2nd-September there were 217 countries active. Countries available: 3A, 3B8, 3D2, 3DA, 3V, 3W, 4J, 4L, 4O, 4S, 4X, 5B, 5H, 5N, 5R, 5T, 5V, 5W, 5Z, 6W, 6Y, 7P, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, EU, EX, EY, EZ, F, FG, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KG4, KH0, KH2, KH6, KH8, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PY, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV5, SV9, T32, T7, TA, TF, TG, TI, TK, TR, TT, TU, TY, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP5, VP8, VP8/h, VP9, VQ9, VR,
VU, XE, XT, XU, XX9, YA, YB, YI, YK, YL, YN, YO, YU, YV, Z2, Z3, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS
* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).
5V, TOGO (Update)
Wim, ON4CIT, will be active as 5V7TH from Togo (Grid Square JJ06rf) between October 26th and November 5th. Activity will be on 40-6 meters, including the 30/17/12 meter bands, using CW, SSB and RTTY. He will focus on JAs and use an Icom IC-7000 into a 6-band Broad-band hexbeam and verticals for 30/40m. Suggested frequencies are:
 CW - 10112, 14022, 18072, 21022, 24892 and 28025 kHz
 SSB - 7070, 14190, 18132, 21292, 24972 and 28492 kHz
 RTTY - 7042, 10142, 14082, 18102, 21080, 24922 and 28090 kHz
 6m - 50.090/CW, 50.120/SSB and 50.200/RTTY
Wim request on SSB to PLEASE call him only using the "International Radiotelephony Spelling Alphabet". QSL via his home callsign, direct (2 USDs/EU and 3 USDs/US), by the Bureau, LoTW (uploaded year later) or by the ClubLog's OQRS. For more details, visit:
http://www.dxpedition.be/5V7TH.html
5X, UGANDA (Update to OPDX.1076)

Nick, G3RWF/5X1NH, announced this past week he is "considering how best to get 160 on the air as it is the only band I have not worked and reckon there must be un-met need!" He works at a community university, so this is not a DXpedition but a solo operation with plenty of time to get on the air. He is looking for help/advice in erecting a simple antenna for 160m. Nick states, "I have access to roach poles (30 footers) and can get max height of about 50 feet. No high trees locally and insufficient room for beverage antennas. Contemplating a 50 ft vertical with capacity top loading and some induction at the feed point. I will get grounding as good as possible within local constraints (small site, vehicles near the house etc). What do you think? Grateful for advice on antennas. I would only work CW - lots of experience on HF (110k QSOs from 5X on the other bands) but novice on 160 DX - advice (polite) also invited on operating." Nick's E-mail address is:
nick@...
6V, SENEGAL
Enrico, IK2FIL, will once again be active as 6V7X from Le Calao between September 24th and October 4th. His activity will include the CQWW DX RTTY Contest (September 29-30th) as a Single-Op/Single-Band (??)/Low-Power entry. Operations will be on 80-10 meters using Elecraft K3 + KAT3 + KXV3 + KFL3A-400. Outside of the contest, Enrico will be on 30-10 meters RTTY only. QSL via LoTW, eQSL, by the BUREAU or direct to IK2FIL. Visit his Web page at:
http://6v7x.jimdo.com
7P8, LESOTHO (Update to OPDX.1051)
Donovan, ZS2DL, has finalized his team of operators and plans to arrive in Lesotho on November 21st, and leave on December 4th. Operations will possibly take place between November 23rd and December 3rd. Naturally this means they will be an entry in the CQWW DX CW Contest (November 24-25th). The callsign will 7P8D. Operators mentioned are made up of three teams:
South Africans - Donovan/ZS2DL (CW), Mitch/ZS2DK (SSB/RTTY) and Roger/ZS6RJ (CW/RTTY)
>Germans - Jo/DJ3CQ (CW), Chris/DL2MDU (CW) and Emil/DL8JJ (CW)
>N. Americans - Frosty/K5LBU (SSB,RTTY), Keith/VE7MID (CW) and Neil/VA7DX (CW)Activity will be on 160-10 meters using CW, SSB and RTTY with a minimum of three stations (possibly 5 stations) on the air 24/7. The suggested frequencies are:
CW - 1820, 3520, 7026, 10105, 14020, 18075, 21020, 24895 and 28015 kHz
SSB - 1840, 3780, 7160, 14185, 18150, 21220, 24945 and 28480 kHz
RTTY - 7038, 10138, 14085, 18102, 21085, 24922 and 28080 kHz
ADDED NOTES: They will be listen up. NO 60m - Licence does not cover it-Sadly!
QSL direct via: LESOTHO DXPEDITION 2012, P.O. Box 29169, Sunridge Park, 6008, SOUTH AFRICA (w/2 USDs - Please no IRC as it is difficult to convert at the post office). A OQRS system (PayPal) will also be implemented just before the expedition. Logs will be uploaded to LoTW within 6 months after the DXpedition has ended. For more details, visit:
http://www.zs2dl.co.za/7P8D.html
8P, BARBADOS
. Dean, 8P6SH, will be active as 8P2K during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (10m) entry. QSL via KU9C.
9J, ZAMBIA
Shinichi, JA7SGV, is now active as 9J2JA from Zambia. His length of stay is unknown. Activity has been on the HF bands (30/20/17/15 meters) using CW. QSL via his home callsign.
AH0, MARIANA ISLANDS (Update)
Kuroi, JH0MGJ/AL5A, will be active as AL5A/AH0 from Saipan Island (OC-086) between September 7-9th. He informs OPDX that he will stay at the rental shack on Saipan and will operate for just several (ten) hours on 40-10 meters using a 1 kw on SSB or CW. Also, he

states that he will bring his FT-817 with him and be active as AL5A/AH0/QRP several times. Kuroi states that he will be looking "for many friends who will be in the Europe". QSL via LoTW. If you want a paper QSL (if it is necessary), his QSL Manager is JA7JEC.

C6, BAHAMAS

Operators George, KQ8Z/GM0IIO, will be active as C6AZZ from Grand Bahama Island (NA-080, WLOTA 0527, WW Loc. FL06UO) between October 24-31st. Activity will focus on 6 meters (CW, SSB, FM) if there are any band openings, otherwise on 80-10 meters, mainly CW with some SSB using his Icom 756Pro3. His activity will also include the CQWW DX SSB Contest (October 27-28th) as a Single-Op/Single-Band (20m)/Low- Power entry. George will use a 80m OCFD antenna at 40 feet. The 20m antenna will be a full sized 20m delta loop right on the beach vertically polarized with the apex at 40 feet. QSL via KQ8Z.

CR3/CT9, MADEIRA ISLANDS

German operators Helge/DG3FAW, Knut/DJ6KS and Matthias/DJ8OG will be active as CT9/homecall from AF-014 between September 4-11th. Look for Matthias/DJ8OG to be active as CR3L during the Worked All Europe DX (WAE) Contest (September 8-9th) as a Single-Op/High-Power entry. QSL CR3L via DJ6QT, all others via their home callsigns.

DXCC NEWS

Bill Moore, NC1L, ARRL Awards Branch Manager, reports that the following operation is approved for DXCC credit:

XU1A Cambodia; 1998 Operation

Bill states, "After reviewing new information, we have concluded that the XU1A documentation and operation are acceptable and sufficient and that QSLs will be accepted for DXCC. If you have had QSLs rejected please send an E-mail to bmoore@... be placed on the list for update. (If you remember the submission in which you included the QSL please note this to expedite the search for the rejected QSO)."

DX MAGAZINE'S MOST WANTED SURVEY

Carl, N4AA, editor of "QRZ DX" and "The DX Magazine", reports to DXers: "Effective immediately the 2012 Most Wanted Survey form is available on the DX Publishing web site. Please go to: www.dxpub.net and under the heading MOST WANTED SURVEY you will find a link to the form. Click on '2012 SURVEY'.

Several prefixes are in BOLD type. These are ones which may cause confusion due to their similarity, i.e. 3D2, VK9, VK0, etc. Please use care when marking these to be sure the correct one is counted.

There are a few shown in RED. These indicate either an addition to the list from last year or a change in the prefix (ZK2 is now E6).

There is a 'block' at the bottom of the form for you to send along any comments, or to include any country that you need which is not on the list.

Please pass the word to your friends and to any DX clubs in your area that the survey will be available until October 15th.

Thanks for your participation. 73, Carl, N4AA"

DXPEDITION VIDEO AVAILABLE

The HK0NA Malpelo Island DXpedition DVD is now available and can be ordered online at: xhttp://www.k4uee.com/dvd

DXPEDITION VIDEOS OF THE WEEK

With more and more DXpeditions putting their videos on YouTube and other Web services, we decided to list them (possibly) each week. For this week's listings:

2012 - ID9A Strombolicchio Island (EU-017): http://www.youtube.com/watch?v=wreOfROfax0

2008 - VE2DXY CQWW Contest DXpedition to Zone 2: http://www.youtube.com/watch?v=rg_AKj_UMnY

2008 - Ham Radio QRP DXpedition into the Needles Utah's Canyonlands: http://www.youtube.com/watch?v=zgvyovWRd-0 (Part 1)

http://www.youtube.com/watch?v=wovL8D63REc (Part 2)
http://www.youtube.com/watch?v=W1oOU0eL24w (Part 3)
2003 - TX4PG Marquesas Island DXpedition: http://www.youtube.com/watch?v=otoCP_6r70E
If you have a DXpedition 'video' available on the Web and would like to have it listed in the OPDX, PLEASE send the URL to use, and we will publish it.
E5, NORTH COOK ISLANDS
Andy/AB7FS (E51AND) and his XYL Kathy are still (as they call it) stranded on Palmerston Atoll (OC-124), North Cook Islands, possibly until September 16th or 17th. It does not sound like the couple is having a good time there. Andy states, "I have minimal equipment with me and there are no stores or supplies on island so it is 'make do with what we have!'." He is operating under a solar charged battery power for his FT857D into a Snowdonia Radio Co. SRCX80 5m vertical, and for CW he is using a hand key and paper logging in a school exercise book.
He states, "Life on island is COMPLETELY different from anything one might experience in the U.S. or Europe and operating is interrupted by things like the battery being used to pump water, the social demands of my host family, a visit from the island secretary . . . ." To read his complete report, go to (QRZ.com) under E51AND. QSL via AB7FS.
E5, SOUTH COOK ISLANDS
Rudi, ZL2KBR, will be active as E51KBR from Rarotonga Island (OC-013) between November 12-19th. Activity will be holiday style on 20-10 meters using SSB, RTTY and PSK31. QSL via ZL2KBR.
HG1912, HUNGARY
Members of the Puskas Tivadar Radio Aamateur Club (HA5KHC) will be active as HG1912PTTT from Budapest between now and September 30th. Activity is to celebrate the 100th anniversary of the "Puskas Tivadar" Telecommunications Technical High School. Operations will be on all HF bands using CW, SSB and the Digital modes. QSL via HA5AUC by the HA QSL Bureau. Visit the club's Web page at:
http://www.ha5khc.hu
IOTA NEWS
EU-052. Dirk, ON5CT, will be active as SV8/ON5CT/P from Corfu Island (Greek IOTA INS-042) between September 4-18th. Activity will be on 20/17/15/12/10/6 meters using SSB and RTTY (preferred). QSL via LoTW or eQSL. NO PAPER QSL.
NA-124. (Update) Operators Felix/XE2I, Saul/XE2HQI, Tony/XE2HVF, Enrique/XE2AA, Fred/KG6HGK, Craig/XE2HWJ, Ana/XE2IHA, Jose/ KD6AFA and Manuel/XE2HUQ will be active as XF1F from San Francisco Island between October 7-13th. Activity will be on all HF bands using CW, SSB, RTTY and PSK. The team will use Hexbeams for HF bands and wires for lower bands. QSL via XE2HUQ.
OC-233. Scott, VK7HVK, will once again be active as VK7HVK/p from his holiday home on Bruny Island between September 9-14th (pending repairs to the tower). His activity is usually 20 meter SSB. QSL via his home callsign direct (see (QRZ.com)).
OC-271. (New One!) Joppy, YB8XM, and possibly another operator will be active as YB8XM/6 from Babar Island between November 1-6th. QSL via YB9BU. Look for more details to be forthcoming.

100-400KH8, AMERICAN SAMOA
Anci, JA2ZL, will be active as KH8/JA2ZL from Pago Pago, American Samoa (OC-045), between October 23-29th. Activity will be on 80-10 meters using CW, SSB and RTTY. He will use a TS-480HX into a HX-5Bi Hexbeam, 30m vertical, 2 element 40m and 80m vertical. QSL via his home callsign, direct or by the Bureau.
KP2, U.S. VIRGIN ISLANDS
Yuriy, N2TTA, will be active as KP2MM during the CQWW DX SSB Contest (October 27-28th) as a Single-Op/All-Band/ Low-Power entry. QSL via LoTW. For more details, see:
http://www.n2tta.info
NH8, SWAINS ISLANDS
Two members of the 19 international NH8S DXpedition team, Joe/W8GEX and Dietmer/DL3DXX, arrived on American Samoa late Thursday evening to coordinate last minute details. The reminder of the team will arrive in Pago Pago late Monday evening, September 3rd. They anticipate leaving for Swains Island on Tuesday morning for the 24 hour boat trip. Since the equipment is already there, they should be able to get right to work on erecting the antennas and setting up stations. They are anxious to get on the air and will be active as soon as possible.
Joe, W8GEX, mentions in his "60m Newsletter" this week that [edited] "This tent/generator operation will start around September 6th, and last until September 18th. I'll be on channel 5 when I am on, unless I have QRN and then I'll move the channel 4. It will take a few days after the operation has started before I think about getting on 60 meters. San, K5YY, will be my pilot station, and he will keep you posted on my activities. I plan to look for Europe around 0400z during their sunrise. I think the best time for NA should be between 0900z to 1100z. If you don't hear me, feel free to call me as we may just be monitoring the channel. Keep in mind I have my regular three hour shift to perform on the other bands, and I'll work you guys in between. I'll try to have Jerry, WB9Z, who's a great op and knows the 60m band, help me out. Please give your call many times in order for us to get your call. I will have a beverage so that will be helpful on receive. I
am using a vertical I have made, and our propagation charts says we should be able to work NA East coast at S3 levels. Let's hope this is the case to get some W1s and W2s in the log."
More details on the NH8S operation, see the Web site:
http://nh8s.org
LAST MINUTE NH8S UPDATE BEFORE GOING TO PRINT:

"SAFE LANDING ON SWAINS ISLANDSWAINS ISLAND 2012 NH8S DX-PEDITION
The weather was absolutely gorgeous on Swains Island for off loading the cargo and David's crew. They arrived on Saturday afternoon, August 25, 2012, and had enough tide for the landing craft to off load most of the fuel, supplies, and David and his crew. They immediately set up a couple of tents at the beach for shading while awaiting supplies from the ship. Then Sunday morning at high tide they off loaded the rest of the cargo. The MV. Sili departed Swains Sunday @ Noon, and arrived Pago Pago early Monday morning August 27, 2012.
Hands down, the star of the show was this old landing craft that was specially repaired for this operation. It was able to take all the cargo fuel and passengers all the way to the beach with about 5 trips. David and his crew are currently clearing areas to construct stations, sleeping quarters and restroom facilities. Since the arrival of Team Leader Joe Pater And Dietmar Kasper, David has been working with Joe on specific station Locations on the island.
Everything is in place and the SWAINS ISLAND 2012 NH8S DXPEDITION is shaping up. We are finalizing our food supplies and await the arrival of the rest Of the Team set for Monday

night, September 3, 2012. Then the Team and cooks will depart for Swains by noon September 4, 2012. The only other thing that will make this more exciting is if the Team members will bring with them all their “McGaiver Tricks” for 2 week survival on a remote island like Swains Island. Oh I hope everyone likes fish because the fish is really biting, and the reef is full of lobsters.
- Alex Jennings"
To see the NH8S Press Release with pictures, visit the NODXA FaceBook page at:
https://www.facebook.com/media/set/?set=a.458786304155996.109243.437998869568073&type=3&l=ef7f153a10
PACIFIC TOUR (5W, KH8 and Possibly ZK3)
Opertaors John/N7CQQ and Ron/N6XT are on an exploratory trip to American Samoa (KH8), Western Samoa (5W0) and possibly Tokelau (ZK3). They depart the West Coast USA on Thursday, August 30th, for Pago Pago, American Samoa, via Honolulu, Hawaii. John and Ron will be in American Samoa to see the Swains expedition group off from American Samoa. During the 30 day trip to the Samoa area, John and Ron hope to get permission to visit Tokelau for two weeks. Their equipment will be shipped to Samoa via US Postal Service to Pago Pago, American Samoa. They will take a flight from American Samoa to Apia, Western Samoa. They hope to find the Tokelau Visitors center open on Saturday where they hope to get permission to visit Tokelau. They will return to American Samoa to get their gear, see the Swains guys off and take a ferry either to Tokelau or back to Western Samoa. If all else fails, they will set up shop in Western Samoa to operate and continue to try to get permission to visit Tokelau. Western Samoa has a few islands that they might visit during their stay.
John hopes to get his old 5W0QQ callsign and Ron will get his special 5W callsign. They also might operate from American Samoa during late September while they await their flight home. John and Ron will both be using ICOM IC 7000 transceivers with SteppIR BIG Vertical antennas. They will construct wire antennas for 80 and possibly 160 meters. They might have access to an amplifier on Western Samoa, as John, N7CQQ, is taking two 3-500z tubes to Atsuo Sakuma, 5W1SA, the only Ham at Western Samoa. Support for this mini expedition was received from SteppIR Antennas, ICOM America, The DX Store, and Radio World of Boulder City, Nevada. QSL to Ron and John via their (QRZ.com) home callsign addresses.
PC12, NETHERLANDS (Special Event)
Fred, PA0FAW, will be operating PC12WSF between September 3-30th. Activity will take place during the World Statues Festival in Arnhem. Operations will be on CW, SSB and PSK etc. Fred has the reference numbers: DIG1487, ISWL PA-11092 and WAB-11722. QSL via PA0FAW, direct, by the Bureau or EQSL (NO LoTW and SWLs are welcome). More details will be on (QRZ.com).

than 10000 old QSL cards in several different albums/galleries. This site contains:
- The ten most wanted DXCC entities (2004 to 2011) with more than 300 QSLs
>- At least one card for each 60 deleted DXCC countries (more than 1400+ QSLs) - Nearest the totality of current prefixes, disappeared now (more than 3600+ QSLs)
>- Album for stations from North Africa 1945-1962 (300+ QSLs)
>- More than 850 QSLs from the Antarctic bases.
>- Nearly 270 QSLs from the TAAF (Terres Australes and Antarctiques Francaises).
>- More than 300 QSLs for the rare French Pacific Islands such as FK/C, FO/C, FO/A, FO/M, FO/C and FW
>- Nearly 100 cards from Eparses Islands such as FR/B/E/G/J/T
>- The FG, FM, FP, FS, FY stations from 1945 to 1970
>- More than 1400 cards for the old timer with more than 130 countries before 1945.
>- Cards from the French Department before 1945.
>- At least one card from each of the states in the U.S. before 1945.The URL address for the Web site is:http://LesNouvellesDX.free.frSome cards are still needed for the collection, and your particip- ation is welcome. Please visit their site and give them your comments by sending an E-mail to: LesNouvellesDX@...
QSL ROUTE CHANGE Khalid, A61BK, has decided to manage his own cards.
As of August 20th, all cards for Khalid should now go direct to him at his new (QRZ.com) address. Buzz, NI5DX, will no longer be confirming any cards for A61BK. However, he will answer any A61BK cards that arrive in the next Bureau shipment to NI5DX. After this shipment, no A61BK cards will be confirmed via the Bureau either.
Effective immediately, also NI5DX will no longer be answering requests for any of the special event callsigns (A60HD, A60A, A60JJ, A60ITU, A60WARD, and A60DWC). Please check QRZ.com to see the QSL route.
QSL RECEIVED VIA LoTW: 5C13KD, 5C5W, 6O0CW, 7O6T, 7S0X, 9A5AN, 9J2CA, 9M0L, 9V1YC, A45XR, A61BK, A61ZX, A92IO, AP2IA, BD4CQ, CE2/VE7SV, CE2WZ, CN8KD, CT3DZ, DU3/N0QM, F4GQY, F8AEJ, FK/F4BKV, FK8DD, FP/VA2WA, G4GIR, G4ZOY, GM3YOR, GM3YTS, GO3NPA, HK0NA, HP1/IQ6CC, HU2DX, IK6DTB, IZ2GRG, JH0INP, KH2L, KH6ND/KH5, MD0CCE, MM0BQN, NI1N, OV2B, PC4U, PJ4/LU8ADX, PJ5/K3TRM, PJ5/SP6EQZ, PJ7PT, PT7ZZ, PZ5RA, RI1ANF, RX3AGD, SP5APW, SP7ATA, SQ9OH, TF3PPN, TI2HAS, TN2T, TO3X, TY1KS, UA3LLR, UT5JCE, UU1AZ, VE8GER, VK7ZE, WL7E, XE2S, YB0MZI/4, YB0NFL, YB1HK, YB2LSR, YB3OX, YV5KAJ and ZD9GI
QSLS RECEIVED VIA MAIL: 3DA0FC, 3D2MP, 3D2T, 6O0CW, 9K2/SP4R, 9L0W, C50C, CP4BT, D3AA, FM/F6ARC, FR4NT, FR8NE, H6VA, J20RR, J28RO, J68HZ, JD1BMH, KL7RCC/p, OX/DL3GCS, P41HQ, T2T, TU2T, UI8ZAA, VP2ETE, VR2XMT and YN4SU
QSLS RECEIVED VIA THE BUREAU: 3B9WR, 3C0E, 3D2A, 3D2ML, 3V8SM, 4KT9W, 5N0OCH, 5R8WW, 5W0OJ, 6W1RW, 6W2SC, 7Z1HL, 9A1MB, 9L5MS, 9M2TO, 9M8DX, 9U0A, 9U1RSI, 9X0CW, 9X0SP, 9Y4HQ, A25/DL7DF, A35AY, A6/DL9WVM, B1HQ, BV9G, BX4AA, CT3/DJ6QT, CT9/DL3KWF, DP1POL, E21YDP, EL2A, FG5NO, FJ/OS1T, FS/F8PDR, FS/F5AHO, HB0/HB9AON, HP1/OA4WW, HU2DX, IG9U, IF9E, IM0/IK0FMB, IS0ANT, IS0BNC, IS0ESG/QRP, IS0SWW, J28A, J79AN, JT1GCV, JW5X, JW9VDA, OD5/DL6SN, OX2A, P29VCX, P4/DK1MM, P41HQ, PJ4C, PP0T, S9DX, SV5/DL2DXA, T32JB, TA/DL7BC, TC2012WKD, TC57A, TF/DL3SEM, TG9IRP, TK4W, TN2T, TO7ZG, TX3T, TX4T, TX6T, TX7M, TY4TW, V21ZG, V5/DJ2HD, V5/DH3WO, VK9C/G6AY, VP2MTA, VP6T, VP8LP, XE3MAYA, XV4SP, XV4YY, YJ0VK, ZA1TC, ZD7XF, ZL1BYZ, ZL6LH, ZL8X and ZY0T
S7, SEYCHELLES
Operators Luca/I5IHE, Simone/IK5RUN and Dan/I5OYY will be active as S79LC, S79UN and S79YY, respectively, from Praslin (AF-024) between October 21st and November 4th. Activity will be holiday style on 80-10 meters using CW, SSB and RTTY. Equipment will be a Elecraft K2 and KX3 transceiver into home made 5 band vertical antenna (on the beach) and a G5RV. QSL via their home callsign, direct only or LoTW. Online logs will be available at: http://www.ik5run.it/s79.html

T6, AFGHANISTAN
Martin, DL3ASM, is now active as T6SM from ISAF Camp Marmal, Mazari Sharif, until the end of November. Activity has been on 20/17/15/10 meters using CW (preferred) and SSB. He is operating with an Icom IC7000 with 75 watts into a 7m Vertical antenna. QSL via his home callsigns.
TC, TURKEY (LH Op!)
Members of the "TC Special Wireless Activity Team" (TCSWAT) and the "Giresun Radio Amateurs and Nature Sports Club" (GITRAD) continued to activate lighthouses in Turkey this past weekend for their "Western Blacksea Lighthouses On The Air (WEBLOTA) Award". The next and last operations for this award will take place in September. In mid- September look for TC6GLH from Sinop Gerze Lighthouse and the last activation will be TC2ZLH from Zonguldak Lighthouse at the end of Sep- tember. QSL via TA1HZ (please do not hurry to send for QSL cards, they will be printed at the end of January 2013). For more details about the lighthouses award, visit:
http://www.qrz.comhttp://www.tcswat.org/awards/WEBLOTA/index.html
TI, COSTA RICA
Operators Juan/TI2JCY, Carlos/TI2KAC, Mauricio/TI4ZM, Eddie/K4UN, Bob/W4BW, Keith/W4KTR and Lex/W4XO will be active as TI8M from Costa de Pajaros, located in the North West Pacific Coast from Costa Rica, during the CQWW DX SSB Contest (October 27-28th) as a Multi-2 entry. Look for activity before, after and during the contest on 160-10 meters. QSL via route on (QRZ.com).
TT8, CHAD (Update to OPDX.1072)
Members of the "Italian Dxpedition Team" will be active as TT8TT from N'Djamena between October 3-16th. Activity will be on 160-6 meters using CW, SSB and RTTY. Suggested frequencies are listed in OPDX.1072. Operators mentioned are Alfeo/I1HJT, Silvano/I2YSB, Vinicio/IK2CIO, Angelo/IK2CKR, Marcello/IK2DIA and Stefano/IK2HKT. The pilot station is Art/IK7JWY. The team will pay particular attention to Japan and the West Coast, as Chad is 40th and 23rd, respectively in the world ranking of the most wanted. QSL direct via I2YSB. QSL by the Bureau via IK2CIO. Logs will be posted to LoTW within six months. A TT8TT survey (for needs), a log search and an OQRS are all available on their Web page at:
http://www.i2ysb.comOfficial forum is at:http://bit.ly/NVQaav
V7, MARSHALL ISLANDS
Rick, WH0AI (ex-T32AI), is currently active from Kwajalein Island (OC-028) from the Kwajalein Amateur Radio Club station and using the club callsign V73AX. Activity has been on 20/15/10 meters at various times using CW and SSB. Rob, KD7H, had a CW QSO with him, and was told by Rick to QSL via his WH0AI (QRZ.com) address, but PLEASE use "green stamps" to help with return postage instead of IRCs. Apparently, his wife is having a problem exchanging IRCs for the return postage. Rick will be on Kwajalein for a while working and is trying to obtain a "V73" callsign (he has requested V73AI) which he hopes to have within several days. Also, Rick plans to be active during the upcoming contest season.
ZA, ALBANIA
Operators Franta/OK1HH and Bob/OK2BOB will be active as ZA/homecall between September 12-20th. Activity will be on 160-6 meters using CW and SSB. QSL via their home callsigns.
ZD9, TRISTAN DA CUNHA (Update)
Operators Martin/G3ZAY and Robert/M0VFC will be active as ZD9UW from Tristan da Cunha possibly on September 27th for 7 days. They will leave Cape Town on September 20th, for a seven day trip (depending on the wx) aboard the "Baltic Trader". Activity is not expected to be on all bands because of the time they have. Logs will be uploaded to ClubLog and LoTW shortly after their operation (or during, if an Internet connection is available). QSL cards will be handled by an OQRS, direct to M0VFC, or via E-mail for Bureau requests. For

more details and updates, visit their Web page at:
http://www.zd9uw.org.ukADDED NOTE: They state on their Web page, "We would like to try and raise some extra funds for the Tristan da Cunha Educational Trust Fund, and plan to take some QSL cards to the island. Anyone willing to donate 25 USDs (maximum of 100 donors) will receive a direct card mailed from Tristan for their first two QSOs (the rest to be posted at no extra cost to the recipient on return to the UK). We'll add details of how to donate shortly - check back here soon, or email M0VFC."

http://www.cordell.org/CI/

We are pleased to announce a DXpedition to Clipperton Island, Territory of France in the Eastern Pacific, during March, 2013.
The project will be mainly an amateur radio DXpedition, but it will also involve selected scientific projects related to the environment, populations, and history of the island.
We invite your participation in the project, as a participant, collaborating scientist, student, or contributor.

Clipperton Island is an uninhabited 3.5-square-mile coral atoll in the eastern Pacific Ocean, southwest of Mexico and west of Central America, at 10°18′N 109°13′W. It is an overseas possession of France under direct authority of the Minister of Overseas France. The island is low-lying and largely barren, save for scattered grasses and a few clumps of coconut palms. A small volcanic outcrop rising to 95 ft on its southeast side is referred to as "Clipperton Rock". The atoll has been occupied at various times by guano miners, would-be settlers or military personnel, mostly from Mexico, which formerly claimed it until international arbitration awarded it to France in 1931. However, Clipperton has had no permanent inhabitants since 1945. It is still visited on occasion by fishermen, French Navy patrols, scientific researchers, film crews, and shipwreck survivors. It has also proven a popular site for transmissions by ham radio operators. [From

A small volcanic outcrop rising to 95 ft on its southeast side is referred to as "Clipperton Rock". The atoll has been occupied at various times by guano miners, would-be settlers or military personnel, mostly from Mexico, which formerly claimed it until international arbitration awarded it to France in 1931. However, Clipperton has had no permanent inhabitants since 1945. It is still visited on occasion by fishermen, French Navy patrols, scientific researchers, film crews, and shipwreck survivors. It has also proven a popular site for transmissions by ham radio operators. [From
Wikipedia, the free encyclopedia]
OVERVIEW

Cordell Expeditions is pleased to announce a new amateur-radio expedition to Clipperton Island, March, 2013. We will use the vessel Shogun from San Diego. This vessel was used for numerous previous trips to Clipperton, including TX5C in 2008.

The goals of the project are:

Conduct amateur radio operations to enable amateurs to make a contact with Clipperton;

Implement an advanced version of the real-time online log website DXA;

Carry out activites in support of the wildlife sanctuary and facilities on Clipperton Island.

The first goal of the DXpedition is to enable as many contacts with Clipperton for as many different radio amateurs as possible. To this end we will field a highly experienced team of up to 24 operators and up to 8 active stations. The motivation for this is to participate in the worldwide activity of amateur radio, using it as a tool for fraternity and information. We expect to make as many as 100,000 contacts with 25,000 different stations during the expedition. We will favor making contacts with stations needing Clipperton for the first time, but all DXers are welcome to contact us.

The callsign for the operation has not yet been selected. It is expected to use the prefix TX5.

The second goal of the radio operation is to deploy and use DXA (version 2). Developed by KK6EK for the 2005 Kure Atoll DXpedition K7C, this system comprises a satellite link from the DXpedition site to a land-based server, and software to enable quasi-real-time communications between the DXpedition site and the server, including direct interaction with DXers. The system is described in various documents available at www.cordell.org/DXA and is available in a working simulated expedition mode on this website (click here). The purpose of DXA is to provide a nearly real-time presentation of the radio log as an aid to DXers wanting to make a contact with the DXpedition. The system reduces the need for duplicate (insurance) contacts, provides an engrossing view of the ongoing operation of the DXpedition, and enhances the integrity and accuracy of the log.

The third goal is to contribute to ongoing research and monitoring of the environment at Clipperton. The team will carry out several scientific projects, including:

(1) Search for possible infestation by the extreme pest ant Pheidole megacephala (the big-headed ant). A PDF of the proposal for this work can be obtained by clicking here.

(2) Collection of representative specimens of marine algae for colleagues the Jepsen Herbarium, University of California, Berkeley. A PDF of the proposal for this work can be obtained by clicking here.

The Clipperton Expedition is being managed by Cordell Expeditions, a nonprofit research group based in Walnut Creek, California. The group has fielded expeditions to remote sites for more than 25 years. Among other projects, Cordell Expeditions provided the scientific basis for designation of the Cordell Bank National Marine Sanctuary.

The principal organizers of this project are: Dr. Robert W. Schmieder, KK6EK; Christian Janssen DL1MGB; and Carlos Nascimento NP4IW.

It is policy of this project to observe and operate within all permits, regulations, and recommendations of the various agencies with interest in Clipperton Island, with particular attention to minimizing impact on the ecosystem. Safety and minimal impact to the Clipperton Island environment have priority in this operation.

CORDELL EXPEDITIONS

Cordell Expeditions is an independent nonprofit research/educational organization. Founded in 1977, the group has carried out a series of research expeditions every year since 1978. The work involves exploring and describing remote sites, principally offshore submerged marine sites that support extensive biological communities. The motivation for the work is to carry out field work to generate primary information about the sites, so

that they can be protected and rationally managed.

The first project of Cordell Expeditions was to explore and describe Cordell Bank, a shallow rocky feature about 50 nautical miles NW of San Francisco, California. As a result of this 10-year project, the U. S. Department of Commerce designated it as the Cordell Bank National Sanctuary.

Other expeditions by the group have been to the Farallon Islands, Noonday Rock, and Fanny Shoal (northern California); the coast near Pt. Sur (California); Rocas Alijos and Guadalupe Island (Baja California); Peter I Island (Antarctica); Roqueta Island (Mexico); Galapagos (Ecuador); Easter Island/Salas y Gómez (south Pacific); Heard Island (South Indian Ocean); San Felix island (Chile); and Kure Atoll (Pacific Ocean).

Books that resulted from the these expeditions include:
Ecology of an Underwater Island
Edward Cordell and the Discovery of Cordell Bank
Rocas Alijos. Scientific Results from the Cordell Expeditions
3YØPI Peter I Island: The 1994 DXpedition
DX-Aku: Messages from the Easter Island Expedition
VKØIR: The 1997 Heard Island Expedition
XRØX: The 2002 San Felix Island Expedition
The work has resulted in the discovery of more than 20 new species, significant uncharted topographic features, and many first observations of environmental conditions. Altogether more than 1000 new records (range and depth extensions, and first observations) have been recorded. A large collection of specimens, and photographic archive, and a large number of popular articles are additional results of the expeditions.
Cordell Expeditions is also involved with ongoing research programs associated with educational institutions, including Diablo Valley College, the California Academy of Sciences, St. Mary's College, and the Shorebird Nature Center in Berkeley. Additionally, the expeditions have embraced radio science, with extensive involvement in amateur radio used on expeditions, particularly to remote sites such as oceanic islands.

CORPORATE

The 2013 Clipperton Island Expedition will have a broad audience worldwide, partially due to its visibility in on a real-time website. It is estimated that the project will be seen and followed by 40,000 radio amateurs, 1000 students, 1000 professional working scientists and administrators, 10,000 conservation-motivated individuals, and many others in various disciplines such as journalism, environmental protection, and photography. This viewership constitutes a highly targeted audience for products and services in fields related to travel, research, education, conservation, and communications.

The project offers corporate sponsors several ways to benefit from this high visibility:

* Logos and links on the expedition websites
* Direct advertising on the websites
* Testimonials and endorsements of products and services
* Photographs of products in use on the expedition
* Rights to advertise, publicize or otherwise use the name of the 2013 Clipperton Island Expedition in promotional activities
* Availablity for interviews and other special events, as appropriate.
Some current sponsors may be seen HERE

Three websites support this project: (1) the main Cordell Expeditions website; (2) the Cordell/Clipperton DXpedition website; and (3) the real-time radio operations website (DXA). These are shown here and each may be accessed by clicking on the respective thumbnail.

Cordell Expeditions
Clipperton Expedition
DXA
All these websites are linked together. Corporate logos and advertising may be placed on any of these websites. The DXpedition website (this website) offers visibility to the amateur radio audience, and would therefore be appropriate for travel products and services, boats, oceania, islands, transportation, cameras, communications, and entertainment. The DXA website offers a targeted audience for technology products and services, such as electronics, computers, communications, camping equipment, and special materials. The scientific projects (ants, algae) will appeal to educators, researchers, sanctuary managers, and policy makers, hence would be most relevant for products and services relating to environmental management, teaching, conservation, and student projects.

An example of images of a product in use on the expedition (the 2002 Cordell Expedition to San Felix Island, Chile) is shown here. The generator supplies the electrical power for the operations in the tent. We will be happy to provide such images optimized for a particular intended use.

An example of corporate use of project content for advertising is the following ad, which was published internationally by ICOM. The ad shows this organization's 2005 expedition to Kure Atoll, K7C. We will be happy to provide materials to enable you to generate advertising appropriate to your company.

QSL Manager

(Not the QSL card)

QSL manager for the 2013 Clipperton DXpedition will be announced later.
Please read our Policy for QSLing TX5?.

http://www.cordell.org/DXA/index.html#

WHAT IS DXA?

DXA is a dynamic website that allows DXers to view the current status and activities of the DXpedition in near-real-time. Within a minute or so after making a contact with the DXpedition, the DXer is able to see confirmation of that contact entered in the expedition log. Information such as the callsigns logged in the last minute and in the last hour, and the bandmodes currently being worked by the DXpedition, are displayed in a simple, automatically-updated interface. The entire application runs within a standard browser--no software needs to be downloaded or installed.

To launch the current development version DXA2, click this image

To launch the current development version DXA2, click this image To launch the current development version DXA2, click this image
To launch the original (2005) version of DXA, click this image To launch the original (2005) version of DXA, click this image To launch the original (2005) version of DXA, click this image

When the DXpedition logs a QSO with you, a green square is illuminated in your table for the appropriate bandmode, confirming your entry in the log. You can see this green square actually turn on if you are logged into DXA when you make the QSO. Note that once you see the green square, there is no need for an insurance contact. Also, if you have a green square, you can be absolutely certain that you have not worked a pirate, since no pirate can turn on the green squares.

Please note that logging into the DXA window DOES NOT enter you in the DXpedition radio log. You must make your QSOs on the air; DXA merely confirms that these QSOs are in the DXpedition radio log.

If you wish, you can log in with your callsign (lower left corner), and see whether you are in the DXpedition log. It is not necessary to log in to see the activity of the DXpedition, but you must log in order to see your own personal bandmode table for logged contacts.

Please log in with your licensed callsign, not with a "/XX" suffix. DXA does not recognize "/XX".

http://www.cordell.org/CI/CI_pages/CI_DXA.html

DXA is an innovative website that allows DXers to view the QSO log and the status and activities of the DXpedition in near-real-time. Within a few minutes after making a contact with the DXpedition, the DXer is able to see confirmation of that contact. Information such as the callsigns logged in the last minute and in the last hour, and the bandmodes currently being worked by the DXpedition, are displayed in a simple, automatically-updated interface. The entire application runs within a standard browser--no software needs to be downloaded or installed. The image below is a screenshot of a simulation of the DXA

interface as it will appear for the TX5? operation.

Click image to see working screen

The map shows the most recently logged callsigns at the approximate latitude-longitude according to public database information.

When we log a QSO with you, we will illuminate a green square ("greenie") in your personalized table for the appropriate bandmode, confirming your entry in the log. Note that once you see the green square, there is no need for an insurance contact. Also, you can be absolutely certain that you have not worked a pirate.

Important note: Logging into the DXA window DOES NOT enter you in the TX5? radio log. You must make your TX5? QSOs on the air; DXA merely confirms that these QSOs are in the TX5? radio log.

You can see a working version of DXA by clicking on the image above. If you wish, you can log in with your callsign (lower left corner), and see whether you are in the (simulated) TX5? log. It is not necessary to log in to see the activity of the DXpedition, but you must log in order to see your own personal bandmode table for logged contacts (the lower left table in the screenshot above).

This operating DXA window is for demonstration purposes only--the actual Clipperton log will be started when the DXpedition becomes active (March 2013). At that time, all the personal bandmode tables will be empty, and as you make QSOs, your personal table will fill with green squares...provided you actually make the QSOs, of course!

01 September 2012 A.R.I. DX Bulletin

No 1113

==========

*** 4 2 5 D X N E W S ***

**** DX INFORMATION ****

==========

Edited by I1JQJ & IK1ADH

Direttore Responsabile I2VGW

9A - Jan, PA4JJ will be active holiday style as 9A/PA4JJ from Porec (Croatian mainland) until 12 September. RTTY and PSK31 are his preferred modes. QSL via home call (OQRS on www.pa4jj.nl). [TNX PA4JJ]

C2 - Yuki, JH1NBN will be active as either C21BN and/or a special callsign from Nauru (OC-031) between 3 and 12 September. He will be QRV in his spare time, with 100 watts and a wire antenna. QSL via home call. [TNX The Daily DX]

CT9 - Look for CT9/DG3FAW, CT9/DJ6KS and CT9/DJ8OG to be active from Madeira (AF-014) on 4-11 September. They will operate SSB, RTTY and PSK on 80-10 metres (maybe also 6m). QSL via home calls. Matthias, DJ8OG will participate in the WAE SSB Contest as CR3L (QSL via DJ6QT). [TNX NG3K]

E6 - Lance, W7GJ (E6M) will conduct a 6m EME DXpedition to Niue on 7-21 September. QSL direct to home call. Further information, including details on the QSO procedure that he uses "most effectively on these DXpeditions", is at www.bigskyspaces.com/w7gj/Niue2012.htm. During the same period Bob, ZL1RS will be active as E6RS on 2m EME (see www.qsl.net/zl1rs/zk2.html for further information). QSL via home call.

5Z - Eric, SM1TDE (www.sm1tde.bloggspace.se) will be active as 5Z4/SM1TDE from Mombasa, Kenya on 5-22 November. He will operate holiday style on 40-10 metres CW. QSL via home call (bureau preferred) and LoTW. [TNX SM1TDE]

6W - Enrico, IK2FIL will be active as 6V7X (http://6v7x.jimdo.com/) from Senegal from 25 September to 3 October, including an entry in the CQ WW RTTY Contest. The QSOs will be confirmed via the bureau through Global QSL, plus LoTW and eQSL on a daily basis. Direct cards via home call.

8Q - Juergen, OE4JHW will be active holiday style as 8Q7OE from the Maldives (AS-013) on 3-14 September. He will operate mainly SSB and BPSK on 40-10 metres. QSL via home call. [TNX The Daily DX]

EA6 - Look for Alessandro, EA6/IZ4WNA and Giuliano, EA6/IZ4WNP to be active from Ibiza, Balearic Islands (EU-004) on 7-10 September. They plan to be QRV on 40-6 metres SSB and PSK63. QSL via home calls (bureau preferred) and LoTW. [TNX hamradioweb.org]

FR - Michael, DF8AN will operate mainly CW as FR/DF8AN from Reunion Island (AF-016) on 2-10 September. QSL via home call. [TNX DX Newsletter]

HS - Tana, E27EK will participate in the All Asian DX SSB Contest (1-2 September) as E27EK/p from Si Chang Island (AS-107). QSL via home call. [TNX DX World]

IS0 - Riccardo, IZ5JMX will be active as IM0/IZ5JMX from San Pietro Island (EU-165) on 2-14 September. He will operate holiday style on 40-10 metres SSB. QSL via home call, direct or bureau.

KH8S - Two NH8S team members (W8GEX and DL3DXX) expected to arrive on American Samoa on 30 August to coordinate last minute details. The remainder of the team will arrive in Pago Pago on 3 September in the late evening. They anticipate leaving on Tuesday morning (4 September) for the 24 hour boat trip to Swains, where they will remain until the 19th. The equipment is already on the island, and they "should be able to get right to work on erecting the antennas and setting up stations. We are anxious to get on the air and will be QRV as soon as possible". Announced frequencies are:

CW 1826.5 3503 7003 10103 14003 18079 21003 24894 28003 50107
SSB - 3790 7082 - 14185 18140 21285 24955 28485 50107
RTTY - 3580 7035 10148 14080 18099 21080 24901 28080 -

Frequencies for activity on 60m are 5405 (CW) and 5403.5 (SSB). Plans are to upload logs daily by satellite phone from the island to Club Log. An Online QSL Request System (OQRS) will be activated on Club Log after the DXpedition ends (around 22 September). You will be able to request your QSLs one of four ways: OQRS Direct, OQRS Bureau, direct mail (Swains Island DXpedition, P.O. Box 5005, Lake Wylie SC 29710, USA), via bureau to AA4NN. Logs will be uploaded to LoTW six months after the conclusion of the DXpedition. Further information can be found at www.nh8s.org

OZ - PA0ABM, PA1SVM, PD2DX and PD2R are active as OV2T (QSL via PA0ABM) from Vendsyssel-Thy/Nordjylland (EU-171) until 4 September. During the weekend they will join the OZ5GX group for the IARU Region 1 Field Day as OZ5GX/p.

PA - Promoting the World Statues Festival that will take place in Arnhem at the end of the month, Fred PA0FAW will be active as PC12WSF on 3-30 September. QSL via home call, direct or bureau.

SM - Look for Fred, SM7DAY/p to be active from Senoren Island (EU-138) on 8-14 September. He will operate CW and SSB on the HF bands. QSL via home call, direct or bureau. [TNX SM7DAY]

SV - Dirk, ON5CT will be active as SV8/ON5CT/p from Corfu Island (EU-052) on 4-18 September. He will operate SSB and RTTY on 20, 17, 15, 12, 10 and 6 metres. QSOs to be confirmed via eQSL and LoTW, no paper QSLs will be available. [TNX NG3K]

SV9 - Look for Silvia, SV9/EA1AP and Alberto, SV9/EA1SA to be active from Crete (EU-015) on 9-15 September. They will operate SSB, CW and RTTY on 80-6 metres. QSL via home calls. [TNX DX World]

W - Special memorial station N3U will be active on 8-13 September in remembrance of United Flight 93 and the tragic events that occurred on 11 September 2001. QSL via W3PN, direct or bureau.

YB - Joppy, YB8XM and another operator have plans to operate from Babar Island (OC-271, new one for IOTA) on 1-6 November. [TNX JN6RZM]

ZD9 - Martin, G3ZAY and Robert, M0VFC have secured places on the "Baltic Trader" travelling to Tristan da Cunha (AF-029) on 20 September from Cape Town. They expect to have about 7 days on the island from the 27th, though this could be curtailed by bad weather. They do not expect to have time to cover all bands and probably will not be able to operate on 160 or 6 metres. The callsign will be ZD9UW to be used by both operators. Logs will be uploaded to LoTW and ClubLog shortly after the operation (or during if an Internet connection is available) and cards will be handled by OQRS on Clublog, or direct to M0VFC, or via email bureau requests. Please try to avoid sending inbound cards via the bureau.
Martin and Rob would like to try to raise some extra funds for the Tristan da Cunha Educational Trust Fund. They plan to take some QSL cards to the island and anyone willing to donate $25 (up to a max of 100 donors) will receive a direct card mailed from Tristan Da Cunha for their first two QSOs (the rest to be mailed at no extra cost to the recipient on return to the UK). More information on how to donate will be available at www.zd9uw.org.uk [TNX G3ZAY]

PACIFIC TRIP ---> John, N7CQQ and Ron, N6XT will be "in the Samoa area" for thirty days starting on 30 August. They will be active from Samoa (5W) and hopefully will get permission to visit Tokelau (ZK3) for a couple of weeks. They also might operate from American Samoa (KH8) in late September while waiting for their flight home. QSL via home calls. [TNX The Daily DX]

==========
*** 4 2 5 D X N E W S ***
**** GOOD TO KNOW ... ****
==========
Edited by I1JQJ & IK1ADH
Direttore Responsabile I2VGW

DXCC NEWS ---> After reviewing new information and documentation, the ARRL DXCC Desk has concluded that the 1998 XU1A DXpedition to Cambodia will be valid for DXCC credit. If you have had QSLs rejected for this operation, please send a request via e-mail (bmoore[@]arrl.org) to be placed on the list for update. If you remember the submission in which you included the QSL, please note this in your e-mail, as it will expedite the search for the rejected QSO.

GTC CW CUP ---> The second Greek Telegraphy Club (GTC) CW Cup will be held on from 12 UTC on 6 October to 12 UTC on the 7th. Details can be found at www.raag.org (click on the G.T.C. tag) or from Stathis Maliakis, SV5DKL (sv5dkl[@]rho.forthnet.gr) [TNX SV5DKL]

HK0NA ---> The HK0NA (Malpelo 2012) DVD is now available for sale. "This video captures the planning and organization phases, the non-stop pileups, humor and local animal life - as well as incredible footage of team members

climbing the mountain. In all my experience, this was the most physically difficult DXpedition of all", Bob Allphin, K4UEE says. To purchase a copy, go to www.k4uee.com/dvd

NOT THE MANAGER ---> Effective immediately, NI5DX is no longer the QSL manager for A60A, A60DWC, A60HD, A60ITU, A60JJ and A60WARD. Check qrz.com for the QSL routes. [TNX K1XN and The Golist]

QSL A61BK ---> Effective 20 August, all cards for A61BK should go direct to him (Khalid Khamis, P.O Box 19037, Dubai, United Arab Emirates). Buzz, NI5DX, will no longer be confirming any cards for A61BK, however he will answer any A61BK cards that arrive in the next bureau shipment. After this shipment, no A61BK cards will be confirmed via the bureau either. [TNX K1XN and The Golist]

+ SILENT KEYS + Fr. Lars Rooth, SJ (SM1BOE) became a Silent Key on 21 July, at 90 years of age. During his long eventful life he was, among many other things, in charge of the Scandinavian section of Vatican Radio, and an operator at HV3SJ.
Cris Henderson (GM4FAM) passed away on 23 August. He was only 57 years old, and one of the top CW DXers in the United Kingdom.

OM Zen,
Khusus utk Diamond DXCC ini gak perlu QSO yang sudah confirmed (QSL card atau LoTW) tapi cukup worked, kita sudah QSO dg stasiun ybs.

Jadi boleh QSO yang blom confirmed koq.

Kalo sudah 100 entities (sebaiknya sih lebih) segera dikirim aja aplikasinya via online saja.

Ahh, mantaft OM Zen.
Ajukan dulu dan nanti khan masih bisa ditambahkan sampai 125, 150 entities - endorsement.
Waktu itu rencananya saya mau ajukan setelah 150an - tapi koq belakangan makin seret, banyak DX di DX watch/cluster, tapi gak terdengar di radio.

Yang saya masih bingung Somalia, Yemen, China, Morocco, PNG tapi yang lumayan nambah jumlah yang dari Malaysia (4 ent) & Indonesia (4 ent dari 5 ent).
Yang kemungkinan dapat lagi tinggal 2 itupun blm pasti (4S/srilanka & YB7/borneo), ZD7/St.Helena tiap sore muncul di cluster, kemarin sempat hawar2 terdengar dan saya nunggu giliran aja kalo2 YB0MWM yg sedang manggil bisa terdengar - tinggal lanjutin (kalo terdengar, HI).

http://www.bigskyspaces.com/w7gj/Niue2012.htm

E6M in Namukulu, AH51baW7GJ 6m EME DXpedition to Niue
September 7-21, 2012 (CQ DX Zone 32)

INTRODUCTION

You very well might wonder, “Why in the world would anybody go the opposite side of the world on a 6m DXpedition at a time of year with no Es and during a solar cycle with little to no chance of F2 propagation?” And on top of that, go at a time when the $US is at an all time low compared to the local currency and there is also an epidemic of Dengue Fever taking place on the island? The answer, of course, is to take advantage of the superb EME conditions afforded at this point in the low solar cycle! If you are thinking about a trip, you might as well go someplace VERY rare so you can hand out a new DXCC to virtually every half million mile contact. In order to provide sufficient advance planning for stations wishing to contact me while I am in Niue, I am providing plenty of advance notice of this DXpedition. Background on Niue can be found here. I urge you to gain experience with JT65A and especially review the QSO PROCEDURE that I use most effectively on these DXpeditions I look forward to contacting you on 6m EME!

This is VERY IMPORTANT: Because Niue has a new IARU prefix of E6, you will need to add E6 to the special DXCC PREFIX box on the WSJT SETUP/OPTIONS screen. This will enable you to use the more sensitive search for our new callsigns. Otherwise, WSJT will think that its copying of E6 is a mistake, and it will only decode the callsign if my signal is UNUSUALLY STRONG at your receiver.....which I certainly do not expect to be!

To the right, please see how I have added E6 to the list of recognized callsigns by putting it into the proper box on the WSJT SETUP/OPTIONS screen on my computer here at home. To confirm that you have properly added E6 to the WSJT prefix list, you should be able to click on the main WSJT screen's HELP tab and select the screen for "AVAILABLE SUFFIXES AND ADD-ON PREFIXES". At the bottom of that screen, you should see "Optional Prefix: E6".

Please also add E6M and E6RS in grid AH51ba to your call3.txt file. You do this from the main JT65 screen. If you have any question on how to do this, please either contact me, or ask any experienced 6m EME operator on the ON4KST EME CHAT PAGE or 2m EME operator on the N0UK JT65 PAGE.

LOGISTICS

Once again, ZL1RS/E6RS is providing 2m EME operation from the same location during approximately the same period. Bob's results will be on his web page. We plan to arrive in Niue on Friday afternoon September 7 local time. There is a VERY remote chance that we will be QRV by our moonrise at local midnight that day (Saturday September 8 GMT), or by our moonset the next morning. We hope to be able to get set up by local Saturday evening (Sunday morning UTC) moonrise. I hope to be able to stay QRV until my moonset on Thursday

September 20 UTC, or until the activity disappears. The planned location will be in the relatively rare grid of AH51 at the northwestern end of the island. There recently has been a Dengue Fever outbreak on the island, which may impact out ability to operate the antennas manually during certain periods. If it turns out that there is no space to set up the antenna at this QTH, we will have to find somewhere else to set up the station and commute to it to operate.

The photo to the left is Kaliki Lodge in Namukulu, where we will be staying. The view is facing to the east. You can see that we expect to have restricted moonrise activity from this QTH, but will be on when the moon does rise. The photo is somewhat deceiving, though, since it was taken with a telephoto lens, which makes the background look closer than it actually is. According to my estimates based on the elevations displayed on Google Earth, I think we should have moonrise around 5 degrees elevation.

Moonset looks more favorable, with a negative horizon, provided we can find enough clear open space for the antenna! The red "X" below marks the hopeful location of the antenna:

EQUIPMENT

The 6m station is essentially be the same as that used at E51SIX, 3D2LR and 5W0GJ. The 6M-1000 has been modified by M2 for overseas use, and provides a solid KW output on JT65A mode with 3 watts of drive. The transceiver this time will still be the reliable K3 and PR6 preamp. The K3's flat, wide bandwidth is ideally suited to copying multiple JT65A mode callers spread out every 200 Hz from about -800 Hz to +800 Hz. The antenna again is my 6M8GJ yagi fed with LMR600 low loss cable and home-made manual elevation mount. As you can see from reviewing the E51SIX TRIP REPORT from that operation, many contacts were made with single yagi horizon-only stations, and the same was true from 3D2LR and 5W0GJ. The smallest station contacted from all three of those places was N3CXV with his single 6M5X yagi. If you have a good yagi, good ground gain, good power and lots of patience, we should be able to complete!

I also will be taking a 20m dipole, so may be on 20m JT65A or USB with 100w if I am not operating 6m EME.

OPERATING SCHEDULE

We expect to have limited access to the internet from time to time, and I will attempt to send out updates regarding our progress, status and confirm our actual grid locator and callsigns. If you copy us, please spot us on the DX Cluster so people will know the correct grid locator, as well as the frequency and our status. I will diligently try to be QRV during all EU and NA moonsets and EU moonrises. However, look at the photo above and realize that my moon may actually rise around 5 degrees elevation. Hopefully, my moonset will be a different situation. Please watch the ON4KST EME page and MMM on VHF page for updates. I will also try to post results and updates at the bottom of this page.

Please keep calling me even if you copy me working someone else. As long as you are not on the same frequency as the other station, you will not be interfering with them. Please coordinate your calling frequency with others on the ON4KST EME chat page to prevent interfering with each other - ideally, stations should be spread out every 200 Hz. I try to decode all callers every receive sequence, and I make a note of each caller and their and frequency so I can reply to you as soon as I am able. Therefore,NEVER change your transmit frequency after you start calling - pick a clear frequency nobody else is using and stay on it! I will try to contact any callers I can copy, but first priority will be given to

contributors and stations with shorter common moon windows.

NOTE: The days of lowest Degradation are September 12-18. If you are in EU, you may not have any window left by then - I encourage you to try to contact me as soon as I am QRV. If you are in NA, I urge you to try to contact me before Saturday September 15 (new moon). Not only could the new moon be noisy, but the Declination is really starting to go negative after that. For those of you who may be new to EME, that means MY ELEVATION will become VERY HIGH during your moonset. Remember that I am using a single yagi, and it can be elevated only to a maximum elevation of 65 degrees (with great difficulty, trying to interlace the elements between the guy ropes), and if the guy ropes are wet, the elements are short out causing high SWR, making operation impossible. So I have a lot better success when my elevation is below 45 degrees ;-) So....even if you are in NA and figure we have plenty of windows, PLEASE don't wait until my elevation is too high to work you!

6M QSL INFORMATION FOR E6M

Please QSL direct with SASE (foreign stations include IRC or $USD for postage) direct to:

Lance Collister, W7GJ
P.O.Box 73
Frenchtown, MT 59834-0073
USA
NOTE: All QSL's for E6RS must be sent directly to ZL1RS at his QRZ.com address.

FREQUENCY AND SEQUENCE

For EME, I plan to operate on 50.190 and will always transmit in the first sequence JT65A mode. Please check this page because I may have to change this frequency due to receiver birdies at my end! If you copy me on some ionospheric mode while I am pointed at the moon and calling CQ on JT65A mode, please answer me on JT65A mode! When not aiming at the moon, I may also beacon on 50.190 or some other frequency, possibly using JT65A or ISCAT so people can detect me under marginal propagation. I also plan to have the ability to operate SSB and/or CW if there is a strong enough ionospheric propagation for those modes.

CONTRIBUTIONS

It is very expensive to haul a 6m EME station halfway around the world - especially with the current unfavorable exchange rate! Therefore, any contributions toward the DXpedition are greatly appreciated! If you would like to contribute via PayPal, please send your contribution to my email address, which is my new PayPal account. Many thanks to the following stations who have already provided generous contributions:

SM7FJE, G8VR, K7CW, K2ZD, G8BCG, ON4IQ, VE1JF, KB7Q, N3CXV, G3WOS, KJ9I, ZL3NW, SM7AED, IW5DHN, FO4BM, N8JX, K0JY, OZ4VV, VE5UF, S51DI, VA3NCD

ZD9UW

A DX'pedition to Tristan da Cunha, the world's most remote inhabited island, by G3ZAY and M0VFC.
September 2012

2012-08-31: Latest news

We (G3ZAY and M0VFC) have secured places on the "Baltic Trader" travelling to Tristan da Cunha on 20th September from Cape Town. We expect to have about 7 days on the island from 27th September though this could be curtailed by bad weather. We don't expect to have time to cover all bands, and probably will not operate on 1.8 or 50MHz. We will operate as ZD9UW.

Logs will be uploaded to ClubLog and LoTW shortly after the operation (or during, if an Internet connection is available), and cards will be handled by OQRS, direct to M0VFC, or via email bureau requests. Please try to avoid sending inbound cards via the bureau.

We would like to try and raise some extra funds for the Tristan da Cunha Educational Trust Fund, and plan to take some QSL cards to the island. Anyone willing to donate $25 (maximum of 100 donors) will receive a direct card mailed from Tristan for their first two QSOs (the rest to be posted at no extra cost to the recipient on return to the UK).

We'll add details of how to donate shortly - check back here soon, or email M0VFC.

3B8/IW5ELA, HONEYMOON AFRICA 2012

After Corsica, Mongolia and Finland now is time for Africa...

Hi,
I'm Alessandro (Alex) IW5ELA, during my honeymoon with Michela I will be active from South Africa and Mauritius, 20-17-15-12 meters CW and SSB.
If possible, I will update the log during the operations but only for Mauritius QSOs.
Hope to listen you!

Mohon bantuan rekan-rekan yang mengetahui atau juga sudah menjadi
member ARLHS (Amatir Radio Ligh House Society).
Saya telah membaca di List ARLHS Database, bahwa :

Lighthouse TANJUNG NUSANIWE (Buru); IDO-317; 3o 47’ 0” S, 128o 05” 0”E; PI46AF

Seharusnya ada di Pulau Ambon, di Kecamatan Nusaniwe, Desa Latuhalat, Kota Ambon.

Saya belum mengetahui data tersebut diatas "(Buru)" ada karena ada yang On Air dari

Pulau Buru dengan mengatasnamakan Lighthouse TANJUNG NUSANIWE atau dari

Societynya sendiri yang menulisnya??

Saya ingin merubahnya menjadi Lighthouse TANJUNG NUSANIWE (AMBON).

Tentunya ini memerlukan pembuktian yg diperlukan seperti :

- Saya mendaftarkannya ke ARLHS

- Saya menjadi member ARLHS (INACTIVE MEMBER)

- Atau mungkin ada cara lain yang rekan-rekan mengetahuinya?

Sebelumnya saya mengucapkan terima kasih atas saran dan petunjuk

yang diberikan, dan saya telah siap untuk menjadi INACTIVE MEMBER ARLHS.

Salam saya

Martin YB8VM

JW8DW, SVALBARD ISLAND, EU026

QRV FROM 12.SEPT. TO 19.SEPT.2012 CW AND SSB

Longyearbyen is the administrative centre of Svalbard. The town hosts a broad range of public services, shops and cafés. Longyearbyen has changed from being a one-sided industrial settlement into becoming a multi-sided community where tourism and science have gained central roles. Longyearbyen is a good starting point for activities in the Isfjorden area.

HB0 Liechtenstein

HB0, Liechtenstein DX-perience :-)
Several belgian hams will be qrv from liechtenstein (hb0) between the 19th and 22 nd of september ,
the aim is to be qrv from 10m to 80m , ssb and cw with an emphasis on the higher bands , conditions permitting
The trip starts from 17 in the morning till 23 evening.

The Team
HB0/homecall Liechtenstein is made up 8 operators:
ON4ACP-Philippe => hb0/on4acp
ON4ANN-Erik => hb0/on4ann
ON4CAU-Jose => hb0/on4cau
ON4CCV-Erik => hb0/on4ccv
ON8CW-Walter => hb0/on8cw
ON4CKM-Cedric => hb0/on4ckm
ON4CJY-Marc => hb0/on4cjy
ON6MI-Rudi =>hb0/on6mi

The objectives :
to have a lot of fun ;
to work as many stations as possible ;
return to belgium , tired but with a big smile on the face !! ;)

Pilote ON6QB, Frans

Lichtenstein
Liechtenstein is situated in the Upper Rhine valley of the European Alps and is bordered to the east by Austria and to the south and west by Switzerland. The entire western border of Liechtenstein is formed by the Rhine. Measured south to north the country is about 24 km (15 mi) long. Its highest point, the Grauspitz, is 2,599 m (8,527 ft). Despite its Alpine location, prevailing southerly winds make the climate of Liechtenstein comparatively mild. In winter, the mountain slopes are well suited to winter sports.
New surveys using more accurate measurements of the country's borders in 2006 have set its area at 160 km2 (61.776 sq mi), with borders of 77.9 km (48.4 mi).[23] Thus, Liechtenstein discovered in 2006 that its borders are 1.9 km (1.2 mi) longer than previously thought.[24] Liechtenstein is one of only two doubly landlocked countries in the world[25]—being a landlocked country wholly surrounded by other landlocked countries (the other isUzbekistan). Liechtenstein is the sixth-smallest independent nation in the world by land area.
The principality of Liechtenstein is divided into 11 communes called Gemeinden (singular Gemeinde). The Gemeinden mostly consist only of a single town or village. Five of them (Eschen, Gamprin, Mauren, Ruggell, and Schellenberg) fall within the electoral district

Unterland (the lower county), and the remainder (Balzers, Planken,Schaan, Triesen, Triesenberg, and Vaduz) within Oberland (the upper county).

3D2C, Conway Reef DXpedition 2012
September 24th 2012 till October 5th 2012
Our team continues its activities in Central and Southern Pacific. For 2012
We booked the beautiful island of the Pacific, we wanted to activate the last
year, but we preferred the island of Rotuma with 3D2R CALL. Now our team
unanimously decided that the Conway Reef is our next point. We already have
CALL: 3D2C.

Conway Reef
Conway Reef, known since 1976 by its Fijian name "Ceva-I-Ra" or "Theva-i-Ra" Reef, is a coral reef of atoll type 450 km southwest of the Fiji Islands, but part of the Republic of Fiji. It is 2.5 km long in an east-west direction. On the middle of the reef is a small sand cay , 1.8 meters high and about 320 meters long and 73 meters wide, with a land area of two hectares. A stranded wreck of a coaster lies 240 meters south of the center of the cay, and the wreck of a fishing vessel lies on the northeast end of the reef. The reef is uninhabited apart from a number of birds which appear to have almost no fear of humans. Administratively, the reef it is part of Western Division , Fiji , and of Nadroga-Navosa province. In 1838 the Royal Navy Captain Drinkwater Bethune of HMS /Conway/ first came across the reef and recorded it however it was first mapped by the British several years later by Captain Denham of HMS /Herald/ . Three shipwrecks (1979, 1981 and 2008) have occurred on the reef. The most recent being a Chinese fishing vessel (Shin Sheng No.165) It was reported in 1983 that there was some vegetation on the cay, but it was bare by 1985. The cay currently has some vegetation about 3m high. While there are no other gaps larger than 75 km between Fiji islands (except Rotuma Island , which is politically but not geographically part of Fiji), Conway Reef lies 450 km to the southwest of the main Fiji complex. The closest land to Conway Reef lies 275 km WSW (Hunter Island in the French territory of New Caledonia). Hunter Island is also claimed by Vanuatu . Access to the island should only be attempted at high tide in a shallow draft tender. Extreme care must be taken to navigate the coral heads

Planned Travel Dates:
Departure to Conway reef from hotel Novotel Lami bay, Suva, Fij is:
September 24 th 2012 at 06,00 PM (18,00 local time).
Part of our team, 5 person with Alex UA4HOX coming via Seoul and will be in hotel in Suva, Friday, September 21st 2012. Main group coming via Los Angeles, departure september 22nd at 23,00 fromLAX and arriving in Nadi at 06,00 AM September 24th. Team will travel from Nadi

to Suva with few rental car's.
Return from Conway Reef is night, October 5/6 th 2012.
Our boat Island Dancer II

NH8S, Swains Island DXpedition 2012, OC-200

IOTA OC-200

Swains Island DXpedition
Scheduled for September 5 - 18, 2012
July 17, 2012
Press Release

Craig (K9CT) and Joe (W8GEX) are happy to report that preparations for the NH8S Swains Island DXpedition are on schedule. The 20 man international team should be on the island from September 4, thru September 17. Swains is # 31 most wanted worldwide. They will operate all bands with SSB, CW and RTTY.
A big thank you goes to John (N7CQQ) and Paul (W8AEF) for their time in building and testing the SVDA's that will be used. Thanks also to Paul (W6XA) and Tom (N4XP) for testing the radios, amps and laptops. All of the equipment has been shipped to Arnie (N6HC) in California for the upcoming departure via cargo ship later this week. The QSLing will be handled by Joe (AA4NN) with help from his XYL Margarett. Plans are to upload logs daily by satellite phone from the island to Clublog.
We are very grateful to our equipment sponsors, including: ICOM, Elecraft, VIbroplex, Innovantennas, DX Engineering, Heil Sound, Primus, Hi-Z Antennas, and The RF Connection. Also to Kimo (KH7U) for the 160m vertical, and George (W8UVZ) for the Battle Creek Special.
We have updated our website with pictures, operating information and links. Thanks to John (K6MM) for doing the webmaster duties.
There will be a great emphasis placed in working Europe where Swains is most needed. We will have several receiving antennas aimed that direction.
It will be very hot and humid, and mosquitoes should be plentiful, so please have patience with the operators. We ask that you listen to the operator instructions to ensure we are able to work as many stations as possible. Please refer to our operating guidelines on the Band Plan page:
http://nh8s.org/pages/bandplan.html
This tent and generator operation is a very expensive endeavor, and the group is most grateful for the foundations, clubs and individuals who have already contributed. For those that would like to donate, you may do so from our website: www.nh8s.org.
The skilled international crew that is looking forward to working you includes: 9V1FJ,

AA4NN, DJ2VO, DL3DXX, K5AB, K9CS, K9CT, K9NW, KB8OCP, N2TU, N4HH, N6HC, NA6M, ND2T, SM5AQD, W4BUW, W6KK, W8GEX, W8TN, and WB9Z.
The team is grateful for the opportunity to activate a rare DXCC entity and, hopefully, work thousands of other DXers worldwide. We look forward to having fun and making life-long friends.

CU in the pileups!
And don't forget to sign our Guestbook -- just click on the Coconuts!
73,
Your NH8S Team

Operating Plan

We want you in our log, so please help us by following these guidelines.
1. If you cannot hear us - please don't call us. Wait until propagation and conditions favor your QTH for one or more of the 11 Bands and 3 Modes. Eventually you WILL have a clear path to Swains Island. Be patient.
2. Unless you hear otherwise from the Operator, we will ALWAYS be operating in SPLIT MODEthroughout the DXpedition.
3. Listen to the Operator for RX frequencies (e.g., "up 5 to 10", or "listening on 7.155", etc.)
4. You have two ears and one mouth, so please try to listen more, talk less. Be patient.
5. During SSB pileups, please announce your full call clearly -- ONCE -- using common phonetics.
6. During ALL pileups, listen for YOUR call on the comeback. Trust that we have two good ears.
7. We're not impressed by those who add to the QRM by constantly calling out of turn. Be patient.
8. Please do not Tune Up on any of our TX frequencies or any of our RX slots!
9. If we ask for "EU" only or "QRP only" or any other specific request, please QRX. Be patient.
10. Resist those "insurance" QSOs. We want to maximize unique QSOs, not Dupes.
11. Whenever possible, we will try to listen in the General portion of the band.
Remember: We want you in our log. Please help us get you there.
Tentative
Schedule   NH8S Band Plan

```

Swains Island
IOTA OC-200
Swains Island is an atoll in the Tokelau chain. Culturally a part of Tokelau, it is an unincorporated unorganized territory of the United States administered by American Samoa. Swains Island has also been known at various times as Olosenga Island, Olohega Island, Quiros Island, Gente Hermosa Island, and Jennings Island. Owned by the Jennings family and used as a copra plantation, Swains Island has a population of 37 Tokelauans, who harvest the island's coconuts.

Worked All Europe DX Contest - Rules 2012
(2012-06-26)
The Deutscher Amateur Radio Club (DARC) invites radio amateurs world wide to participate in the annual WAE DX Contest.
1 Times
CW: August, second full weekend
Saturday, August 11, 2012, 0000 UTC until Sunday, August 12, 2012, 2359 UTC
SSB: September, second full weekend
Saturday, September 8, 2012, 0000 UTC until Sunday, September 9, 2012, 2359 UTC
RTTY: November, second full weekend
Saturday, November 10, 2012, 0000 UTC until Sunday, November 11, 2012, 2359 UTC
2 Bands
3.5 - 7 - 14 - 21 - 28 MHz.
According to IARU recommendations operation should be avoided outside contest-preferred segments. No operation to take place on:
CW : 3560-3800; 7040-7200; 14060-14350 kHz
SSB: 3650-3700; 7050-7060; 7100-7130; 14100-14125; 14300-14350 kHz.
3 Categories
* SINGLE-OP LOW
Max. output 100 watts - all bands. Only one signal permitted at any time.
* SINGLE-OP HIGH
Output higher than 100 watts - all bands. Only one signal permitted at any time.
* MULTI-OP
Band changes are allowed every 10 minutes; this includes all activities of a main station, including QSO & QTC traffic and CQing.
Only exception: Working of a multiplier. Other transmitters may be used in parallel to the main station to work multipliers on other
bands.
* SWL
(see §12)
Notes:
* Transmitters, receivers and antennas used in the contest must be located within a 2 km diameter circle.
* The use of DX spotting nets is allowed in all categories.

4 Off Times
Single Operator stations may only operate 36 out of the 48-hour contest period.
The total of 12 hours off time may be taken in one part but not more than three parts. The off times must be shown on the summary sheet. If operation is interrupted for more than 12 hours the three longest off time periods must be a minimum of 12 hours.
5 Exchange
A contest QSO can only be conducted between a European and a non-European station (exception: RTTY, see §13). The exchange consists of RS/RST and a progressive serial number starting with 001. If the station worked does not send a serial number, log the contact with number 000. Each station can be credited only once per band.
6 Multiplier
For non-European stations the multiplier is the number of countries defined in the WAE Country List (see below) worked per band.
For European stations every non-European DXCC entity counts as a multiplier.
Exception: In the following countries up to ten numerical call areas count as multipliers: W, VE, VK, ZL, ZS, JA, PY and RA8/RA9 and RAØ -- without respect to their geographical location.
Examples: W1, K1, KA1 and K3../1 count as W1;
VE1, VO1 und VY1 count as VE1;
JR4, 7M4 und 7K4 count as JA4;
ZL2 and ZL6 are two different
multipliers.
Multiplier bonus: Country multiplier points are "weighted" by band. Multiply the number of countries worked on 3.5 MHz by four, on 7 MHz by three, and on 14/21/28 MHz by two. The total multiplier is the sum of the weighted multiplier points of all bands.
7 QTC Traffic
Additional points can be achieved by QTCs. A QTC is the report of a contest QSO back to a European station (exception: RTTY, see §13).
The following rules apply:
1. A QTC contains time, call sign and serial number of the reported QSO. Example: "1307 DA1AA 431" means that DA1AA was worked at 1307 UTC and sent serial number 431.
2. Each QSO may only be reported once as a QTC. The QTC may not be reported back to the original station.
3. Every QTC that was correctly transferred, counts one point for the sender and one point for the receiver.
4. Two stations may exchange up to 10 QTCs maximum. The two stations may establish contact several times to complete the quota.
5. QTCs are transferred by means of QTC series. A QTC series is a block of one (minimum) to ten (maximum) QTCs. QTC series are numbered using the following scheme: The first figure is the progressive serial number starting with one; the second figure denotes the number of QTCs in the series. Example: "QTC 3/7" means this is the third QTC series transmitted by this station and it contains seven QTCs.
6. For every QTC series that is transmitted or received, the QTC number, time and frequency band of the QTC transmission must be logged. If any of this data is missing from your log, no credit will be given for this QTC series.
8 Scoring
The final score is the result of total QSOs plus QTCs on all bands multiplied by the sum of all multipliers weighted by the band bonus factor (see §6).
9 Disqualification
Violation of the rules of the contest or unsportsmanlike conduct will be deemed sufficient

cause for disqualification. The decisions of the contest-committee are final.
10 Submissions
URL: http://www.waedc.de
Messages to contest manager (no logs): waedc-info@dxhf.darc.de
Logs need to be sent in STF or Cabrillo-Format to the following e-mail address:WAEDC CW : waecw@... WAEDC SSB : waessb@....de WAEDC RTTY : waertty@...
Be sure to put the station call sign into the subject of each message.
By submitting an electronic log, the participant claims to fully accept the rules of the contest. A written declaration is not necessary.
Note: After publication of the results all logs will be put
into the DARC Contest Logbook (DCL).
Hand-written logs:
After the contest use a proper logging program or LM from DL8WAA to enter your data.
See Link: http://contestsoftware.com/e/home.htm
If you do not have a computer, please ask a friend or family member to import the log.
11 DX & Contest Club Competition
The club score is calculated by adding the final results of all participating club members in all three WAE contests, excluding SWLs. To be counted, the name of the club has to be indicated in the log on a separate header line using the keyword "CLUB".
The club must not be an official national amateur radio club. For a club to be listed, a minimum of three logs must be submitted.
A trophy is sponsored for the top DX (non-EU) and the top EU clubs.
For DL stations participating in the German DARC/VFDB-Clubmeisterschaft put your DOK in the log on a separate header line using the keyword "SPECIFIC".
12 Special Rules for SWLs
SWLs record stations working in the WAEDC. Participation is only possible as a single operator all bands. Every call sign heard - European or non-European station - may be credited only once per band. Both call signs of a contest QSO have to be recorded.
Each station that is logged including the serial number that was sent by that station, counts one point. Every complete QTC which includes all QTC series information (up to a maximum of 10 per station) also counts one point.
Multipliers are counted according to the criteria indicated in §6, but both European and non-European multipliers are counted. A call sign can only be counted as a multiplier, if the serial number it sent was recorded. In the best case, for a completely recorded QSO, two points and two multipliers can be credited.
13 Special Rules for RTTY
In the RTTY portion of the WAEDC there are no continental limits; everybody can work everybody. Only QTC traffic must be performed between different continents.
Every station may send and receive QTCs. The sum of QTCs exchanged between two stations (sent plus received) must not exceed 10 (ten).
The European and non-European multipliers indicated in §6 count for all stations.
14 Log Deadline
Log deadline is always two weeks or, more specific, the third Monday after the end of the contest.
CW: August 27; SSB: September 24; RTTY: November 26, 2012.
15 Criteria for WAEDC Awards and Plaques
Continental winners will receive a plaque. Printable online certificates will be availabe for all stations on result publication.
Entries from countries split by numerical call areas for multiplier reasons (see §6) will be listed according to their reported location within their respective geographical call area.

Stations who activate a WAE country for the WAEDC from where no log was received over the last three years will be recognized as "WAEDC Hero" and receive a special prize.
For 2012 these 9 countries are:
 1AØ, HV, JW, JW/b, JX, R1F, SV/A, YU8, ZB
Stations who have been in the Top-Ten/Top-Six list for at least five times can apply for a special plaque.
The WAEDC committee reserves the right to honor special contest activities with additional plaques.
WAE Country List
 1AØ, 3A, 4O, 4U1I, 4U1V, 9A, 9H, C3, CT, CU, DL, E7, EA, EA6, EI, ER, ES, EU, F, G, GD, GI, GJ, GM, GM/s, GU, GW, HA, HB, HBØ, HV, I, IS, IT, JW, JW/b, JX, LA, LX, LY, LZ, OE, OH, OHØ, OJØ, OK, OM, ON, OY, OZ, PA, R1F, RA, RA2, S5, SM, SP, SV, SV/A, SV5, SV9, T7, TA1, TF, TK, UR, YL, YO, YU, YU8, Z3, ZA, ZB.[R1M removed]

DXNL 1796 - Sep 5, 2012

8Q, MALDIVES, AS-013
Hamed,8Q7HA, was active in SSB on 17m around 1700 UTC. QSL via 9K2HS.

9A, CROATIA
Jan,9A/PA4JJ, from Pores is working in holiday style in his favourite modes RTTY and PSK31 until Sep 12.
QSL via homecall, OQRS: http://www.pa4jj.nl

9J, ZAMBIA
Shinichi,JA7SGV, is QRV as 9J2JA from Zambia but the length of his stay is not known. He has been spotted in CW on 30m, 20m, 17m and 15m.
QSL via homecall.

E6, NIUE, OC-040
Lance,W7GJ, and Bob,ZL1RS, are planning an EME DXpedition as E6M and E6RS to Niue (OC-040, WLOTA 2139, Loc AH51ba) from Sep 7-21.
Sep ausgesucht. Lance will focus on 6m EME (50.190 MHz) and Bob on 2m but they may show up from other bands as well.
See also: http://www.qsl.net/zl1rs/zk2.html and
http://www.bigskyspaces.com/w7gj/Niue2012.htm
QSL E6M via W7GJ, QSL E6RS via ZL1RS; both only direct or LoTW.

G, ENGLAND, EU-005
The Churches and Chapels on the Air (CHOTA) on Sep 8 is a good oppor-

tunity to introduce amateur radio and also the World Association of Christian Radio Amateurs and Listeners (WACRAL). CHOTA is organised by WACRAL member John,G3XYF.
A list of stations can be found at: http://www.wacral.org/CHOTA.htm
---
GB2HST (the suffix stands for High Stoy Telegraph) is a special event station in Minterne Magna, Dorset from Sep 9-14. QSL via M0XIG.

Gary,M0NNH, and Chris,M0DOL, are using the special callsign GB2012LP during the Paralympics in London until Sep 9.

ISWL members will activate following special event stations during the Paralympic Games in September:
Sep 1-7:
GO4BJC/a from Great Sutton in Cheshire by Geof,M0BAU (ISWL G-20665), WAB SJ37, EU-005, WLOTA 1841
MO1SWL/a from Dagenham in Essex by John,M0HEM (ISWL G-20579) WAB TQ48, EU-005, WLOTA 1841
Sep 8-9:

GO4BJC from Broad Oak in East Sussex by Arthur,G0KOC (ISWL G-20358),
WAB TQ62, EU-005, WLOTA 1841
MO1SWL/a from Walton on the Naze in Essex by Herbie,G6XOU (ISWL
G-20006), WAB TM22, EU-005, WLOTA 1841
Sep 10-30:
G4BJC tba.
MX1SWL/a from Hartford in Cambridgeshire by Tom,G3RPV (ISWL G-7964),
WAB TL27, EU-005, WLOTA 1841
All QSLs via G6XOU, eQSL. See also: http://www.iswl.org.uk

HA, HUNGARY
Members of the Puskas Tivadar Radio Aamateur Club (HA5KHC) is QRV as
HG1912PTTT from Budapest until Sep 30 celebrating the 100th anniversary
of the "Puskas Tivadar" Telecommunications Technical High School.
Activities will take place in CW, SSB and digital modes on all HF bands
QSL via HA5AUC. See also: http://www.ha5khc.hu

J2, DJIBOUTI
Christian,F5MBF, has been in Djibouti since July and finally received
his callsign J28NC. He will stay there for at least two years and is
working mainly in CW with some SSB on 80m-10m using a vertical.
The QSL route has not been announced yet, the cluster says via F5MBF.

KH0, MARIANA ISLANDS, OC-086
Mike,JA6EGL, and Yu,JE6DND, will be active in CW and SSB on 30m-10m
signing KK6WW/KH0 and KH0R from Saipan (OC-086) from Sep 6-9.
QSLs via homecalls, unfortunately only direct.

Kuroi,JH0MGJ/AL5A, will be QRV as AL5A/AH0 from Saipan as well and
wants to listen for his friends in Europe from Sep 7-9.
QSL via JA7JEC, LoTW.

ON, BELGIUM
The Groupement De Verviers (GDV) will activate the special callsign
ON4USA in SSB and PSK on 40m/20m/15m/10m/6m on Sep 8/9 for the
68th anniversary of the liberation of Verviers by US GI's.
QSL via ON4GDV.

PA, THE NETHERLANDS
Fred,PA0FAW, will be QRV as PC12WSF in CW, SSB and digital modes
from the "World Statues Festival" in Arnheim until Sep 30.
Fred is DIG 1487, ISWL PA-11092, WAB-11722. QSL via homecall.

UA1, EUROPEAN RUSSIA
The special event station R1150I is active from Sep 2-9 celebrating
the 1150th anniversary of the Izborsk Fortress. QSLs will be sent
via bureau automatically, eQSLs are available as well.

Several stations will be using the suffix SRR from Sep 4-13 celebrating
the 10th anniversary of IARU membership of the Soyuz Radiolyubitelej
Rossii (SRR). QSL routes will be announced in the QSO.

V7, MARSHALl ISLANDS, OC-028
Rick,WH0AI (ex T32AI), is working from Kwajalein Island (OC-028) from the Kwajalein Amateur Radio clubstation and using the club call V73AX. He has been heard in CW and SSB on 20m, 15m and 10m. Rich has applied for the call V73AI. He also plans to be active in the upcoming contests QSL via WH0AI, unfortunately only direct (QRZ.com) with "green stamps".

W, USA
Members of the Symbol Technologies Amateur Radio Club (STARC) will be QRV as N1Y in CW and SSB on 40m/20m/15m on Sep 8/9 commemorating Sep 11, 2001. QSL via W2SBL.

The special event station N3U/Flt93 (N3U/United Flight 93) remembers the terrorist attack on this flight from Sep 8-13. QSL via W3PN.

Wayne,AB8DD, plans to activate Kiser Lake State Park in Champaign County/Ohio mainly in SSB and CW on all bands during the "Ohio State Parks On The Air" (OSPOTA) event on Sep 9.

The Milford Ohio Amateur Radio Club (MARC) is using the call W8MRC from The East Fork State Park in Clermont County during the same event. They will three stations in SSB on 80m-10m. See: http://www.w8mrc.com
---
Andy,N8OFS (SMIRK #6737), will be QRV as N8OFS/p from "Big Caboose" during the "QCWA Fall QSO Party" on Sep 7 and during the "ARRL September VHF QSO Party" on Sep 8/9.
QSL via homecall, unfortunately only direct.

YA, AFGHANISTAN
Martin,DL3ASM, is based in Mazar-i-Sharif until the end of November. He is an officer in the German Army and maintains the radios. His call is T6SM and his equipment includes a TS590, TS870, IC7000, a TL922 plus a W3DZZ (12m high), a FB 33 yagi, a TripleLeg for the WARC bands and verticals for 2m/70cm. QSL via homecall.

PACIFIC TRIP: John,N7CQQ, and Ron,N6XT, will be "in the Samoa area" until the end of September. They plan to become active from Samoa (5W), hopefully from Tokelau (ZK3) and maybe also American Samoa (KH8). QSLs via homecalls.

DXCC: The XU1A DXpedition of 1998 has been approved for DXCC credit after reviewing new information. If you have had QSLs rejected please send an e-mail to bmoore@... to be placed on the list for update.
If you remember the submission in which you included the QSL please note this to expedite the search for the rejected QSO.

SURVEY: A survey about the Most Wanted DXCCs is online until Oct 15:
http://www.dxpub.net

SILENT KEYS: Fr. Lars Rooth, SJ (SM1BOE), passed away on July 21, aged 90. He was responsible for the Scandinavian department of Vatican Radio OP at HV3SJ.
Cris Henderson,GM4FAM, passed away at the age of 57 on Aug 23. He was

one of the zop CW DXers in the UK.
Our condolences and sympathy are with their families and friends.
We do not want to be sad that we lost him, but grateful that we could
get to know him as a radio friend. We will always keep him in memory.

LINKS: Current SOTA activities (mountain summits) are announced at:
http://www.sotawatch.org

Detailed information about current VHF activities can be found on the
VHF DX portal "Make More Miles on VHF" at: http://www.MMMonVHF.de

UPCOMING CONTESTS

Sep 8 Kulikovo Polye Contest (see: http://www.kpctest.ru)
Sep 8/9 WAE DX Contest
Sep 8/9 IARU Region 1 ATV Contest
Sep 9 North American Sprint
The HTC QRP Sprint 2012 has been cancelled!

IOTA compiled by Klaus, DL7UXG (e-mail: iota@....de)

Island activities:
AF-049, 3B8, Mauritius Island: After visiting South Africa Alex,IW5ELA, and
Michaela now plan to stop at Mauritius (WLOTA 0595) next. He will work
in holiday style as 3B/IW5ELA from Sep 6-12. Alex is working mostly in
CW using his FT-857 and vertical. QSL via IW5ELA (bureau/direct).

AS-042, R0B, Severnaya Zemlya: Vladimir,RV3EFH/0, will be QRV again from
Bolshevik Island (RRA RR-07-03, RDA KK-65, Loc OQ28dh) in September.
QSL via homecall (bureau/direct).

EU-004, EA6, Balearic Islands: Alessandro,IZ4WNA, and Giuliano,IZ4WNP,
will show up as EA6/homecalls from Ibiza (DIE E-023, MIA MB-003,
WLOTA 0958) from Sep 7-10. They also plan to visit other islands.
Activities will take place on these bands: 80m SSB, 40m SSB,
20m PSK63/SSB, 15m PSK63/SSB, 10m PSK63/SSB. QSLs via IZ4WNA.
Their website is: http://www.iz4wna.com

EU-015, SV9, Crete Island: Silvia,SV9/EA1AP, and Alberto,SV9/EA1SA, will be
active from Crete (GIOTA KRS-005, MIA MGC-005, WLOTA 1400) in SSB, CW
and RTTY on 80m-6m from Sep 9-15. QSLs via homecalls (bureau/direct).

EU-031, I*8, Campania Region group: Hubert,OE3FHA, and Sal,IC8SQS, will be
QRV as IC8/OE3FHA from Ischia (IIA NA-001, MIA MI-042, WAIS EL44,
WLOTA 0689, LOC JN60) from Sep 6-22. They will work only in SSB on the
HF bands and maybe also 6m. QSL only via bureau to OE3FHA.

EU-043, SM6, Goteborg och Bohus/Halland County group: Stephan,SM5YRA, plans
an activation of the lighthouse Halloe (ARLHS SWE173, Loc JO58oh,
SMFF-0465, LH C0375) as SB6HL in SSB and digital modes on 80m-6m
from Sep 8-15. QSL via SM5YRA (bureau/direct).

EU-052, SV, Ipeiros/Dytiki Elaas Region group: Dirk,SV8/ON5CT/p, is going to visit Corfu (GIOTA INS-042, MIA MG-055, WLOTA 4132, Loc JM99) from Sep 4-18 and will be QRV mainly in RTTY and SSB on 20m-6m. QSL only via LoTW or eQSL. No paper QSLs.

EU-088, OZ, Kattegat group: Bernd,DL8AAV, will sign OZ0AV from the island of Laeso (DIA NK-003, WLOTA 2820) from Sep 10-22. QSL via DL8AAV.

EU-138, SM7, Blekinge County group: Fred/SM7DAY/p will show up again from Senoren Island. He will work in SSB/CW on the HF bands from Sep 8-14. QSL via homecall (bureau/direct).

EU-165, I*0, Sardinia's Coastal Islands: Riccardo,IZ5JMX, spends his holiday on San Pietro island from Sep 2-14. Listen for IM0/IZ5JMX in SSB on 40m-10m. QSL via IZ5JMX (bureau/direct).

OC-233, VK7, Tasmania's Coastal Islands: Scott,VK7HVK/p, wants to hand out a few IOTA points from Bruny Island (WLOTA 1829, Loc QE36PQ) if his antenna can be repaired. QSL via homecall (d).

Non IOTA: John,VE3ISE, and Doug,VE3GJ, plan to activate the Canadian island Byng (ON-037) on Sep 8. They will use two stations: VE3ISE with 100 W starting around noon local time on 40m/20m and VE3GJ with QRP on 20m. QSLs via homecalls (bureau/direct).

OEFF/IFF: Fred,DL8DXL, is underway in IN3 and OE during the next two weeks and wants to activate several WFFs and SOTAs. QSL via homecall.

Lighthouse activities

AL5A/KH0	LH 1333	Sep 7-9

Worked All Europe DX Contest - Rules 2012
(2012-06-26)
The Deutscher Amateur Radio Club (DARC) invites radio amateurs world wide to participate in the annual WAE DX Contest.
1 Times
CW: August, second full weekend
Saturday, August 11, 2012, 0000 UTC until Sunday, August 12, 2012, 2359 UTC
SSB: September, second full weekend
Saturday, September 8, 2012, 0000 UTC until Sunday, September 9, 2012, 2359 UTC
RTTY: November, second full weekend
Saturday, November 10, 2012, 0000 UTC until Sunday, November 11, 2012, 2359 UTC
2 Bands
3.5 - 7 - 14 - 21 - 28 MHz.
According to IARU recommendations operation should be avoided outside contest-preferred segments. No operation to take place on:
CW : 3560-3800; 7040-7200; 14060-14350 kHz
SSB: 3650-3700; 7050-7060; 7100-7130; 14100-14125; 14300-14350 kHz.
3 Categories
* SINGLE-OP LOW
Max. output 100 watts - all bands. Only one signal permitted at any time.
* SINGLE-OP HIGH
Output higher than 100 watts - all bands. Only one signal permitted at any time.

* MULTI-OP
Band changes are allowed every 10 minutes; this includes all activities of a main station, including QSO & QTC traffic and CQing.
Only exception: Working of a multiplier. Other transmitters may be used in parallel to the main station to work multipliers on other
bands.
* SWL
(see §12)
Notes:
* Transmitters, receivers and antennas used in the contest must be located within a 2 km diameter circle.
* The use of DX spotting nets is allowed in all categories.
4 Off Times
Single Operator stations may only operate 36 out of the 48-hour contest period.
The total of 12 hours off time may be taken in one part but not more than three parts. The off times must be shown on the summary sheet. If operation is interrupted for more than 12 hours the three longest off time periods must be a minimum of 12 hours.
5 Exchange
A contest QSO can only be conducted between a European and a non-European station (exception: RTTY, see §13). The exchange consists of RS/RST and a progressive serial number starting with 001. If the station worked does not send a serial number, log the contact with number 000. Each station can be credited only once per band.
6 Multiplier
For non-European stations the multiplier is the number of countries defined in the WAE Country List (see below) worked per band.
For European stations every non-European DXCC entity counts as a multiplier.
Exception: In the following countries up to ten numerical call areas count as multipliers: W, VE, VK, ZL, ZS, JA, PY and RA8/RA9 and RAØ -- without respect to their geographical location.
Examples: W1, K1, KA1 and K3../1 count as W1;
VE1, VO1 und VY1 count as VE1;
JR4, 7M4 und 7K4 count as JA4;
ZL2 and ZL6 are two different
multipliers.
Multiplier bonus: Country multiplier points are "weighted" by band. Multiply the number of countries worked on 3.5 MHz by four, on 7 MHz by three, and on 14/21/28 MHz by two. The total multiplier is the sum of the weighted multiplier points of all bands.
7 QTC Traffic
Additional points can be achieved by QTCs. A QTC is the report of a contest QSO back to a European station (exception: RTTY, see §13).
The following rules apply:
1. A QTC contains time, call sign and serial number of the reported QSO. Example: "1307 DA1AA 431" means that DA1AA was worked at 1307 UTC and sent serial number 431.
2. Each QSO may only be reported once as a QTC. The QTC may not be reported back to the original station.
3. Every QTC that was correctly transferred, counts one point for the sender and one point for the receiver.
4. Two stations may exchange up to 10 QTCs maximum. The two stations may establish contact several times to complete the quota.
5. QTCs are transferred by means of QTC series. A QTC series is a block of one (minimum) to

ten (maximum) QTCs. QTC series are numbered using the following scheme: The first figure is the progressive serial number starting with one; the second figure denotes the number of QTCs in the series. Example: "QTC 3/7" means this is the third QTC series transmitted by this station and it contains seven QTCs.
6. For every QTC series that is transmitted or received, the QTC number, time and frequency band of the QTC transmission must be logged. If any of this data is missing from your log, no credit will be given for this QTC series.
8 Scoring
The final score is the result of total QSOs plus QTCs on all bands multiplied by the sum of all multipliers weighted by the band bonus factor (see §6).
9 Disqualification
Violation of the rules of the contest or unsportsmanlike conduct will be deemed sufficient cause for disqualification. The decisions of the contest-committee are final.
10 Submissions
URL: http://www.waedc.de
Messages to contest manager (no logs): waedc-info@dxhf.darc.de
Logs need to be sent in STF or Cabrillo-Format to the following e-mail address:WAEDC CW : waecw@dxhf.darc.de WAEDC SSB : waessb@dxhf.darc.de WAEDC RTTY : waertty@dxhf.darc.de
Be sure to put the station call sign into the subject of each message.
By submitting an electronic log, the participant claims to fully accept the rules of the contest. A written declaration is not necessary.
Note: After publication of the results all logs will be put
into the DARC Contest Logbook (DCL).
Hand-written logs:
After the contest use a proper logging program or LM from DL8WAA to enter your data.
See Link: http://contestsoftware.com/e/home.htm
If you do not have a computer, please ask a friend or family member to import the log.
11 DX & Contest Club Competition
The club score is calculated by adding the final results of all participating club members in all three WAE contests, excluding SWLs. To be counted, the name of the club has to be indicated in the log on a separate header line using the keyword "CLUB".
The club must not be an official national amateur radio club. For a club to be listed, a minimum of three logs must be submitted.
A trophy is sponsored for the top DX (non-EU) and the top EU clubs.
For DL stations participating in the German DARC/VFDB-Clubmeisterschaft put your DOK in the log on a separate header line using the keyword "SPECIFIC".
12 Special Rules for SWLs
SWLs record stations working in the WAEDC. Participation is only possible as a single operator all bands. Every call sign heard - European or non-European station - may be credited only once per band. Both call signs of a contest QSO have to be recorded.
Each station that is logged including the serial number that was sent by that station, counts one point. Every complete QTC which includes all QTC series information (up to a maximum of 10 per station) also counts one point.
Multipliers are counted according to the criteria indicated in §6, but both European and non-European multipliers are counted. A call sign can only be counted as a multiplier, if the serial number it sent was recorded. In the best case, for a completely recorded QSO, two points and two multipliers can be credited.
13 Special Rules for RTTY
In the RTTY portion of the WAEDC there are no continental limits; everybody can work everybody. Only QTC traffic must be performed between different continents.
Every station may send and receive QTCs. The sum of QTCs exchanged between two stations

(sent plus received) must not exceed 10 (ten).
The European and non-European multipliers indicated in §6 count for all stations.
14 Log Deadline
Log deadline is always two weeks or, more specific, the third Monday after the end of the contest.
CW: August 27; SSB: September 24; RTTY: November 26, 2012.
15 Criteria for WAEDC Awards and Plaques
Continental winners will receive a plaque. Printable online certificates will be availabe for all stations on result publication.
Entries from countries split by numerical call areas for multiplier reasons (see §6) will be listed according to their reported location within their respective geographical call area.
Stations who activate a WAE country for the WAEDC from where no log was received over the last three years will be recognized as "WAEDC Hero" and receive a special prize.
For 2012 these 9 countries are:
1AØ, HV, JW, JW/b, JX, R1F, SV/A, YU8, ZB
Stations who have been in the Top-Ten/Top-Six list for at least five times can apply for a special plaque.
The WAEDC committee reserves the right to honor special contest activities with additional plaques.
WAE Country List
1AØ, 3A, 4O, 4U1I, 4U1V, 9A, 9H, C3, CT, CU, DL, E7, EA, EA6, EI, ER, ES, EU, F, G, GD, GI, GJ, GM, GM/s, GU, GW, HA, HB, HBØ, HV, I, IS, IT, JW, JW/b, JX, LA, LX, LY, LZ, OE, OH, OHØ, OJØ, OK, OM, ON, OY, OZ, PA, R1F, RA, RA2, S5, SM, SP, SV, SV/A, SV5, SV9, T7, TA1, TF, TK, UR, YL, YO, YU, YU8, Z3, ZA, ZB.[R1M removed]

Kepada Rekan2,

Mengajukan permohonan menjadi anggota YBDXC kepada YB2DX OM Hans melalui email yb2dx@... dengan persyaratan memenuhi salah satu sbb:

Dapat melampirkan copy/scan/photo award dari salah satu kontest yg berskala Internasional (skala Nasional tidak berlaku) atau

Dapat melampirkan copy/scan/photo salah satu dari DXCC Awards yang dikeluarkan oleh ARRL atau

Dapat melampirkan copy/scan/photo QSL Card yg terdiri dari minimal 5 Benua (AF, AN, AS, EU, NA, SA), (OC tidak berlaku)

Anggota diharuskan mempunyai data pada www.qrz.com

de YB4IR Imam / YB1AR Yana

ONLINE REGISTRATION (at this moment, valid YB Operator only)

Dear All,

One of the most interesting ways to use Club Log is to join your clubs, so that you can participate in your own leagues against friends. Also, if you are interested in joining in the HF or LF challenges organised by CDXC, then you can join these contests in Club Log and have your score automatically calculated by Club Log.

Note: members must add themselves to this club. Instruct them to click 'Settings' and then go to the 'Clubs' tab to join. This method allows users to opt-out (by default) of leagues and DXpedition charts. The opt-in principle is how Club Log is intended to work.

PS: Only YBDXC registered member who got the number membership will be approved.

http://www.clublog.org/edituser.php goes to settings, goes to clubs, thick YBDXC, goes to join clubs

Wah sayang, tanggal2 itu ada rencana ke Lombok mau lihat lokasinya ex YB9IOTA (OM Adhi/YB3MM dkk) HI.

Tapi apa maksud kalimat ini ya :

"Qsl to my home call LA8DW via buerau or direct.Pleace include a self-addressed envelope and return postage for direct qsl. PSE PROVIDE 1 IRC THANKS
PLEACE NO GREENSTAMP !
ALL ENVELOPE WITH 1 GREENSTAMP RETURN VIA BUREAU !
DIRECT QSL NEED 3 GREENSTAMP !"

- Pse provide 1 IRC
- Please NO GREENSTAMP
- All envelope with 1 GS return via bureau
- Direct QSL need 3 GS.

Note pertama & kedua saya baca = ybs hanya mau terima IRC bukan GS
Note ketiga & keempat saya baca = ybs minta 3 GS, kalo 1 GS - QSL card akan dikirim via buro
Lalu kalo dilampirkan 2 GS..??

Bulan Mei kemarin saya dapat Liechtenstein di 15M, gak sengaja padahal agak langka juga. Saya masuk ke frequency DXpedition dan waktu monitor utk siap2 ikutan pile up ada HB0CC panggil stasiun DXpedition itu, signal cukup kuat.

Selesai dia QSO dg DXpedition, saya coba cegat 5kHz di atasnya dan panggil dia, tapi gagal - mungkin dia scan ke bawah atau langsung QRT.
Akhirnya saya kirim email utk buat sked, ternyata jawaban cuma dlm beberapa menit dan saya sampaikan akan panggil dia di satu frekwensi.

Waktu saya putar dial ke frekwensi yg saya sebut sudah keduluan dia panggil2 saya disana. Worked dan beberapa hari kemudian confirmed via LoTW.

Sayangnya yangkee bravo sierra gak bisa ke 10M, semoga dapat dari AR Belgia ini nanti. Amin.

HB0 Liechtenstein

HB0, Liechtenstein DX-perience :-)
Several belgian hams will be qrv from liechtenstein (hb0) between the 19th and 22 nd of september ,
the aim is to be qrv from 10m to 80m , ssb and cw with an emphasis on the higher bands , conditions permitting
The trip starts from 17 in the morning till 23 evening.

The Team
HB0/homecall Liechtenstein is made up 8 operators:
ON4ACP-Philippe => hb0/on4acp
ON4ANN-Erik => hb0/on4ann
ON4CAU-Jose => hb0/on4cau
ON4CCV-Erik => hb0/on4ccv
ON8CW-Walter => hb0/on8cw
ON4CKM-Cedric => hb0/on4ckm
ON4CJY-Marc => hb0/on4cjy
ON6MI-Rudi =>hb0/on6mi

The objectives :
to have a lot of fun ;
to work as many stations as possible ;
return to belgium , tired but with a big smile on the face !! ;)

Pilote ON6QB, Frans

Lichtenstein
Liechtenstein is situated in the Upper Rhine valley of the European Alps and is bordered to the east by Austria and to the south and west by Switzerland. The entire western border of Liechtenstein is formed by the Rhine. Measured south to north the country is about 24 km (15 mi) long. Its highest point, the Grauspitz, is 2,599 m (8,527 ft). Despite its Alpine location, prevailing southerly winds make the climate of Liechtenstein comparatively mild. In winter, the mountain slopes are well suited to winter sports.
New surveys using more accurate measurements of the country's borders in 2006 have set its area at 160 km2 (61.776 sq mi), with borders of 77.9 km (48.4 mi).[23] Thus, Liechtenstein discovered in 2006 that its borders are 1.9 km (1.2 mi) longer than previously thought.[24] Liechtenstein is one of only two doubly landlocked countries in the world[25]—being a landlocked country wholly surrounded by other landlocked countries (the other isUzbekistan). Liechtenstein is the sixth-smallest independent nation in the world by land area.
The principality of Liechtenstein is divided into 11 communes called Gemeinden (singular Gemeinde). The Gemeinden mostly consist only of a single town or village. Five of them (Eschen, Gamprin, Mauren, Ruggell, and Schellenberg) fall within the electoral district Unterland (the lower county), and the remainder (Balzers, Planken,Schaan, Triesen, Triesenberg, and Vaduz) within Oberland (the upper county).

OM Uun,
Iya untuk Italy dan beberapa yg lain ada yg bilang "outside EU = 3GS".

Tapi kalo yg ini (atau saya salah baca) :
1-2 : "Harap sertakan 1 IRC" dan "jangan greenstamp" --> saya baca dia maunya 1 lb IRC jangan GS.

Tapi pada note berikutnya dia tulis :
3-4 : "Semua yg melampirkan 1GS, akan dibalas via buro" dan "direct QSL perlu 3GS".

Sepertinya agak bertentangan antara pernyataan 1 & 2 dengan 3 & 4

Om Hen, mungkin maksudnya sebaiknya pakai IRC (mungkin sering hilang GS nya), cuma kalau ada yg "bandel" pakai GS ya harus 3 GS, kalau 1 GS nggak cukup buat balasannya, jadi via bureau.
Mungkin begitu OM Hen...

Di Tempat.

Hal : Pengunduran diri

Jakarta, 01 September 2012

Salam Sejahtera,
Pertama-tama saya ucapkan “Selamat Hari Raya Idhul Fitri 1433 H“ mohon ma’af lahir dan bathin untuk Pak Imam Raharjo, YB4IR beserta keluarga dan seluruh pengurus & anggota YBDXC.
Saya mengucapkan terima kasih atas permintaan dari Pak Imam untuk saya mengenai kesediaan saya menjadi keanggotaan dan pengurus di YBDXC, saya menghargai atas permintaan pak Imam untuk kemajuan Amatir Radio Indonesia utamanya untuk kemajuan dibidang DX-ing & contesting.
Oleh karena sesuatu dan lain hal maka, karena kesibukan rutinitas saya bekerja di kantor dan juga saya sebagai pengurus ORARI yang kita cintai ini, maka dengan ini saya mengundurkan diri dari keanggotaan dan pengurus YBDXC.
Saya mohon ma’af sekali lagi kepada Pak Imam atas pernyataan saya ini dengan atas dasar tidak ada paksaan/pengaruh dari orang lain.
Demikian surat pemberitahuan ini saya sampaikan, terima kasih dan harap maklum adanya.
Hormat saya,
      Ttd
Prihandoyo, YBØECT

OM Irsan (yg pakar sapi juga kambing rupanya),
Gadis "pemerah susu", maksudnya apa ?

- Gadis yg bekerja memerah susu kambing/sapi, atau
- Gadis yg membuat susu menjadi (berwarna) merah

;-)

Boleh OM....bilang aja sama OM Roger..
Nanti siapa tau akan dicarikan gadis sehat dan segar dari pedesaan di kampungnya...
Mungkin gadis pemerah susu atau gadis penggembala kambing seperti ceritanya Heidy ...Hi hi...

Cheers,

Irsan

OM Hen, jika ada Paypal account nya, lebih enak OM.
OQRS Lebih pasti dan aman.

OM Uun,
Iya untuk Italy dan beberapa yg lain ada yg bilang "outside EU = 3GS".

Tapi kalo yg ini (atau saya salah baca) :
1-2 : "Harap sertakan 1 IRC" dan "jangan greenstamp" --> saya baca dia maunya 1 lb IRC jangan GS.

Tapi pada note berikutnya dia tulis :
3-4 : "Semua yg melampirkan 1GS, akan dibalas via buro" dan "direct QSL perlu 3GS".

Sepertinya agak bertentangan antara pernyataan 1 & 2 dengan 3 & 4

OM Hendro, ada beberapa negara di EU spt Italy skr dgn 2 GS sdh tdk cukup utk kirim balasan, makanya mereka mintanya 3 GS.
Demikian setahu saya lho...

Subject: Bls: [YBDXC_News] http://www.ybdxc.net/2012/09/jw8dw-svalbard-island-eu026.html

Wah sayang, tanggal2 itu ada rencana ke Lombok mau lihat lokasinya ex YB9IOTA (OM Adhi/YB3MM dkk) HI.

Tapi apa maksud kalimat ini ya :

"Qsl to my home call LA8DW via buerau or direct.Pleace include a self-addressed envelope and return postage for direct qsl. PSE PROVIDE 1 IRC THANKS
PLEACE NO GREENSTAMP !
ALL ENVELOPE WITH 1 GREENSTAMP RETURN VIA BUREAU !
DIRECT QSL NEED 3 GREENSTAMP !"

- Pse provide 1 IRC
- Please NO GREENSTAMP
- All envelope with 1 GS return via bureau
- Direct QSL need 3 GS.

Note pertama & kedua saya baca = ybs hanya mau terima IRC bukan GS
Note ketiga & keempat saya baca = ybs minta 3 GS, kalo 1 GS - QSL card akan dikirim via buro
Lalu kalo dilampirkan 2 GS..??

JW8DW, SVALBARD ISLAND, EU026

QRV FROM 12.SEPT. TO 19.SEPT.2012 CW AND SSB

Longyearbyen is the administrative centre of Svalbard. The town hosts a broad range of public services, shops and cafés. Longyearbyen has changed from being a one-sided industrial settlement into becoming a
multi-sided community where tourism and science have gained central roles. Longyearbyen is a good starting point for activities in the Isfjorden area.

My address :
Karl-Gustav Larsen
Wergelandsvegen 17
4700 Vennesla
NORWAY

la8dw@online.nokglarsen.com

Log is opdated on LoTW.
Qsl to my home call LA8DW via buerau or direct.Pleace include a
self-addressed envelope and return postage for direct qsl. PSE PROVIDE 1 IRC THANKS
PLEACE NO GREENSTAMP !
ALL ENVELOPE WITH 1 GREENSTAMP RETURN VIA BUREAU !
DIRECT QSL NEED 3 GREENSTAMP !

Log was updated online every day via:

Tidak selalu OM Hen, biasanya $2-3 sama dng greenstamp. Cuman kalau pakai green stamp kadang hilang di jalan.
Kalau hilang sama aja ngak dpt card.

Tapi paling murah ya LOTW dan e qsl (green amatir radio ngak pakai kertas hehehe)
Mudah2an kedepan banyak award pakai metode ini.

Kalau paper qsl card mungkin kalau 1000/2000 masih enak simpannya, tapi kalau sdh banyak ribu dan puluhan ribu bingung mau simpannya.

OM Djoko,
Greenstamp repotnya juga adalah kurs di money changer - kalo kita beli harganya sama utk semua pecahan, tapi kalo kita jual utk pecahan USD 1-2 kursnya lebih rendah. HI.
Saya juga sepertinya ada QSL yang 'missing in action', saya memang pernah juga terima GS/IRC tapi pernah saya terima GS dari Greece/Crete/Dodecanese ?(lupa tepatnya) yg adalah pengembalian GS yg saya kirim sebelumnya.

OM Zen,

Utk 15M sebenarnya sebelumnya saya sudah dapat ZL2USB tapi blm balas QSL yg saya kirim hampir setahun (MIA-missing in action spt GI di vietnam), dapat juga ZL2WL.

Tapi yg saya intip di QRZ.com - ZL3GQ ini juga LoTW user, HI - nggak mau rugi dong.
Yg sebelum saya sepertinya salah tuh, karna panggilnya ZL3CQ - ini karna nyontoh mentah2 dari spot di DXwatch. :-(

Semoga kepanggil/work ya Palaunya (T88ME) saya sudah dapat beberapa bulan yll.

Ya, syarat mutlak jangan ada ID amatir radio di amplopnya, termasuk di SAE.
Waktu di makassar semua QSL yg saya kirim ada callsign tujuan juga callsign saya.
Yang selamet pulang pergi hanya beberapa saja - sejak itu No ID amatir radio.
Malahan beberapa minggu yll saya baca, ada juga tangan jahil menggelapkan amplop itu bukan karna GS (pada awalnya), tapi perangkonya.
Padahal selama ini saya berusaha tempel perangko yg banyak, dg pecahan yg kecil2.

OM Zen,
Palau ini agak sering juga koq muncul, jangan kuatir deh.
Tadi itu T88ME konsentrasinya ke VK & ZL station saja.

Di 15M dulu saya dapat orang jerman yg QRV di Palau = KC6/DF6FK, kalo yg di 10M = T88CR.
Di 15M tahun 2012 ini aja ada T88XC dan T88ME, saya kontak lagi ke T88ME utk mengisi logsheet utk Diamond DXCC.

http://www.arrl.org/news/arrl-plans-centennial-celebration-in-hartford-in-2014

ARRL Plans Centennial Celebration in Hartford in 2014

The ARRL has announced plans to hold its National Centennial Convention in Hartford, Connecticut on July 17-20, 2014. The Convention will mark 100 years of the ARRL's founding in Hartford. ARRL President Kay Craigie, N3KN, has also announced a theme for ARRL's Centennial year: Advancing the Art and Science of Radio -- since 1914.

In May 1914, Hiram Percy Maxim, W1AW -- a leading inventor and industrialist in Hartford, Connecticut -- founded the American Radio Relay League, together with Clarence Tuska, 1WD, the secretary of The Radio Club of Hartford. Today, the ARRL serves more than 158,000 members, mostly licensed radio amateurs, in the US and around the world.

The decision to hold the ARRL Centennial Convention in Hartford was made by the ARRL Board of Directors at its July 2012 meeting. The organization's headquarters has been maintained in the Hartford area since its founding. ARRL's present headquarters is located on Main Street in Newington, Connecticut, a suburb of Hartford, and is visited by nearly 2000 groups and individuals each year. The site has been home to The Hiram Percy Maxim Memorial Station, W1AW, since 1938.

The proposal to host the Centennial Convention in Hartford was reinforced by the organizers of the ARRL New England Division Convention, held every two years in Boxboro, Massachusetts. "Boxboro's organizing sponsor, FEMARA, Inc, has graciously agreed to forgo holding a Convention in 2014," said ARRL Chief Operating Officer Harold Kramer, WJ1B. "Instead, FEMARA has offered to help share its expertise and volunteers as we prepare to bring this national celebration to Hartford. We will also invite help from ARRL members and radio clubs throughout New England and the region to help."

Proceeds from the biennial Boxboro convention help support the FEMARA Scholarship Fund, awarded to young radio amateurs who are pursuing higher education. "Since Boxboro will not be held in 2014, a portion of the ticket sales for the Centennial Convention will be donated to the FEMARA Scholarship fund," Kramer explained.

"ARRL members should save the dates," said ARRL Marketing Manager Bob Inderbitzen, NQ1R. "The 2014 Centennial Convention is a once-in-a-lifetime opportunity, and it will have all of the trademark elements of a proper convention and hamfest: presentations and forums, exhibits, vendors, demonstrations, flea market, activities for youth and a banquet.

Inderbitzen noted that there will be some very special centennial-themed activities, including tours of ARRL Headquarters and W1AW, guest presenters, some surprises and lots of celebrating: "We want ARRL members to come with all of their experiences from the first 100 years of Amateur Radio and the ARRL, and leave with a shared vision for ARRL's Second Century."

The convention's organizing team is already making plans to bring the convention to Hartford, including the selection of a venue. The area boasts dozens of attractions and

activities, making Connecticut a great destination for members who plan to attend the convention with their family and friends. Nearby attractions include the Connecticut Science Center, the Mark Twain House, the Harriet Beecher Stowe Center the Wadsworth Atheneum and Six Flags New England. Hartford is served by an international airport (Hartford/Springfield BDL), and is conveniently located between Boston and New York City. Hartford's centrally located Union Station is serviced by Amtrak and major bus companies.

Preliminary Convention Agenda
Thursday, July 17
Registration
Seminars and Training Tracks
Friday, July 18
Registration
Opening General Session
ARRL EXPO
Exhibit Hall and Flea Market
Forums and Presentations
Dinner Banquet
Wouff Hong Ceremony
Saturday, July 19
Registration
ARRL EXPO
Exhibit Hall and Flea Market
Forums and Presentations
Closing General Session
Sunday, July 20
TBD
Other Activities:
Tours of ARRL headquarters/W1AW
Donor Reception
ARRL National Youth Event
Spouse/Family Excursions (area attractions)

About the ARRL Centennial Logo

To help mark the occasion of League's Centennial in 2014, the ARRL created this colorful, contemporary, celebratory and forward-looking logo. A key element of the ARRL Centennial logo is the traditional ARRL diamond, flanked by five diamonds in different colors that represent each of the organization's underpinnings: Public Service, Advocacy, Education, Technology and Membership. The diamonds are arranged together, pointing forward.

http://yb2ecg.wordpress.com/2008/10/31/n1mm-logger-dan-kontes-nasional-tips-tricks/
N1MM logger dan kontes nasional : tips & tricks

Sering mengikuti kontes nasional di 80m band? Masih mempergunakan manual log alias tulis tangan? Kalau jawaban keseluruhannya YA, mungkin postingan ini berguna bagi Anda… para Kontester Nasional! He he….

Secara umum, masih belum banyak para kontester nasional yang mempergunakan elekronik logger semacam N1MM saat mengikuti kontes, hal ini terlihat saat kontes sering terjadi pertanyaan-pertanyaan yang agak ‘lucu’, stasiun ini sudah belum ya, jam berapa, pertukarannya berapa….pertanyaan yang mengurangi kesangkilan dan kemangkusan aktifitas kontesting dan terus terang bikin ‘geli’, oops, sorry!

Karena juklak kontes nasional beragam dan belum terstandar serta belum diakomodasi oleh N1MM, postingan ini lebih kearah penanganan log dan administrasi paska kontes dibantu dengan program spreadsheet semisal Excell.

Untuk memulai N1MM sebagai logger kontes nasional mulailah dengan new contest data base dan pilihlah type log-nya, bisa DX ataupun Serial tergantung pertukaran report-nya sesuai juklak. Untuk dx non serial isikan pertukaran pada comment sehingga saat diupload ke ADIFF field Name tidak akan terisi dengan data pertukaran/exchange.

Mulailah aktifitas kontesting dan temukan fitur N1MM logger; pengecekan duplikasi dan pencatatan log akan lebih mudah, apalagi kalau dibantu dengan fungsi VOX pada radio sehingga tangan dapat dengan bebas mengetik di keyboard.

Selesai kontes kewajiban seorang kontester adalah melakukan administrasi log;memberikan nilai point dan multiplier dan menghitung score yang didapatkan sesuai dengan juklak kontes.

Untuk menghitung dan memformat logsheet sesuai juklak dapat dilakukan dengan spreadsheet Excell. Dari N1MM lakukan export logsheet ke format text file: klik file-Export-Export to File (generik), untuk export to file ada dua menu pilihan; order by time ataupun oder by band sesuaikan dengan permintaan dari panitia kontes.

Lakukan konversi dan terbentuk satu file dan letakkan pada folder yang bersesuaian. Buka dengan Excell dengan terlebih dulu file of type-nya all file. Karena berupa text file lakukan penyesuaian sebagai berikut :
Pilihlah type data fixed width
Atur jarak lebar antar field.
Atur setting kolom dan format data
Ketik finish dan lakukan pengolah data dan sesuaiakn dengan format yang dikehedaki dengan excell.
Lakukan penghitungan point dan multiplier [inilah bagian yang menarik dari kontes nasional]
Cetak dan kirim dan jangan lupa, biasanya, biaya kontes berupa lembaran materai/perangko.

Dengan bantuan logger, semacam N1MM, aktifitas kontesting akan semakin menarik. Mau mencoba…… ndak ada yang melarang lho!

http://kambing.ui.ac.id/onnopurbo/orari-diklat/teknik/rtty/n1mm/TATACARA%20PENGOPERASIAN%20N1MM%20CONTEST%20LOGGER.pdf

TATACARA PENGOPERASIAN N1MM CONTEST LOGGER
R. Prihandoyo, YBØECT ; KB3LWW

Langkah Awal :
Buka N1MM Contest logger yang sudah di Install, kemudian klik file dan new log in database: \ham.mdb. Lalu ada tulisan Select Contest Type for new log, cari pada blok log type Contest apa yang akan anda ikuti, Misal : cqwwssb dsbnya. Kemudian Isi operator category : single op ; multi one ; multi two atau multi-multi (pilih salah satu). Band category diisi sesuai keinginan kita, Power category diisi berdasarkan ower yg keluar pada transceiver anda (Jika Low berarti kurang dari 100 watts, Jika High berarti kita menggunakana linier amplifier. Mode Category dipilih salah satu misal : SSB,CWRTTY atau Mixed (SSB dan CW).Overlay category : N/A (Karena Overlay category ini untuk stasiun USA Only). Sent exchange : isi sesuai keinginan kontes yang kita hadapi misal : oleh karena kita mengikuti CQWW maka harus diisi CQ Zone yaitu 28. Jika kita ikuti kontes WPX maka, diisi dengan 3 digit yaitu 001. Operators : diiisi bila kita dengan
 Multi-multi atau multi one atau Multi two, disebutkan siapa saja operatornya, jika kita Single operator maka hanya callsign kita saja yang kita masukkan pada blok itu. Soapbox comments adalah komentar-komentar anda selama kita contes yang kita ikuti atau cerita-cerita menarik dsbnya. Setelah semua diisi maka, klik OK.

Selanjutnya klik : Running dan isi band frekwensi pada blok CQ Frequency dilanjuti dengan isi mode yang akan kita pergunakan jika CW kita ketik CW dan jika SSB kita ketik USB untuk di High band (14 Mhz, 21 Mhz dan 28 Mhz) dan LSB untuk di Low band (1,8 Mhz, 3,8 Mhz dan 7 Mhz).

Mengganti Nama dan alamat anda atau data anda :
Data ini penting supaya nama dan alamat anda tercapat pada award winner atau pengumuman kontes dengan cara : Klik Config, lalu klik kembali Change your station data, isilah callsign anda, nama dan alamat yang jelas, Grid square, CQ Zone, Itu Zone dan ARRL Section harud diketik DX (Karena kita diluar USA). Isi email anda bila ada. Setelah itu Klik OK.

Pindah band :
Isi frekwensi yang akan di operasikan pada blok callsign (CQ-Frequency) Jangan mengisi frekwensi dengan titik atau koma akan tetapi ketik saja angka-angkanya saja dan selanjutnya ketik mode yang akan dipergunakan (LSB/USB/CW/RTTY) Misal : ketik 14200 lalu tekan ENTER, setelah itu ketik USB (mode)

Pergantian Operator :
Tekan CONTROL O, lalu ketik callsign Operator lalu tekan ENTER Misal : ketik callsign YB0ECT lalu tekan ENTER

Menghapus Callsign :
Jika salah ketik Callsign, maka tekan ALT W Misal : Jika tertera callsign JA78HJK, maka tekan ALT W, lalu ketik kembali callsign yang dimaksud, JA7HJK.

Menghitung kembali scores anda yang terbaru :
Caranya adalah klik TOOLS dan kemudian klik rescores current contest Tunggu beberapa lama sampai N1mm Contest Logger sudah membentuk kembali Scores yang baru.

Perhatikan 10 Menit RULES (Khusus untuk kategori Multi One/Multi Single),
Maksudnya :
Jika anda CQ pada band 14200 lalu, anda pindah band pada 21250 ternyata hanya 2 stasiun DX yang logging tanpa multiplier, kemudian anda pindah band kembali ke 14200, maka anda harus menunggu 10 menit atau lebih. Jika tidak maka, dihitung MULTIMULTI.

Bagaimana cara mengulang-ulang CQ pada mode CW :
Caranya klik Config, kemudian klik CQ repeat, atau tekan Alt-R, untuk merubah durasinya maka, klik Config, lalu klik Set CQ repeat Time atau Control R, biasanya untuk kontes durasinya adalah 1.3 kemudian klik OK.

Fungsi-fungsi pada Window :
Available mult’s & Q’s, Jika anda mempunyai Internet 24 Jam, maka anda dapat melihat stasiun-stasiun DX mana pada band 160m,80m,40m,20m,15m dan 10m yang belum anda hubungi terutama untuk multiplier dan QSOnya

Band map, digunakan jika anda mempunyai internet 24 jam, maka akan terlihat bahwa pada band yang kita operasikan akan terlihat stasiun-stasiun DX yang sedang CQ, misal : jika kita beroperasi di band 21 Mhz kita akan melihat siapa saja yang CQ di band tersebut dstnya.

Check, digunakan apabila kita belum mengetahui callsign stasiun DX oleh karena QRM, QRN dsbnya, maka kita bisa melihat pada check kira-kira callsign mana yang sedang menghubungi kita.

CW key, digunakan untuk mode CW pada suatu kontes. Jika kita ketik di keyboard pada blok CW Key maka N1mm Akan mengirim CW sesuai ketikan kita.

Digital interface, digunakan apabila kita mengikuti kontes digital berupa RTTY atau PSK-31 (namun sebelumnya harus di setting terlebih dahulu).

Entry window, N1MM kontes logger yang akan digunakan atau main menu.

Grayline, berguna pada pengoperasian low band (160m,80m,dan 40m). Akan terlihat secara real time, pergerakan matahari dari kiri kekanan mengikuti perubahan waktu di computer. Terlihat ada warna redup sebagian, menandakan bahwa sudah malam dan sangat baik beroperasi DX pada saat itu terutama pada low band

Info, berguna jika kita ingin mengetahui rata-rata QSO selama 10 menit, 1 jam dsbnya termasuk timer 10 menit pada category multi one,multi two atau multi-multi. Log, beguna jika kita ingin mengetahui logsheet kita secara menyeluruh, disana akan diberitahu point, multiplier, tanggal, jam UTC dan mode.

Multipliers, berguna jika kita ingin mengetahui stasiun-stasiun DX mana yang sudah kita hubungi, disamping itu kita juga bisa melihat CQ zone, Counttry dan Sect (USA states dll).

Packet, apabila kita mempunyai Internet 24 jam, maka packet digunakan untuk kita me spot stasiun DX dan atau kta sendiri pada band-band tertentu pada DX Cluster (Spot maksudnya, kita memberitahukan bahwa pada callsign stasiun DX bekerja pada band frekwensi sekian.

Score summary, maksudnya apabila kita ingin mengetahui berapa scores kita terakhir, berapa point kita, berapa multiplier kita yang diperoleh dan berapa QSOs stasiun DX yang sudah di hubungi.

Fungsi-fungsi pada Config :
Configure ports, telnet Address, other, maksudnya apabila kita ingin mengoperasikan CW dan digital communication, maka harus disetting melalui configurasi ini. Apabila kita ingin dengan mode :

Mode CW maka, pada konfigurasinya adalah klik Hardware, kemudian klik LPT-1 lalu klik OK. Maka kita dapat mengoperasikan Mode CW namun, harus disediakan CW Coupler terlebih dahulu, Skemanya adalah sbb :
Perhatikan, Jika kita menggunakan LPT-1 maka skemanya ada di bawah ini :

Mode RTTY, adalah sebagai berikut : Masih pada klik Config kemudian klik Configure ports, telnet Address, other, selanjutnya klik digital modes dan disana terlihat
Digital Interface 1 TU Type, klik carilah Soundcard. Kemudian lihat kebawah ada tulisan DI-1 MTTY path klik lah pada select/cari MTTY.exe (N1MM akan menassociate dengan program MTTY). Setelah itu kemudian lihat kembali ke atas dan cari hardware, klik pada blok digital dan di kanan klik SET. Pada SET tersebut perhatikan DTR (Pin 4) di ubah Always on dan pada RTS (Pin 7) diubah ke PTT. Setelah itu klik OK 2 kali. Setelah meng konfigurasi maka, langkah selanjutnya klik Window pada main menu N1MM. Lalu Klik Digital Interface, akan nampak Macro yang belum di set, dan Spectrum yang masih standard,
Mohon Lihat pada “Tatacara Setting Konfigurasi N1MM Contest Logger” khususnya cara pembuatan Macro pada PDF file **

Merubah File logsheet N1MM anda ke ADIF File adalah sebagai berikut : Mohon Lihat pada “Tatacara Setting Konfigurasi N1MM Contest Logger” khususnya cara pembuatan Macro pada PDF file **

Mengirim Logsheet setelah kontes :
Caranya adalah klik File, kemudian klik Export lihat disana ada tulisan Export cabrillo to file…. Klik Ok, kemudian tunggu sampai keluar kalimat Check your sent Exchanged, kemudian keluar kalimat Choose a file, masukkan callsign anda pada file name dan pilih Save in pada desktop (maksudnya agar mudah mencari logsheet anda) klik Save, maka N1mm Contest logger akan merekalkulasi terlebih dahulu Contest logsheet anda dan jika selesai klik OK.
Akhirnya cabrillo file contes logsheet anda sudah jadi, dan siap dikirim melalui email kepada panitia kontes.
Jakarta 06 Agustus 2006

http://www.cqwwrtty.com/CQWWRTTY_Rules_2012.pdf

The 2012 CQ WW RTTY DX Contests
RTTY: September 29–30, 2012
Starts 0000 GMT Saturday Ends 2400 GMT Sunday

I. OBJECTIVE: For amateurs around the world to contact other amateurs in as many zones, countries, US states and VE areas as possible.

II. BANDS: Five bands only: 3.5, 7, 14,21, and 28 MHz.

III. TYPE OF COMPETITION (choose only one):
For all categories:
1. All entrants must operate within the limits of their chosen category when per- forming any activity that could impact their submitted score.
2. You must not exceed the total output power limitation of your chosen category. Total output power on any band at any time is measured at the output of the active amplifier.
3. Operating location: All transmitters and receivers used by the entrant must be located within a single 500-meter diame- ter circle or within the property limits of the station licensee’s address, whichever is greater.
4. All antennas used by the entrant must be physically connected by wires to the transmitters and receivers used by the entrant.
5. Only the entrant’s call sign may be used to aid the entrant’s score.
6. A different call sign must be used for each CQ WW RTTY entry.
7. An entrant’s remote station is deter- mined by the physical location of the transmitters, receivers, and antennas. A remote station must obey all station and category limitations of Rule III.
8. A competitor who wishes to be judged for a top score in their category must agree to a potential visitation at any time during the contest by an observer appointed by the CQ WW Contest Committee (CQ WW CC). Failure of the entrant to respond to our correspondence or to allow a CQ WW CC observer full access to the contest QTH during the full contest may result in the competitor being removed from award eligibility for 3 years.
9. Self-spotting or asking to be spotted is not allowed.
10. Only one signal on a band is allowed at any time.
11. Remote receivers outside the limi- tations of Rule III.3 are not allowed. The only exception is public remote skimmers which are allowed for the Multi-Operator and Assisted categories.
12. When two or more transmitters are present on a band, a hardware device MUST be used to prevent more than one signal at any one time; interlock king two or more transmitters on a band with alternating CQs (soliciting contacts) is not allowed.
13. Only Baudot mode is permitted.

A. Single Operator (All-Band or Single-Band): only one person (the entrant) can contribute to the final score during the official contest period. Call sign alerting assistance of any kind places the entrant in one of the Single Operator Assisted categories. For all single opera- tor categories, all-band or single-band, only one signal

is allowed at any time; for the all-band category the operator can change bands at any time.
1. Single Operator: QSO alerting assistance of any kind is not allowed.
a. Single Operator High (SOAB High or SOSB High): Total output power must not exceed 1500 watts on any band at any time.
b. Single Operator Low (SOAB Low or SOSB Low): Total output power must not exceed 100 watts on any band at any time.
c. Single Operator QRP (SOAB QRP or SOSB QRP): Total output power must not exceed 5 watts on any band at any time.
2. Single Operator Assisted: Any public QSO alerting assistance is allowed for all assisted categories. This includes, but is not limited to, DX Cluster-type net- works, local or remote Skimmer and/or Skimmer-like technology and reverse beacon network. A local Skimmer is one obeying Rule III.3.
a. Single Operator High Assisted (SOAAB High or SOASB High): Total output power must not exceed 1500 watts on any band at any time.
b. Single Operator Low Assisted (SOAAB Low or SOASB Low): Total out- put power must not exceed 100 watts on any band at any time.
c. Single Operator QRP Assisted (SOAAB QRP or SOASB QRP): Total output power must not exceed 5 watts on any band at any time.

B. Multi-Operator (all band operation only): any public QSO spotting help is allowed. Any number of operators is allowed. Total output power must not exceed 1500 watts on any band at any time.
1. Single Transmitter: Only one trans- mitter may be used and it may make a maximum of 8 band changes in any clock hour (run transmitter). Exception: One and only one—other transmitter may be used—if and only if—the station worked is a new multiplier (multiplier transmitter). The multiplier transmitter may also make a maximum of 8 band changes in any clock hour. The run and multiplier trans- mitters are governed by independent 8-band-change rules. A clock hour runs from 00 through 59 minutes. The multipli- er station cannot call CQ (solicit contacts). Logs found in violation of the 8-band- change rule may be reclassified as M2. If electronic logging is used (Cabrillo), for each QSO, the run transmitter or multipli- er transmitter must be indicated in the log. a. Single Transmitter High (MS High): Total output power must not exceed 1500
watts on any band at any time.
b. Single Transmitter Low (MS Low): Total output power must not exceed 100 watts on any band at any time.
2. Two Transmitters (M2): A maxi- mum of two transmitted signals at any time on two different bands. Both trans- mitters may work any station. A station may only be worked once per band regardless of which transmitter is used. The log must indicate which transmitter made each QSO. Each transmitter may make a maximum of 8 band changes in any clock hour.
3. Multi-Transmitter (MM): No limit to the number of transmitters or operators. Five bands may be activated simultaneously.

IV. NUMBER EXCHANGE: RST report plus zone (i.e., 59905). US and VE sta- tions also send US state or VE area (i.e.,59905 MA, see V. MULTIPLIER below.)

V. MULTIPLIER: Three types of multipli- er will be used.
1. A multiplier of one (1) for each dif- ferent zone contacted on each band.
2. A multiplier of one (1) for each dif- ferent country contacted on each band. Stations are permitted to contact their own country and zone for multiplier credit. The Worked All Zones written rules, DXCC country list, WAE country list and IG9/IH9, and WAC boundaries

are standards. Maritime mobile stations count only for a zone multiplier.
3. A multiplier of one (1) for each dif- ferent US “lower-48” state and VE area contacted on each band. Stations are per- mitted to contact their own US state or VE area for multiplier credit. One multiplier for each US state (48) and each Canadian area (14) on each band. Please use only official U.S. Postal Service abbreviations to identify states (e.g., Michigan = MI; Massachusetts = MA, Ohio = OH). Note: The District of Columbia counts as Maryland (MD); Alaska (KL7) and Hawaii (KH6) are counted as country multipliers only and not as state multipliers. Canadian areas (14 total) are as follows: NB (VE1, 9), NS (VE1), QC (VE2), ON (VE3), MB (VE4), SK (VE5), AB (VE6), BC (VE7), NWT (VE8), NF (VO1), LB (VO2), NU (VYØ), YT (VY1), PEI (VY2).

VI. POINTS:
1. Contacts between stations on differ- ent continents are worth three (3) points.
2. Contacts between stations on the same continent but different countries, two (2) points.
3. Contacts between stations in the same country, one (1) point.

VII. SCORING: All stations: the final score is the result of the total QSO points multiplied by the sum of your zone, country and US state/VE area multipliers. Example: 1000 QSO points ´ 100 multi- plier (30 Zones + 35 Countries + 35 States/Areas) = 100,000 (final score).

VIII. AWARDS: First place certificates will be awarded in each category listed under Section III in every participating country and in each call area of the United States, Canada, Russia, Spain and Japan. All scores will be published. To be eligible for an award, a Single-Operator station must show a minimum of 12 hours of operation. Multi-operator stations must operate a minimum of 24 hours. A single-band log is eligible for a single-band award only. If a log contains more than one band it will be judged as an all-band entry, unless oth- erwise specified. In countries or call areas where the returns justify, 2nd and 3rd place awards may be made. All certifi- cates/plaques will be issued to the licensee of the station used.

IX. TROPHIES and PLAQUES: Plaques and trophies are awarded for top perfor- mance in a number of categories. They are sponsored by individuals and organiza- tions. For a current list of plaques and sponsors, or to learn how to become a sponsor, see the CQ WW RTTY website:
<http://www.cqwwrtty.com>. A station win- ning a World trophy will not be considered for a sub-area award; the trophy will be awarded to the runner-up in that area.

X. CLUB COMPETITON:
1. The club must be a local group and not a national organization.
2. Participation is limited to members operating within a local geographic area defined as within a 275 km radius from the center of club area (except for DX- peditions conducted by members living within the defined club geographic area). Club contributions from DXpedition scores are a percentage of the number of club members on the DXpedition.
3. To be listed, a minimum of 3 logs must be received from a club, and a club officer must submit a list of eligible mem- bers to the Contest Director.

XI. LOG INSTRUCTIONS:
1. All times must be in UTC.
2. All sent and receive exchanges are to be logged.
3. If submitting a paper log, you must indicate zone, country and US/VE multi- pliers the FIRST TIME worked on each band. This is not required for electronic Cabrillo log submissions.

4. Electronic log submission: We want your electronic log. The Committee requires an electronic log for any possible high-scoring log. By submitting a log to the CQ WW RTTY Contest, the entrant agrees to have the log open to the public. If possible, we would appreciate complete frequencies in the log. E-mail Required Content: Please submit your log in the Cabrillo file format created by all major logging programs. Be sure to put the STA- TION CALL SIGN in the “Subject:” line of each message. Your e-mail log will auto- matically be acknowledged by the server. Electronic submission implies a signed declaration that all contest rules and reg- ulations for amateur radio in the country of operation have been observed. Submit your CQ WW RTTY log to <rtty@cqww. com>.
5. Paper log submission: Use a sepa- rate log sheet for each band. Each paper log entry MUST be accompanied by a summary sheet showing all scoring infor- mation, category of competition, and con- testant’s name and address in BLOCK LETTERS. Sample log and summary sheets are available on the CQ website,
<www.cq-amateur-radio.com>. If official forms are not available, make up your own, 80 contacts to the page on 8-1/2" ´
11" paper or European A4. All paper log entrants are required to submit cross- check sheets (an alphabetical list of calls worked) for each band on which 200 or more QSOs were made.
6. Bad QSO: The bad QSO is removed and a penalty of three more equivalent QSOs is applied to the points only.
7. QRP and Low Power stations must indicate their category on their summary sheets and state the actual maximum power output used in the comment sec- tion of their Cabrillo submission.

XII. ACTIONS OF THE CQ WW RTTY CC: Violation of the rules of the contest makes the entrant subject to either a red or yellow card, a warning letter, or log rejection at the discretion of the CQ WW RTTY Contest Committee.
A. YELLOW card: One Yellow card: entrant not eligible for an award in the entered contest. An entrant or operator issued a yellow card will be listed at the end of the published results. Two Yellow cards: An entrant receiving two yellow cards in three consecutive CQ WW RTTY contests is a Red card.
B. RED card: One Red card: entrant not eligible for an award in the entered contest. Entrants receiving a red card will be listed at the end of the published results. An entrant or operator receiving a red card will be ineligible for any CQ- sponsored contest award for a period of one year beginning with the publication of the violation in CQ magazine. Two Red cards: An entry or operator receiving two Red cards within five consecutive CQ WW RTTY contests will be ineligible for any CQ-sponsored contest award for a period of three years beginning the month of publication of the second viola- tion in CQ magazine. If the entrant is in a multi-operator category, all listed oper- ators are so affected.
Further CQ WW RTTY CC actions:
1. The entrant agrees that the CQ WW RTTY CC reserves the right to reject any entry for non-compliance with the rules.
2. Unsportsmanlike conduct can be grounds for either a Red or Yellow card at the discretion of the CQ WW RTTY CC. Unsportsmanlike conduct includes but is not limited to violation of the CQ WW RTTY rules, ANY use by an entrant of any non-amateur means during the contest including, but not limited to, telephones, Internet, instant messaging, chat rooms, VoIP, or the use of any DX cluster/reflec- tor to SOLICIT, ARRANGE, or CONFIRM any contacts during the contest. Unsportsmanlike conduct also includes out of band transmissions by the entrant.
3. Taking credit for excessive unverifi- able QSOs or unverifiable multipliers may result

in a yellow or red card at the dis- cretion of the CQ WW RTTY CC.
4. An entrant is free to withdraw his/her submitted log for any reason prior to receiving an official letter from the CQ WW RTTY CC. The log will then be handled per the entrant's request. If after receiv- ing an official letter from the CQ WW RTTY CC an entrant chooses to withdraw their log, the entrant's call will be listed at the end of the results showing their log as having been withdrawn.
5. By submitting a CQ WW RTTY Contest log, an entrant agrees that the issuing of Red cards, Yellow cards, and other decisions of the CQ WW RTTY CC are official and final.
6. A card penalty given to an entrant will be honored by all CQ sponsored contests, the EUHFC, the SCC RTTY Cham- pionship and the JIDXC.

XIII. DEADLINE:
1. All entries must be sent NO LATER than 15 October 2012.
2. An extension of up to one month may be given if requested by e-mail to <w0yk@...>. The granted extension must be confirmed by the Contest Director, must state a legitimate reason, and the request must be received before the log mailing deadline. Logs postmarked after the extension deadline may be listed in the results but will be declared ineligible for an award. All paper logs should be sent to Ed Muns, WØYK, POB 1877, Los Gatos, CA 95031-1877, USA.

OM An,

Bisa anda unduh sndr dr http://issuu.com/e-qsp ...(pse Cntrl+Click to follow link), atau anda sebut edisi mana aja yang anda perlukan, nanti sy kirim langsung ke japri anda (mngkn harus dicicil, krn rata-rata file tiap edisi makan memory >700 Kb), dan sekalian nama/alamat imil anda sy masukkan dlm Distribution List, OK !?

73,

[bam]

e-QSP Ed.

SB DX @ ARL $ARLD037
ARLD037 DX news

ZCZC AE37
QST de W1AW
DX Bulletin 37 ARLD037
From ARRL Headquarters
Newington CT September 6, 2012
To all radio amateurs

SB DX ARL ARLD037
ARLD037 DX news

This week's bulletin was made possible with information provided by NC1L, The Weekly DX, the OPDX Bulletin, 425 DX News, The Daily DX, DXNL, Contest Corral from QST and the ARRL Contest Calendar and WA7BNM web sites. Thanks to all.

MAURITIUS, 3B8. Alex, IW5ELA is QRV as 3B8/IW5ELA until September 12. Activity is on the HF bands using mostly CW. QSL to home call.

CROATIA, 9A. Jan, PA4JJ is QRV as 9A/PA4JJ from Pores until September 12. Activity is holiday style using RTTY and PSK31 on the HF bands. QSL to home call.

ZAMBIA, 9J. Shinichi, JA7SGV is QRV as 9J2JA. His length of stay is unknown. Activity of late has been on 30, 20, 17 and 15 meters using CW. QSL to home call.

MADEIRA ISLANDS, CT3. Matthias, DJ8OG will be QRV as CR3L in the Worked All Europe SSB DX contest as a Single Op/High Power entry. QSL via DJ6QT.

NIUE, E6. Lance, W7GJ and Bob, ZL1RS are QRV as E6M and E6RS, respectively, until September 21. This is primarily an EME operation, with activity on 6 and 2 meters. They may be active on other bands as well. QSL to home calls.

BALEARIC ISLANDS, EA6. Alessandro, IZ4WNA and Giuliano, IZ4WNP are QRV as EA6/home calls from Ibiza, IOTA EU-004, until September 10. They plan to visit other islands as well. Activity is on 80, 40, 20, 15 and 10 meters using SSB and PSK63. QSL both calls via IZ4WNA.

HUNGARY, HA. Members of the Puskas Tivadar Radio Amateur Club are QRV as HG1912PTTT from Budapest until September 30 in celebration of the 100th anniversary of the Puskas Tivadar Telecommunications

Technical High School. Activity is on the HF bands using CW, SSB and various digital modes. QSL via HA5AUC.

SARDINIA, IS0. Riccardo, IZ5JMX is QRV as IM0/IZ5JMX from San Pietro Island, IOTA EU-165, until September 14 while on holiday. Activity is on 40 to 10 meters using SSB. QSL to home call.

MARIANA ISLANDS, KH0. Mike, JA6EGL and Yu, JE6DND are QRV as KK6WW/KH0 and KH0R, respectively, until September 9. Activity is on 30 to 10 meters using CW and SSB. QSL direct to home calls.

SWAINS ISLAND, KH8. A large group of operators are QRV as NH8S until September 19. Activity is on 160 to 6 meters, including 60 meters, using CW, SSB and RTTY with seven stations active around the clock. QSL direct to AA4NN.

BELGIUM, ON. Members of the Groupement De Verviers will be QRV on September 8 and 9 using special event station ON4USA to commemorate the 68th anniversary of the liberation of Verviers. Activity is on 40, 20, 15, 10 and 6 meters using SSB and PSK. QSL via ON4GDV.

CRETE, SV9. Silvia, EA1AP and Alberto, EA1SA will be QRV as SV9/home calls from September 9 to 15. Activity will be on 80 to 6 meters using CW, SSB and RTTY. QSL to home calls.

ASIATIC RUSSIA, UA0. Vladimir, RV3EFH/0 is QRV from Bolshevik Island, IOTA AS-042, during the month of September. QSL to home call.

MARSHALL ISLANDS, V7. Rick, WH0AI is QRV as V73AX from the Kwajalein Amateur Radio club station on Kwajalein, IOTA OC-028. He has applied for the call sign V73AI. Activity has been on 20, 15 and 10 meters using CW and SSB. QSL direct to home call.

ALBANIA, ZA. Franta, OK1HH and Bob, OK2BOB will be QRV as ZA/home calls from September 12 to 20. Activity will be on 160 to 6 meters using CW and SSB. QSL to home calls.

THIS WEEKEND ON THE RADIO. The ARRL September VHF QSO Party, North American CW Sprint, Brazil Independence Day BPSK31 CDX Contest, NCCC Sprint CW Ladder, QCWA Fall QSO Party, PODXS 070 Club Jay Hudak Memorial 80-Meter Sprint, G3ZQS Memorial Straight Key CW Contest, Worked All Europe SSB DX Contest, Kulikovo Polye CW Contest, IARU Region 1 ATV Contest, North American Summits on the Air, Arkansas QSO Party, Ohio State Parks on the Air and the SKCC Weekend CW Sprintathon will certainly keep contesters busy this weekend. The NAQCC-EU Monthly CW Sprint is scheduled for September 10. The CWops Mini-CWT CW Test is scheduled for September 12. Please see September QST, page 79 and the ARRL and WA7BNM Contest websites for details.

Alhamdulillah hari ini sudah muncul di lognya = WORKED.
Cukup dan cuma bisa di 10M/15M - kalo YB1AR sudaH 6 slots.

Saat ini 09/09/2012 - 02.33 UTC QRV di 28.485MHz (10M) 5/9 cukup jelas terdengar.

73 gud dx

Om Hendra :
Menurut Kep-065/OP/KU/2009 , untuk penggalang di 14MHz adalah di 14.000 sd 14.150 :
     CW : 14.000 sd 14.150
     DATA: 14.101 sd 14.112
     SSB : 14.112 sd 14.150
kalau rame atau tidaknya , beta tidak tau....

OM Hen,

Besok (minggu) ngana pi aja ke pasar loak di Jl. Jatinegara Timur (pindahan dr SOGO jongkok sepanjang lapangan Urip Sumoharjo depan Psr Jatinegara), +/- 50 mtr masuk dr jl. Jatinegara Timur II, 'nglewati jembatan kecil belok kanan ketemu Mesjid ... di depan Mesjid situ ada lapak p. Haji yg jual joran pancing fiber glass sampe sepanjang 9 mtr.

Beli 2 batang yg 6 meteran (bahan/batangnya aja, TANPA kerekan, ring utk "rel" senar dsb.). Sampe di rumah potong +/- 1 – 1.5 mtr ujungnya -- yg terlalu kecil utk dipake ngebahan elemen antena.

Untuk sebelah sayap Dipole 20m perlu +/- 5 mtr, so kalo' kurang panjang sambung PANGKAL-nya dg pipa PVC.

Tinggal terpasrah sm "ur own ingenuity" utk bikin element-to-boom mounting bracketnya (ato pulang dr beli joran mampir ke Sinarwaja di Psr Kenari, kaya'nya si Ayung masih ada "stok" barang gituan – ato habis baca imil ini silah LL OM Taufan yb0ai yg sbg "sesama alumni" tentu dg enteng akan nawarin dr "stok" bliao ;-)

Dg bahan semua lengkap (pake aja kabel monster 2x50 utk ngebahan elemen, dan pipa PVC 1.5" buat Boom), paling juga perlu 1/2 hari buat 'ngrakit 3-ele Yagi, Dick Bird G4ZU's style ...(malam ini beta cuba menelusuri di folder mana orek-orekan beta ttg ini tersimpan, otherwise silah tanya uncle Google dg kata kunci "G4ZU".

Dg konfigurasi paling sederhana (dr atas terlihat spt <|>) paling nggak Gain 7-8 dBd sudah terbayang ;-)

OM Hen,

Terlampir yg sdh ketemu, tp utk band 15m (tinggal scale up aja ukuran-ukuran utk di 20m, kan !?)

Utk spacing antar elemen “mainin” aja antara 0.18- 0.2λ utk ‘ndapatkan kompromi optimal antara Frwd Gain +/- 8 dBd dan FB Ratio +/- 25 dB (not bad, eh?)

OM Bambang,
Terima kasih utk idenya ini, setelah saya baca2 - seingat saya catatan ini pernah saya dapat juga dari OM Bambang, malahan juga sudah saya cetak - karna buat saya lebih mudah baca dari kertas ketimbang di layar pc.

Saya mau kumpulkan dulu contoh2/ide2 utk antena 20M ini untuk nanti sepulang dari Lombok coba membuatnya.

73 es tnx

OM Bambang,
Hari minggu ini kita nyanda bisa pi ka mana2.
Pagi, kita pe kawan bikin pesta perkawinan anaknya di Cawang, siang harus siapkan logistik dll utk besok ke Lombok.

Kita akan pertimbangkan mengingat kemungkinan besar ini akan terpisah dari antena yg sudah ada : 4 el. Yagi 15M dan 4 el. Deltaloop 10M - pada satu boom yang ada.
Jadi jangan sampe mereka/antenna baku pegang.

Eh, OM Bambang - kalo pake istilah "kita" beda di Sulut dan Sulsel lho, itu bahasa daerah bukan bahasa Indonesia. HI.

Bah. Indonesia : KITA = you & me
Bah. Manado   : KITA = me

Bah. Makassar : KITA = you

Om Hen YC0QR,

Band 20 m

14.000 - 14.350 MHz CW
14.070 - 14.099 MHz Data
14.100 MHz International Beacon Frequency Note C
14.101 - 14.112 MHz Data
14.112 - 14.350 MHz SSB
14.230 - 14.235 MHz SSTV
14.300 MHz Center of Activity for Emergency Note E

Band ini untuk tingkat Penggalang dan Penegak
Khusus untuk tingkat Penggalang hanya dibenarkan menggunakan segmen 14.000 – 14.150 MHz

OM Hen,

G4ZU MUDAH sekali di modify utk jadi multi-element-multi-bander.

Pd DE (yg aslinya berbentuk Dipole) anda ganti ele-to-boom mounting bracketnya dg T-doos 4-cabang dr Clipsal, terus anda “bobok” “rumah”nya spy bisa dimasukin Boom.

Cabang yg horizontal buat nge-mount ele. 20m, sedang cabang yg vertical dipake untuk nge-mount spreader (gampangnya pake aja conduit merk Clipsal jg).

Barangkali dr sini sdh kebayang: DE utk 15 dan 10m adalah 2 bh QuadLoop yg di mount di “common” spreader, dan konfigurasi akhir antena anda adalah sebuah multiband QUAGI.

Krn anda sdh punya jam terbang cukup utk mengumpan “masing-masing” antena dg “masing-masing” feeder, rasanya nggak bakal ada masalah serious di soal pengumpanan ini.

Dan, krn Quagi ini pada dasarnya adalah sebuah wire-antenna -- masalah beban, hambatan angin dsb -- so pasti jauh lbh ringan dan mudah utk ditangani ketimbang 4-ele Yagi anda yg menganut madzab “plumbers’ delight” itu (all Alu. tubing construction)

Utk lbh meng-encourage anda, sekedar mengingatkan bhw Quagi basically is a 3-ele Beam, ketimbang wire-beam lain (misalnya) MOXON, X-beam dan Spider Web yang hanya meng-compress 2 ele-Yagi.

Kalo’ mau nambahin DIR utk nambahin Gain jg bukan masalah sulit, cuma aja anda pikir-pikir dulu apakah “hasil yg didapat” akan cukup sebanding dg “upaya (dan kerepotan) yg dikeluarkan” ... dengan merujuk pd hukum Malthus “the law of diminishing return” yg dalam hal ini bisa ditafsirkan: penambahan DIR sesudah DIR-3 tidak akan memberikan penambahan Gain yg signifikan, atau yg seimbang dg kerepotan yg sudah dilakukan (baca lagi blah-blah-blah ttg antena Quagi di e-QSP Vol II.1 AUG 2012)

BTW, hv a nice Lombok trip, es BON VOYAGE ...

[bam]

OM Bambang,

Hari minggu ini kita nyanda bisa pi ka mana2.

Pagi, kita pe kawan bikin pesta perkawinan anaknya di Cawang, siang harus siapkan logistik dll utk besok ke Lombok.

Kita akan pertimbangkan mengingat kemungkinan besar ini akan terpisah dari antena yg sudah ada : 4 el. Yagi 15M dan 4 el. Deltaloop 10M - pada satu boom yang ada.

Jadi jangan sampe mereka/antenna baku pegang.

Eh, OM Bambang - kalo pake istilah "kita" beda di Sulut dan Sulsel lho, itu bahasa daerah bukan bahasa Indonesia. HI.

Bah. Indonesia : KITA = you & me

Bah. Manado : KITA = me

Bah. Makassar : KITA = you

Judul: RE: [YBDXC_News] 20M

OM Hen,

Besok (minggu) ngana pi aja ke pasar loak di Jl. Jatinegara Timur (pindahan dr SOGO jongkok sepanjang lapangan Urip Sumoharjo depan Psr Jatinegara), +/- 50 mtr masuk dr jl. Jatinegara Timur II, ‘nglewati jembatan kecil belok kanan ketemu Mesjid ... di depan Mesjid situ ada lapak p. Haji yg jual joran pancing fiber glass sampe sepanjang 9 mtr.

Beli 2 batang yg 6 meteran (bahan/batangnya aja, TANPA kerekan, ring utk “rel” senar dsbkaN LOGISTIK .). Sampe di rumah potong +/- 1 – 1.5 mtr ujungnya -- yg terlalu kecil utk dipake ngebahan elemen antena.

Untuk sebelah sayap Dipole 20m perlu +/- 5 mtr, so kalo’ kurang panjang sambung PANGKAL-nya dg pipa PVC.

Tinggal terpasrah sm “ur own ingenuity” utk bikin element-to-boom mounting bracketnya (ato pulang dr beli joran mampir ke Sinarwaja di Psr Kenari, kaya’nya si Ayung masih ada “stok” barang gituan – ato habis baca imil ini silah LL OM Taufan yb0ai yg sbg “sesama alumni” tentu dg enteng akan nawarin dr “stok” bliao ;-)

Dg bahan semua lengkap (pake aja kabel monster 2x50 utk ngebahan elemen, dan pipa PVC 1.5” buat Boom), paling juga perlu 1/2 hari buat ‘ngrakit 3-ele Yagi, Dick Bird G4ZU’s style ...(malam ini beta cuba menelusuri di folder mana orek-orekan beta ttg ini tersimpan, otherwise silah tanya uncle Google dg kata kunci “G4ZU”.

Dg konfigurasi paling sederhana (dr atas terlihat spt <|>) paling nggak Gain 7-8 dBd sudah terbayang ;-)

GL es 73,

[bam]

Cerita intermezzo waktu saya di makassar (bo'ongan lho).

Seorang teman wanita dari jakarta baru turun dari pesawat di bandara Makassar.
Langsung masuk taxi, baru jalan supir taxi dg halus bertanya : "Tidur dimana kita, Bu ?".
Si ibu ini marah, disangka supir kurang ajar.

Setelah dijelaskan bahwa di Makassar, KITA = ANDA - baru deh ngerti karena maksud sebenarnya si supir mau tanya Ibu ini mau nginap di hotel mana, karna begitu masuk taxi sibuk dg HPnya.

Lagian mbak Endang ini....!!?
3 suku bangsa : sapa aja ? Manado-Makassar..... satunya suku bangsa Indonesia ?
Xixixixixixixixi......

Mbak Endang, sorry.., saya tunggu YC0DQT blm ada konfirmasi saya jadi ikut bantuin YC0KBE naikin antena yaginya ke towernya.
Jadi gimana tadi - gimana sekarang..?

Cerita intermezzo waktu saya di makassar (bo'ongan lho).

Seorang teman wanita dari jakarta baru turun dari pesawat di bandara Makassar.
Langsung masuk taxi, baru jalan supir taxi dg halus bertanya : "Tidur dimana kita, Bu ?".
Si ibu ini marah, disangka supir kurang ajar.

Setelah dijelaskan bahwa di Makassar, KITA = ANDA - baru deh ngerti karena maksud sebenarnya si supir mau tanya Ibu ini mau nginap di hotel mana, karna begitu masuk taxi sibuk dg HPnya.

Lagian mbak Endang ini....!!?
3 suku bangsa : sapa aja ? Manado-Makassar..... satunya suku bangsa Indonesia ?
Xixixixixixixixi......

hen

Wah, bisa salah persepsi nih kalo 3 suku bangsa ngobrol bareng.

Bah. Indonesia : KITA = you & me
Bah. Manado   : KITA = me
Bah. Makassar : KITA = you

Sama seperti bhs sunda dan jawa, atos-nya sunda = sudah, jawa = keras.
Sunda, Amis = manis

Salam,

OM Bambang,
Hari minggu ini kita nyanda bisa pi ka mana2.
Pagi, kita pe kawan bikin pesta perkawinan anaknya di Cawang, siang harus siapkan logistik dll utk besok ke Lombok.

Kita akan pertimbangkan mengingat kemungkinan besar ini akan terpisah dari antena yg sudah ada : 4 el. Yagi 15M dan 4 el. Deltaloop 10M - pada satu boom yang ada.
Jadi jangan sampe mereka/antenna baku pegang.

Eh, OM Bambang - kalo pake istilah "kita" beda di Sulut dan Sulsel lho, itu bahasa daerah bukan bahasa Indonesia. HI.

Bah. Indonesia : KITA = you & me
Bah. Manado : KITA = me

Bah. Makassar : KITA = you

OM Hen,
Besok (minggu) ngana pi aja ke pasar loak di Jl. Jatinegara Timur (pindahan dr SOGO jongkok sepanjang lapangan Urip Sumoharjo depan Psr Jatinegara), +/- 50 mtr masuk dr jl. Jatinegara Timur II, ‘nglewati jembatan kecil belok kanan ketemu Mesjid ... di depan Mesjid situ ada lapak p. Haji yg jual joran pancing fiber glass sampe sepanjang 9 mtr.
Beli 2 batang yg 6 meteran (bahan/batangnya aja, TANPA kerekan, ring utk “rel” senar dsbkaN LOGISTIK .). Sampe di rumah potong +/- 1 – 1.5 mtr ujungnya -- yg terlalu kecil utk dipake ngebahan elemen antena.

Untuk sebelah sayap Dipole 20m perlu +/- 5 mtr, so kalo’ kurang panjang sambung PANGKAL-nya dg pipa PVC.
Tinggal terpasrah sm “ur own ingenuity” utk bikin element-to-boom mounting bracketnya (ato pulang dr beli joran mampir ke Sinarwaja di Psr Kenari, kaya’nya si Ayung masih ada “stok” barang gituan – ato habis baca imil ini silah LL OM Taufan yb0ai yg sbg “sesama alumni” tentu dg enteng akan nawarin dr “stok” bliao ;-)

Dg bahan semua lengkap (pake aja kabel monster 2x50 utk ngebahan elemen, dan pipa PVC 1.5” buat Boom), paling juga perlu 1/2 hari buat ‘ngrakit 3-ele Yagi, Dick Bird G4ZU’s style ...(malam ini beta cuba menelusuri di folder mana orek-orekan beta ttg ini tersimpan,

otherwise silah tanya uncle Google dg kata kunci “G4ZU”.
Dg konfigurasi paling sederhana (dr atas terlihat spt <|>) paling nggak Gain 7-8 dBd sudah terbayang ;-)

GL es 73,
[bam]
